Dear Sir,

Sub : Disclosure of Material Impact on Business and Operations due to outbreak of
COVID-19

Pursuant to Circular No:SEBI/HO/CFD/CMD1/CIR/P/2020/84 dated 20th May, 2020,
issued by SEBI, we enclose the details with regard to material impact on the business
and operations of the Company due to outbreak of COVID-19.

Kindly take the same on record.

Thanking you

Yours faithfully
For Ramco Industries Limited

S. Balamurugasundaram
Company Secretary and Legal Head

Encl. : as above

Impact of the COVID-19 pandemic on the business

Due to the outbreak of COVID-19 and the lockdown announced by Government of India and state Governments, the Company's manufacturing facilities spread across eight states and one Union Territory had to be temporarily suspended. Because of this, our despatches were affected and this had affected the sales and had an impact on the revenues. However, this was not materially significant for the financial year 2019-2020, as the lock down was announced in the later part of March 2020.

Ability to maintain operations including the factories/units/office, Schedule for Restarting of Operations and Steps taken to ensure smooth functioning

After getting permissions on the resumption of operations from the authorities concerned, the Company resumed its operations in a phased manner ensuring all the safety and sanitisation measures, including adhering of social distancing, etc. The lockdown is continuing in 2020-2021 with various restrictions / relaxations across different states and the Company is carrying on its operations, subject to such restrictions and relaxations.

For the employees at non-factory locations, viz. Corporate Office and Sales Offices, the Company had enabled "Work from Home", ensured daily operations and business continuity. The employees also adopted for a smooth transition for the new way of working.

The employees who are attending office for critical tasks, have been advised to follow safety precautions, like non-usage of air-conditioners in the office, mandatory wearing of face mask, regular use of hand sanitiser, maintaining social distancing in the work place, etc. The safety measures that are being followed by us are in line with the Standard Operating Procedure announced by the Ministry of Home Affairs, Government of India.

Estimation of the future impact of COVID-19 on its operations

The Company expects the demand for Building products to get back to its normal levels, based on further relaxations that would be announced by the Central and State Governments, in the future and is also dependant on how quickly construction industry comes back to normalcy. Projects and Infrastructure segments face huge challenges due to non-availability of workers, logistics constraints, uncertainties in imports and stress in the financial sector. Availability of labour including return of migrant labour would be the key. Demand for Textiles product would depend upon on overall improvement in the Indian economy as well as opening up on international trade. The Company is optimistic of reaching its earlier normal levels, in the medium to long term, when the restrictions are gradually lifted.

Wherever relaxations are in, economic activities have started resuming. However, the estimation of the future impact of COVID-19 could not be predicted and quantified at this juncture, as we still continue to bear the brunt of the outbreak.

Impact of COVID-19 on the Company's capital and financial resources, profitability, liquidity position, ability to service debt and other financing arrangements, assets, internal financial reporting and control, supply chain, demand for its products/services.

The Company's capital and financial resources are well protected though there is an impact on its sales. The lower sales would have a bearing on the Company's profitability. The liquidity position of the Company continues to be satisfactory. The Company has been servicing its debt obligations as per schedule on the due dates. The Company did not avail any moratorium extended by the Banks, as per the Reserve Bank of India's guidelines. The Company has sufficient liquidity / financial arrangements for the continuity of its business operations. The Company is confident of its ability to serve its debt and other obligations in future as well.

As per our assessment, there could be a significant impact on the revenue and profitability in first half of 2020-2021, as our operations were temporarily suspended.

The Company expects to recover the carrying amount of inventories, trade receivables and other financial/non-financial assets.

The Company has got adequate Internal Financial Controls by means of Policies and Procedures commensurate with the size & nature of its operations and pertaining to financial reporting.

The Company's supply chain had got affected due to outbreak of COVID-19. However, after the announcements of relaxations and as the manufacturing facilities are located in the rural areas, where the Covid spread is not as rampant as in urban areas, the Company's supply chain, for both inward and outward goods are gradually improving.

The Company is carrying sufficient inventories across all its plants to meet the production requirements. The Company's suppliers and service providers have long-term relationship with the Company and have assured to extend their full co-operation with regard to their commitments on priority basis.

Existing contracts/agreements

The Company does not have any material risk of non-fulfilment of obligations by any party arising out of existing contracts/agreements. However, the Company's capital expenditure programmes are being reviewed and will be implemented based on exigencies.
