### **MANAGEMENT DISCUSSION AND ANALYSIS REPORT**

#### **GLOBAL ECONOMIC OVERVIEW**

Even as India's outlook remains bright, global economic prospects for 2024-25 have been weighed down by the combination of a unique set of challenges.. Multi-decadal high inflation numbers have compelled central banks across the globe to tighten financial conditions - after a decade of easy monetary policy, the Japanese Central Bank has begun tightening and interest rates are rising. There are concerns of the pace of growth of the US tech industry. The conflicts in various parts of the world has had a major impact. Hence, global growth is forecasted to grow around 3.2 % in 2024 and 2025. as per IMF's World Economic Outlook, April 2024.

#### **INDIAN ECONOMIC OVERVIEW**

India took a big economic leap this leap year: The country ended fiscal year 2023-24 with a big bang, surpassing all market estimates of GDP, with 8.15% year-over-year growth. For three consecutive years, India's economy has exceeded growth expectations (averaging 8.3% annual growth over this period) despite global uncertainties, driven by strong domestic demand and continuous government efforts toward reforms and capital expenditure.

Optimism prevails, as per a survey by a leader in consultancy services, which shows high confidence among industry leaders in India's continued robust growth. With prevalent signs of the rural economy rebounding, strong growth in manufacturing, robust bank balance sheets and credit growth, and stronger exports in services and high-value manufacturing, there is confidence that India's underlying potential will help it outpace growth in the rest of the world.

The survey points to a significant shift toward increased spending on luxury and premium goods and services. This trend is expected to be amplified with the growing middle-income class. While urban households collectively outspent their rural counterparts over the past decade, the latter has quickly caught up in spending on discretionary durable goods (including automobiles and electric and electronic goods) as well as services. There is a broad-based shift in the composition of consumption toward more non-food items, reflecting changing lifestyles and preferences that are here to stay.

## **INDUSTRY STRUCTURE AND DEVELOPMENTS**

The ceramic tiles industry in India is growing exponentially post-COVID, due to the recovery in demand. The country is one of the fastest-growing ceramic tile marketplaces globally, driven by factors such as the booming real estate sector, government policies supporting housing growth, and rising disposable income leading to a desire for beautification of spaces. The recent budget increased investment in PMAY for an additional 10 million houses and Government schemes to buy or build homes for the middle class are also anticipated to provide a further boost to the real estate market, thereby influencing the ceramic sector. The implementation of RERA has made the real estate sector more transparent, that has helped the growth of the sector. A surge in remodeling activities is expected to enhance product demand in the residential segment of the Indian ceramic tiles market.

India's ceramic tile production is expected to continue its upward trajectory, reaching a volume of more than 3.7 billion square meters by 2026, maintaining a steady year-on-year growth rate of nearly 8%. For the foreseeable future, the majority of this production (about 70%) is likely to be absorbed by domestic demand, indicating a strong domestic market. However, exports have reduced and this has created a big impact on domestic prices resulting lower margins for the producers.

Going forward, the Indian ceramic industry is poised to become the world's largest ceramic producer in coming years. The sector has already established itself as a major global player in the ceramic tile market, second only to China in terms of manufacturing, consumption, and export. This expansion is being driven by India's expanding urbanization and construction activity, leading to a surge in demand for various types of tiles, particularly glazed vitrified tiles. These tiles are popular among customers because they are incredibly durable and have a visually attractive appearance. The development of glazed vitrified and full body vitrified tiles has provided a tremendous impetus to the industry, with vitrified tiles often hailed as the 'tiles of the future'.

## **FUTURE OUT LOOK**

The low per capita consumption of tiles, rapid urbanization, increasing disposable income of nuclear families, untapped rural market and stable replacement demand shall continue to augur well for the Indian tile industry.

## **COMPANY OUTLOOK**

Your company is optimistic of its revival and is confident about its prospects in the coming years. The positive feedback about the products and increasing distribution infrastructure

will be further strengthened in the current financial year. The brand “REGENCY” still represents Quality and Service – and the customers of your company are welcoming the return of Regency to the market. The Company hopes to present a vastly improved financial performance in 2024-25.

### **HUMAN RESOURCES AND INDUSTRIAL RELATIONS**

Your Company believes that human resource is the most important asset of the organization and lays importance on competence and commitment of human capital for its growth.

