- Established two Miyawaki forests in Jaipur, covering an area of 2 acres of land. The Miyawaki technique yields extensive benefits, including maintaining water levels and reducing sound and dust pollution by over 30 times. This method involves multi-layered plantation, maximizing vertical space usage while shielding the soil from direct sunlight, thereby resulting in very less evaporation.

5. Has the entity implemented a mechanism for Zero Liquid Discharge? If yes, provide details of its coverage and implementation.

Our facilities are equipped with zero-liquid discharge mechanisms, reflecting our commitment to effective waste management and proper handling of wastewater. We have installed Effluent Treatment Plants (ETP) and Sewage Treatment Plants (STP) to treat the wastewater. The treated wastewater is then recycled, significantly reducing the consumption of freshwater. These plants successfully recycle 17,500 KL of water annually. Additionally, we have installed two rainwater storage tanks with a combined capacity of 500 KL, enabling us to harvest approximately 6,100 KL of rainwater at various locations. We are also in the process of constructing a new rainwater harvesting tank with a capacity of 600 KL, further enhancing our sustainable water management efforts.

8. Does the entity have any project related to reducing Green House Gas emission? If yes, then provide details.

As a socially responsible organization, we have implemented several initiatives to reduce carbon emissions. Here are the details:

- **Afforestation:** During the past few years, we have developed two Miyawaki forests spanning across 2 acres of land in India, planting approximately 28,000 saplings in barren lands. These forests will become self-sustainable within the next two years and will be ten times denser than conventional forests. We anticipate that they will sequester 850 tons of carbon each year. Additionally, we planted 7,000 plants in various government schools and RIICO gardens.
- **Electric Vehicles:** As part of our environmental efforts, we have 184 electric scooters and one electric car for our employees' commute. This investment is a continuation of our ongoing commitment to reduce Scope 2 carbon emissions (equivalent to 25-28 tons per annum) and minimize our carbon footprint. By making this investment, we have eliminated the need for 11 buses from our fleet and also done away with requirement of 1 bus.
- **Solar Power:** We have installed two solar power plants in Jaipur (rooftop solution) and Bikaner (ground-mounted solar panels). With a total installed capacity of 3.23 MW, these solar power plants fulfill 100% of the power requirements for our two major manufacturing units in Jaipur.
