India's 60+ more tech savvy than millennials, finds survey

They also surpass the younger lot in digital device usage

KUNAL DOLEY
New Delhi, August 6

IF YOU ASSUMED tech adoption among the older generation, especially those above 60 years, is usually lower than their younger counterparts, you would be pleasantly surprised to be proven wrong.

According to a new study released by GenS, a soon-to-be launched holistic tech platform tailored for the actively ageing 60+ population, India's senior citizens surpass millennials in smartphone adoption (94%) & overall digital device usage, including digital payments (61%).

In fact, 33% of the 60+ population are actively on the lookout to buy new technology devices and software in the market. While 82% use their phones for messaging, 77% use them for voice calls, 74% for emails, 73% for watching videos, 64% for news, 54% for internet browsing, 51% for social networks, 50% for paying bills, 37% for finance and banking and 29% for games.

The members of this generation, who are in their golden years, also love watching content on streaming apps and shopping online. While 71% use YouTube, 34% watch Disney+ Hotstar, 31% Netflix, 32% JioCinema, 31% Prime Video, 27% SonyLIV and 22% ZEE5. Up to 19% are also comfortable using Spotify from other options available. Similarly, 67% use Amazon, 50% shop on Flipkart, 21% on BigBasket, 20% on Mynta, 12% on Meesho, 6% on Ajo and 4% on Tata CliQ.

The study, conducted in collaboration with UK-headquartered public opinion and data company YouGov over 52 weeks (June 2023 to May 2024) and with an average

THE SENIOR EDGE

India's senior citizens surpass millennials in smartphone adoption (94%) & overall digital device usage, including digital payments (61%).

A sample size of ~7,900 for the 30-40 years and 60+ years age cohorts combined, reveals other surprising trends that defy common perceptions about life after 60. As per the findings, 62% of the 60+ population work out weekly (of which 23% do it on a daily basis), 45% use apps related to their health, fitness and diet, 72% are passionate about travel, 41% use digital platforms for travel booking, 50% prefer staying in 3-4 star hotels, 11% in 5-star properties, and one out of four among the surveyed population prioritises saving up for their next vacation after retirement and emergency fund.

From an outdoor point of view, this audience enjoys more than just visiting places of worship (50%) or walking in the parks / gardens (50%). While 47% love watching movies, 43% attend exhibitions, 43% visit shopping malls, 40% visit historical sites and attractions, 38% restaurants and cafes, 34% visit museums, 19% watch theatre, 31% comedy shows, 28% art galleries, 26% enjoy watching concerts / live music event and 18% musicals.

Apart from watching television (59%), cooking (48%) and reading (56%), this audience also has other key interests making them a heterogeneous lot. While 43% engage in gar-

dening, 27% love doing puzzles and crosswords, 22% photography and 13% acting, dancing / other performing arts.

In terms of investment, while 61% still prefer the security of fixed deposits, one in three individuals is investing in riskier options like direct stocks and cryptocurrency, the study noted.

Despite rising ageing, the 60+ population continues to play an active role in the workforce. As per the study, while 43% are currently employed, 27% are working full-time. "There's a set narrative in society about the 60+ people that suggests they only have healthcare needs. Despite being a growing demographic (those aged 60 and above are projected to make up 19% of the population by 2050, as per reports), their diverse needs and aspirations have been largely overlooked," said Meenakshi Menon, founder of GenS, who's herself over 60 years of age.

GenS seeks to challenge and reshape the conventional narrative surrounding ageing by recognising and celebrating the fact that 60+ is a time of newfound freedom, free from expectations and stereotypes. Combining community engagement with tech-powered solutions, the GenS app aims to create a comprehensive ecosystem for its 60+ members, addressing their physical, mental, emotional, financial, and social needs and desires.

"We want to empower individuals to embrace the abundance of life after 60 with confidence and enthusiasm. I firmly believe that the 60+ have reached a stage in their lives where they can become a vehicle of social change while enjoying each day of their lives to the fullest," added Menon.

Online lifestyle market likely to touch nearly \$45 bn by 2028

ANEESS HUSSAIN
Bangalore, August 6

India's online fashion and lifestyle market is set to grow from \$16.17 billion to \$40.45 billion by 2028, according to a Bain & Company and Mynta report titled "Decoding India's Online Fashion and Lifestyle Shopping Trends". The report, titled "Decoding India's Online Fashion and Lifestyle Shopping Trends," provides a comprehensive overview of the evolving e-lifestyle landscape in India.

The overall lifestyle market in India, valued at \$130 billion in 2023, is expected to grow at a CAGR of 10-12% to reach \$210 billion by 2028. E-commerce penetration in the lifestyle sector is projected to increase from the current 13% to 18-22% by 2028, meaning one in five dollars spent on lifestyle will be online.

Currently, over 175 million Indians shop online for lifestyle products, making an average of 6-7 transactions per year. Gen-Z shoppers, approximately 60 million strong, are driving growth with a higher purchase frequency of 8-9 times annually, compared to 5-6 times for non-Gen-Z shoppers.

Fashion leads the e-lifestyle market with a 75-80% share, followed by beauty and personal care. The online trend-first market is projected to grow from \$0.5 billion to \$4.5 billion by 2028, with online penetration rising from 30-35% to 50-55%.

The report notes that 90% of the top 50 global lifestyle brands are active in India, with half of them generating over \$30 million in revenue.

