Dabur shares tank 6%, Marico hits new high

Analysts say Dabur may fare better in 03, expect double-digit revenue growth for Marico

DEEPAK KORGAONKAR

Mumbai, 3 October

abur India's (Dabur's) share price slipped 8 per cent to ₹571.25 in intraday trade on Thursday, hitting a four-month low on the BSE, after the management said it expected consolidated revenue to decline in mid-single digits in the July to September quarter (O2FY25).

The stock ended 6 per cent lower at ₹580.60, its lowest level since June 4, 2024. In the past two weeks, the stock has declined 14 per cent.

The personal care products company posted over 7 per cent year-onyear (Y-o-Y) growth in Q2FY24 and O1FY25. On account of lower primary revenue and high advertisement & promotion (A&P), however, the management expects the operating margin to decline in the mid to high teens Y-o-Y in Q2FY25.

In Dabur India's Q2FY25 business update, the company said it had experienced disproportionately higher growth in modern trade (MT), e-commerce, and quick commerce in the last few quarters, which led to high inventory levels for its general trade (GT) channel and affected distributor return on investment (ROI).

This has prompted the company to make a strategic decision to correct distributor inventory at the GT level to improve its ROI. It is expected to impact the temporary decline in revenue.

"While demand trends were witnessing some improvement, heavy rain and floods across parts of the country impacted out-of-home consumption and consumer offtake in Q2FY25. Due to this, we saw some impact on our business especially in the beverage category," the company said. While this correction has happened in the Indian business, the international business is expected to

 Dabur India — Marico 127.4-Base=100

Dec 29,'23 Oct 3,'24 Source: Exchanges

register "double-digit constant currency growth in top line", it said, adding that the 'Badshah Masala' business continued to perform well by growing in double digits during the quarter. With the streamlining of the GT channel and strong growth momentum in alternative channels, the management expects the revenue growth to recover starting from October 2024

Dabur, a leading fast-moving consumer goods (FMCG) company, is scheduled to announce its Q2FY25 results on October 30, 2024.

According to analysts at Nuvama Wealth Management, the stock could be under pressure in the near term. While downstocking and pipeline correction in FMCG are not rare, the extent of impact on Dabur seems surprising. Q3 shall be slightly better than Q2. However, consistency in growth is critical for a re-rating. The cola price war remains a key monitorable for the beverages business, the brokerage firm said, with a

Meanwhile, Marico bucked the trend and hit a record high of ₹719.80, gaining 4 per cent on the BSE in intraday trade on stable volume growth in Q2FY25. The stock ended nearly 1 per cent higher at ₹698.55, as compared to a 2.1 per cent decline in the BSE Sensex. In the last six months, the stock has outperformed the market by surging 41 per cent against a nearly 12 per cent rise in the benchmark index.

Marico in its Q2 quarterly update said that consolidated revenue growth remained in the high single digits, as higher realisations in the domestic business were offset by incremental currency headwinds in some overseas markets. The company expects consolidated revenue growth to move into double digits in the second half of the year and expects to deliver double-digit revenue growth this year. The sector witnessed stable demand trends with rural outperforming urban year-onyear for the third quarter in a row. In the given context, the domestic business posted mid-single-digit volume growth, exhibiting improvement on a sequential basis, Marico said.

After a weak update from Dabur, Marico's update reassured investors. The numbers are largely in line with our estimates, said analysts at Nuvama Wealth Management. Value Added Hair Oils (VAHO) and Saffola Oils remain muted.

The brokerage firm said Marico's consolidated revenue growth will likely be 8 per cent Y-o-Y. Domestic business shall clock 5 per cent volume growth Y-o-Y. The International business shall deliver 13 per cent constant currency (CC) growth. Bangladesh shall post high-singledigit growth amid a turbulent operating environment. Copra experienced inflation higher than expected. Parachute shall see midsingle-digit volume and double-digit revenue growth. Foods and Digitalfirst brands performed better than estimates, analysts said in the company update and retained a 'buy' rating on the stock with a target price of ₹780 per share.

Lock into attractive SCSS, FD returns before rate cuts begin

SARBAJEET K SEN

Interest rates are expected to decline soon after remaining elevated for an extended period. After the US Federal Reserve's recent 50-basis-point (bps) cut, other central banks, including the Reserve Bank of India (RBI), will likely follow suit.

