# Come join us as we unfold the future of digital networks

**STLescope** 2021

Date: 1<sup>st</sup> July, 2021

Time: 17:30 to 19:30 IST

**Mihir Modi**  
Chief Finance Officer, STL

Hi,

When we met last year, the world was very different. We were beginning to explore the magic of technology and thought that far-reaching changes will happen sometime in the future. But now, here we are!

Now our lives are deeply integrated with technology and our digital networks have greatly evolved in terms of scale and architecture. This year is so much more action-packed. We are likely to crossover from 4G to 5G, from legacy to programmable, from wireless to converged.

This is a defining point in the evolution of digital networks. At STL, we believe that the future of networks will be built on four specialized technological confluences: wired and wireless, software and hardware, connectivity and computation, and open-source - all at the edge of the network. STL is beautifully bringing these shifts together to build future networks that will drive the world, going forward. With core capabilities in Optical Interconnect, Virtualized Access Solutions, Network Software, and System Integration, we are uniquely positioned to take the power of digital networks to the entire humanity.

We are very excited about this upcoming decade of network creation and it's with this thought that we invite you to this year's **STLescope** - our yearly Investor Meet so that we can together discuss the very bright future of digital networks. It's on 1 July, 5:30 PM IST. We hope to see you there!
