Subject: Outcome of the Conference Call held on 12th September, 2024 under the SEBI (Listing Obligations and Disclosure Requirements), Regulations, 2015

Dear Sir(s),

Further to our letter dated September 9, 2024 and September 11, 2024, regarding non-deal roadshow of investor group meeting(s), please find the copy of the Investor Presentation which was shared to the Investor(s) is attached herewith for your record(s). The same is also available on the website of the Company at <https://www.uflexltd.com/company-presentation.php>.

Further, no unpublished price sensitive information was shared during the said Meeting(s).

Kindly take the same on your records.

Thanking You,

Yours faithfully,
For UFLEX LIMITED

(Ritesh Chaudhry)
Sr. Vice President - Secretarial &
Company Secretary

India flexible packaging market by product types in 2022 (revenue in \$ billion)

7x Growth Potential : India's per capita polymer consumption is highly underpenetrated, suggesting a future growth potential of 4 to 7 times.

01

STEADY ECONOMIC GROWTH

Steady economic growth amidst global challenges

02

FMCG DEMAND

Gradual uptick in rural demand

03

COMMODITY PRICE TREND

Raw material prices surge in Q1 FY25, normalized by August

Global outlook resilient although with some moderation

- Emerging market central banks are cautious about cutting rates due to risks from interest rate differentials & currency depreciation
- In the US, a sharper-than-expected growth slowdown was driven by reduced consumption and a negative impact from net trade
- Shoots of economic recovery in Europe, led by an improvement in services activity and higher-than-expected net exports
- Continued weaknesses in manufacturing suggest a more sluggish recovery in countries such as Germany.

India continues to sustain its momentum

- FY25 GDP expected to grow by 7.2%
 - Private final consumption expenditure (PFCE) grew by 7.4% in Q1 FY25
- Balanced Macros
 - Tax collections remain buoyant
 - Investment activity is anticipated to remain on track
 - Strong Bank and Corporate Balance Sheets
 - Forex Reserves hit a fresh all time high of USD 683.99 billion

Evolving consumption trends

Steady growth in both consumption value & volume

FMCG growth %

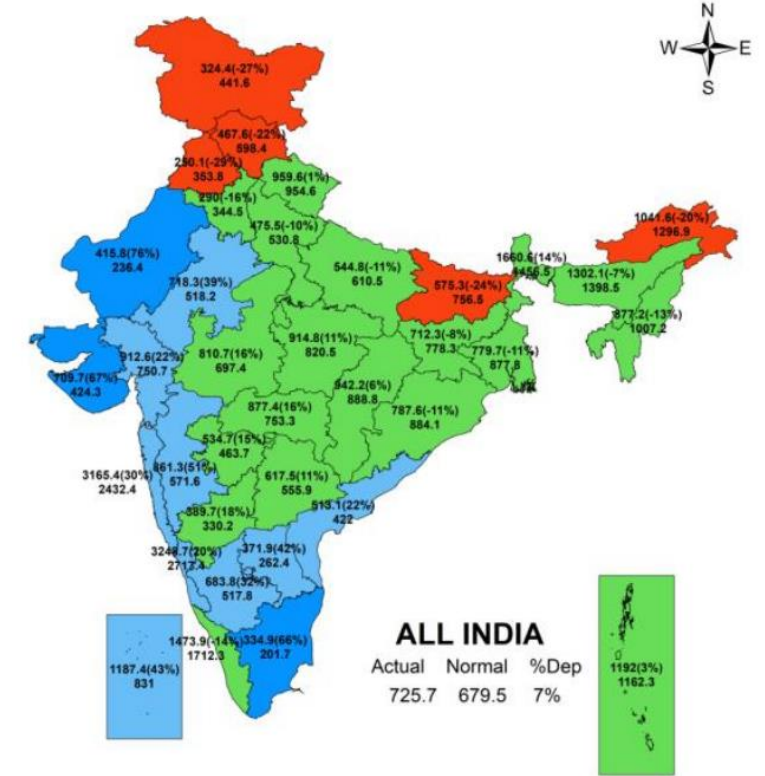

Rising rural consumption

FMCG volume growth % in Rural & Urban

Rainfall status: +7% LPA (1st Jun'24 – 28th Aug'24)

