Yuvraj changes investment gear

Mansi Verma
mansiverma@livemint.com
MUMBAI

Like in cricket, Yuvraj Singh has seen setbacks in his investment journey as well.

From helping India lift the 2011 World Cup with his all-round consistency, to coming down with a shattering rare germ cell cancer between his lungs, the iconic cricketer has seen it all. Singh didn't know where his cricket career was headed when he was left out of the national team in 2013. "I didn't know where my career was going, so I thought about what I could do with the money I had earned from cricket," Singh told *Mint* in an interview.

From this depth of despondency was born YouWeCan Ventures in 2015, his investment vehicle that has since backed as many as 12 startups. His bet on healthcare marketplace Healthians paid off handsomely, returning 100x, but some others failed spectacularly, too.

Wiser in his entrepreneurial journey, Singh says that he will now take more calculated risks.

On 12 November, Singh embarked on this new approach by launching Twiddles, a healthy snacking brand, where he will serve as co-founder.

Singh will hold a double-digit minority share in the company. Alinity Studios will hold a majority stake in Twiddles, while the rest would be held by investors of Alinity. For Singh, Twiddles is the first company where he is taking an operational role as a founder, and will also drive growth as the face of the brand.

'Starlink must resolve issues'

Govt open to offering satellite broadband licence to Musk's firm, but awaits security assurances, says Scindia

Aman Gupta & Gulveen Aulakh
NEW DELHI

The government is "happy to give" a licence to Elon Musk's Starlink as long as it complies with the conditions laid down for offering services in India and addresses security concerns, telecom minister Jyoti Raditya Scindia said on Tuesday.

"They (Starlink) are in the process of addressing the (security) concerns, and they have to check all the boxes," Scindia said in a media briefing, noting that the SpaceX-owned satellite broadband provider's application was under process. He did not elaborate on the security concerns the Indian government has raised with Starlink.

Indian telecom firms Reliance Jio Infocomm Ltd and Bharti Airtel Ltd are resisting Starlink's entry into the satellite broadband market, arguing that the US-based company's direct-to-consumer service will compete with their retail services, distorting the level-playing field. Spectrum allocation for satellite broadband is at the

Scindia's assurance comes amid a spectrum tug-of-war with local telcos. MINT

centre of the ongoing tussle between the two sides. Starlink has sought administrative spectrum allocation, and the Indian carriers have cited 'same service, same rules' as the benchmark for spectrum allocation. The same service, same rules principle refers to telecom operators and any company providing similar services as wireless carriers should be regulated in the same way. The Telecom Regulatory Authority of India (Trai) is working on the method of spectrum allocation for satellite broadband services in the country. Indian operators and Starlink have stated their views, including during an open-house discussion by Trai last week.

In response to questions on granting waiver on the bank guarantees of ₹27,000 crore sought by Vodafone Idea, Scindia said that any assistance that has to be given will not be company-specific but will be 'sectoral'. "The sector received a tremendous amount of boost from government in last 2.5 years. We have four players, which is necessary from a sectoral point of view. The customer must have a choice. All assistance given till now was from a sectoral point of view, except for BSNL."

Scindia said BSNL set up 50,000 radio access networks for 4G and all 100,000 sites are expected to be up by May or June 2025. Some of the sites would be 5G-enabled by the middle of next year, he added. On relief sought by Vodafone Idea on adjusted gross revenue (AGR) calculations, he said the Supreme Court verdict 'stands as is' and if the Centre were to take a decision, it would be notified in time.

On the question of whether telecom service providers will be asked to remove Chinese equipment from legacy networks, Scindia said security cannot be compromised, and the security checks were there for all networks, but replacement of legacy networks will be "evaluated at a later time". "At this point of time, the trusted source system is fully in place," he said.

And whether a stand has been taken on the demand of the telecom operators to get a share of revenues from OTT players, the Union minister said that the government will hear the views of the carriers through the advisory committee mechanism set up by the minister, but noted that the telecom regulator will take a view on the matter. "They've also circulated a consultation paper on the issue," said Scindia. aman.gupta@hdtigital.in For an extended version of this story go to livemint.com

The minister, however, did not elaborate on the security concerns the government has raised with the American firm

AI-enabled solutions help Siemens improve margin: Global CTO

Nehal Chaliawala
nehal.chaliawala@livemint.com
MUMBAI

Industrial technology major Siemens will be focusing on delivering artificial intelligence-based solutions to its customers over selling simple components to differentiate itself and enrich its margins, a top executive at the firm said.

The German company, with a revenue of €77.8 billion in fiscal ended September 2023, is also exploring the development of large language model-based interface for industrial

solutions that will help its clients simplify industrial design and automation, according to Peter Koerte, who is the chief technology officer, chief strategy officer and a board member at Siemens AG.

With these solutions, engineers can give natural language inputs for creating a design of the products instead of manually making designs in computer-aided design (CAD) software, Koerte said. "Think about the time saved, and also the many different variations you can create because of the saved time."

Siemens' recent acquisition of industrial simulation and analysis software maker Altair Engineering will form the basis of developing these solutions, he added.

"Today, we are all fascinated by ChatGPT but show me where has it really transformed industry yet. This is where Siemens comes into play. We take those models, and we apply them and put them to productive use, for

energy management, resilient supply chains, whatever it is."

Siemens, which has a listed subsidiary in India, is bullish on the market for the adoption of its AI-enabled smart industrial products. The Indian arm, Siemens Ltd, has seen its profit margin improve 1.6 percentage points year-on-year to 11.6% in the April-June quarter. This has been partly attributed to higher margins from deliver-

ing more AI-enabled solutions than simply selling industrial products and equipment.

"In the last three years, since we introduced Siemens Xcelerator, there has been a margin expansion. And a large part of that margin expansion is because of providing solutions as against providing dumb boxes," Sunil Mathur, managing director and chief executive officer, Siemens Ltd, said.

Siemens Xcelerator is a digital business platform that includes a portfolio of software and services to help industries in their digital transformation.

"Almost every single thing that we sell today is somehow connected," Koerte said. "Our customers say, 'You know what, don't send me just the box. Send me the use case. Tell me how much energy I can save. Show me how much productivity I can get.'"

The smart hardware that the company sells collects large volumes of data. The company then uses software including AI to analyze this data to optimize the output of its customers.
