Royal Sense Limited is excited to announce the official launch of our latest Orthotics Care Product, the Stergic Iris Abdominal Support Belt provides compression and stability, aiding in post-surgery recovery, back support, and easing discomfort during pregnancy.

*Here are some details you might find in a Stergic Iris Abdominal Support Belt.*

*An abdominal support belt is a specialized garment designed to provide compression and stability to the abdominal region. It is commonly used for various purposes such as post-surgery recovery, especially after procedures like abdominal hernia repair or cesarean section. The belt helps to reduce swelling, provide support to weakened abdominal muscles, and promote healing by keeping the surgical area secure and protected.*

*Additionally, abdominal support belts are beneficial during pregnancy to alleviate back pain, support the lower back, and reduce discomfort caused by the growing belly. They can also aid in improving posture by providing gentle yet firm support to the spine and surrounding muscles. The belts are typically adjustable to accommodate different body sizes and are made from breathable materials for comfort during extended wear.*

**About Royal Sense Limited:** Royal Sense Limited is a leading provider of innovative diagnostic solutions for healthcare professionals worldwide. With a focus on quality, reliability, and accessibility, we are dedicated to improving patient care and advancing the field of medical diagnostics.