Food inflation remains elevated (Monthly YoY%)

Consumer non-durables growth lag (YoY%)

Large Excess 60% or more | Excess 20%-59% | Normal -19% to 19% | Deficient -59% to 20%

An above-normal monsoon will augur well for the agricultural sector and rural demand

Commodity price trends

Commodity prices surged during the quarter

Commodity price change

	Q1'25 vs. Q4'24	Q1'25 vs. Q1'24	Q1'25 vs. Q1'23
Crude Oil (Brent USD/bbl)	+2.0%	+8.1%	-25.4%
PTA (Rs./KG)	+4.2%	+4.3%	-11.9%
MEG (Rs./Kg)	-2.8%	+5.4%	-9.3%
MELT (PTA+MEG) (Rs./Kg)	+2.7%	+4.5%	-11.4%
PP homopolymer (Rs./kg)	1.6%	+0.8%	-21.1%

Commodity prices surge in Q1 FY25, Normalize by August

PTA, MEG, PTA MEG MELT and Brent crude price trends

PTA, MEG, and MELT prices are sourced from ICIS, PLATTS, and ME Global. These prices represent the average import index price, with PTA and MEG calculated as the average of ICIS and PLATTS monthly prices. From April 2023 onwards, ME Global prices are used for MEG price. Note: Import duty, terminal handling charges, and local freight costs are not included in the price and will be added separately on this price. Brent crude oil: EIA; monthly prices are calculated by the U.S. Energy Information Administration (EIA) by taking an unweighted average of the daily closing spot prices.

