Foreign currency transactions are translated into Indian Rupee (INR) which is the functional currency (i.e.the currency of the primary economic environment in which the entity operates) using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at year end exchange rates are recognized in profit or loss.

Monetary foreign currency assets and liabilities at the year-end are translated at the year-end exchange rates and the resultant exchange differences are recognised in the Statement of Profit and Loss.

The company recognizes revenue when the amount of revenue can be reliably measured, it is probable that future economic benefits will flow to the Company and significant risk and rewards incidental to the sale of products is transferred to the buyer.

1.5 Income Tax:

The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

Deferred income tax is provided in full, using the liability method on temporary differences arising between the tax bases of assets and liabilities and their carrying amount in the financial statement. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are excepted to apply when the related deferred income tax assets is realised or the deferred income tax liability is settled.

Deferred tax assets are recognised for all deductible temporary differences and unused tax losses, only if, it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are off set where the Company has a legally

enforceable right to offset and intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Deferred tax assets/liabilities are not recognized for temporary differences between the carrying amount and tax bases of investments in subsidiary and associate where in case of assets it is not probable that the differences will reverse in the foreseeable future and taxable profit will not be available against which temporary difference can be utilized and in case of liabilities the group is able to control the timing of the reversal of the temporary differences and it is probable that the differences will not reverse in the foreseeable future.

Current and deferred tax is recognised in the Statement of Profit and Loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

Minimum Alternate Tax credit is recognised as deferred tax asset only when and to the extent there is convincing evidence that the Company will pay normal income tax during the specified period. Such asset is reviewed at each Balance Sheet date and the carrying amount of the MAT credit asset is written down to the extent there is no longer a convincing evidence to the effect that the Company will pay normal income tax during the specified period.

All mutual funds in scope of Ind-AS 109 are measured at fair value through profit and loss (FVTPL).

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit and loss. This category generally applies to borrowings.

De-Recognition of Financial Liabilities

A financial liability is de-recognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the de-recognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

The carrying amount of any component accounted for as a separate asset is derecognized when replaced. All other repairs and maintenance are charged to profit and loss during the reporting period in which they are incurred.

Depreciation methods, estimated useful lives and residual value:

Depreciation on Property, Plant and Equipment is provided as per Written down Method (WDV). Depreciation for the current year is provided on the basis of useful lives as prescribed in Schedule II to the Companies Act, 2013, which in the view of the management is reasonable based on the life the asset is expected to be used.

The assets' residual values and useful lives are reviewed, adjusted if appropriate, at the end of each reporting period.

1.17 Impairment of Financial assets:

In accordance with Ind-AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the following financial assets:

Actual results could differ from estimates.

1.19 Borrowing:

Borrowings are initially recognised at net of transaction costs incurred and measured at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in the Statement of Profit and Loss over the period of the borrowings using the effective interest method.

1.20 Borrowing Cost:

Interest and other borrowing costs attributable to qualifying assets are capitalised. Other interest and borrowing costs are charged to Statement of Profit and Loss.

1. 21 Employee Benefits:

Post-employment obligations

Defined benefit plans such as Gratuity:

The liability or asset recognised in the balance sheet in respect of defined benefit gratuity fund is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is calculated annually by actuaries using the projected unit credit method.

The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows by reference to market yields at the end of the reporting period on government bonds that have terms approximating to the terms of the related obligation.

The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is included in employee benefit expense in the Statement of Profit and Loss.

Remeasurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised in the period in which they occur, directly in other comprehensive income. They are included in Other Comprehensive Income in the statement of changes in equity and in the balance sheet.

1.22 Provisions and contingent liabilities:

Provisions are recognised when the Company has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation and the amount can be reliably estimated. Provisions are not recognised for future operating losses.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The discount rate used to determine the present value is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognised as interest expense.

Contingent Liabilities are disclosed in respect of possible obligations that arise from past events but their existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or where any present obligation cannot be measured in terms of future outflow of resources or where a reliable estimate of the obligation cannot be made.

Level 1: quoted prices (unadjusted) in active markets for financial instruments

Level 2: The fair value of financial instruments that are not traded in an active market is determined using valuation techniques which maximise the use of observable market data rely as little as possible on entity specific estimates.

40 FINANCIAL RISK MANAGEMENT

The Company's activities expose it to market risk, liquidity risk and credit risk. In order to minimise any adverse effects on the financial performance of the Company, the company has risk management policies as described below :-

(A) Credit risk

Credit risk refers to the risk of financial loss arising from default / failure by the counterparty to meet financial obligations as per the terms of contract. The Company is exposed to credit risk for receivables, cash and cash equivalents and financial guarantees. None of the financial instruments of the Company result in material concentration of credit risks.

