26. Overview of the entity’s material responsible business conduct issues pertaining to environmental and social matters that present a risk or an opportunity to your business, rationale for identifying the same, approach to adapt or mitigate the risk along-with its financial implications¹

¹Material issues identified are referred from the Sustainability Accounting Standards Board (SASB) 2023-24 version. SASB Standards are maintained and enhanced by the International Sustainability Standards Board (ISSB); this follows the SASB’s merger with the International Integrated Reporting Council (IIRC) into the Value Reporting Foundation (VRF) and subsequent consolidation into the IFRS® Foundation in 2022.

Sl. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk/opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
1	Energy Management	Risk	Energy is essential for industrial machinery manufacturing, with purchased electricity being the main energy expense, followed by purchased fuels. The type of energy, the amount of energy used and energy management strategies vary based on the products made. The mix of energy sources—whether generated on-site, grid-sourced or alternative—affects the cost and reliability of the energy supply, influencing the Company’s cost structure and regulatory risk. With increasing energy costs and installation capex – this risk is one of the key environmental & cost risk.	The Company has installed an energy-efficient Variable Refrigerant Flow (VRF) system for air conditioning purposes at the plant. It helps Control Print to reduce energy consumption and use of ecofriendly system for air conditioning.	Negative. *There has been no negative impact in the reporting period of FY 2023-24.
2	Workforce Health & Safety	Risk	Employees in industrial machinery manufacturing facilities encounter health and safety risks from operations of heavy machinery, moving equipment and electrical hazards. If safety practices are not adhered to, it can lead to higher healthcare costs, litigations and frequent work disruptions.	The said risk can be dealt with by enforcing robust safety protocols, such as incident reporting and investigation, and fostering a safety-oriented culture. The Company has implemented ISO 45001:2018 Occupational Health and Safety system at its Guwahati and Nalagarh plant. The Company has established Standard Operating Procedures (SOPs) that encompass the process of hazard identification and also provides periodic training to employees and conducts mock drills for firefighting, first aid and critical conditions.	Negative. *There has been no negative impact in the reporting period of FY 2023-24.

Sl. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk/opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
3	Materials Sourcing	Risk	Industrial machinery manufacturers face significant supply chain risks when utilizing critical materials in their products. These materials often lack substitutes and are sourced from a limited number of countries, which can be affected by geopolitical instability. Additionally, the rising global demand for these materials from various sectors intensifies competition, potentially leading to price hikes and supply uncertainties.	The Company, to address these risks, place weekly bulk orders. By doing so, we can build a buffer stock that provides a backup in case of supply disruptions, ensuring we have sufficient materials to meet production demands. This strategy helps us avoid shortages and stabilize our supply chain despite the external challenges.	Negative. *There has been no negative impact in the reporting period of FY 2023-24.
4	Remanufacturing designs and services	Opportunity	Industrial machinery and goods manufacturing relies heavily on materials like steel, iron, aluminium, glass, and plastics. Remanufacturing industrial machinery systems, offers a valuable opportunity for companies to reduce the need for raw materials in the production of new machinery. This approach also cuts down on the time and resources required to produce finished goods. By remanufacturing products, companies can derive value from items that would otherwise be discarded or recycled. Additionally, reusing end-of-life parts to build remanufactured machines can lead to significant cost savings and provide new sales opportunities. Integrating remanufacturing into the process and design phases can thus lower raw material demand, reduce manufacturing costs and open up new revenue streams.

