Dear Sirs,

Sub: Update on usage of Green Power

We are pleased to inform you that in the last week of August 2023, in our Kolimigundla Plant, we have commissioned the balance capacity of 3 MW of Waste Heat Recovery System out of 12 MW capacity. With this, total operating capacity of Waste Heat Recovery System for the Company has gone up to 43 MW.

The Company’s wind power capacity, including its subsidiary’s capacity of 40 MW, stands at 166 MW. We have earlier informed of the change in utility of wind power from ‘Sale to Board’ to ‘Captive Usage’ for 133 MW, out of 166 MW. Further, our application for conversion of further capacity of 33 MW from ‘Sale to Board’ to ‘Captive Purpose’ is pending with State Electricity Board. The appeal filed by the State Electricity Board before the Honourable Supreme Court of India against the favourable order given by the Honourable Madras High court in favour of the Industries, with regard to Wheeling and Banking of Power from wind mills has been dismissed. Hence, the Company is eligible to get this capacity transferred to captive use. With the average PLF of 25%, the generation of wind power for captive use is expected to be 42 MW.

THE RAMCO CEMENTS LIMITED

Corporate Office:

Auras Corporate Centre, V Floor,

Corporate Identity Number: L26941TN1957PLC003566

Our entire green power capacity of 85 MW including the capacity available in the subsidiary company would be used for captive purpose. On an annualised basis, the share of green power is expected to reach 45% of the total energy consumption.

Our efforts towards augmenting of Green Energy sources, reduces the reliance on fossil fuels and minimises the Green House Gas emissions, leading to lower environmental footprint, in the cement production.

Thanking you,

Yours faithfully,
For **THE RAMCO CEMENTS LIMITED,**

K.SELVANAYAGAM