Investment proposition

India's largest flexible packaging & solutions company

FY24 consolidated revenues

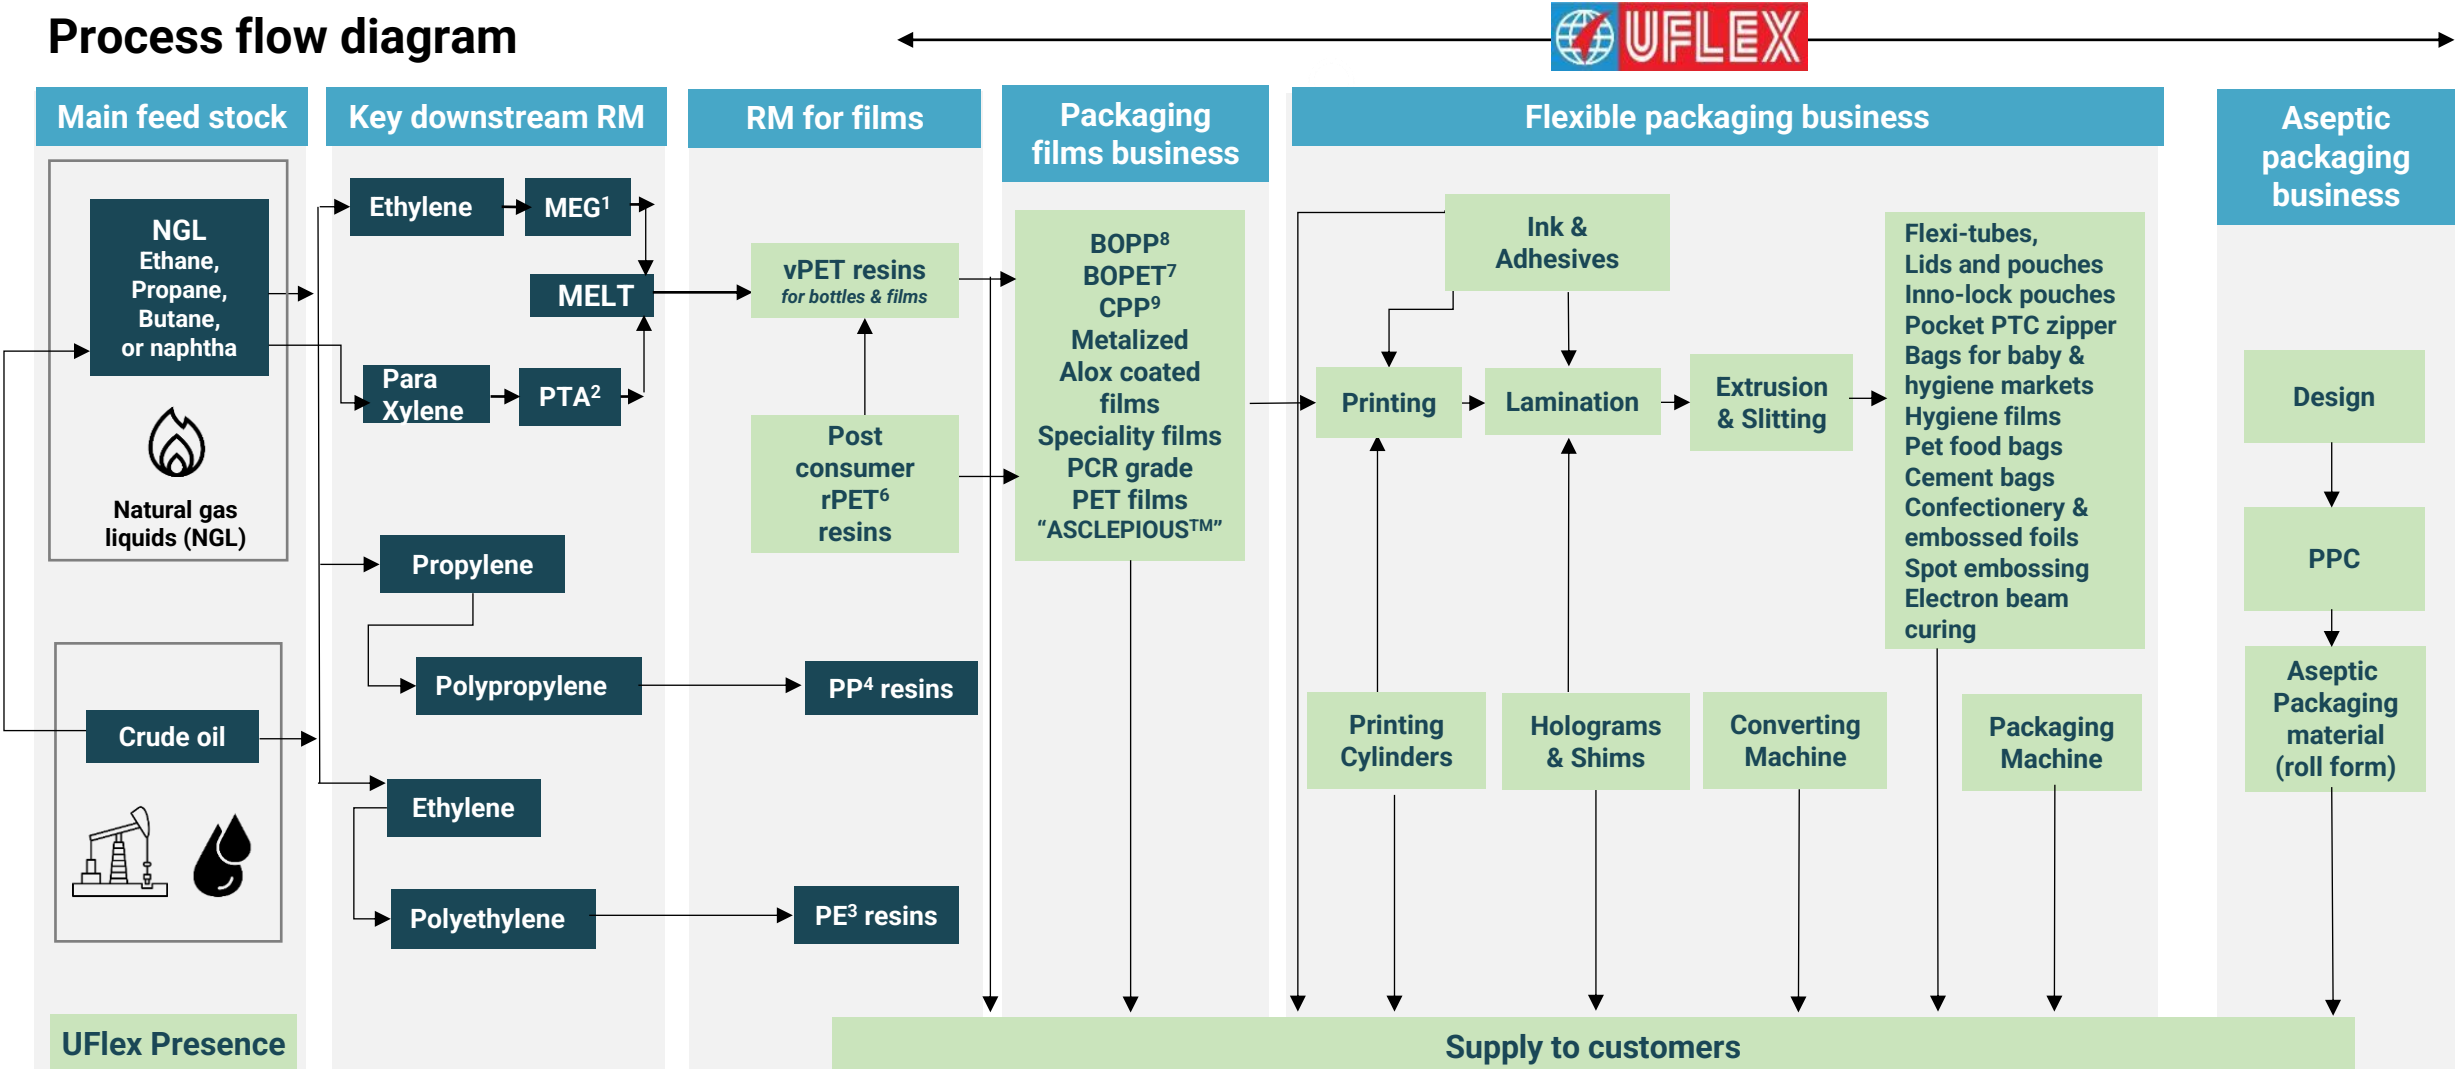

FY24 consolidated EBITDA

In FY24, UFlex normalized EBITDA was Rs. 16,103 million. This normalized EBITDA figure includes adjustments of Rs. 968 million related to foreign currency gain/loss and profit/loss in derivative instruments.

300,000	423,000	510,000	591,000	591,000

To calculate capacity utilization, We use the proportion of the annual capacity that is operational during the fiscal year, which is computed by dividing the yearly capacity by 12 and factoring in the months of operation after commissioning.

Poland: In Q3 FY21(OND20), 45,000 MTPA second BOPET line was commissioned, so 6 months of its capacity(45k/12*6) and 30,000 MTPA from the first line were used in the FY21 utilization calc.; **Hungary:** 42,000 MTPA BOPP line was commissioned in Q1 FY22, starting April 1, 2021.; **Dubai:** Production on the 30,000 MTPA second BOPET line ceased in early June 2019, only 5,000 MT considered in FY20, alongside 22,000 MT from the first line for utilization. Production of the 18,000 MTPA CPP line started in May 2022, so 16,500 MT (11 months) of capacity was included in FY 23 utilization.; **Russia:** 30,000 MTPA BOPET line in Russia was commissioned in Q2 FY21 (JAS20). So 22,500 MT (9 month) of capacity used in FY21 for utilization; **Dharwad, India:** 18,000 MTPA CPP line was commissioned in Q2 FY23 (JAS22, 9 mon. of capacity for utilization in FY23), & 45,000 MTPA BOPET line was commissioned on March 31, 2023. **Nigeria:** 45,000 MTPA film line was commissioned in Q2 FY22 (JAS21), So, 33,750 (MT (9 months) of capacity for utilization in FY22.; **Egypt:** 42,000 MT BOPP line commissioned in Q4 FY21(JFM 21).;

Centralized procurement in major production facilities

- 
- **01** UFlex follows year-long volume contract with the RM suppliers while prefers spot-price for supplying finished goods. This results in lowest manufacturing costs, operational flexibility and assurance of RM availability.
 - **02** The inventory holding period is optimal (~89 days in FY24)
 - **03** The Global presence of UFlex enables it to centrally procure raw materials with benefits of economies-of-scale

Project Plastic Fix: Paving the way to a circular, greener, and sustainable future

Sustainability: 'Project Plastic Fix' continues to turn waste into wealth

At UFlex, circular economy innovations such as packaging Film: "ASCLEPIUS™", made of 100% PCR PET (rPET) chips, and injection molding items made from recycled MLP granules, are paving the way for a more sustainable and greener tomorrow.

