Natural gas prices may be cut to decade low of \$1.9; dent ONGC revenues

PRESS TRUST OF INDIA
New Delhi, August 16

PRICES OF NATURAL GAS in India are likely to be cut to \$1.9-1.94 (\$142.26-145.26) — the lowest in more than a decade — from October, denting revenues of producers such as ONGC who are already incurring huge losses on gas production.

Prices of natural gas, which is used to produce fertiliser and generate electricity and is also converted into CNG for use in automobiles as fuel and cooking gas for households, are set every six months — on April 1 and October 1 each year. Sources said the cut in prices would mean a widening of losses for India's top oil and gas producer ONGC. Oil and Natural Gas Corp (ONGC) had posted 24,272 crore loss on gas business in 2017-18, which is likely to widen to over 26,000 crore in the current fiscal (April 2020 to March 2021), they said.

A gas price revision is due from October 1 and going by the changes in the benchmark rate in gas exporting nations, the price is likely to be anywhere between \$1.90 and \$1.94 per million British thermal unit (mmbtu), sources privy to the development said.

FPIs invest ₹28,203 cr in August so far; turn net investor in debt after 5 months

PRESS TRUST OF INDIA
New Delhi, August 16

FOREIGN PORTFOLIO INVESTORS (FPI) remained net investors in Indian markets in the first half of August, pumping in ₹28,203 crore in debt and equities on net basis in the period, according to the depositories data.

Also, FPIs turned net investors in the debt segment in August after a gap of five months. Market experts attributed the inflows to better-than-expected corporate earnings and increasing global liquidity. Depositories data showed that a net sum of ₹26,147 crore was invested in equities and ₹2,056 crore in the debt segment by FPIs between Aug 3 and 14. This translated into a total 14.1% net investment of ₹28,203 crore in the debt segment over seas investors turned net investors after a gap of five months. Before this, FPIs had invested ₹4,734 crore in February. FPIs have been net buyers for two consecutive months prior to this. They invested ₹3,301 crore in July and ₹24,053 crore in June on net basis.

Himanshu Srivastava, associate director - manager research, Morningstar India, said, "A combination of global and domestic factors has resulted in huge net inflows from FPIs in Indian equities." He said the inflows have been excess liquidity available in the global markets with major central banks pushing aggressive stimulus measures to combat the coronavirus pandemic and support their dwindling economies. This surplus liquidity, due to the quantitative easing measures by developed economies, is finding its way into other markets with India too receiving its share and on the domestic front, better-than-expected corporate earnings have led to capital flows in Indian markets, Srivastava added.

Report: Demand for tech-enabled health care solutions rising due to Covid impact

PRESS TRUST OF INDIA
New Delhi, August 16

THE OUTBREAK OF Covid-19 has led to a change in consumer preferences and priorities as the focus now shifts towards the use of technology and contact-less health care, a report by consultancy services firm Deloitte India said.

Civil defence members and counsellors work at the Covid-19 district surveillance and telemedicine hub at a school in New Delhi.

Home health care has taken prominence as consumer receptiveness towards out-of-hospital, at-home services across the care continuum - consultation, diagnosis, and in-patient care has shot up, it added.

The report, "Changing consumer preferences towards healthcare services: The impact of COVID-19", said social distancing and a fear-led mindset have resulted in consumers preferring online consultations over in-person interactions. "Consumers are increasingly preferring to have their health care needs met remotely or from the comfort and safety of their homes. They expect their health care service providers to prioritise adherence to safety protocols," the report noted.

The demand for telemedicine services is expected to continue, driven by an increasing first four months of the current financial year also dipped 56.5% to \$65.32 million (\$5,185 crore). The decline in gold and silver imports has helped in narrowing the country's trade deficit, difference between imports and exports, to \$13.95 billion during April-July 2020-21, against \$59.4 billion in the year ago period.

Gold imports have been recording a negative growth since December last year. The fall in March, April, May and June was to 1.2%, 99.93%, 98.4% and 77.5%, respectively.