"This is a good time to take fixed-income exposure at elevated rates before the softening starts," says Amol Joshi, founder, PlanRupee Investment Managers.

Rate cuts on the horizon

The RBI has projected inflation at 4.5 per cent for financial year 2025 (FY25), close to its 4 per cent target. With the current repo rate at 6.5 per cent, experts anticipate a 50 basis point cut soon. "I see a repo rate cut of 50 bps to 6 per cent," says Joydeep Sen, author and corporate trainer (debt).

"RBI may cut rates by 50 bps over the next six months, starting with a 25 bps cut in December," says Pankai Mathpal, managing director,

Optima Money Managers.

Current rates are attractive

Fixed-income instruments such as bank fixed deposits (FDs), corporate FDs, and small savings schemes (SSS) are currently offering attractive returns. For example, bank FDs of two to three years' duration are yielding 7-7.5 per cent, while the government has kept SSS rates unchanged as of September 30, 2024. "If you want to invest in FDs or the Senior Citizens Saving Scheme (SCSS), now is the right time. Investors can also consider long-term debt funds? says Mathpal.

Sen notes that any reduc-

tion in bank FD rates will lag behind the RBI's actions. "Bank deposit rates will ease but may not align directly with RBI rate cuts, as credit demand remains strong, and banks need deposits, he explains.

Which instruments look good?

Several fixed-income products currently offer attractive rates. The SCSS, with an 8.2 per cent interest rate that can be locked in for five years, remains one of the most attractive. The scheme's investment limit has been enhanced to ₹30 lakh. The Mahila Samman

Certificate offers 7.5 per cent interest for two years on deposits up to ₹2 lakh. Select corporate FDs offering around 8-8.5 per cent are worth considering. Banks are offering attractive rates for 12-15 month FDs. Investors with a longer time frame will, however, be better off investing in longer-tenured FDs. "Senior citizens should capitalise on high SCSS rates and lock in investments now. For short-term needs, FDs are a good option. NBFC FDs offer slightly higher rates than bank FDs," says Mathpal.

As a rule, match your investment timeframe with the product's tenure, as premature withdrawals lead to penalties.

Avoid floating rate instruments

With interest rates set to fall, floating-rate instruments like **RBI Floating Rate Savings** Bonds may not be ideal. They currently offer 8.05 per cent (35 bps higher than the 7.7 per cent offered by the National Savings Certificate). "Floating-rate instruments will adjust downwards as rates drop, so they are not suitable in a declining interest-rate environment," says Joshi.

Focus on goals and allocation

Invest according to your horizon. "Young investors should focus more on equity, while retired senior citizens should prioritise fixed income. Midcareer investors should aim for a balanced allocation," says Sen. Fixed income allocation should also depend on investment horizon and risk appetite. "Investors with lower risk tolerance and short-term goals should focus on debt instruments," says Mathpal.

Private-sector banks	Tenure	Intere
RBL Bank	500 days	8.60
SBM Bank India	391 days to 15 mon	ths 8.60

Why those above 70 need separate health insurance despite PM-JAY?

The government has said that all senior citizens aged 70 and above, who belong to families already covered under AB PM-JAY, will be eligible for an additional top-up cover of ₹5 lakh per year.

Is it sufficient?

But those above 70 years may still need separate health insurance. Siddharth Singhal, head—Health Insurance, Policybazaar tells why. "While the annual floater health

Readfull report here: mybs.in/2dZcPnV

coverage of ₹5 lakh per family can help in managing a wide range of secondary and tertiary medical expenses, it may not be sufficient to cover certain highcost treatments for age-related

illnesses.

Is there a restriction on combining policies?

The good news is that there is no restriction on combining Ayushman Bharat with private health insurance.

A wider safety net

This integration means that senior citizens can use their private insurance as their primary coverage and treat

Ayushman Bharat as a backup for additional expenses. Essentially, the governmentprovided coverage complements their private insurance, offering a wider safety net. This approach ensures that they have access to multiple sources of funds when dealing with medical bills, creating a more comprehensive healthcare plan.