Sl. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk/opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
5	Legal & Regulatory Framework	Opportunity	<p>Implementing a robust and well-defined governance structure is crucial for ensuring effective decision-making and operational management within an organization. A strong governance framework provides clear guidelines and processes for making decisions, which helps in aligning the organization's activities with its strategic goals. It establishes accountability and transparency, ensuring that all stakeholders understand their roles and responsibilities.</p> <p>This structure also facilitates better risk management by identifying potential issues early and creating mechanisms to address them promptly. By having a clear governance framework, organizations can improve their compliance with legal and regulatory requirements, thereby reducing the risk of penalties and enhancing their reputation.</p> <p>The Company has established robust processes which helps them to build their Corporate Governance journey in an efficient manner.</p>	Not Applicable	Positive

Governance, leadership and oversight

7. Statement by director responsible for the business responsibility report, highlighting ESG related challenges, targets and achievements

With a steadfast commitment to minimizing environmental impact and actively contributing to society, sustainability remains at the core of our Company’s priorities. Through tangible actions and persistent efforts, we strive to reduce our carbon footprint and integrate sustainable practices throughout our operations. This firm commitment underscores our role as a socially responsible corporate citizen.

Our Company is dedicated to the efficient recycling of all plastic waste, including packaging materials. In collaboration with third-party agencies, we ensure the responsible management of plastic waste, promoting a circular economy and minimizing environmental harm.

The implementation of the occupational health and safety system ISO 45001:2018 marks a significant step toward ensuring a safe and healthy working environment for our employees, highlighting the importance of occupational well-being. This proactive approach extends beyond internal benefits, contributing to broader social progress and environmental protection goals.

By maintaining a focus on these core pillars, our Company aims to create a meaningful and lasting impact. Prioritizing workplace health and safety and actively engaging in responsible plastic waste management, we seek to create a positive ripple effect that extends beyond our organization. In our pursuit of a sustainable future for all, we aim to act as a catalyst for change and drive momentum towards a better world.

No such concerns arose hence, no corrective action taken.

PRINCIPLE 4: Businesses should respect the interests of and be responsive to all its stakeholders

Essential Indicators:

1. Describe the processes for identifying key stakeholder groups of the entity.

CPL acknowledges the crucial role played by stakeholders in its journey and recognizes the importance of collaborating with them to fully understand their concerns and achieve optimal outcomes. With a focus on meeting stakeholder needs, the Company implements initiatives and programs tailored to address their specific requirements.

“Annexure - C” to the Board’s Report (Contd.)

Our approach to stakeholder engagement involves identifying key internal and external stakeholders, followed by assessing the impact of each stakeholder group on our business and vice versa. Through this process, we prioritize key stakeholders to better understand their expectations and concerns. Regular interactions with our stakeholders across different channels have strengthened our relationships and improved our organizational strategy.

2. List stakeholder groups identified as key for your entity and the frequency of engagement with each stakeholder group.

Stakeholder Group	Whether identified as Vulnerable & Marginalized Group (Yes/No)	Channels of Communication (Email, SMS, Newspaper, Pamphlets, Advertisement, Community, Meetings, Notice Board, Website, Other)	Frequency of engagement (Annually/ Half yearly/ Quarterly/ others - please specify)	Purpose and scope of engagement including key topics and concerns raised during such engagement

Leadership Indicators

1. Provide the processes for consultation between stakeholders and the Board on economic, environmental, and social topics or if consultation is delegated, how is feedback from such consultations provided to the Board.

There are different levels of engagement when it comes to involving stakeholders in decision-making processes:

Inform: Providing stakeholders with unbiased information to help them understand the project, issue, and potential solutions. There’s no opportunity for stakeholder input or decision-making.

“Annexure - C” to the Board’s Report (Contd.)

Consult: Gathering feedback on the provided information, ranging from minimal interaction like online surveys to extensive feedback sessions. Stakeholder input is considered in the decision-making process.

Involve: Directly working with stakeholders throughout the process to ensure their concerns and desired outcomes are fully understood and considered at each stage. Final decisions are still made by the organization, but with input from stakeholders.

Collaborate: Partnering with stakeholders in decision-making, including developing alternative solutions and choosing the preferred option together. The goal is to achieve consensus.

Empower: Giving stakeholders final decision-making power, often through voting or referenda. This level of engagement is rare and typically involves a small group representing important stakeholder interests.