As the Company is in the process of reviving and strengthening its operations, it has hired a strong senior and middle management team to helm its sales and production capabilities.. An enabling environment that fosters continuous learning and innovation remains a key focus area of your company.

### **BUSINESS REVIEW AND FINANCIAL PERFORMANCE**

During the year under review, the Company has earned revenue through sale of goods and have made significant efforts towards reviving and refurbishment of the Plant and is optimistic of commencing the production this year. There are several teething issues that are being resolved in a determined manner.

### **THREATS, RISKS AND CONCERNS**

Alongside the multiple opportunities, the building material sector in India, particularly the ceramic industry and bathware sector, faces a range of challenges as well. These challenges include competition from the unorganized sector, which poses a threat to the organized players. Additionally, the sector faces unstable input costs, which can negatively impact profitability. Furthermore, there are macroeconomic volatilities, including currency fluctuations, that can affect the sector. Also, environmental regulations and changing consumer preferences pose a threat to the sector. With the rising awareness of environmental issues, consumers are displaying an escalating preference for eco-friendly building materials, which could lead to a shift in demand away from traditional materials. Supply chain disruptions, due to global unrest, can also have a negative impact on the sector. To overcome these challenges and remain resilient in the future, the sector should demonstrate innovation, proactively seek alternative fuel sources, diversify revenue streams. In order to maintain a strong position in the coming years, the industry must also possess flexibility and adaptability to navigate evolving economic circumstances. Likewise, it is crucial for the Company to possess the agility and foresight to effectively address present and future challenges.

### **OPPORTUNITIES**

The coming year presents a plethora of opportunities for the tiles and bathware market

which is set to benefit the Company as well as the industry. One potential factor, boosting the prospect, is the reduction of supply chain disruptions, translating into lower freight costs and increased profitability. Moreover, reduced natural gas prices led to lower manufacturing costs, boosting the market competitiveness of products.

The Government's focus on infrastructure development through rising capital expenditure will serve as a catalyst for private players to augment their own capital expenditure. Further, rising awareness towards sustainability and sustainable products is set to drive the demand for eco-friendly building materials. This will provide vast opportunities to capitalize on. Additionally, new technologies such as 3D printing may result in the development of new products and more efficient manufacturing methods. Moreover, rapid urbanization in India will continue to uplift demand for residential and commercial constructions, resulting in increased demand for building materials. These variables, if combined with macroeconomic factors, set in motion a huge development potential in India's building material business in 2024, 2025 and beyond..

#### **INTERNAL CONTROL SYSTEM AND ADEQUACY**

The Company has a robust and effective internal control mechanism in place, one that is commensurate with the size, nature and complexities of its business. Internal control mechanism, which is benchmarked with evolving best practices at regular intervals, ensures Company's adherences to all applicable regulations in letter and spirit. It also protects Company's various assets from unauthorised use while also ensuring accuracy of financial reporting.

The internal audit is entrusted to an independent Chartered Accountants firm, M/s. Brahmayya and Co, Chartered Accountants. The Audit Committee periodically reviews the efficacy of control mechanism, offering improvement suggestions, as and when required. Internal control on financial reporting is attested by the Company's statutory auditors.

#### **DETAILS OF SIGNIFICANT CHANGES IN KEY RATIOS**

During the period under review, there was no significant change in the key ratios, since the Company is still in the process of reviving its operations.

prescribed under Section 133 of the Act read with relevant rules issued there under and other accounting principles generally accepted in India. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the company and for preventing and detecting the frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit. We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

A memorandum of settlement had been entered under Section 12 (3) of the Industrial Disputes Act, 1947 between the Company and the Regency Ceramics Staff and Workers Union. As per the MOU, the management has commenced works and it is expected that all conditions will be fulfilled in this financial year.

The insurance claim preferred in respect of Loss/damage to Company's Plant and Equipment, Finished Goods and Raw Materials during labour unrest on 27.01.2012 had been referred to arbitration. The management uses a provision matrix to determine the impairment Loss on the portfolio of trade and other receivables. The provision matrix is based on its historically observed Expected Credit Loss rates over the expected life of the trade receivables and is adjusted for forward-looking estimates.
