The magic of life is having a vision, having faith, and then going for it. Knowing that embedded in this time of taking a new step towards growth and development is the promise of a new foundation, a promise to continue the legacy; if we have the courage and commitment towards making something better than it already was. **“From this year onwards TTFL has become a one-stop business partner for all of its clients, which augurs higher customer satisfaction and better sales volume from our existing clientele.”**

**The future for TTFL looks very promising, where we plan to grow incrementally from our manufacturing operations while keeping trading operations status quo.**

**Dear Shareholders,**

It gives me immense pleasure to present to you our Annual Report for the financial year 2018-19, this year becomes all the more significant for Trident Textofab Limited and its stakeholders as we begin a new chapter in the life of our company.

After a decade of consistent performance in its core competency - trading of textiles, our company started with the manufacturing of textile products in FY2018-19. Our entire manufacturing setup was not operational throughout the financial year and hence the majority of business was still driven through trading operations. This was because our greenfield weaving unit in Surat got delayed due to increased complexities in compliances and late shipment of machinery, the same got commissioned in April 2019. In the years to come, manufacturing will play a prominent role in the progress of our company. We have, in place, our integrated manufacturing unit, which

undertakes various steps of the value chain like - weaving, stitching, digital printing, heat setting, embroidery, and finished garments. Our company also increased its team strength near 5 times this year, totaling to 97, on account of its new operations.

Not only did our newly incorporated manufacturing operations boost profitability, but it also enhanced our product offering and customer satisfaction. From this year onwards TTFL has become a one-stop business partner for all of its clients, which augurs higher customer satisfaction and better sales volume from our existing clientele.

We witnessed revenue growth of 1.7% over the previous financial year, along with an expansion in operating profit margin from 1.7% in FY2017-18 to 2.7% in FY2018-18, which led to a 69.9% increase in profit after tax over the previous year. This was due to a shift in sales-mix towards manufacturing operations.

The future for TTFL looks very promising, where we plan to grow incrementally from our manufacturing operations while keeping trading operations status quo. We also plan to explore new geographies internationally this year, particularly in the Middle-eastern and Afghanistan region. Our company has raised debt in the current year, to finance the additional capital employed in manufacturing operations. We completed a preferential issue of 2,00,000 compulsory convertible cumulative preference shares (CCPS), at a price of Rs. 101.48 per share, raising a total amount of approximately 203 Lakhs. We have in place the necessary infrastructure, team strength, and capital to cater to the demand for the coming financial year.

**With warm regards,  
Hardik Desai**

## Industry Overview

Textile is the oldest manufacturing industry in India, dating back to centuries. It is one of the largest textile industries in the world having an ample raw material base and strengths across the value chain. As of FY2017-18 textiles and apparel contributed nearly 2.1% of India's GDP, 12.65% of industrial production and about 12% of Indian exports. India is second only to China, for the production of man-made fiber and filament accounting for a 14% market share globally. India also ranks second to China in the consumption of polyester fiber, however, the per capita consumption of India is far lower than that of China. India's per capita consumption in all the fibers ranks 50% lesser to the global per capita consumption, in 2018. This also

highlights the substantial unrealized potential of Indian consumption.

In terms of structure, the Indian textile market is largely unorganized, fragmented and privatized. The majority of market share is held by a large number of unorganized players with a few select corporates. India also has a presence across the entire textile value chain including - spinning, weaving, knitting, processing, and making garments. In terms of capacity, India hosts 24% of the world's spindle capacity, 8% of global rotor capacity and 63% of loom capacity (including handlooms) as of FY2017-18.

## Recent Developments

Introduction of Goods and Service Tax (GST) in July 2017 has introduced

quite a few changes in the industry. The unorganized industry was hit hard by the implementation of GST, the organized industry, on the other hand, has grown at the cost of the unorganized industry. GST has diluted the tax arbitrage that was previously available to unorganized players, thereby shifting the market towards organized players.

For the textile industry, rates of 5% and 12% are imposed on cotton and man-made fiber respectively, while silk and jute are exempted. On the apparel side, goods costing less than Rs. 1,000 attract a 5% GST rate while goods costing more than Rs. 1,000 attract a 12% GST rate.

While the unorganized space has faced the heat of GST far more

intensely than organized space in domestic markets, it has been equally challenging for organized space in the export front. The introduction of GST discontinued many export incentives, making Indian manufacturers less competitive globally. Added to this was subdued demand from UK and USA, which are the world's largest textile consumption markets.