2. Whether stakeholder consultation is used to support the identification and management of environmental, and social topics (Yes / No). If so, provide details of instances as to how the inputs received from stakeholders on these topics were incorporated into policies and activities of the entity.

At Control Print, engaging with stakeholders is crucial for managing ESG (Environmental, Social and Governance) aspects related to governance oversight, employee empowerment and well-being, diversity and inclusion, stakeholder engagement and ESG offerings. We prioritize identifying and addressing key material issues based on their impact on both stakeholders and our business. This feedback is integral to shaping goals and plans in these domains.

3. Provide details of instances of engagement with, and actions taken to, address the concerns of vulnerable/ marginalized stakeholder groups.

We are committed to growing our business sustainably while prioritizing environmental protection and community welfare. We believe in nurturing relationships with all stakeholders— consumers, customers, employees, shareholders, business partners and society at large—under a multi-stakeholder model for sustainable growth. Our Code of Business Principles (CoBP) and Code Policies govern our interactions with key stakeholders, ensuring transparency, honesty, integrity and openness in all engagements.

Our engagement with stakeholders is managed by relevant departments in consultation with leadership and overseen by the ESG Committee. Feedback on environmental, social or economic matters from various stakeholder groups is shared with the Board’s ESG Committee. Additionally, we have a CSR Committee dedicated to reviewing, monitoring and providing strategic direction for our corporate social responsibility practices and initiatives.

4. Do you have a focal point (Individual/ Committee) responsible for addressing human rights impacts or issues caused or contributed to by the business? (Yes/No)

Yes, The Company has established a grievance cell dedicated to monitoring and addressing all grievances. At the forefront, the HR department manages grievances. Additionally, the Company operates under an open-door policy and internal mechanisms enabling employees to raise concerns directly with senior management.

Moreover, a Whistleblower Policy is in effect, allowing employees to report any instances of unethical behaviour or violations of the Company’s Code of Conduct to the designated whistleblower officer.

Furthermore, the Company upholds the principle of respecting the dignity of all individuals. To foster a safe and inclusive workplace, Committee under Prevention of Sexual Harassment (POSH) Act are established throughout the organization. These committees are tasked with addressing instances of sexual harassment and taking necessary actions for resolution

5. Describe the internal mechanisms in place to redress grievances related to human rights issues

The Company has established internal mechanisms to address grievances related to human rights issues. These include a grievance handling mechanism designed for both workers and employees. Additionally, the Company has formulated a Whistleblower policy to provide a vigil mechanism for stakeholders, employees and workers to report grievances to the designated whistle officer.

Under this policy, employees are empowered to report any instances of unethical behavior, suspected fraud or violations of the Company’s Code of Conduct. Through these practices, CPL ensures that individuals are treated with dignity and that their rights are safeguarded.

6. Number of Complaints on the following made by employees and workers:

7. Complaints filed under the Sexual Harassment of Women at Workplace (Prevention, Prohibition and Redressal) Act, 2013, in the following format:

The Company has implemented a Prohibition of Sexual Harassment (POSH) Policy aimed at addressing workplace discrimination and harassment. In line with this policy, the Company has established an Internal Complaints Committee responsible for handling cases related to discrimination and harassment. As part of the process, the Complainant’s identity is kept confidential throughout the investigation of any specific matter. The Presiding Officer of the Internal Complaints Committee (ICC) is a senior individual within the company who possesses relevant experience and a contextual understanding of the appropriate course of action in sexual harassment cases. The decision regarding the action to be taken against an employee in a POSH case is made in consultation with an external ICC member. Overall, the ICC ensures that the principle of natural justice is adhered to throughout the entire process. Moreover, the Company has a Whistle blower policy in place that offers various protections to individuals who report any unethical practices happening in the workplace.