Credit risk on receivables is minimum since sales are made after judging credit worthiness of the customers, advance payment or against letter of credit by banks. The history of defaults has been minimal and outstanding receivables are regularly monitored. Before giving loans to parties including subsidiary, the Company assesses the material risk on account of non-performance by any of the parties.

For derivative and financial instruments, the Company manage its credit risks by dealing with reputable banks and financial institutions.

Credit risk from balances with banks and financial institutions is managed by the Company's treasury department in accordance with the Company's policy. Investments of surplus funds are made only with approved counterparties and within credit limits assigned to each counterparty. The limits are set to minimise the concentration of risks and therefore mitigate financial loss through counterparty's potential failure to make payments.

(B) Liquidity risk

Liquidity risk refers to the risk that the Company fails to honour its financial obligations in accordance with terms of contract. Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due and to close out market positions.

Management monitors rolling forecasts of the company's liquidity position (including the undrawn credit facilities extended by banks and financial institutions) and cash and cash equivalents on the basis of expected cash flows. In addition, the Company's liquidity management policy involves projecting cash flows and considering the level of liquid assets necessary to meet these, monitoring balance sheet liquidity ratios against internal and external regulatory requirements and maintaining debt financing plans

Maturities of financial liabilities

The tables below analyse the Company's financial liabilities into relevant maturity groupings based on their contractual maturities for all non-derivative financial liabilities.

ANNEXURE “A” TO THE INDEPENDENT AUDITOR’S REPORT

Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)

In conjunction with our audit of the consolidated Ind AS financial statements of the Company as of and for the year ended March 31st 2022 we have audited the internal financial controls over financial reporting of **ASIAN TEA & EXPORTS LIMITED** (hereinafter referred to as “the Parent” or “Company”), as of that date.

Management’s Responsibility for Internal Financial Controls

The Board of Directors of the Parent, are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Parent considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (“the ICAI”). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the Parent’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor’s Responsibility

Our responsibility is to express an opinion on the Parents’s internal financial controls over financial reporting of the Company based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the “Guidance Note”) issued by the Institute of Chartered Accountants of India and the Standards on Auditing, prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Parent’s internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion and to the best of our information and according to the explanations given to us, the Parent, has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2022 based on the internal control over financial reporting criteria established by the company considering the essential components of internal control stated in the Guidance Note.

The Group is engaged in the Business of sale of made tea, Fibre Boards, Elevators, Yellow Peas, etc. The Parent Company, its Subsidiaries and associates are together referred as "The Group".

Note No. 1: SIGNIFICANT ACCOUNTING POLICIES

This note provides a list of significant accounting policies adopted in the preparation of these financial statements. These policies have been consistently applied to all years presented, unless otherwise stated.

1.1 Basis of Preparation of Financial Statements

1.1.1 Compliance with Ind AS:

These financial statements comply in all material aspects with the Indian Accounting Standards (Ind AS) notified under Section 133 of the Companies Act, 2013 (the "Act") [Companies(Indian Accounting Standards) Rules,2015] and other relevant provisions of the Act.

1.1.2 Classification of Current and Non-Current:

All the Assets and Liabilities have been classified as current or non-current as per the group's normal operating cycle and other criteria set out in the Ind AS 1- Presentation of Financial Statements and Schedule III to the Companies Act, 2013. Based on the nature of the products and the time between the acquisition of assets for processing and their realization in cash and cash equivalents, the group has ascertained its operating cycle to be 12 months for the purpose of current/non-current classification of assets and liabilities.

1.1.3 Historical Cost Convention:

These financial statements have been prepared in accordance with generally accepted accounting principles in India under the historical cost convention, except for the following:

- i) Defined Benefit Plans – Plan Assets measured at fair value.
- ii) Certain Financial Assets and Liabilities which are measured at fair value.
- iii) Assets held for sale - measured at lower of carrying amount or fair value less cost to sell.

1.1.4 Rounding of amounts:

All amounts disclosed in the financial statements and notes have been rounded off to the nearest Rupees as per the requirement of Schedule III, unless otherwise stated.

1.2 Segment Reporting:

Operating Segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker.

1.3 Foreign Currency Translation:

Foreign currency transactions are translated into Indian Rupee (INR) which is the functional currency (i.e. the currency of the primary economic environment in which the entity operates) using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at year end exchange rates are recognized in profit or loss.

