The DWH Business, has various inter-dependencies with inter alia the remaining business of MSSL. The DWH Business sources variou The DWH Business, has various inter-dependencies with inter alia the remaining business of MSSL. The DWH Business sources various goods or materials, including such as sourcing of various goods or materials, wires, various tools, jigs, fixtures, nubber parts, connectors and certain other components which are used to manufacture/ assemble wing harmesses along with procurement of certain capital items as required for the DWH Business. Further, MSSL (either directly or through its subsidiaries or joint ventures) has a central team for some of the key functions in the areas of design and development serviouse, finance, procurement engineering services, human resource, travel management, infrastructure support etc. To ensure that, the benefit of the in-house value chain continues to be available to the DWH Business, certain related party transactions have been entered into between the Company and MSSL (including its subsidiaries and joint venture companies), which are effective on and from Effective Date 1 i.e. January 5, 2022. Further, as on date, Motherson Lease Solution Limited ("MLSL"), extends car leasing services to MSSL and other entities under the Motherson group, for use by the employees of such companies and for other corporate purposes. This gives such entities availing services from MLSL a distinct cost advantage. The car leasing services is being extended to the Company. In addition to the above-mentioned transactions with MSSL (including its subsidiaries and joint ventures) and MLSL, there are various agreements and arrangements between the Company and Sumitomo Wiring Systems Limited, Japan ("SWS"), which include arrangements in relation, (a) purchase of components, such as wiring harness component and child parts, from relation to the manufacture and sale of domestic wiring harness, and know-how and technical assistance to be provided by SWS, in relation to the manufacture and sale of domestic wiring harness and its components. The above agreements and arrangements are effective relation to the manufacture and sale of domestic wiring harness and its components. The above agreements and arrangements are effective on and from Effective Date 1 i.e. January 5, 2022.

DETAILS OF GROUP COMPANIES In terms of the SEBI (ICDR) Regulations, the term 'group companies', includes (a) such companies (other than promoter(s) and subsidiary(les)) with which there were related party transactions during the period for which financial information is disclosed, as covered under applicable accounting standards, and (b) any other companies considered material by the board of directors of the relevant issuer company. The Company has not entered into any transactions with Group Companies during the period for which financial information is

d accordingly, there are no Group Companies as on date.

discosed accordingly, mere are no errolp companies as or date.

However, it may be noted that, while the DWH Undertaking was housed in MSSL (prior to the Scheme becoming effective), MSSL undertook various related party transactions in relation to the DWH Undertaking with companies which were considered as Group Companies, in terms of the SEBI (ICDR) Regulations,. Since the DWH Undertaking has now been transferred to the Company pursuant to the Scheme, going forward, the Company will undertake such related party transactions with companies which will be considered as its Group Companies, including the Related Party Transactions described in Paragraph N. All such related party transactions with Group Companies will be undertaken by the Company at arm's length and in accordance with the requirements of Applicable Laws.

INTERNAL RISK FACTORS

INTERNAL RISK FACTORS

Our inability to identify and adapt to evolving industry trends and preferences and develop new products to meet our customers' demands may adversely affect our business.

Changes in competitive technologies may render certain of our products obsolete or less attractive, and to compete effectively we must be able to develop and produce new products or enhanced versions of existing products to meet our customers' demands in a timely manner. Our ability to anticipate changes in technology and regulatory standards and to successfully develop and / or procure and introduce new and enhanced products on a timely basis is a significant factor in our ability to remain competitive. Additionally, we may not be able to secure adequate financing for the capital expenditures required for the research and development and / or procurement of new technologies and products. If we are unable to secure adequate financing, or financing in time on commercially acceptable terms, or at all, we may be forced to curtail our product development programs, and our business, financial conditions and results of operations may be materially and adversely affected. We are also subject to the risks generally associated with new product introductions and applications, including lack of market acceptance, delays in product development and failure of products to operate property.

The success of our newly designed products and other innovations depends in part on our ability to obtain, protect and preserve

The success of our newly designed products and other innovations depends in part on our ability to obtain, protect and preserve intellectual property rights to our designs and we cannot assure you that we will develop sufficient new revenue streams to replace revenue streams that may diminish as our current intellectual property rights expire.