Complaints on POSH upheld		

8. Mechanisms to prevent adverse consequences to the complainant in discrimination and harassment cases

The Company has established a POSH Policy to address workplace discrimination and harassment, accompanied by an Internal Complaints Committee (ICC) responsible for handling related cases. Maintaining confidentiality of the complainant’s identity throughout investigations is paramount to prevent any negative repercussions. The Presiding Officer, a senior member with relevant expertise, oversees the ICC’s proceedings, ensuring adherence to principles of natural justice. Decisions concerning actions in POSH cases involve consultation with an external ICC member. Additionally, the Company’s Whistleblower policy offers protections to individuals reporting unethical practices, further shielding them from adverse outcomes.

9. Do human rights requirements form part of your business agreements and contracts?

Yes, human rights requirements form part of the business agreements and contracts of the Company.

10. Assessment for the year:

	% of your plants and Offices that were assessed (by entity or statutory authorities or third parties)
Child Labour	100.00
Forced/involuntary labour	100.00
Sexual Harassment	100.00
Discrimination at workplace	100.00
Wages	100.00

11. Provide details of any corrective actions taken or underway to address significant risks / concerns arising from the assessments at Question 10 above.

No such concerns arose hence, no corrective action taken.

“Annexure - C” to the Board’s Report (Contd.)

Leadership Indicators

1. Details of a business process being modified / introduced as a result of addressing human rights grievances/ complaints

While there have been no specific instances requiring modification or introduction of a business process in response to human rights grievances or complaints, the Company has established accessible channels for employees to address any grievances. Employees can directly email the HR department, which promptly resolves grievances in a time-bound manner. Moreover, the Company’s policies, such as the Prevention of Sexual Harassment (POSH) policy and Whistleblower Policy, provide provisions for grievance redressal, ensuring a comprehensive framework for addressing concerns related to human rights.

2. Details of the scope and coverage of any Human rights due-diligence conducted.

Human rights is a critical aspect of a Company’s commitment to ethical practices and sustainable operations through internal audits. These audits ensure that our operations adhere to human rights standards and practices, safeguarding the rights and well-being of all employees and workers.

3. Is the premise/office of the entity accessible to differently abled visitors, as per the requirements of the Rights of Persons with Disabilities Act, 2016?

Yes, the Company prioritizes inclusivity and accessibility in its premises and office spaces in accordance with the requirements of the Rights of Persons with Disabilities Act, 2016. It has installed lifts and ramps throughout the premises to ensure easy access for individuals using wheelchairs. These accessibility features are designed to facilitate comfortable navigation for all visitors, regardless of their physical abilities, ensuring a barrier-free environment within the Company’s facilities.

4. Details on assessment of value chain partners:

	% of value chain partners (by value of business done with such partners) that were assessed
Sexual Harassment	100.00
Discrimination at workplace	100.00
Child Labour	100.00
Forced Labour / Involuntary Labour	100.00
Wages	100.00

5. Provide details of any corrective actions taken or underway to address significant risks / concerns arising from the assessments at Question 4 above.

No such concerns have been reported, hence no corrective action has been taken.

PRINCIPLE 6: Businesses should respect and make efforts to protect and restore the environment

Essential Indicators:

Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency? (Y/N) If yes, name of the external agency.

There hasn't been an external review or analysis conducted to assess various aspects of our operations, performance or compliance with standards or regulations.

2. Does the entity have any sites / facilities identified as designated consumers (DCs) under the Performance, Achieve and Trade (PAT) Scheme of the Government of India? (Y/N) If yes, disclose whether targets set under the PAT scheme have been achieved. In case targets have not been achieved, provide the remedial action taken, if any

Our Company is not included within the ambit of the Perform, Achieve, and Trade (PAT) Scheme initiated by the Government of India.

There hasn’t been an external review or analysis conducted to assess various aspects of our operations, performance, or compliance with standards or regulations.

5. Has the entity implemented a mechanism for Zero Liquid Discharge? If yes, provide details of its coverage and implementation.

