Press Release

Thermax bags Rs. 1,176 crore order for a Sulphur Recovery Block

Pune: March 17, 2022

Thermax Limited has concluded an order of Rs. 1,176 crore from an Indian public sector refinery to set up their Sulphur Recovery Block on LSTK basis.

The Sulphur Recovery Block includes 2 x 240 TPD Sulphur Recovery Unit (SRU) along with Tail Gas Treatment Unit (TGTU), 690 TPH Amine Regeneration Unit (ARU), 200 TPH Sour Water Stripper – phenolic and 95 TPH Sour Water Stripper non-phenolic.

Reducing the sulphur content in fuels produced by the refinery is important for emission control. The sulphur recovery unit converts the hydrogen sulphide gas generated during the process to elemental sulphur, thus decreasing the amount of sulphur compounds released into the atmosphere.

The Sulphur Recovery Block will be a part of the customer's ongoing refinery expansion project. This landmark project is being pursued as a part of the Government of India's North East Hydrocarbon Vision 2030. The project will significantly contribute to the country's growth as well as the economic development of the entire North-Eastern region.

The scope of supply includes project management, engineering, procurement, manufacturing, construction, and commissioning of the Sulphur Recovery Block. The project is slated to be completed in 28 months.

About Thermax Limited: Thermax Limited, a leading energy and environment solutions provider, is one of the few companies in the world that offers integrated innovative solutions in the areas of heating, cooling, power, water and waste management, air pollution control and chemicals. Thermax has manufacturing facilities in India, Europe and Southeast Asia. The sustainable solutions Thermax develops for client companies are environment-friendly and enable efficient deployment of energy and water resources.