We have rights in respect of a number of intellectual properties relating to the products we manufacture. Our success and competitive position of the products of the products are completely only the products.

we have agains in respect or a number of miseiscental properties relating to the products we manufacture. Our success and completive postion depends on a combination of trade secrets and other unpatented proprietary know-how, including, in particular, engineering drawings, exclusively licensed- in technologies, data and manufacturing processes and materials expertise. In addition, due to the high degree of customization of our technologies, new products and processes may be developed jointly with customers or suppliers. While the terms of these collaborations with customers or suppliers vary, in a limited number of cases, customers and suppliers restrict us from using the developed technology or producing the developed products for competitors for a period of time, while in a limited number of cases we may be prevented from exploiting such technology or product or selling to other customers at any time. Any dispute we may have with our customers regarding the ownership of patents or other forms of intellectual property, could negatively affect our business.

regarding the ownership of patents or other forms of intellectual property, could negatively affect our business. We believe that having a significant level of protected proprietary technology gives us a competitive advantage in marketing our products and services. We therefore try to obtain and protect certain intellectual property rights to our newly designed products and other innovations. However, we cannot be certain that the measures that we employ will result in the protection of our intellectual property rights or will result in the prevention of unauthorized use of our proprietary technology. We also rely upon unpatented proprietary know-how and continuing technological innovations and other trade secrets to develop and maintain our competitive position. While it is our policy to enter into confidentiality agreements with our key employees to protect our intellectual property, there can be no assurance that these confidentiality agreements will not be breached or that they will provide meaningful protection for our trade secrets or our proprietary know-how ow, it at all. in addition, there can be no assurance that other companies will not obtain knowledge of these trade secrets through independent development or other legal means of access. Any failure to protect our proprietary rights relating to our designs, processes, components, technology, trade secrets or proprietary know-how outli have a material adverse effect on our business, financial office and existing intellectual property rights are not indefinite and will expire. There can be no assurance that we will develop sufficient

secrets or proprietary know-now could have a material adverse entex on our business, limancial contribution and restulis or operations in addition, our existing intellectual property rights are not indefinite and will expire. There can be no assurance that we will develop sufficient revenue streams protected by equivalent rights in the future to replace revenue streams as the relevant intellectual property rights can be challenged on the basis of invalidity. Although we typically confirm that our processes do not violate existing intellectual property rights of third parties, we may face claims that our product designs or manufacturing processes infringed third party intellectual property rights. Even though many of our manufacturing services contracts generally require our customers to indemnify us for infringement claims relating to the product specifications and designs, a particular customer may be unwilling or unable to satisfy its indemnity obligations. In addition, we may be responsible for claims that the processes or components that we use in manufacturing streams that the processes or components that we use in manufacturing streams that the processes or components that we use in manufacturing streams that the processes or components that we use in manufacturing for the product of infringe third party intellectual property rights. Infringement claims could subject us to significant liability for damages and potentially injunctive action and, regardless of merits, could be time-consuming and expensive to resolve.

Our future success depends on our ability to satisfy changing customer demands by offering innovative products in a timel manner and maintaining such products' competitiveness and quality.

manner and maintaining such products' competitiveness and quality.

Our competitors may gain significant advantages if they are able to offer products satisfying customer needs earlier than we are able to and this could adversely impact our sales, results of operations and financial condition. Unanticipated delays or cost overruns in implementing new product launches, expansion plans or capacity enhancements could also materially and adversely impact our financial condition and results of operations. Customer preferences seem to be moving in favor of more fuel efficient and environmentally friendly vehicles. In addition, increased government regulations, as exemplified by a number of initiatives, volatile fuel prices and evolving environment preferences of consumers has brought significant pressure on the automotive industry to reduce carbon dioxide emissions. Our operations may be significantly impacted if we experience delays in developing fuel efficient products that reflect changing customer preferences. In on assurance that the market acceptance of our future products will meet our sales expectations, in which case, we may be unable to realize the intended economic benefits of our investments and our financial condition and results of operations may be materially and adversely affected.

include the rising costs of automotive transport, increasing traffic density in major cities and environmental awareness. Furthermore, the increased use of car-sharing concepts and other innovative mobility initiatives facilitates access to other methods of transport, thereby reducing dependency on the private automobile. A shift in consumer preferences away from private automobiles, and resulting decrease in the size and number of orders from our OEM customers, would also have a material adverse effect on our general business activity and on our sales, prospects, financial condition and results of operations.

Any delay in the implementation or failure in the operation of our information systems could disrupt our operation ted increase in costs.

