Zydus receives final approval from the USFDA for Potassium Chloride Extended-Release Capsules USP

Ahmedabad, 13 March 2019

Zydus Cadila has received the final approval from the USFDA to market Potassium Chloride Extended-Release Capsules USP (US RLD – Micro-K[®] Extended-Release Capsules), 8 mEq (600 mg) and 10 mEq (750 mg). It will be manufactured at the group's formulations manufacturing facility at SEZ, Ahmedabad.

This medication is a mineral supplement used to treat or prevent low amounts of potassium in the blood. Potassium helps your cells, kidneys, heart, muscles and nerves work properly. Some conditions that can lower the body's potassium level include severe prolonged diarrhoea and vomiting, hormone problems such as hyperaldosteronism, or treatment with 'water pills'/diuretics.

The group now has 254 approvals and has so far filed over 350 ANDAs since the commencement of the filing process in FY 2003-04.

About Zydus Cadila

Zydus Cadila is an innovative, global pharmaceutical company that discovers, develops, manufactures and markets a broad range of healthcare therapies. The group employs over 23,000 people worldwide and is dedicated to creating healthier communities globally. Zydus aspires to be a research-based pharmaceutical company by 2020.