The Guwahati Unit has installed a Sewage Treatment Plant (STP) with a capacity of 7.5 kiloliters per day (KLD) and a Rainwater Harvesting Tank with a capacity of 20,000 liters on their premises. However, they have not yet fully implemented a Zero Liquid Discharge mechanism. The stepwise implementation of STP is as follows:

Step-1: Raw Sewage Collection Tank

The raw sewage collection process is crucial in sewage treatment as it removes large coarse particles. This initial operation is vital at treatment plants for the following purposes:

- a. Eliminating floating solids that could block pumps and outfalls at treatment plants.
- b. Removing solids from sewage to prevent the formation of unsightly sludge banks at disposal sites, especially with only primary treatment.

Step-2: Biological Tank

In the biological tank, microorganisms, including bacteria and protozoa, play essential roles. Bacteria break down organic matter, while protozoa help regulate bacterial levels. DAP and urea fertilizers are added every three days to enhance microbial activity.

Step-3: Clarifier Tank

Clarifiers are settling tanks with mechanical means to continuously remove solids deposited by sedimentation. They clarify and thicken liquids by allowing solid contaminants to settle at the tank bottom, collected by a scraper mechanism. Sludge refers to concentrated impurities at the tank’s bottom, while scum refers to floating particles on the liquid’s surface.

“Annexure - C” to the Board’s Report (Contd.)

Step-4: Filters

Iron Filter: Functions like a water softener to capture iron precipitates, leaving water iron-free.

Carbon Filter: Uses granular activated carbon (GAC) to effectively remove organic chemicals from water. Chlorine dosing occurs before both filters to optimize treatment.

The Nalagarh unit also has not fully implemented Zero Liquid Discharge mechanism, but has STP installed in their premises which consists of:

- a. Collection Tank
- b. Biological Treatment
- c. Tertiary Treatment

Collection Tank: This tank holds the wastewater temporarily, allowing for initial containment and stabilization.

Biological Treatment: In this phase, air is diffused from the bottom through diffusers or nozzles using twin lobe blowers. The organic load is reduced through either the attached growth on synthetic media or a complete mix process facilitated by dissolved oxygen. The effluent flows from the bioreactor to the secondary clarifier, where it enters with an upward flow. The sludge settles at the bottom while the clear supernatant is collected at the top. The settled sludge is recycled back to the reactor to maintain the required level of MLSS (Mixed Liquor Suspended Solids), and excess sludge is removed and dried on sludge drying beds before being used as manure. The overflow from the secondary clarifier is directed to the filter feed tank for final treatment.

Tertiary Treatment: The effluent from the biological treatment stage is passed through a dual media filter (containing sand and carbon) using filter feed pumps. This process removes suspended and dissolved impurities before the final discharge. The treated effluent is then used for plantation within the unit.

Please provide details of air emissions (other than GHG emissions) by the entity, in the following format:

6. Provide details of greenhouse gas emissions (Scope1 and Scope 2 emissions) & its intensity, in the following format:

Parameter	Please specify unit	FY 2023-24	FY 2022-23
NOx	mg/Nm ³	189.02	197.02
SOx	mg/Nm ³	15.01	14.01
Particulate matter (PM)	mg/Nm ³	62.07	51.08
Persistent organic pollutants (POP)		-	-
Volatile organic compounds (VOC)		-	-
Hazardous air pollutants (HAP)		-	-

Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency? (Y/N) If yes, name of the external agency.

The independent evaluation has been carried out by ABNS Scientific Services in Guwahati Unit and Eco Paryavaran Laboratories and Consultants Pvt. Limited in the Nalagarh Unit.