We have implemented various information technology ("IT") solutions to cover key areas of our operations. For instance, we have implemented various information technology ("IT") solutions to cover key areas of our operations. For instance, we have implemented systems to consolidate data and other key performance parameters at the regional and corporate levels. Other significant IT solutions include systems designed to provide data security and to allow for collaboration of information across the network, as well as supply chain solutions to cover critical processes in relation to customers and suppliers across our manufacturing facilities. Any delay in the implementation or failure in the operation of these information systems could result in material adverse conse pregations, loss of information and an unanticipated increase in costs Further, these systems are potentially vulnerable to damage or interruption from a variety of sources, which could result in a material advers

Furmer, ness systems are potentially vulnerable to camage or interruption from a variety or sources, which could result in a material adverse effect on our operations. A large-scale IT malfunction could disrupt our business or lead to disclosure of sensitive company information. Our ability to keep our business operating depends on the proper and efficient operation and functioning of various IT systems, which are susceptible to malfunctions and interruptions (including those due to equipment damage, power outages, computer viruses and a range of other hardware, software and network problems). A significant or large-scale malfunction or interruption of one or more of our IT systems could adversely affect our ability to keep our operations running efficiently and affect product availability, particularly in the country, region or functional area in which the malfunction occurs, and wider or sustained disruption to our business cannot be excluded. In addition, it is possible that a malfunction of our data system security measures could enable unauthorized persons to accesse sensitive business data, including information relation to our intellegation to our business. Such malfunction or our data system security measures could enable unauthorized persons to accesse sensitive business data, in contraction and our problemations could including information relating to our intelligation property or business strategy or those of our customers. Such maifunction or disruptions could cause economic losses for which we could be held liable. A failure of our information technology systems could also cause damage to our reputation which could harm our business. Any of these developments, alone or in combination, could have a material adverse effect on our reputation which could harm our business. Any of these development business, financial condition and results of operations.

Start-up costs and inefficiencies related to new products or programs can adversely affect our operating results and such co may not be fully recoverable if new programs are cancelled.

may not be fully recoverable if new programs are cancelled.

New programs often entail material start-up costs with respect to the design, development and testing of the products to match the customer's specifications, as well as establishing additional production lines or new facilities where required. If we are unable to recoup start-up costs, manage our labor and equipment resources effectively in connection with the establishment of new programs and new customer relationships, or to correctly estimate required resources, our gross margins and operating results could be adversely affected. These factors are particularly evident in the early stages of the life cycle of new products and new programs and in the opening of new facilities. These factors also affect our ability to efficiently use labor and equipment. In addition, if any of these new programs or new customer relationships were terminated or our existing customers shift their base of operations to a location where we do not have a manufacturing facility, our operating results could be adversely affected, particularly in the short term. We may not be able to adequately recover these start-up costs or replace anticipated revenues from any such new products or programs, which could adversely affect our business and financial condition.

Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, capital expenditure, long-term target payout ratios, growth & investment opportunities, current capital ratios, current & prospective financial performance and other macro & micro-economic factors.

Our ability to pay dividends in the future will depend on our earnings financial condition and capital requirements. Further, dividends

Our ability to pay dividends in the future will depend on our earnings, financial condition and capital requirements. Further, dividends distributed by us will attract tax deduction(s) and may be subject to other requirements. We have a board-approved dividend policy to govern our dividend payout. We may not generate sufficient income to cover our operating expenses and therefore may be unable to pay dividends to our shareholders.

We may not be successful in implementing our growth strategies, including our strategy to capture opportunity in the growing EV Market.

Market.

The market for electric vehicles is relatively new, rapidly evolving, characterized by rapidly changing technologies, price competition, additional competitors, evolving government regulation and industry standards, frequent new vehicle announcements and consumers' willingness to adopt electric vehicles. A decline in the trend towards electrification driven by changing consumer preference or any change in government policy, laws and regulations that reduces or eliminates support for electrification of vehicles, resulting in lower demand for electrical vehicles and consequently a significant reducion in production of electric vehicles could have an adverse effect on our sales to electric vehicles DEMs and lead to a decline in our earnings from the electric vehicles market.

We expect our strategies to place significant demands on our management and other resources and require us to continue developing and improving our operations, infancial and other internal controls. We may not be successful in implementing our growth strategies due to various factors, including failure to adapt to rapidly evolving technological changes, anticipate and accurately assess potential growth opportunities and new markets and effectively allocate resources and capital investment in a timely and cost-effective manner to capitalize on such opportunities, attract new customers, obtain sufficient financing for our expected capital expensive, control input costs, effectively manage our internal supply chain, manufacturing processes and operations and costs related to research & development and maintain sufficient operational and financial controls. We may also not be successful in implementing our goals due to factors beyond our control, including shift in customer preferences towards products that we are unable to manufacture, change in business and spending plans of our customers with whom we have collaborated to produce new and innovative systems and components or downturn in the global economic, financial and market conditio

Our inability to effectively manage the expansion of our business and execute our strategies effectively, could adversely affect our busin

B. Breach of applicable laws and regulations, including those related to environmental, health and safety regulations could adverse affect our business, operations and reputation.

affect our business, operations and reputation.

