## Press Release

### Dhanuka digitally imprints, ONEKIL in mega PAN India launch

Dhanuka Agritech Ltd. manufactures a wide range of farm input and has a pan-India presence through its marketing offices in all major states, with a network of more than 6,500 distributors & dealers selling to over 75,000 retailers across India and reaching out to more than 10 million farmers. The Company has technical tie-ups with many US, Japanese and European companies. It is also listed among '200 Best Under a Billion Companies in the Asia Pacific' by FORBES magazine in the year 2010, 2011 & 2013.

Every year Dhanuka keeps on adding new products to its portfolio and is continuously on the lookout to bring the latest technology to Indian Farmers. For the first time, Indian Onion growers will experience ONEKIL, a 9(3) molecule that is a complete solution for weed-free Onion crop, from the house of Dhanuka. The much-awaited molecule, ONEKIL took its first digital imprint in a pan-India launch on 28th July 2021.

Presently, Onion growers of India are suffering from multiple weed problems out of which major weeds are Narrow leaf & Broad leaf. ONEKIL is a post emergence, systemic herbicide that controls Narrow Leaf Weeds as well as Broad Leaf Weeds. Once ONEKIL is absorbed by the Onion crop's foliage and root system, it provides longer residual control to most of the weeds. Moreover, ONEKIL lasts for 1-2 hours and has effective rain fastness. ONEKIL has a dual mode of action and has excellent translocation activity. When it is absorbed through leaves, it moves downwards through the phloem, and when absorbed by roots, and moves upward through the xylem.

Dhanuka Agritech Ltd. aspires to "Transform India through Agriculture" with better crops, better quality management, and a better life for farmers. Dhanuka is confident, with the use of ONEKIL our Onion crop growers will enjoy good harvest ever than before.
