### **Overview of Indian Economy**

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP or GDP at Current Prices in the year 2023-24 is estimated at Rs. 295.36 lakh crores (US\$ 3.54 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 269.50 lakh crores (US\$ 3.23 trillion). The growth in nominal GDP during 2023-24 is estimated at 9.6% as compared to 14.2% in 2022-23. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the second half of FY24. During the period April-June 2025, India's exports stood at US\$ 109.11 billion, with Engineering Goods (25.35%), Petroleum Products (18.33%) and electronic goods (7.73%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

In the last quarter of FY24, India's GDP grew by 8.2 percent, ₹47.24 lakh crore, according to the data released by the Ministry of Statistics and Programme Implementation and the National Statistical Office. It was better than NSO's earlier estimates for real GDP growth for FY24 at 7.3 percent. "Nominal GDP has witnessed a growth rate of 9.6 percent in FY24 over the growth rate of 14.2 percent in FY23," the NSO said.

According to the press release, real GDP or GDP at Constant Prices is estimated to have attained a level of ₹173.82 lakh crore in FY24, against the First Revised Estimates (FRE) of GDP for FY23 of ₹160.71 lakh crore. The growth rate in Real GDP during FY24 is estimated at 8.2 percent compared to 7.0 percent in FY23. Nominal GDP or GDP at Current Prices is estimated to attain a level of ₹295.36 lakh crore in FY24, against ₹269.50 lakh crore in FY23, showing a growth rate of 9.6 percent.

### **Textile Industry overview**

India is the 5th largest producer of technical textiles in the whole world with a market size of nearly \$22 billion, which we hope to build up to \$300 billion when we turn 100 by 2047. The textiles and apparel industry in India has strengths across the entire value chain from fiber, yarn, fabric to

apparel. It is highly diversified with a wide range of segments ranging from products of traditional handloom, handicrafts, wool and silk products to the organized textile industry. The organized textile industry is characterized using capital-intensive technology for mass production of textile products and includes spinning, weaving, processing, and apparel manufacturing.

The domestic textiles and apparel industry stood at \$152 bn in 2021, growing at a CAGR of 12% to reach \$250 bn by 2025 India scaled its highest ever exports tally at \$ 44.4 Bn in Textiles and Apparel (T&A) including Handicrafts in FY 2021-22, indicating a substantial increase of 41% and 26% over corresponding figures in FY 2020-21 and FY 2019-20, respectively.

India's textiles sector is one of the oldest industries in the Indian economy, dating back to several centuries. The industry is extremely varied, with hand-spun and hand-woven textiles sectors at one end of the spectrum, with the capital-intensive sophisticated mills sector at the other end. The fundamental strength of the textile industry in India is its strong production base of a wide range of fibre/yarns from natural fibres like cotton, jute, silk and wool, to synthetic/man-made fibres like polyester, viscose, nylon and acrylic.

The decentralised power looms/ hosiery and knitting sector form the largest component of the textiles sector. The close linkage of textiles industry to agriculture (for raw materials such as cotton) and the ancient culture and traditions of the country in terms of textiles makes it unique in comparison to other industries in the country. India's textiles industry has a capacity to produce a wide variety of products suitable for different market segments, both within India and across the world.

In order to attract private equity and employ more people, the government introduced various schemes such as the Scheme for Integrated Textile Parks (SITP), Technology Upgradation Fund Scheme (TUFS) and Mega Integrated Textile Region and Apparel (MITRA) Park scheme.

The Indian textile and apparel industry is expected to grow at 10% CAGR from 2019-20 to reach US\$ 190 billion by 2025-26. India has a 4% share of the global trade in textiles and apparel.

The textile industry has around 4.5 crore of workers employed in textiles sector including 35.22 lakh handloom workers all over the country.

The future of the Indian textiles industry looks promising, buoyed by strong domestic consumption as well as export demand. India is working on various major initiatives to boost its technical textile industry. Owing to the pandemic, the demand for technical textiles in the form of PPE suits and equipment is on the rise. The government is supporting the sector through funding and machinery sponsoring.

Production of fibre in India reached 2.40 MT in FY21 (till January 2021), while for yarn, the production stood at 4,762 million kgs during the same period. Natural fibres are regarded as the backbone of the Indian textile industry, which is expected to grow from US\$138 billion to US\$195 billion by 2025.

India's textile and apparel exports (including handicrafts) stood at US\$ 44.4 billion in FY22, a 41% increase YoY. During April October in FY23, the total exports of textiles stood at US\$ 21.15 billion. India's textile and apparel exports to the US, its single largest market, stood at 27% of the total export value in FY22. Exports of readymade garments including cotton accessories stood at US\$ 6.19 billion in FY22.

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Financial Statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of Financial Statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the Financial Statements.

