Empowering mechanics in the commercial vehicle segment

Schaeffler REPERT Mobile Training Van is back on its knowledge trail

Pune, India | 30th August 2024 | Schaeffler India, a leading motion technology company, is pleased to be back with the second edition of its highly successful **REPERT Mobile Training Van campaign**. This program aims to upskill mechanics across the nation, specially designed for the commercial vehicle (CV) segment.

The first edition of REPERT Training Van tour in India, was participated by over 2600 mechanics and proved to be a huge success. The mobile technical training unit covered over 9000 kilometers, reaching out to mechanics and automotive professionals in key markets across Northern, Central, and Western India, traversing 8 states and 42 cities across the nation. The training program from Schaeffler is designed to offer exclusive, in-depth, hands-on training sessions for mechanics to equip them with necessary skills to install and maintain vital replacement products correctly, enabling longer lifecycles.

Mr. Arbind Singh, Vice President of Automotive Aftermarket Schaeffler India, said: "We are excited to commence the second edition of our REPERT Training Van campaign across Central and Southern parts of India. Continuing with our innovative approach of on-the-go training, we aim to strengthen our relationship with our mechanic partners as well as reinforce our position as a trusted partner in the automotive community."

The REPERT training van, equipped with a dedicated product display area and an exclusive training room, will offer mechanics an immersive learning experience. A team of experienced Schaeffler technical experts will conduct rigorous training sessions, delving deep into Schaeffler's cutting-edge automotive products. This initiative is a testament to Schaeffler's dedication to fostering a culture of continuous learning and skill development within the industry.

Additionally, the Schaeffler REPERT App will also be highlighted, that is the perfect go-to app for mechanics providing comprehensive product information and valuable insights such as tightening torques, work values or the required repair instructions when searching for the right spare part. Garage professionals in the automotive aftermarket can easily find many helpful tips in the new application that support their everyday work. The app combines the functions of the well-known REPERT online portal with the advantages of mobile use. The REPERT App is now available for free download on iOS and Android operating systems, for both smartphones and tablets.
