Citi sees global investors not exiting India debt

SUBHADIP SIRCAR & DIVYA PATIL
June 13
GLOBAL INVESTORS WHO'VE bought Indian government bonds to piggyback on their inclusion in a flagship debt gauge are likely to remain invested and not take a quick profit...

Bond yields may fall further

for Citi. "Some of the active money does come in beforehand as they expect the passive money to come in later and then they use that opportunity to get out of the position," he said. "But in India, I don't think that's necessary how it'll play out given the structurally good story." India will ultimately receive a 10% weight in the JPMorgan index. Agreee estimates the inclusion will attract almost \$30 billion of capital into India, from both active and passive investors.

Startups share 'value-add' mentors to drive growth

RAMASUBRAMANIAN ADDED THAT specialised mentors help establish robust frameworks and processes that can prevent mismanagement and foster transparency, integrate sustainable practices and meet regulatory requirements. These practices have increasingly become critical for the long-term success of startups.

Jio gets green signal for launching satcom services

"AS THE PROCESS is taking time, spectrum for satcom should be assigned to operators on a provisional basis. They may provide an undertaking that the spectrum charges would be applicable from the date of assignment," Anil Kumar Bhatt, director general of Ispa, said. "This will ensure that operators can launch their services immediately. And hence, they would not lose on opportunity cost," Bhatt added.

RBI drops action against 3 ARCs

SACHIN KUMAR
Mumbai, June 13
THE RESERVE BANK of India (RBI) has decided to drop actions related to show-cause notices issued to three asset reconstruction companies (ARCs) last year.

The RBI says it has decided not to continue with actions related to the notice issued earlier," said a source. "It is a big relief for these ARCs..." The ARCs received communication from the banking regulator early this week, according to sources. The development has ended speculations regarding cancellation of licences of these ARCs. Show-cause notices were issued following a special audit, which was prompted by an income tax raid on the premises

of some ARCs in 2021. Industry experts say with the three ARCs receiving positive feedback from the regulator, the confidence of the entire ARC industry will get a boost. The RBI has been asking ARCs to improve governance and bring more transparency. Addressing chiefs and representatives ARCs last month, RBI deputy governor M Rajeshwar Rao stressed the need for strong governance frameworks, robust internal controls and a strong compliance culture. He warned that the failure to meet regulatory guidelines and wilful violations would invite strict action. The RBI, on May 29, barred Edelweiss ARC and ECL

Finance, an Edelweiss Group entity, from acquiring financial assets or undertaking structured transactions, saying they had been engaged in 'evergreening' of distressed loans. Evergreening refers to a practice where new loans are given to stressed borrowers to enable them to repay existing loans. The regulator on Tuesday rejected Edelweiss ARC's request to reappoint Raj Kumar Bansal as its managing director and chief executive officer for the third time. Currently, there are 27 ARCs operating in the country. ARCs have witnessed a robust growth over the past years, RBI data show.

Marketing," he said. He also added that certain VC companies have increased their fund size and transformed into PE companies by adopting this work style. The 'shared resources' model has proven to be a win-win for funds and portfolio companies. For investors, this model not only generates better results from portfolio companies but also allows them to have structured control over them without having to interfere daily. It also secures their portfolio startups from getting trapped into complications that may come up if corporate governance is not done right. Motilal Oswal Alternates, which invests in mid-sized companies, said an organisation is built by its support functions. "Every company has to embrace tech in a big way but none of the mid-sized companies is willing to hire a strong head of technology. Likewise, HR is one of the most important functions, but often companies can't afford such talent," Vishal Tulsyan, MD and CEO at MO Alternates (private equity) said. That's why, a few years ago, the firm decided to hire senior people from HR, technology and performance improvement and leverage them across its portfolio.

The firm currently has a shared resources team of six people, including the chief people officer, CTO, head of performance improvement and other industry experts. The team focuses on improving HR practices, developing leadership capabilities, creating a tech framework, optimising working capital, and cost reduction, among other things. The area of support that a particular portfolio company needs also varies. For instance, an early-stage startup would need support in hiring, while late-stage in their IPO journey. "Founders sometimes dedicate 100-150 hours a month to hiring. To alleviate this burden, we have a dedicated HR team, whose support can be accessed at favourable rates," Pearl Agarwal, founder and managing partner at Eximius Ventures, said. The size of 'shared resources' team varies from firm to firm. "Many factors such as the sector in which the startup operates, the complexity of its operations, the unique needs determined by the PE or VC firm and the size of the portfolio company can affect how many personnel are allocated to each job," Milan Sharma, founder and MD, 35North Ventures said.

Last year, Jio demonstrated India's first satellite-based gigabit internet service JioSpace-Fiber, which can potentially be used to provide high-speed internet services to inaccessible areas in the country. The company has connected four remote locations with JioSpace-Fiber — Girin Gujarat, Korba in Chattisgarh, Nabarangpur in Odisha, and Jorhat in Assam, using the spectrum on trial. Similarly, OneWeb's earth station gateways in Mehansa, Gujarat, and one near Chennai are ready for services. Currently, Eutelsat OneWeb's satellite communications network features more than 630 satellites in low earth orbit (LEO) segment. On the other hand, SES has over 70 satellites in medium earth orbit (MEO) and geostationary orbit (GEO).

Adani Cement
Adani Cement has been scouting for acquisitions even as the firm was looking at organic growth to achieve the target of 140 MTPA by 2028. In 2023, Ambuja Cement acquired Sanghi Industries, which had a production capacity of 6.1 MTPA, and later in January this year, its subsidiary ACC closed the acquisition of the balance 55% stake in Asian Concrete and Cements (2.8 MTPA).

Adani ups cement game with ₹10,422-cr buy
THE CURRENT TOTAL installed production capacity in the country stands at 541 MTPA.
Adani Cement has been scouting for acquisitions even as the firm was looking at organic growth to achieve the target of 140 MTPA by 2028. In 2023, Ambuja Cement acquired Sanghi Industries, which had a production capacity of 6.1 MTPA, and later in January this year, its subsidiary ACC closed the acquisition of the balance 55% stake in Asian Concrete and Cements (2.8 MTPA).
Adani Group had forayed into the cement sector with the acquisition of Switzerland-based Holcim Group's stake in Ambuja Cement and ACC for \$6.6 billion in September 2022.
