***Announcing the 'Prevest DenPro R&D Centre is now operational'***

Prevest DenPro Limited , a leading Indian manufacturer of dental materials announces the opening of its new, one of its kind, R&D and Testing Center adjoining to its Jammu factory. This new facility is a testimony of its belief that in research & development is the backbone of business growth and will focus on the innovations in the dental field.

Prevest DenPro is the 1<sup>st</sup> Indian manufacturer to set up a research centre in the private sector. The new facility has been completed in a record time of one year with an investment of Rs. 1200 Lakhs (\$1.45 millions). The facility is spread across 16000 square feet. This facility has been equipped with required infrastructure to design & develop dental materials, conduct product reliability performance testing and verification, as well as validation of products and processes.

The new R&D centre is also accompanied by the latest pilot plant facilities, training facilities and other necessary downstream equipment.

The new facility will employ 30 highly qualified and experienced scientists, engineers, and dental professionals to carry out the research on new products development. The R&D Centre will have ample facilities for scientists to explore the new development avenues and bring out new innovative products

The mission of the R&D project is to focus on the development of innovative products that will improve oral, dental, and craniofacial health.

The latest testing equipment installed at the R&D Centre will help the company to maintain its key competency in quality and utilize this facility to continuously monitor and improve the quality of the products.
