CANALYS REPORT

'PC shipment in India hits 5-yr high of 4.1 m units in Q2'

PRESS TRUST OF INDIA New Delhi, September 8

PC SHIPMENT IN India hit a fiveyear high to about 4.1 million units in the June 2021 quarter, growing at 42.7% year-on-year, according to research firm Canalys.

The 4.1 million shipments included over 2.4 million notebooks, about 5,15,000 desktops, more than 1 million tablets and 54,000 workstations, Canalys said in a report.

"Almost all categories grew by double-digit percentages year on year, mainly due to a lacklustre performance in Q2 2020, when the entire country was under lockdown, braving the first wave of COVID-19. Shipments of notebooks, the largest category by volume, grew 43% over Q2 2020," it added. Tablets also had one of the best quarters since 2016, with 52% year-on-year shipment growth, while desktop shipments were up by 23 per

The 4.1 million shipments included over 2.4 million notebooks, about

5,15,000 desktops, more than 1 million tablets and 54,000 workstations, the report says

cent, it added. India's PC market topped 4.1 million units in the second quarter of 2021 for the first time since 2016, Canalys said. About 2.87 million units were shipped in the June 2020 quarter.

The report said HP maintained its leadership position with a 26% market share - as its shipment grew 54% year-onyear in the June 2021 quarter.

Lenovo and Dell followed in the tally with 20.5% and 12.8% market share, respectively, in the said quarter.

"Samsung finished fourth, thanks to its strong tablet business. It grew shipments by a massive 134% year on year. Samsung is uniquely positioned to benefit from the cost-conscious device procurement happening across India to support multiple government and educational institutions," the report said. Canalys said it expects Samsung to benefit from the

drive to remote learning and its

connected tablets will be at the

forefront of this seismic shift in

education in India.

Samsung had a 9.8% share of the PC shipment in the second quarter of 2021. Acer finished fifth as the vendor topped Apple and grew its total shipments by an impressive 95% year-on-year. Acer had an 8% share.

"The market has finally returned to pre-COVID shipment levels. While desktops and notebooks haven't really seen a major bump in shipments, tablets are in much higher demand than before, resurrecting what was a dying category in India," Canalys Research Analyst Ashweei Aithal said.

Spike in Covid cases connected to higher humidity during rains

GEETA NAIR Pune, September 8

THE SPIKE IN new Covid cases in Mumbai and Delhi could be linked to the humidity factor. Apart from an increase in cases during the unlocking period, there was a significant correlation observed between humidity and Covid cases in these two cities by researchers at the Indian Institute of Tropical Meteorology (IITM) Pune.

According to Gufran Beig, scientist and programme director of SAFAR at IITM, this was the first of its kind study done in the country while similar studies have been carried out in US and Europe. Beig and his team of researchers at IITM have observed a link between high humidity during the monsoon and a spike in Covid cases in these

Pune and Mumbai account for around third of the Covid-19 cases till date in Maharashtra. The state has reported 64.89 lakh Covid cases, while Pune ac-

counts for 11.24 lakh cases and Mumbai another 7.46 lakh. Total Covid deaths in Pune have been at 19,305 and in Mumbai at 15,998.

"As the virus in India during 2020 largely travelled with droplets, the association with absolute humidity in the dry regions has serious implications. Clarity in understanding the impact of seasonality will greatly help epidemiological research and in making strategies to control the pandemic in India and other tropical countries around the world," the study notes.

Beig along with Vrinda Anand, Nikhil Korhale, Suvarna Tikle and Mahender Singh Rawat have presented a paper that examines whether meteorology was a factor to the Covid-19 spread in tropical climate.

The IITM study examined the impact of the meteorological parameters during summer and monsoon season of 2020, in different Indian mega cities having a distinct climate and geography.