## Growth Drivers

### Per capita spend on apparel

Per capita spending on apparel in developing countries like India is expected to increase by more than 2 times in the next 10 years (CAGR 9-11%) and will make developing countries the drivers of incremental growth in the global textile consumption.

### Increase in disposable income

Strong economic growth is expected to increase per capita income, resulting in more disposable income to spend on fashionable clothes. The increase in income would improve the general standard of living, which in turn would further propel the demand for apparel.

### Increasing urbanization

Rising urbanization leads to an increase in demand for new designs and fashions to match new lifestyles. A large percentage of these new city dwellers are expected to be in their twenties thus possibly making first-time independent choices for various categories of clothing items including denims, shirts, and footwear.

### E-commerce

With the changing lifestyle and rising

incomes, people are left with less spare time. E-commerce has leveraged this opportunity and is providing consumers with what they want, with just a few simple clicks, making a seamless and faster shopping experience. The huge success of e-commerce companies led Indian textile companies to explore the online market through their own e-commerce platforms.

### Foreign Direct Investments (FDI)

The government has allowed 100% FDI in this sector. The textiles industry in India is experiencing a significant increase in collaboration between global majors & domestic companies. FDI in textiles (including dyed, printed) grew at a CAGR of 17.13% during the period from FY10 to FY17.

## **Business Model**

Company Overview

**At the end of the financial year 2018-19, we had in place the infrastructure required to manufacture grey fabrics, finished garments and other value-added products in embroidery, stitching, and digital printing.**

Trident Texofab Limited (TTFL) was incorporated in the year 2008, by our founders and first-generation promoters Mr. Hardik Desai and Mr. Chetan Jariwala. TTFL is based out of the textile city of India, Surat. We started out as a textile trading company dealing in a variety of home furnishing and other products like bed sheets, scarfs, pareos, suiting, shirting and many more. After a decade of steady progress in trading operations and an IPO on BSE SME in 2017, we decided to take it up one notch. Recently in 2018, TTFL commenced manufacturing operations in textiles out of its greenfield facilities set up in Surat. At the end of this financial year 2018-19, we had in place the infrastructure required to manufacture grey fabrics, finished garments

and other value-added products in embroidery, stitching, and digital printing. This new business division was financed through a combination of borrowed funds and owner funds (both fresh infusion and internal accruals).

## Business Segments

### Trading

In the last decade, trading of textile products has single-handedly driven the growth at TTFL. Prior to the current financial year, almost 100% of the business was contributed by trading operations.

Unlike the typical trading model of buying and selling goods, we are present throughout the process of getting the products manufactured and delivered to our customers. We engage right from the receipt of order, identification of a manufacturer, placing an order, supervising manufacturing and delivery of the finished product. This process helps us in providing superior customer satisfaction to our clients.

### Product Basket

We deal in a wide range of products, like home furnishing, bed sheets, curtains, cushion covers, scarfs, pareos, suiting, shirting, technical textile fabrics and many more. Our product basket includes finished, semi-finished and value-added fabrics.

### Performance in FY2018-19

Trading operations contributed 75.1% of revenue from operations in the FY2018-19 as compared to 100.0% in FY2017-18. This was primarily due to the commencement of commercial operations from the manufacturing division.

## Manufacturing

In 2018, we started with the manufacturing of textile products. In the month of May, we established our first unit engaged in value-added segments like digital printing and embroidery. The initial set-up was of 10 digital printing machines, 2 heat transfer machines, and 7 embroidery machines. By September 2018, we began commercial operations of embroidery and stitching units. In the month of April 2019, TTFL commenced manufacturing of grey fabrics at its newly established unit in Surat. By the end of the financial year, we have become fully integrated into our manufacturing operations with the ability to produce finished garments, semi-finished articles and

grey fabrics. Currently, TTFL is working with marquee garment clients like TCNS Clothing Company, Libas and many more.

### Product Basket

Currently, we mainly deal in business-to-business (B2B) trade for manufactured textile products. Our manufacturing product basket can be categorized into two categories. Finished products wherein we produce kurtis, tunics, nighty, gowns suiting and many more; Semi-Finished products where we produce grey fabrics and do job work for digital printing and other value-added products in embroidery and stitching.

### Performance in FY2018-19

Our manufacturing operations, which started in 2018, contributed 24.9% of revenue from operations in FY2018-19. The majority of contribution was of finished garments, from stitching and digital printing operations.