**Control Print is in coding and marking Industry wherein we are the manufacturer of printers and consumables. Printer manufacturing carried out by outsourcing major components in printers. Final assembly & testing of printers are carried out at our plants which is non-polluting process. We outsource major chemicals and other components of the consumables. The final formulation is carried out at our plant as per requirements. There is no significant air emission in manufacturing process. Those arising from the operations of diesel generator sets during power outages is negligible, as generator operates only instant of power failure which is rare. Also, we have necessary consent under the Air (prevention and control pollution) Act for business operations wherever required.

There hasn’t been an external review or analysis conducted to assess various aspects of our operations, performance, or compliance with standards or regulations.

8. Does the entity have any project related to reducing Green House Gas emission? If yes, then provide details.

Our Company currently does not have a greenhouse gas reduction project in place, but we are proud of our ongoing initiatives such as rainwater harvesting, the operation of a sewage treatment plant (STP), and the recycling of plastic waste. These efforts reflect our dedication to environmental stewardship.

9. Provide details related to waste management by the entity, in the following format:

Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency? (Y/N) If yes, name of the external agency.

There hasn't been an external review or analysis conducted to assess various aspects of our operations, performance, or compliance with standards or regulations.

The waste management process involves various agencies handling specific types of waste. All plastic waste is recycled, ensuring that none goes to landfills. E-waste is collected by parties authorized by the Central Pollution Control Board (CPCB), while hazardous waste is managed by parties authorized by the State Pollution Control Board (SPCB). Non-hazardous waste is collected by the local Municipal Board, ensuring proper disposal. Additionally, all canteen waste is composted in-house using a composter machine, promoting sustainable waste management practices.

10. Briefly describe the waste management practices adopted in your establishments. Describe the strategy adopted by your Company to reduce usage of hazardous and toxic chemicals in your products and processes and the practices adopted to manage such wastes

In Guwahati and Nalagarh Unit, Hazardous materials such as waste oil, grease, ink, paint, soaked clothes, gloves, empty hazardous waste containers and ink drums are securely stored in the designated hazardous storage yard. These items are properly labelled and handled with appropriate personal protective equipment (PPE) before being disposed of through authorized dealers. Non-hazardous waste, including discarded PPE, process waste, packing materials and mechanical parts, is stored in the scrap yard. These materials are subsequently disposed of by an authorized scrap dealer.

11. If the entity has operations/offices in/around ecologically sensitive areas (such as national parks, wildlife sanctuaries, biosphere reserves, wetlands, biodiversity hotspots, forests, coastal regulation zones etc.) where environmental approvals / clearances are required, please specify details in the following format:

S. No.	Location of operations/offices	Type of operations	Whether the conditions of environmental approval / clearance are being complied with? (Y/N) If no, the reasons thereof and corrective action taken, if any.
--------	--------------------------------	--------------------	---

The Company refrains from conducting its operations in environmentally fragile or ecologically sensitive regions. This strategic decision underscores the Company's commitment to responsible business practices and environmental stewardship, avoiding potential harm to delicate ecosystems.

“Annexure - C” to the Board’s Report (Contd.)

12. Details of environmental impact assessments of projects undertaken by the entity based on applicable laws, in the current financial year:

Name and brief details of project	EIA Notification No.	Date	Whether conducted by independent external agency (Yes / No)	Results communicated in public domain (Yes / No)	Relevant Web link
-----------------------------------	----------------------	------	---	--	-------------------

Not applicable. Following the guidelines of the Ministry of Environment, Forest & Climate Change (MoEF), our industrial operations are exempted from the obligation to provide environmental clearance or undergo an Environmental Impact Assessment (EIA).

13. Is the entity compliant with the applicable environmental law/ regulations/ guidelines in India; such as the Water (Prevention and Control of Pollution) Act, Air (Prevention and Control of Pollution) Act, and Environment protection act and rules thereunder (Y/N). If not, provide details of all such non-compliances, in the following format:

S. No.	Specify the law / regulation / guidelines which was not complied with	Provide details of the non-compliance	Any fines / penalties / action taken by regulatory agencies such as pollution control boards or by courts	Corrective taken, if any action
--------	---	---------------------------------------	---	---------------------------------

The Company adheres to all relevant environmental laws and regulations.

