Leadership Indicators

1. Awareness programmes conducted for value chain partners on any of the Principles during the financial year:

Throughout the financial year, we prioritized the dissemination of critical principles such as quality, environment and safety across our value chain. Emphasizing the paramount importance of quality, environment and safety in all our operations, we meticulously educated our vendors on adhering to stringent quality standards and robust environment & safety protocols.

Our partners are educated on labour principles, including compliance with labour laws, fair wages, non-discrimination, and the prohibition of child and forced labor. By instilling a culture where quality, environment, safety, and ethical business practices are paramount, we ensure the integrity and sustainability of our value chain, fostering trust and reliability at every stage of our operations.

Total number of awareness programmes held	Topics / principles covered under the training	%age of value chain partners covered (by value of business done with such partners) under the awareness programmes
14	Real Estate Value Chain	100%
10	Fire & Safety	90%
8	Site Safety	95%
9	Code of Conduct	100%

2. Does the entity have processes in place to avoid/ manage conflict of interests involving members of the Board? (Yes/ No) If yes, provide details of the same.

As required under the Companies Act 2013, the Company obtains Annual Declarations from the Directors and KMPs, and also periodical declaration for the changes if any to the declaration made earlier. The declarations help the Company to identify the conflict and avoid such transactions as appropriate. Further, the Director interested in any subject matter, will recuse himself from the meeting and move out of the meeting room. In the discussion on the evaluation of Directors by the Nomination and Remuneration Committee, the Director concerned will not participate, while he is being evaluated by other members.

The Code of Conduct for Directors, KMPs and Senior Employees also has an appropriate process to disclose the conflict situation.

PRINCIPLE 2

Businesses should provide goods and services in a manner that is sustainable and safe

Essential Indicators

1. Percentage of R&D and capital expenditure (capex) investments in specific technologies to improve the environmental and social impacts of product and processes to total R&D and capex investments made by the entity, respectively.

In our efforts to enhance the environmental and social impacts of our construction processes, we have invested in aluminum formwork technology. Aluminum formwork is a sustainable alternative to traditional wooden formwork, significantly reducing timber usage and minimizing deforestation. It also helps in reducing construction waste due to its reusability. Socially, the lightweight nature of aluminum formwork reduces the physical strain on workers and lowers the risk of on-site injuries, promoting a safer working environment. Additionally, the precision and efficiency of aluminum formwork result in high-quality, durable structures, contributing to safer and more resilient buildings for end users.

2. Does the entity have procedures in place for sustainable sourcing? (Yes/No). If yes, what percentage of inputs were sourced sustainably?

YES, the Company integrates sustainability into its supply chain and is driven by the Sustainable Supply Chain Management Policy (SSCM)

The Company gives priority to purchasing locally available materials/products of high quality to minimize environmental impact and gives preference to green-certified field products (including FSC and other products)

Approximately 30% of the inputs were sourced sustainably.

3. Describe the processes in place to safely reclaim your products for reusing, recycling and disposing at the end of life, for (a) Plastics (including packaging) (b) E-waste (c) Hazardous waste and (d) other waste.

The Company is in the business of construction and development of residential homes. We have detailed process for recycling and reusing of materials as below:

Plastics: The waste generated during construction, which are removed for recycling or disposal by the vendors

- E-waste: E-waste is handled centrally through our authorized e-waste handlers
- Hazardous waste: Not applicable
- Other waste: STP is provided at sites to treat the wastewater and is reused for Gardening. Organic waste convertors are deployed at most of the sites.

The Company uses a state of art material for the fabrication of concrete using Aluminum sheet. This material is 85% reusable after the completion of the project to another Project. This reduces the use of natural materials like wooden planks/ shuttering materials.

4. Whether Extended Producer Responsibility (EPR) is applicable to the entity's activities (Yes / No). If yes, whether the waste collection plan is in line with the Extended Producer Responsibility (EPR) plan submitted to Pollution Control Boards? If not, provide steps taken to address the same.

