PRESS RELEASE

Tata Communications IZO™ Multi Cloud Connect reimagines connectivity, enhances user experience

Provides a single window, end-to-end solution for on-demand, real-time, reliable, and scalable multi cloud connectivity | Brings fast, seamless, intelligent connectivity for next-gen global enterprises

Mumbai, INDIA – 03rd August 2023 – [Tata Communications](#), a global digital ecosystem enabler, today reimagines connectivity by announcing new features in its IZO™ Multi Cloud Connect solution to integrate multiple clouds instantly, seamlessly and with flexibility. It is empowering enterprises with speed and intelligence by enabling next-gen digital businesses to get ready with an end-to-end, on-demand, real-time, reliable, and scalable multi cloud connectivity. These enterprises also get real time provisioning, pay-as-you-go usage-based billing and enhanced performance.

Through a single window, Tata Communications IZO Multi Cloud Connect offers enterprises an improved user experience while accessing their data, applications and content. It eases information technology (IT) operations of an enterprise to manage multiple cloud services with the ability to add more services on the go, providing complete visibility and management of the cloud traffic.

“Our IZO Multi Cloud Connect brings fast, seamless and intelligent connectivity for next-gen global enterprises helping them rapidly transform for a hyperconnected world. With our digital fabric, we stitch IZO Multi Cloud Connect into the existing digital architecture of the enterprise improving processes and bringing operational efficiencies. We are empowering our customers with greater agility to connect their users, branches, data centres, applications, cloud and partners globally,” said **Hon Kit Lam, Vice President, Core and Next- Gen Connectivity Services, Tata Communications**. “A multi-cloud environment is a reality for enterprises today with mission critical applications moving to the cloud. Built on Tata Communications global network, IZO Multi Cloud Connect removes complexities and challenges associated with managing virtual connections and virtual network functions cost-effectively with end-to-end service assurance.”

Oscar Martínez, IT Senior Network Architect, Clariant SE, said, “We have been partnering with Tata Communications, using their IZO™ Hybrid WAN to connect our sites to data centers. On moving 200+ applications from on-premises to the cloud, we needed a solution to connect our distributed cloud data centers over internet, with performance like MPLS VPN. IZO Multi Cloud Connect with virtual router capability provided predictable internet connections from our 100+ sites to business-critical applications in the cloud. Tata Communications has enabled our smooth transition to internet-only network for our cloud transformation.”

Brian Washburn, Research Director, Omdia, said, “It’s not an understatement that everything is moving to cloud. Tata Communications IZO Multi Cloud Connect mixes versatile connectivity options, fast and flexible capacity, ease of ordering and configuration, plus optional virtual network functions. It effectively serves site-to-cloud, data center-to-cloud and cloud-to-cloud use cases. Enterprises may find the combination of IZO Multi Cloud Connect with IZO Internet WAN especially compelling as an option to migrate private networks to Internet with end-to-end, SLA-backed performance guarantees.”

With Tata Communications IZO Multi Cloud Connect, enterprises can access different applications from different clouds seamlessly and experience continuous connectivity with better performance. To find out more about Tata Communications new IZO Multi Cloud Connect, please visit [our website](#).