Several factors are driving this growth, including easing inflationary pressures, rising incomes, a surge of fashion-forward Gen-Z shoppers, and a shift towards organized retail. Addition-

Social media contributes **20%** of traffic for top D2C brands

tionally, technology advancements, such as AI-driven personalisation, virtual try-ons, and voice-assisted shopping, are enhancing the online shopping experience.

Manan Bhasin, Partner at Bain & Company, provided an insight into India's evolving apparel sourcing landscape: "India's apparel sourcing landscape has matured, with new manufacturing clusters beyond Surat and Tirupur emerging across the length and breadth of the country. Share of India sourcing has increased steadily to 20-30% for some leading global brands. While there is a lot more scope for improvement, enhanced textile manufacturing capabilities, tighter brand-supplier relationships and greater technology enablement including ERP systems, AI-based trend-spotting all signal the evolution of India's apparel manufacturing ecosystem," Bhasin said.

The report highlights the increasing role of social media in driving discovery and purchases, with social platforms contributing 20% of the incremental traffic for the top 30 D2C brands over the past two years.

CBI Probing Hindalco & MoEF Ex-Director Over Green Nod to Talabira Project in 2014-15

Our Bureau

Mumbai: The Central Bureau of Investigation (CBI) is probing Hindalco Industries Ltd (HIL) and a former director of the ministry of environment and forest (MoEF) in a corruption case.

According to the first information report (FIR), CBI has booked the company, Dr T Chandini, the then director of MoEF and unknown persons under certain sections of the Prevention of Corruption (PC) Act and Section 120 (B) pertaining to criminal conspiracy of the Indian Penal Code (IPC).

"This is an old matter pertaining to 2014-15. These mines were de-allocated as part of the government's de-allocation process. This is a matter of public record where more than 100 mines were de-allocated," a Hindalco spokesperson told ET.

According to the FIR, the case was registered in pursuance of a preliminary enquiry (PE) conducted by the agency in 2016 that allegedly disclosed commission of a cognisable offence. The period under investigation is between 2000 and 2013.

The CBI alleged that its PE found that during 2014-15 to 2017-18 and 2018-19, HIL produced/ mined 3,045 mtpa excess coal in violation of the MoEF norms. In 2010, MoEF classified the industrial and mining area of Ib Valley (Orissa) and Jharsuguda (Orissa) as critically polluted. The probe found that Talabira I Open Cast Mine for which HIL had applied for prior environmental clearance from the MoEF was located in a critically polluted area of Jharsuguda, of 2 which Ib Valley is a part.

The PE found that Dr Chandini, who was allegedly required to return the proposal of HIL, instead allegedly acted fraudulently and communicated to the company that their project would be considered in the next meeting.

The PE states the "... facts and circumstances disclosed during enquiry prima facie revealed that Dr T Chandini was fully aware of the prohibition imposed by MoEF in critically polluted areas."

An industry source told ET that the Talabira mines were reallocated in 2015-16 and have subsequently been auctioned and sold separately. Hindalco does not own these mines anymore.

Oriana to Build Electrolyser Giga Factory for Green Hydrogen, E-Fuels

Our Bureau

Mumbai: Renewable energy company Oriana Power on Tuesday said it will build a gigawatt-scale factory for manufacturing alkaline electrolyser and balance of plant (BOP) modules. The factory will open in two phases, with the first phase of 500 mw annual capacity for electrolyser production expected to be operational in 2026.

The facility is being built in partnership with Splitwaters, a US-based provider of alkaline electrolyser and BOP equipment.

"This factory will be a critical component in the company's efforts to develop green hydrogen and e-fuels, including green ammonia, e-methanol and green methanol," Oriana said in a statement. It did not disclose investment details for the new venture.

The collaboration with Splitwaters will enable Oriana Power to utilise the latest electrolyser technology for ensuring hydrogen production from renewable energy sources, the company said. The BOP systems will support the electrolyser's manufacturing critical functions such as water supply, gas separation, and purification, it said.

"The green hydrogen market faces significant challenges due to high initial capital costs and lengthy execution timelines, but Splitwaters' one-stop-shop model and modular technology address both these issues effectively," said Anirudh Saraswat, chief business officer at Oriana Power.

"Our partnership with Splitwaters allows us to deploy the state-of-the-art technology to produce these clean energy carriers at scale and at a significantly lower cost, up to 30% lower, than competing methods," he said.

Oriana Power said it is also working on setting up green hydrogen and e-fuel projects in the UK and Europe in partnership with Splitwaters.

"The payoffs from the green hydrogen and e-fuels business will start by next financial year and we expect this business to contribute a significant share of our revenues by FY2027," Saraswat said.

Over 84% Districts Prone to Extreme Heatwaves: Report

New Delhi: More than 84% of districts in India are prone to extreme heatwaves and 70% are experiencing a rise in the frequency and intensity of extreme rainfall events, according to a new analysis. The report, Managing Monsoons in a Warming Climate

by the independent developmental organisation IPE Global and East India Technologies, said the country was experiencing ex-

tended summer-like conditions during the June-September monsoon. The report said UP, Madhya Pradesh, Rajasthan, Gujarat and Tripura were the top five heatwave hotspot states in the 2013-22 decade. It said 74% of districts in the coastal regions, 71% in the plains, and 65% in the hills had "high to very high" exposure to extreme heatwaves. —PTI