Extended Producer Responsibility is not applicable to the Company's activities.

Energy intensity in terms of physical Output	0.001	0.001
Energy intensity (optional) - the relevant metric may be selected by the entity	0	0

*For energy consumption, units were computed based on average rate

2. Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency?

No

3. Does the entity have any sites / facilities identified as designated consumers (DCs) under the Performance, Achieve and Trade (PAT) Scheme of the Government of India? (Y/N) If yes, disclose whether targets set under the PAT scheme have been achieved. In case targets have not been achieved, provide the remedial action taken, if any.

Not applicable

4. Provide details of the following disclosures related to water, in the following format:

Parameter	FY24	FY23
Water withdrawal by source (in kiloliters)		
(i) Surface water	0	0
(ii) Groundwater	0	0
(iii) Third party water*	75,425	25,413

Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency? - No

6. Has the entity implemented a mechanism for Zero Liquid Discharge? If yes, provide details of its coverage and implementation.

To minimize wastewater discharge, we have established systems designed to achieve Zero Liquid Discharge (ZLD). Sewage Treatment Plants (STPs) at several of our properties treat water for reuse in applications such as toilet flushing and irrigation of green spaces. These initiatives reduce our dependence on fresh water and significantly lower wastewater discharges, supporting our commitment to environmental sustainability.

7. Please provide details of air emissions (other than GHG emissions) by the entity, in the following format:

Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency? - No

11. Briefly describe the waste management practices adopted in your establishments. Describe the strategy adopted by your Company to reduce usage of hazardous and toxic chemicals in your products and processes and the practices adopted to manage such wastes.

We do not have a documented waste management process, as our vendors and suppliers are responsible for handling the waste generated.

12. If the entity has operations/offices in/around ecologically sensitive areas (such as national parks, wildlife sanctuaries, biosphere reserves, wetlands, biodiversity hotspots, forests, coastal regulation zones etc.) where environmental approvals / clearances are required.

Our residential housing projects are not located in the ecologically sensitive area. The projects are approved/cleared by the appropriate authorities including the state and central pollution control and environmental authorities.

13. Details of environmental impact assessments of projects undertaken by the entity based on applicable laws, in the current financial year:

Not applicable

14. Is the entity compliant with the applicable environmental law/ regulations/ guidelines in India; such as the Water (Prevention and Control of Pollution) Act, Air (Prevention and Control of Pollution) Act, Environment protection act and rules thereunder?

All our projects have clearance/approval from applicable environment agencies/regulators.

Leadership Indicators

1. Water withdrawal, consumption and discharge in areas of water stress (in kilolitres):

For each facility / plant located in areas of water stress, provide the following information	Not applicable
Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency? (Y/N)	Not applicable
If yes, name of the external agency.	Not applicable

2. Please provide details of total Scope 3 emissions & its intensity:

Not applicable

3. With respect to the ecologically sensitive areas reported at Question 10 of Essential Indicators above, provide details of the significant direct & indirect impact of the entity on biodiversity in such areas along with prevention and remediation activities.

Not applicable

4. If the entity has undertaken any specific initiatives or used innovative technology or solutions to improve resource efficiency, or reduce impact due to emissions/effluent discharge / waste generated, please provide details of the same as well as the outcome of such initiatives, as per the following format:

* These new initiatives are being implemented on a trial basis and based on the success, these might be gradually introduced to other projects too.