Leadership Indicators:

1. Water withdrawal, consumption and discharge in areas of water stress (in kilolitres):

For each facility / plant located in areas of water stress, provide the following information:

- (i) Name of the area
- (ii) Nature of operations
- (iii) Water withdrawal, consumption and discharge in the following format:

There hasn’t been an external review or analysis conducted to assess various aspects of our operations, performance, or compliance with standards or regulations.

2. Please provide details of total Scope 3 emissions & its intensity, in the following format:

Parameter	Unit	FY 2023-24	FY 2022-23
Total Scope 3 emissions (Break-up of the GHG into CO ₂ , CH ₄ , N ₂ O, HFCs, PFCs, SF ₆ , NF ₃ , if available) - Limited	Metric tonnes of CO ₂ equivalent	5.22	1.83
Total Scope 3 emissions per rupee of turnover	Metric tonnes of CO ₂ Equivalent/ Rupees	0.0000000015	0.0000000006

For calculation of Scope 3 emissions – only waste generated is considered

Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency? (Y/N) If yes, name of the external agency.

There hasn’t been an external review or analysis conducted to assess various aspects of our operations, performance, or compliance with standards or regulations.

3. With respect to the ecologically sensitive areas reported at Question 11 of Essential Indicators above, provide details of significant direct & indirect impact of the entity on biodiversity in such areas along-with prevention and remediation activities.

The Company refrains from conducting its operations in environmentally fragile or ecologically sensitive regions. This strategic decision underscores the Company’s commitment to responsible business practices and environmental stewardship, avoiding potential harm to delicate ecosystems. By deliberately choosing locations that are not ecologically sensitive, the Company aims to minimize its environmental impact and contribute to the preservation of biodiversity and natural habitats.

4. If the entity has undertaken any specific initiatives or used innovative technology or solutions to improve resource efficiency, or reduce impact due to emissions / effluent discharge / waste generated, please provide details of the same as well as outcome of such initiatives, as per the following format:

S. No.	Initiative undertaken	Details of the initiative (Web-link, if any, may be provided along-with summary)	Outcome of the initiative
1	Separate storage locations for waste have been established, ensuring that waste is disposed of by authorized recyclers in compliance with the policies of Extended Producer Responsibility (EPR) and Plastic Waste Management (PWM).	Waste is broadly categorized into Dry and Wet categories and then further sub-classified into Electronic, Plastic, Chemical and Metal waste.	<p>As a result of our waste management initiative, we have achieved the proper disposition of waste through the following measures:</p> <p>Types of Waste:</p> <p>Dry Waste: Managed separately, including non-biodegradable materials like paper, plastic, glass, metals and electronics.</p> <p>Wet Waste: Handled as biodegradable materials such as food scraps and garden clippings.</p> <p><i>The sub-categories:</i></p> <p>Electronic Waste: Efficiently disposed of, including discarded electronic devices and components.</p> <p>Plastic Waste: Properly managed, encompassing various plastic materials like bottles and packaging.</p> <p>Chemical Waste: Safely disposed of, including hazardous materials such as industrial chemicals and solvents.</p> <p>Metal Waste: Appropriately handled, including metal scraps, old appliances, and containers.</p> <p>Storage and Disposal of Wastes:</p> <p>Separate Storage Locations: Established for different types of waste to prevent cross-contamination and facilitate recycling.</p> <p>Authorized Recyclers: Waste is disposed of through authorized recyclers, adhering to EPR and PWM policies, ensuring environmentally responsible processing and recycling. These steps have resulted in improved waste management efficiency, reduced environmental impact, and the promotion of sustainable practices.</p>