Our operations are subject to various domestic laws and regulations governing, among other things, noise control, emissions to air, discharge to waters and the generation, handling, storage, transportation, treatment and disposal of waste and other materials, environmental concerns (including concerns about global climate change and its impact such as greenhouse gas emissions), fuel economy standards, health and safety of employees, labor and accounting laws, foreign trade and investment, import license requirements and tariffs and taxes and intellectual property enforcement issues. We are also required to obtain and comply with environmental permits for certain of our operations. For instance, we require approvals under the Water (Prevention and Control of Pollution) Act, 1974, the Air (Prevention and Control of Pollution) Act, 1974, the Air (Prevention and Control of Pollution) Act, 1981, the Hazardous and Other Waste (Management and Transboundary Movement) Rules, 2016 in order to establish and operate our manufacturing feditions in India.

Pollution) Act, 1981, the Hazardous and Other Waste (Management and Transboundary Movement) Rules, 2016 in order to establish and operate our manufacturing facilities in India. We believe that our operations and manufacturing facilities will be operated in compliance, in all material respects, with such laws and regulations. However, there can be no assurance that we will be in complete compliance at all times with such laws, regulations and the terms and conditions of any consents or permits. If we violate or fail to comply adequately with these requirements, we could be fined or otherwise sanctioned by the relevant regulators or our operations may be temporarily shut-down pending such compliance. Occurrence of any such events could adversely affect our business, reputation, financial condition or results of operations. In addition, these requirements may become more stringent over time and there can be no assurance that we will not incur significant costs or liabilities in the future in order to comply with evolving laws and regulations, including environmental, health and safety laws, regulations or other pertinent requirements that may be adopted or imposed in the future by governmental authorities. We do not carry any insurance to cover environmental liabilities in India where we operate. At same time, there is no pollution which is created in manufacturing process since the Company engaged in largely assembly operations.

Our continued operations are critical to our business and any shutdown of our manufacturing facilities or other manufacturing production problems caused by unforeseen events may reduce sales and adversely affect our business, results of operations

Our manufacturing facilities are subject to operating risks and we may encounter manufacturing problems or experience difficulties or delays in production as a result of occurrence of the following events or any other events beyond our control:

(a) forced or voluntary closure of manufacturing plants, including as a result of regulatory inspections.

(b) problems with supply chain continuity, including as a result of natural or man-made disasters at one of our facilities or at a suppliers or any other including as a result of natural or man-made disasters at one of our facilities.

venous reality;
manufacturing shutdowns, breakdown or failure of equipment, performance below expected levels of efficiency, obsolescence of our equipment and production facilities, industrial accidents and the need to comply with the directives of relevant government authorities; labor disputes, strikes, lock-outs that may result in temporary shutdowns or manufacturing disruptions; failure of a supplier to provide us with the critical raw materials or components for an extended period of time, which could impact

shortage of qualified personnel or

changes in applicable local and international laws and regulations impacting our manufacturing facilities where we ope 10. We are required to obtain, renew or maintain statutory and regulatory permits, licenses and approvals to operate our business am our manufacturing facilities, and any delay or inability in obtaining, renewing or maintaining such permits, licenses and approval could result in an adverse effect on our results of operations.

could result in an adverse effect on our results of operations.

We are required to obtain and maintain various statutory and regulatory permits and approvals to operate our business in relation to the environment laws and regulations, which requires us to comply with certain terms and conditions to continue our operations. Although we have no reason to believe that such statutory and regulatory permits and approvals will not be granted and / or renewed as and when requested, there could be events which may prevent us from being able to maintain, renew or obtain any required statutory and regulatory permits and approvals in the future, in a timely manner, or that no additional requirement will be imposed in connection with such request including delay from the regulator in granting the licenses for any reasons beyond our control. In the event that we are unable to renew or maintain such statutory permits and approvals or comply with any or all of their applicable terms and conditions, or seek waivers or extensions of time for complying with such terms and conditions, our operations may be interrupted and penalties may be imposed on us by the relevant authorities. Q. OUTSTANDING LITIGATIONS

As on date, there are no outstanding litigations against the Company, its Promoters, its Directors or any of the Group Companies

However, there are approximately 8 labour cases which pertain to the DWH Undertaking out of which 7 cases are pending adjudication a labour courts of Noida and Gurgaon. These cases are on account of different labour disputes such as dismissal for wrong bill submission dismissal for wilful damages to the property of DWH Undertaking, termination of services due to prolonged absenteeism, reinstatement with back wages initiated by the workmen, disobeying law and order etc. The total amount of claim involved in the aforesaid cases is estimated be INR 17.05 Million.

Additionally, there are certain excise, sales tax and service tax matters pertaining to the DWH Undertaking, transferred to the Compa pursuant to the demerger. The total amount of claim involved in the aforesaid cases is estimated to be INR 7.25 Million. Accordingly, summary of contingent liabilities transferred to the Company upon demerger of DWH Undertaking and not ack