Monetary foreign currency assets and liabilities at the year-end are translated at the year-end exchange rates and the resultant exchange differences are recognised in the Statement of Profit and Loss.

1.4 Revenue Recognition:

Revenue is measured at the fair value of the consideration received or receivable. Amounts disclosed as revenue are inclusive of tea claims and are net of sales return, sales tax/value added tax/goods and service tax, trade allowances and amount collected on behalf of third parties.

The group recognizes revenue when the amount of revenue can be reliably measured, it is probable that future economic benefits will flow to the group and significant risk and rewards incidental to the sale of products is transferred to the buyer.

1.5 Income Tax:

The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

Deferred income tax is provided in full, using the liability method on temporary differences arising between the tax bases of assets and liabilities and their carrying amount in the financial statement. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when the related deferred income tax assets is realised or the deferred income tax liability is settled.

Deferred tax assets are recognised for all deductible temporary differences and unused tax losses, only if, it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are off set where the group has a legally enforceable right to offset and intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Deferred tax assets/liabilities are not recognized for temporary differences between the carrying amount and tax bases of investments in subsidiary and associate where in case of assets it is not probable that the differences will reverse in the foreseeable future and taxable profit will not be available against which temporary difference can be utilized and in case of liabilities the group is able to control the timing of the reversal of the temporary differences and it is probable that the differences will not reverse in the foreseeable future.

Current and deferred tax is recognised in the Statement of Profit and Loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

Minimum Alternate Tax credit is recognised as deferred tax asset only when and to the extent there is convincing evidence that the group will pay normal income tax during the specified period. Such asset is reviewed at each Balance Sheet date and the carrying amount of the MAT credit asset is written down to the extent there is no longer a convincing evidence to the effect that the group will pay normal income tax during the specified period.

1.6 Cash and Cash Equivalents:

For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, bank overdraft, deposits held at call with financial institutions, other short-term highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

1.7 Trade Receivables:

Trade Receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment, if any.

1.8 Inventories:

Inventories are stated at lower of cost and net realizable value. Cost is determined using FIFO method and comprises of the purchase price including duties and taxes, freight inward and other expenditure directly attributable to the acquisition, but excluding trade discount and other rebates.

1.9 Investments and other Financial Assets:

The group classifies its financial assets in the following measurement categories:

- i) Those to be measured subsequently at fair value (either through other comprehensive income, or through profit or loss), and
- ii) Those measured at amortized cost.

The classification depend on the group's business model for managing the financial assets and the other contractual terms of cash flows.

1.9.1 Measurement – Equity Instruments:

The group measures its equity investment other than in subsidiaries and associates at cost. However where the group's management makes an irrevocable choice on initial recognition to present fair value gains and losses on specific equity investments in other comprehensive income, there is no subsequent reclassification, on sale or otherwise, of fair value gains and losses to the Statement of Profit and Loss.

1.9.2 Measurement – Mutual Funds:

All mutual funds in scope of Ind-AS 109 are measured at fair value through profit and loss (FVTPL).

1.9.3 De-Recognition of Financial Assets

A financial asset is primarily de-recognised when the rights to receive cash flows from the asset have expired or the group has transferred its rights to receive cash flows from the asset.

1.10 Financial Liabilities

Initial Recognition and Measurement

All financial liabilities are recognised initially at fair value and transaction cost that is attributable to the acquisition of the financial liabilities is also adjusted. These liabilities are classified as amortised cost.

Subsequent Measurement

These liabilities include are borrowings and deposits. Subsequent to initial recognition, these liabilities are measured at amortised cost using the effective interest method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit and loss. This category generally applies to borrowings.

De-Recognition of Financial Liabilities

A financial liability is de-recognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the de-recognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

1.11 Income Recognition:

Dividends- Dividends are recognized in profit or loss only when the right to receive payment is established.

Interest Income- Interest Income from debt instrument is recognised using the effective interest rate method.

1.12 Property, Plant and Equipment:

All items of Property, Plant and Equipment are stated at historical cost less depreciation. Historical Cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the group and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognized when replaced. All other repairs and maintenance are charged to profit and loss during the reporting period in which they are incurred.

Depreciation methods, estimated useful lives and residual value:

Depreciation on Property, Plant and Equipment is provided as per Written down Method (WDV). Depreciation for the current year is provided on the basis of useful lives as prescribed in Schedule II to the Companies Act, 2013, which in the view of the management is reasonable based on the life the asset is expected to be used.