Product Basket	Capacity	Number
Embroidery Unit	37 Lakh Stitch/Day	7 Machines
Digital Printing Unit	7,200 Meter/Day	6 Machines
Heat Transfer Unit	7,200 Meter/Day	2 Machines
Waterjet	7.5 Lakh Meter/Month	60 Machines
Stitching Unit	-	55 Machines

that we want to change for the  
better, indicates the start of  
something new”**

## Changing Business Dynamics

Post the financial year 2017-18, TTFL houses two different business segments i.e. Trading and Manufacturing operations. Both of these businesses have very different inherent business dynamics. *While earlier TTFL was a textile trading company, it is currently an integrated textile manufacturing and trading company.* In this year and in the years to come, TTFL will witness the following changes in business dynamics.

### Fixed Assets

In the last financial year, we have built an additional net block of 739 Lakhs totaling to 895 Lakhs. This increase has been on account of investment in plant and machinery for the new manufacturing units. With an increase in the net block, we will also witness additional depreciation expenses in the years to come.

### Margin Profile

Manufacturing operations records superior profitability margins as compared to trading operations. With the commencement of manufacturing operations in the current financial year, we have witnessed an increase in the gross margins from 4.5% in FY2017-18 to 7.0% in FY2018-19 and operating margins from 1.7% in FY2017-18 to 2.7% in FY2018-19. With increasing contribution from manufacturing operations, the blended profitability margins are also expected to increase.

### Working Capital Cycle

Prior to the financial year 2018-19, we have historically maintained a net working capital cycle of under or around 30 days. This has been possible

due to the stringent management of inventory, debtors, and creditors. However, manufacturing operations inherently have a longer working capital cycle as compared to trading operations. In the coming years, we expect to witness a stretch in the working capital cycle due to an increase in inventory levels.

### Human Resource

We have increased our team size nearly 5 times in the financial year 2018-19. The majority of employee additions have been on the manufacturing front, by the end of the financial year TTFL has become a team of 97 members. Subsequently, we have also witnessed an increase in employee benefit expenses from 67 Lakhs in FY2017-18 to 192 Lakhs in FY2018-19.

### Capital Structure

This year witnessed a massive increase in total capital employed (debt and equity) in the company from 1243 Lakhs in FY2017-18 to 2366 Lakhs in FY2018-19. The majority of the additional capital was employed in fixed assets followed by working capital. TTFL increased its borrowings from 417 Lakhs in FY2017-18 to 1267 in FY2018-19 and its shareholders' funds from 826 Lakhs in FY2017-18 to 1100 Lakhs in FY2018-19. TTFL raised 203 Lakhs from a preferential issue and rest was financed from internal accruals. This year witnessed an increase in the total debt to equity ratio from 0.50 times in FY2017-18 to 1.15 times in FY2018-19. However, the interest coverage also improved on account of better operating profits from 0.9 times in FY2017-18 to 1.8 times in FY2018-19.

We have increased our team size nearly 5 times in the financial year 2018-19

**895** Lakhs  
Total Net Block

**7%**  
Gross Margins

**2.7%**  
Operating Margins

With increasing contribution from manufacturing operations, the blended profitability margins are also expected to increase.

“We are constantly changing, indeed, but the decision of how and what kind of change we want depends upon us.”

### Strategy going ahead

#### Expanding geographical reach

TTFL is planning to tap export markets, in middle-eastern region and Afghanistan, with its products basket of finished garments. Export operations are expected to commence in the financial year 2019-20, which will mark another milestone in our history.

### Quality assurances

### Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

### Revenue Recognition

The key audit matter	How the matter was addressed in our audit

## Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement

when it exists. Misstatements can arise in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and bases on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statement or if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationship and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most

significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

## TO THE INDEPENDENT AUDITORS' REPORT OF EVEN DATE ON THE FINANCIAL STATEMENTS OF TRIDENT TEXOFAB LIMITED

Report on the Internal Financial Controls under Clause (i) of Sub-Section 3 of Section 143(3)(i) of the Companies Act, 2013 ("the Act")

### To the Members of Trident Texofab Limited

We have audited the financial controls over financial reporting of TRIDENT TEXOFAB LIMITED ("the Company") as of March 31, 2019 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

### Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

### Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial controls over Financial Reporting (the "Guidance Note") and the standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk.

The procedures selected depend on the auditor's judgment,

including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

### Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that:

1. Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
2. Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and
3. Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

### Inherent Limitations of internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

## Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2019, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.