S. No.	Initiative undertaken	Details of the initiative (Web-link, if any, may be provided along-with summary)	Outcome of the initiative
2	Multiple training sessions have been conducted to minimize waste generation at its origin.	Training sessions have been provided to all employees, raising awareness on waste segregation practices and emphasizing the importance of proper separation, along with understanding the associated consequences.	As a result of the training provided to all employees, there has been a significant improvement in the proper disposal of waste materials. Employees are now well-informed about waste segregation practices, ensuring that waste is disposed of correctly and efficiently. This has led to better waste management practices and minimized environmental impact.
3	Installation of Sewage Treatment plant	Our initiative focuses on recycling and reusing treated wastewater by implementing a Sewage Treatment Plant (STP). Here’s how this initiative is structured: Treatment Process: The wastewater from our operations undergoes a comprehensive treatment process. Initially, it enters the STP where it undergoes anaerobic treatment followed by aerobic treatment using activated sludge and extended aeration processes. These processes effectively reduce organic contaminants and improve the quality of the effluent. Recycling and Reuse: Once treated, the wastewater is recycled and reused within our facility. It serves various purposes such as irrigation for landscaping, cooling water for industrial processes, or other non-potable uses that do not require high-quality water.	The implementation of our Sewage Treatment Plant (STP) has resulted in significant environmental and operational benefits. By utilizing a comprehensive treatment process that includes both anaerobic and aerobic treatments, our facility effectively reduces organic contaminants in wastewater. The treated effluent is then recycled and reused for non-potable purposes such as irrigation for landscaping and cooling water for industrial processes. This initiative not only minimizes the demand on freshwater resources but also supports sustainable water management practices within our operations, contributing to a more environmentally friendly and cost-effective approach to water usage.
4	Managing waste and educating staff about environmental conservation.	We have conducted diverse training sessions and maintained standard operating procedures (SOPs).	Through our efforts, we have achieved: Increased Knowledge: Employees have gained valuable knowledge through various training sessions. Time Efficiency: Implementation of streamlined processes has reduced time consumption. Less Waste: Efforts to minimize waste generation have led to reduced waste output.

5	Plantations	We actively celebrate World Environment Day to raise awareness and promote environmental stewardship. Additionally, we frequently engage in tree planting initiatives to expand green areas and enhance environmental sustainability.	Through our initiatives, we have achieved: Better Environment: Our efforts, including celebrating World Environment Day and planting trees, have contributed to a healthier and more sustainable environment. Beautification: Increased greenery and tree planting initiatives have enhanced the aesthetic appeal and beautification of our surroundings.
6	Conservation of Water	We have taken several steps to improve water management and conservation, including: * Repairing leaking pipes to prevent water wastage. * Installing automatic water level sensors in water tanks to optimize usage. * Implementing pressmatic water taps for efficient water conservation. * Recycling and reusing treated wastewater through STP implementation. * Installing rainwater harvesting systems to utilize natural water resources sustainably.	Through our initiatives, we have achieved significant improvements in water management and conservation practices: Reduced Water Wastage: By fixing leaking pipes, we have minimized water wastage and improved overall water efficiency. Optimized Water Usage: Installation of automatic water level sensors in water tanks ensures optimal water usage, preventing unnecessary overflow and depletion. Efficient Water Consumption: The introduction of pressmatic water taps has promoted efficient water consumption, reducing unnecessary usage. Sustainable Water Practices: Recycling and reusing treated wastewater through our STP and implementing rainwater harvesting systems have enabled us to utilize water resources sustainably. Environmental Impact: These initiatives collectively contribute to reducing our environmental footprint and promoting responsible water management practices. Overall, our efforts have led to enhanced water management efficiency, conservation of natural resources, and a more sustainable approach to water usage within our facilities.
7	Energy conservation	We have shifted from traditional tube lights to LED lights and installed timers for street lights.	To reduce energy consumption, we have implemented measures such as converting tube lights to LED lights and installing timers for street lights. These initiatives are aimed at enhancing energy efficiency across our operations.