The assets' residual values and useful lives are reviewed, adjusted if appropriate, at the end of each reporting period.

Gain and losses on disposals are determined by comparing proceeds with carrying amount. These are included in profit or loss within other gains/losses.

1.13 Equity:

Equity shares are classified as equity. Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax, from the proceeds.

1.14 Dividends:

Provision is made for the amount of any dividend declared, being appropriately authorised and no longer at the discretion of the group, on or before the end of the reporting period but not distributed at the end of the reporting period.

1.15 Earnings per Share:

1.15.1 Basic earnings per share

Basic earnings per share is calculated by dividing:

- The profit attributable to owners of the group
- By the weighted average number of equity shares outstanding during the financial year.

1.15.2 Diluted earnings per share:

Diluted earnings per share adjusts the figures used in the determination of basic earnings per share to take into account:

- The after income tax effect of interest and other financing costs associated with dilutive potential equity shares, and
- The weighted average number of additional equity shares that would have been outstanding assuming the conversion of all dilutive potential equity shares.

1.16 Impairment of Financial assets:

In accordance with Ind-AS 109, the group applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the following financial assets:

Trade Receivables

For recognition of impairment loss on Trade Receivable, the group determines whether there has not been a significant increase in the credit risk since initial recognition and if the credit risk has not increased significantly, no impairment loss is provided.

Other Financial Assets

For recognition of impairment loss on other financial assets and risk exposure, the group determines whether there has been a significant increase in the credit risk since initial recognition and if credit risk has increased significantly, impairment loss is provided.

1.17 Use of Estimates:

The Preparation of financial statements in conformity with the generally accepted accounting principles in India requires the management to make estimates and assumptions that affects the

reported amount of assets and liabilities as at the balance sheet date, the reported amount of revenue and expenses for the periods and disclosure of contingent liabilities at the balance sheet date. The estimates and assumptions used in the financial statements are based upon management's evaluation of relevant facts and circumstances as of the date of financial statements and actual results could differ from estimates.

1.18 Borrowing:

Borrowings are initially recognised at net of transaction costs incurred and measured at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in the Statement of Profit and Loss over the period of the borrowings using the effective interest method.

1.19 Borrowing Cost:

Interest and other borrowing costs attributable to qualifying assets are capitalised. Other interest and borrowing costs are charged to Statement of Profit and Loss.

1. 20 Employee Benefits:

Post-employment obligations

Defined benefit plans such as Gratuity:

The liability or asset recognised in the balance sheet in respect of defined benefit gratuity fund is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is calculated annually by actuaries using the projected unit credit method.

The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows by reference to market yields at the end of the reporting period on government bonds that have terms approximating to the terms of the related obligation.

The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is included in employee benefit expense in the Statement of Profit and Loss.

Remeasurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised in the period in which they occur, directly in other comprehensive income. They are included in other comprehensive income in the statement of changes in equity and in the balance sheet.

1.21 Provisions and contingent liabilities:

Provisions are recognised when the group has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation and the amount can be reliably estimated. Provisions are not recognised for future operating losses.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The discount rate used to determine the present value is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognised as interest expense.

Contingent Liabilities are disclosed in respect of possible obligations that arise from past events but their existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the group or where any present obligation cannot be measured in terms of future outflow of resources or where a reliable estimate of the obligation cannot be made.

1.22 Principles of consolidation and equity accounting:

1.22.1 Subsidiaries

Subsidiaries are all entities over which the group has control. The group controls an entity when the group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the relevant activities of the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the group. They are deconsolidated from the date that control ceases.

The group combines the financial statements of the parents and its subsidiaries line by line adding together like items of assets, liabilities, equity, income and expenses. Intercompany transactions, balances and unrealised gains on transactions between group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the transferred asset. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the group.

1.22.2 Associates

Associate is an entity over which the group has significant influence but not control or joint control. Investment in associate are accounted for using the equity method of accounting, after initially being recognised at cost.

Under the equity method of accounting, the investments are initially recognised at cost and adjusted thereafter to recognise the group's share of the post-acquisition profit or losses of the investee in profit and loss, and the group's share of other comprehensive income of the investee in other comprehensive income. Dividends received or receivable from associate are recognised as a reduction in the carrying amount of the investment.

1.23 Control

The Group assessed whether or not it has control on its investees based on whether, as an investor, it has the power/rights and consequently the practical ability to direct the relevant activities of its investees unilaterally. In making this judgement, the Group considered the absolute size of its holding, the relative size of and dispersion of other shareholders, and whether any contractual arrangements exist between the Company (and its subsidiaries) and other shareholders of the investees. Based on this, and in accordance with its Accounting Policy, the Group has determined that the entities listed in the notes to the financial statements are the only entities over which Group has control.