- Vision of circularity
- 'Project Plastic Fix' milestones: Progress in FY2024
- Innovations for sustainable Re-use
- ESG

Extended Producer Responsibility (EPR) for Packaging

A: Flexible/Plastic packaging

B: Alternate to Flexible Plastics Packaging-Aluminum/Tin/Paper/Glass

C: Future of Flexible/Plastic packaging

Under Plastic Waste Management (Amendment) Rules, 2022, the classification of plastics is defined below:

- **Category I:** Rigid plastic packaging.
- **Category II:** Flexible plastic packaging of a single layer/multilayer (more than one layer with different types of plastic), plastic sheets and covers made of plastic sheet, carry bags, plastic sachet or pouches.
- **Category III:** Multi-layered plastic packaging (at least one layer of plastic and at least one layer of material other than plastic).
- **Category IV:** Plastic sheets used for packaging and carry bags made of composite plastics.

Year-wise target for minimum level of recycling of plastic waste across different categories

- PIBOs obligation for recycling – Min. level of recycling of plastic packaging waste (% of EPR target)

Plastic Packaging Category	2024-25	2025-26	2026-27	2027-28 and onwards
Category I	50	60	70	80
Category II	30	40	50	60
Category III	30	40	50	60
Category IV	50	60	70	80

- PIBOs obligation for use of recycled plastic content – Mandatory use of recycled plastic (% of plastic purchased)

Plastic Packaging Category	2025-26	2026-27	2027-28	2028-29 and onwards
Category I	30	40	50	60
Category II	10	10	20	20
Category III	5	5	10	10

Guidelines on Extended Producer Responsibility (EPR) for plastic packaging

Provision	Violator	Violation	Environmental Compensation
Environmental compensation (EC) shall be levied based on polluter pays principle, w.r.t. the nonfulfillment of EPR targets by PIBOs.	PIBOs.	Shortfall in EPR target in following types <ol style="list-style-type: none"> Recycling End of life recycling Mandated use of recycled plastics 	EC to be levied at INR 5,000 per ton, at INR 10,000 per ton for 2 nd time and INR 20,000 per ton for 3 rd time. EC can be carried forward up to 3 years as per EPR guidelines.

Sustainability: 'Project Plastic Fix' continues to turn waste into wealth

6,638 MT PCR PET bottle trash or 478 million PET bottles recycled in FY24

2,569 MT PCR PET bottle trash or 185 million PET bottles recycled in Q1 FY25

6,964 MT and 2,027 MT MLP waste recycled in FY24 & Q1 FY25 respectively

35.4%+ YoY Increase in recycled/reused raw materials/inputs in our production processes

100+ product variants, 6 facilities

Operational since **1995**

UFlex's four-fold approach to sustainable and eco-friendly packaging is a key unique selling proposition

- ✓ UFlex Group has been a trendsetter when it comes to sustainable innovation and commitment towards the 'Circular Economy'.
- ✓ UFlex converts plastic waste into fuel, biomass and green films through a superior technology developed in-house.
- ✓ UFlex recycles waste into granules which can be re-used to produce 1,000+ products.
- ✓ Sustainable packaging is an opportunity for UFlex as it is best positioned among the global peers to adapt to the environmental changes.

Waste2energy

At our Noida plant, UFlex converts 6 tons of discarded waste material (rPE) into Liquid Fuel, Hydrocarbon Gas and Carbon Black.

1

Pyrolysis

Greenhouse-emission-free fuel conversion from plastic waste

Recycling

MLP waste into granules used to make over 10000 products: road dividers, furniture, dustbins

2

Recycling

MLP Waste recycled into granules. Molding industry re-uses it to make industrial/ household products with sustainable commercial value.

Biomass

UFlex develops special master batch additives that converts plastic waste into 100% biodegradable biomass by 12 months.

4

Converting plastic waste into 100% biodegradable biomass

Biomass

Converting waste plastic bottles into upto 100% PCR films Asclepius

Asclepius

3

Green Film Asclepius

It is a 90% PCR content rBOPET Film. It reduces 75% carbon footprint versus virgin BOPET Films.