S.No.	Initiative undertaken	Details of the initiative	Outcome of the initiative
1	Promoting sustainable construction*	Significant change we have made is the modification of our concrete mix composition. Instead of relying solely on high cement content, we have introduced GGBS as a Supplementary Cementitious Material (SCM). GGBS is a byproduct of manufacturing iron in a blast furnace. By incorporating GGBS, we not only reduce the amount of cement needed but also decrease the carbon footprint associated with cement production. Reduction in the water usage by replacing conventional water curing with curing compound. And in case of water curing, sprinkler technique has been adopted instead of conventional type. Rod straightening machine implemented to use the lower dia rods which may end up as scrap.	
2	Usage of LED bulbs	Replacing the normal incandescent bulbs with LED bulbs	
3	Wastewater Management	Wastewater generated is treated at the sewage treatment plant (STP) and reused efficiently for secondary consumption purposes like gardening, landscaping and flushing. This process significantly reduces our dependence on potable water, thereby conserving precious water resources.	
4	Water Conservation Initiatives*	To reduce water waste, implemented several water conservation measures, ensuring the use of low-flow fixtures and efficient irrigation methods. These measures include: • Water-efficient showerheads • Water-efficient bathroom faucets • Efficient water closets • Water-efficient kitchen faucets	27% Water Savings
5	Energy Conservation Initiatives*	Following energy conservation measures have been considered on design phase at Park 63 project, • Reduced Wall to Wall ratio • Reflective exterior wall • Natural Ventilation • Efficient Exterior Lighting	38% of energy savings
6	Renewable Energy*	Power usage in common areas at Park 63 is converted to green power sources to reduce our carbon footprint. This initiative includes the installation of solar photovoltaic (PV) modules thus ensures sustainable energy practices are adopted throughout the project.	

S.No.	Initiative undertaken	Details of the initiative	Outcome of the initiative
7	Implementation of Voided Slabs*	We have utilised in applicable areas Voided slab technology has been adopted where it is a sustainable construction method aimed at reducing the environmental impact of concrete structures. By incorporating filler material within concrete slabs, voided slabs significantly reduce the amount of concrete & steel needed for construction. This results in a substantial decrease in carbon emissions associated with cement production, contributing to a greener and more sustainable built environment.	
8	Implementation of Waffle Slabs*	We have utilised in applicable areas Waffle slab technology has been adopted where it is an innovative construction approach designed to minimize the environmental impact of concrete structures. By utilizing a grid pattern of ribs on the underside of slabs, waffle slabs reduce the amount of concrete required for construction while maintaining structural integrity. This reduction in concrete & steel usage results in decreased carbon emissions associated with cement production, making waffle slabs an environmentally friendly choice for building projects. Additionally, waffle slabs offer enhanced structural efficiency, allowing for larger spans and reduced need for columns, further reducing material usage and environmental footprint.	The adoption of waffle slab technology has contributed to significant reductions in concrete consumption and associated carbon emissions.

The Corporate Social Responsibility Policy of the Company is in compliance with Sec 135 of the Companies Act 2013. In addition to the Statutory requirement, we believe in providing assistance to the society and community for their upliftment and extending our financial support.

We believe in "transforming the life" of the poor and weaker sections of society. Basis, over and above the statutory contribution, our Company has made donations to provide food materials to a special children's care centre, blind school and extended assistance to the education of the female children and health care. In line with this principle, the Company has been providing donations to provide provision of food materials to NGOs in Bengaluru to provide food to the underprivileged. The Company has provided medical equipment to the nearby hospital.

Apart from this, the Company annually sponsors the "Shriram Bengaluru Marathon" for the past 10 years to encourage two major causes: (A) Bringing a Red Ribbon Revolution - to eradicate stigma and discrimination among children and youth living with HIV/ AIDS. (B) Bringing them (children and youth living with HIV/ AIDS) to the mainstream through sports as a medium of transformation and enable them to emerge as athlete of the state.

We enhanced the environment for intellectually disabled children at Tambaram Institute by clearing overgrown areas, installing an RO water system, laying eco-friendly flooring, fitting mosquito nets, and creating a sensory garden. Following Cyclone Michaung's flooding in Chennai, we provided relief kits with essentials to more than 2,500 families. Additionally, during Road Safety Week, we conducted awareness campaigns with the Tamil Nadu Traffic Police focused on traffic rules and safety for school children and the elderly.