41 FINANCIAL INSTRUMENTS

(i) Fair value hierarchy

Financial assets and financial liabilities measured at fair value in the statement of financial position are classified into three Levels of a fair value hierarchy. The three Levels are defined based on the observability of significant inputs to the measurement, as follows:

Level 1: quoted prices (unadjusted) in active markets for financial instruments

Level 2: The fair value of financial instruments that are not traded in an active market is determined using valuation techniques which maximise the use of observable market data rely as little as possible on entity specific estimates.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3.

NOTES ON CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH, 2022

42 FINANCIAL RISK MANAGEMENT

The Group's activities expose it to market risk, liquidity risk and credit risk. In order to minimise any adverse effects on the financial performance of the Group, the Group has risk management policies as described below :-

(A) Credit risk

Credit risk refers to the risk of financial loss arising from default / failure by the counterparty to meet financial obligations as per the terms of contract. The Group is exposed to credit risk for receivables, cash and cash equivalents and financial guarantees. None of the financial instruments of the Group result in material concentration of credit risks.

Credit risk on receivables is minimum since sales are made after judging credit worthiness of the customers, advance payment or against letter of credit by banks. The history of defaults has been minimal and outstanding receivables are regularly monitored. Before giving loans to parties including subsidiary, the Group assesses the material risk on account of non-performance by any of the parties.

For derivative and financial instruments, the Group manage its credit risks by dealing with reputable banks and financial institutions.

Credit risk from balances with banks and financial institutions is managed by the Group's treasury department in accordance with the Group's policy. Investments of surplus funds are made only with approved counterparties and within credit limits assigned to each counterparty. The limits are set to minimise the concentration of risks and therefore mitigate financial loss through counterparty's potential failure to make payments.

(B) Liquidity risk

Liquidity risk refers to the risk that the Group fails to honour its financial obligations in accordance with terms of contract. Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due and to close out market positions.

Management monitors rolling forecasts of the Group's liquidity position (including the undrawn credit facilities extended by banks and financial institutions) and cash and cash equivalents on the basis of expected cash flows. In addition, the Group's liquidity management policy involves projecting cash flows and considering the level of liquid assets necessary to meet these, monitoring balance sheet liquidity ratios against internal and external regulatory requirements and maintaining debt financing plans.

Maturities of financial liabilities

The tables below analyse the Group's financial liabilities into relevant maturity groupings based on their contractual maturities for all non-derivative financial liabilities.

The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

Contractual maturities of financial liabilities as at 31st March 2021	Less than 1 year	Between 1 and 2 years	Between 2 and 5 years	More than 5 years	Total
Financial Liabilities					
Borrowings	3,02,333	21,366	50,314	-	3,74,013
Trade Payables	1,81,059	-	-	-	1,81,059
Total	4,83,392	21,366	50,314	-	5,55,072

(C) Market risk

(i) Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

The Group operates internationally and is exposed to foreign exchange risk arising from foreign currency transactions, primarily with respect to the USD, EUR and GBP. Foreign exchange risk arises from future commercial transactions and recognised assets and liabilities denominated in a currency that is not the Group's functional currency (INR). The risk is measured through a forecast of highly probable foreign currency cash flows.

"The Group, as risk management policy, hedges foreign currency transactions to mitigate the risk exposure and reviews periodically to ensure that the results from fluctuating currency exchange rates are appropriately managed."

(ii) Price risk

The Group's exposure to equity securities price risk arises from unquoted investments held and classified in the balance sheet as Cost. The Group is not expecting high risk exposure from its investment in securities.

(D) Agricultural Risk

Cultivation of tea being an agricultural activity, there are certain specific financial risks. These financial risks arise mainly due to adverse weather conditions, logistic problems inherent to remote areas, and fluctuation of selling price of finished goods (tea) due to increase in supply/availability.

The Group manages the above financial risks in the following manner:

Sufficient inventory levels maintained so that timely corrective action can be taken in case of adverse weather conditions.

Slightly higher level of consumable stores are maintained in order to mitigate financial risk arising from logistics problems.

Sufficient working-capital-facility is obtained from banks in such a way that procurement and sale of tea is not adversely affected even in times of adverse conditions.

- (a) Safeguard their ability to continue as a going concern, so that they can continue to provide returns for shareholders and benefits for other stakeholders, and

In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.