Among the first in the world to recycle mixed plastic waste for which it earned recognition at Davos Recycle Forum in 1995, way ahead of peers from the developed economies

Highlights of initiatives taken

- **PCR recycling infrastructure at Noida** is utilized to provide granules for manufacturing 90% PCR based green films Asclepius. Clone capacities already developed in Mexico, Egypt and Poland.
- Launched '**Project Plastic Fix**', a four-way method to reinstate the virtue of plastic from Waste to Wealth.
- **Developed host of new sustainable products such as**
 - Engineering product, RELAM 250 to recycle all layers of MLP homogenously.
 - UV LED Ink series, Water based Inks, Paper based tubes, Water based Cylinders, Solvent-free Adhesives.
 - Low carbon footprint packaging films: F-MSH, F-PS, B-THP & many more.

Commissioned new projects will create new revenue streams and profitability. The resulting earnings generated will aid in deleveraging the company's balance sheet.

Investing in future

Capex in Q1 FY25

- Incurred total Capex of Rs 2,802 Mn during the quarter, with two projects accounting for major portion
 - a) Egypt: Rs. 1,145 million was allocated for developing a virgin PET chips line with a capacity of 2,16,000 MTPA.
 - b) Rs. 1,194 million was allocated to Indian operations during the quarter, with Rs. 653 million earmarked for acquiring essential machinery at the Sanand facility.
 - c) Remaining Rs. 463 million of the capex attributed to various miscellaneous and maintenance activities

Upcoming in FY 2025

Sanand, Gujarat

- Asepto Packaging Debottlenecking
- Plan to increase production capacity from 7bn packs per annum to 12bn packs per annum
- Further future expansion to be decided at an appropriate stage
- Expecting growth in liquid packaging business upon completion of debottlenecking capacity at Sanand plant in H2 FY25

Egypt

- Plans to commission virgin PET chips line of 2,16,000 MTPA in Egypt with a total investment of ~USD 68 million
- The plant is scheduled for commissioning in H2 FY25.
- To date, ~USD 44 million has already been spent while the remaining capex to be utilized before commissioning of the PET chips plant in Q3 FY25.

Mexico

- Plans are in place to commission an 18,000 MTPA CPP line in Mexico, along with a coating line, between the second and third quarter of fiscal 2025.
- The total estimated capital expenditure for this project is ~USD 37 million (640 million Mexican Pesos), of which, ~USD 33 million (564 million Mexican Pesos) has already been incurred, while the remaining USD 4 million (76 million Mexican Pesos) to be used before commissioning of the CPP line.

Q1 FY25 EBITDA bridge

Normalized EBITDA Bridge (Q1FY24 vs Q1FY25)

Robust EBITDA growth: strong volume growth, improved realization and a better product mix

- Revenue increased by 12.3% YoY and 5.3% QoQ, driven by improved pricing and robust volume growth in the packaging film business.
- Strong operating profit driven by significant volume growth, enhanced pricing, and an improved product mix.
- Note: Rs. 249 million related to foreign currency gains/losses and gains/losses in derivative instruments are absolute adjustments made to calculate normalized EBITDA. This figure does not represent an increase compared to same quarter previous year.

Q1 FY25 EBITDA to normalized PAT

EBITDA to Normalized PAT (Q1FY25)

BASIC EPS	Q1FY25
Weighted Av. No. of shares (millions)	72.2
Normalized earnings per share ¹	Rs 11.4

1. Normalized earnings per share based on adjusted net income excluding Exceptional items related to Nigeria, Egypt & Mexico currency devaluation

Chemicals

1. Radcure Products

Flexcure “Metal Spray” Gloss Coating for Metal-decor applications

Flexcure “Metal Spray Coating”, a new generation dual cure UV / LED curing mechanism designed especially for “Metal décor” applications, such as Aluminum, Steel, Iron & Metal composites etc. suitable for processing with latest generation spray coating machines. This is an eco-friendly coating designed offering best exterior durable properties.