**INHERENT LIMITATIONS OF INTERNAL FINANCIAL CONTROLS OVER FINANCIAL REPORTING**

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to errors or frauds may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

**OPINION**

In our opinion, the company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31<sup>st</sup> March, 2024, based on the internal control over financial reporting criteria established by the company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India.

**NOTES FORMING PART OF FINANCIAL STATEMENTS**

**1. SIGNIFICANT ACCOUNTING POLICIES AND EXPLANATORY NOTES ON FINANCIAL STATEMENTS**

**(A) Corporate Information:**

The Company was originally incorporated on February 5, 2014 vide Certificate of Incorporation bearing Registration Number 252842 issued by the Registrar of Companies, Mumbai. The Company changed its name from Billwin Waterproof Private Limited to Billwin Industries Private Limited on 09.07.2019 and again changed its name to Billwin Industries Limited on 28.01.2020.

The Company is engaged in the manufacturing of protective gears which are manufactured by using coated fabric as the raw material.

**(B) Basis of Preparation:**

The financial statements of the Company have been prepared in accordance with generally accepted accounting principles in India (Indian GAAP). The Company has prepared these financial statements to comply in all material respects with the accounting standards notified under section 133 of the Companies Act 2013, read together with paragraph 7 of the Companies (Accounts) Rules, 2014. The financial statements have been prepared on an accrual basis and under the historical cost convention. The accounting policies have been consistently applied except where specifically stated in financial statement and notes to accounts of the non-conformity with the relevant Accounting Standard.

**(C) Significant Accounting Policies:**

**(a) Use of Estimates:**

The preparation of financial statements in conformity with Indian GAAP requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the end of the reporting period and the reported amounts of revenue and expenses during the reported period. Although these estimates are based on management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the Carrying amounts of Assets or Liabilities in future periods.

**(b) Property, Plant & Equipment and Intangible Assets:**

Property, Plant and Equipment is stated at acquisition cost net of accumulated depreciation and accumulated impairment losses, if any. Cost of acquisition or construction of property, plant and equipment comprises its purchase price including import duties and non-refundable purchase taxes after deducting trade discounts, rebates and any directly attributable cost of bringing the item to its working condition for its intended use.

Subsequent costs are included in the assets' carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the company and the cost of the item can be measured reliably. All other repairs and maintenance cost are charged to the statement of profit and loss during the period in which they are incurred.

Gains or losses that arise on disposal or retirement of an asset are measured as the difference between net disposal proceeds and the carrying value of property, plant and equipment and are recognised in the statement of profit and loss when the same is derecognised.

Depreciation is calculated on pro rata basis on Written Down value basis based on life assigned to each asset in accordance with Part C of Schedule - II of the Companies Act, 2013 or as per life estimated by the Management.

**NOTES FORMING PART OF FINANCIAL STATEMENTS**

**(c) Revenue Recognition:**

The company generally follows the mercantile system of accounting and recognizes Income & Expenditure on accrual basis.

Revenue is recognised to the extent that it is possible that, the economic benefits will flow to the company and the revenue can be reliably estimated and collectability is reasonably assured.

Revenue from sale of goods and services are recognised when control of the products being sold is transferred to our customer and when there are no longer any unfulfilled obligations. The performance obligations in our contracts are fulfilled at the time of dispatch, delivery or upon formal customer acceptance depending on customer terms.

Revenue is measured on the basis of sale price, after deduction of any trade discounts, volume rebates and any taxes or duties collected on behalf of the Government such as goods and service tax etc. Accumulated experience is used to estimate the provision for such discounts and rebates. Revenue is only recognised to the extent that it is highly probable a significant reversal will not occur.

**(d) Impairment of Assets:**

The carrying amounts of assets are reviewed at each balance sheet date if there is any indication of impairment based on internal/external factors. An impairment loss is recognized wherever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the higher of the asset's net selling price and value in use, which is determined by the present value of the estimated future cash flows.

**(e) Investments:**

Investments, which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investments.

On initial recognition, all investments are measured at cost. The cost comprises price and directly attributable acquisition charges such as brokerage, fees and duties.

Current investments are carried in the financial statements at lower of cost and fair value determined on an individual investment basis. Long term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of Investments.

On disposal of investment, the difference between its carrying amount and net disposal proceeds are charged or credited to the statement of profit and loss.

**(f) Inventories:**

Inventories consisting of Raw Materials, W-I-P and Finished Goods are valued at lower of cost and net realizable value unless otherwise stated. Cost of inventories comprises of material cost on FIFO basis and expenses incurred in bringing the inventories to their present location and condition.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and estimated costs necessary to make the sale.

**(g) Employee Benefits:**

Retirement benefit in the form of provident fund is a defined contribution scheme. The contribution to the provident fund is charged to the statement of profit and loss for the year when an employee renders the related services.
