Sequoia top investor in Hurun's unicorn list

India produced 25 unicorns so far compared to 11 last year, the report said

Joseph Rai
joseph.r@livemint.com
NEW DELHI

Sequoia Capital India, one of the most prolific investors in the country, has the most number of companies in its portfolio that have the potential to become unicorns as early as 2023 or at least in the next four years, according to a Hurun India Future Unicorn List 2021.

A startup founded in the 2000s that has reached a valuation of less than \$1 billion and greater than \$200 million, but has yet to list on a public exchange, has been considered for the list. There are 86 such startups in India, according to the list.

The list further categorized startups with a valuation of \$200-\$500 million as Cheetahs and those with \$500 million and less than \$1 billion as Gazelles. There are 32 Gazelles and 54 Cheetahs with online retail store Zilingo the most valuable Gazelle and online furniture platform Pepperfry the most valuable Cheetah. These startups have raised \$12.1 billion in funding from more than 300 investors so far.

With 37 startups, Sequoia is the leading investor in the list. Startups with Sequoia as an investor include Zilingo, gaming startup Mobile Premier League, internet kitchen platform Rebel Foods, consumer goods brand Mamaearth and digital payments firm MobiKwik. Startups with Sequoia as an investor are also listed as the top 10 on Hurun's list of future unicorns. The local arm of the Menlo Park-based firm has been the most active investor in India by deal volume, retaining its pole position in the first half of this year as well, according to an analysis done by VCCircle.

Sequoia was followed by US-based Tiger Global Management with 18 investments including pre-owned cars platform Spinny,

The local arm of the Menlo Park-based Sequoia Capital has been the most active investor in India by deal volume, said the Hurun India Future Unicorn List 2021. GETTY

also featured among the top 10 future unicorns in the list.

VCCIRCLE

Tiger Global, an early backer in Flipkart, has been super aggressive in its investments in India this year, creating unicorns in the process. In the first half of 2021, Tiger Global made 20 bets in India, equiva-

lent to what it did in 2020.

The future unicorn list gains significance as India has produced unicorns at a break-neck speed this year, having already produced 25 unicorns so far compared to just 11 last year. India added three unicorns every month over the last year. Last month

The report also said that only a dozen startups on the list are co-founded by women entrepreneurs.

UNICORN BOOM

INDIA added three unicorns each month over the last year. Last month itself saw 8 unicorns

E-COMMERCE, fintech and SaaS comprised 49% of India's future unicorns

ONLY a dozen startups on the Hurun list are co-founded by women entrepreneurs

reported by the Comptroller and Auditor General for the states reveals that their combined revenue receipts in Q1 FY22 were only 2% higher than the pre-covid level of ₹4.3 trillion. The recovery in receipts was led by non-tax revenues, even as own taxes and central tax devolution trailed the level witnessed in Q1FY20, she said.

Residential real estate demand remained intact, driven by multi-year low interest rates and a preference for bigger houses. MINT

tained increase in market share of large developers among recent launches, is likely to continue and will support further improvement in the market share of larger and stronger developers.

With construction impacted to some extent and decline in sales for the top nine listed players, collections also got hit, registering a drop of 27% quarter-on-quarter.

Further, extension in RERA timelines in certain states by six to nine months along with a reduction in approval costs/construction premiums provided by certain states for a limited period has provided flexibility to defer outflows in case of collection weakness.

Thus, notwithstanding the moderation in collections, the cash flow from operations for larger developers have not witnessed a steep decline.

However, a shrinking market share and cautious lending approach by NBFCs and HFCs may create a challenging operating and financing environment for small real estate developers in the near term.

Second covid wave had a muted impact on residential real estate business: Icra

Madhurima Nandy
madhurima.n@livemint.com
BENGALURU

The second covid wave had a lower impact on the residential realty sector, while the increased focus on vaccination and reopening of the economy will help home sales recover to pre-covid levels in the short to medium term, rating agency Icra said in a note on Thursday.

In the June quarter, sales of residential real estate in the top eight cities fell 19% to 68.5 million sq. ft from 84.7 million sq. ft in the March quarter. The sequential drop was on a high base, as the fourth quarter of FY21 had witnessed the second highest sales since FY12.

However, sales more than doubled compared to the 33.7 million sq. ft in the June quarter of the previous year.

According to Icra, despite the disruption in the March quarter, demand remained intact, driven by multi-year low interest rates, preference for bigger and better homes following the shift to a hybrid

working model and pent-up demand.

"The impact of the second wave was lower than the first wave due to various factors, including the continuing trend of working from home by salaried employees, localized lockdown restrictions and a higher degree of certainty regarding future income levels and stability."

The IT-ITeS sector witnessed robust financial performance with increased hiring, which supported the demand from employees of

the sectors," said Kapil Banga, sector head and assistant vice-president, Icra.

Homebuyers are looking at ready-to-move-in units from developers with a track record of on-time and quality project completion, Icra said. This has also led to the increased market share of the top nine listed realty players, from 6% of sales in FY17 to over 16% in FY21.

The long-term trend of consolidation, which has been a result of evolving consumer preferences as well as a sus-

'State's fiscal balances remain weak in Q1'

Staff Writer
feedback@livemint.com
MUMBAI

The combined revenue balance of 19 states deteriorated in the June quarter to a deficit of ₹50,000 crore, compared to a surplus of ₹10,000 crore in the year-ago quarter, primarily due to the varied recovery in revenues and expenditures of state governments, rating agency Icra said on Thursday.

Aditi Nayar, chief economist, Icra Ltd, said fiscal data

reported by the Comptroller and Auditor General for the states reveals that their combined revenue

The total revenue balance of 19 states fell to a deficit of ₹0.5 tn in Q1, in contrast to a surplus of ₹0.1 tn a year ago

"Simultaneously, the revenue spending of the 19 state governments increased by a sharper 14% to ₹4.9 trillion in Q1FY22 from the pre-covid level of ₹4.3 trillion, possibly reflecting higher social sector spending amid the second wave of covid-19. Given the persistent nature of the pandemic, the fiscal deficit has nearly doubled to ₹1.1 trillion in Q1FY22 from the pre-covid level of ₹0.6 trillion in Q1FY20, she said.

by the 19 state governments recovered to ₹0.6 trillion in Q1FY22, exceeding the pre-pandemic level of Q1FY20 by 2.6%," added Nayar.

The combined revenue balance of the 19 states slipped into a deficit of ₹0.5 trillion in Q1FY22, in contrast to the small surplus of ₹0.1 trillion in Q1FY20. Moreover, their fiscal deficit has nearly doubled to ₹1.1 trillion in Q1FY22 from the pre-covid level of ₹0.6 trillion in Q1FY20, she said.
