SHYAM STEEL

flexi STRONG® TMT REBAR

Not just Strong, also Flexible

Why should TMT be FLEXI-STRONG?

A TMT rebar with high strength might seem like an obvious choice, because to make a home strong, we need strength in a TMT rebar. But, to make a home stand firm for generations – protecting it from natural calamities and rigours of weather – we need another equally important attribute in a TMT rebar, which is **flexibility**.

Therefore, to build a strong as well as long-lasting home, we must have a TMT rebar with **high flexibility** as well as **adequate strength**.

The Bureau of Indian Standards and eminent professors of renowned IITs attest the same.

But it is very difficult to have more of both – strength and flexibility – since increasing the strength would decrease the flexibility (being inversely proportional).

After many years of research and consultation with experts, Shyam Steel has designed and created Shyam Steel Flexi-Strong TMT rebar – a TMT rebar, which has high flexibility as well as adequate strength. This ensures that your home will be strong and last for generations.

Select Shyam Steel Flexi-Strong TMT rebar, whose unique and perfect mix of flexibility and strength keeps your dream home forever strong.

Pure Steel assured

Made from high quality iron ore, in integrated steel plants, quality ensured by NABL.

70 Years of experience

Delivering excellence in construction steel for seven decades.

Mega Projects & dream homes

The same TMT, building hundreds of national projects and millions of dream homes across the nation.
