Dear Sirs,

Sub:Update on Waste Heat Recovery Plants

The Waste Heat Recovery System (WHRS) captures the waste heat available from the preheater exhaust gas and the clinker cooler exhaust gas of cement kilns and the said heat is used to generate electrical energy, by adopting technologies which are latest in the industry.

We have invested in the WHRS for power generation in all the three lines of our Jayanthipuram Plant. The last leg of the preheater was commissioned on 16-04-2022. With this, the WHRS has been fully commissioned at our Jayanthipuram plant. The capacity of WHRS at Jayanthipuram is 27 MW.

Further, we are set to commission Company's 5th integrated cement plant at Kolumigundla, Kurnool District, Andhra Pradesh together with 12.15 MW of WHRS. The overall capacity of Company's WHRS will increase to 39.15 MW.

Inclusive of the wind energy being wheeled for the company's production, we will be meeting 71% of power required for the clinker production through Green Energy.

Thanking you,

Yours faithfully,
For **THE RAMCO CEMENTS LIMITED,**

K.Selvanayagam