Flexcure “PVC Mirror Gloss” Coating for PVC flexible & rigid substrate applications

Flexcure “Mirror Gloss Coating” is a new generation curing mechanism designed especially for PVC doors & Panel (flexible & rigid) substrates through roller coater applications with excellent mechanical & chemical resistant properties

Chemicals

2. Water Base Products

FLEXBOND PB 40

Flexbond PB 40 is water based general performance synthetic adhesive designed for handle & bottom pasting applications on medium-to-high speed automatic paper bag making machines through standard wheel applicator. This product is also suitable for side pasting application in corrugated boxes by wheel and can also be used for flute board pasting, corrugation honeycomb making.

FLEXCOAT FP BARRIER COAT UF009

This water-based, eco-friendly primer free coating offers a high oxygen barrier and is specifically recommended for BOPET film to enhance the shelf life of food. The coated films are suitable for packaging dry food items such as nuts, chips, and biscuits. This coating can be applied offline using a conventional rotogravure cylinder.

Chemicals

3. PU Products

Development of Polyurethane Acrylate (FLEXCRYL 3333)

The polyurethane acrylate resin is mainly used for production of UV curable coatings, printing inks, and adhesives

FLEXBON R110A/FLEXBON R110C

Adhesive for flexible packaging offering superior wetting properties. These adhesives are highly effective on combinations of metallized films and Aluminum foils with printed films, producing speckle-free laminates.

Flexible Packaging

UFlex converting division unveils innovative packaging solutions

Pouches boost brand visibility on shelves and online by capturing immediate attention. They advance packaging design, providing innovative solutions to meet consumer needs while supporting a more sustainable future.

**Riso FlaxOmega
multi-source edible oil**

**3D pouch with plastic handle, first
time in pesticide and Fertilizer**

**3D Format Pouch
in Vermi Compost**

Holography

Advanced holographic blister packaging solutions: A New Era of Counterfeit Deterrence

UFlex Holography business unit has made notable penetration in the pharmaceutical packaging market with its advanced holographic blister packaging solutions. In the Q1 of 2024-25, the division successfully attracted a significant number of customers in this format, providing the pharmaceutical industry with an exceptional level of product protection and brand security. UFlex enhanced holographic blister packs feature an arsenal of visually stunning and scientifically intricate security features, making replication virtually impossible.

Films

1. Acrylic Coated BOPP Films (1/2)

- a) "B-TAL" ultra-low SIT (65°C) one side Acrylic coated transparent BOPP film.
- b) "B-TAA" ultra-low SIT (65°C) both side Acrylic coated transparent BOPP film.
- c) "B-TAO" ultra-low SIT (85°C) one side Acrylic coated transparent BOPP film.

One sided Acrylic Coated BOPP films

Two sided Acrylic Coated BOPP films

Acrylic-coated BOPP film is a high-performance value-added super film known for its excellent transparency and clarity. It provides superior barriers against aroma, oxygen, and humidity, and features Excellent wide heat-sealing property at ultra-low temperatures (65°C or 85°C). Low temperature sealable layer makes it ideal for high-speed HFFS (Horizontal Form-Fill-Seal) machines for making units and/or multiple packs. Additionally, it offers excellent ink adhesion on acrylic side, high gloss, low haze, and good water vapor barrier properties.

Films

1. Acrylic Coated BOPP Films (2/2)

Acrylic Coated
BOPP films

Market & Application

1. Food Packaging
 - i. Flexible Pouches
 - ii. Wraps and Films
2. Beverage Packaging
3. Cosmetic Packaging
4. Medicine Packaging
5. Adhesive Tapes

End-use application

Films

2. “B-UNB-M” Outstanding Barrier Metallized BOPP Film (Non heat sealable version)

The “B-UNB-M” is an outstanding barrier metallized BOPP film, having ultra-high surface energy on one side and the other side no heat sealable treated layer. The film has exceptional barrier to oxygen, moisture, aroma and mineral oil. Sustainable & recyclable solutions to replace AL foil.

End-use application:

- Dry fruits & beverage packaging
- Confectionery & chocolate packaging

3. The “C-CPR-CH” Co-Extruded Transparent film with both sides treated and sealable

Co-Extruded Transparent CPP Film with double-sided treated and sealable. This high-performance film offers excellent sterilization capabilities, superior lamination adhesive anchorage, and high seal strength, making it an ideal choice for various packaging applications, including cheese packing.

End-use application:

- Cheese packaging

Appendix

A black and white photograph of a business meeting. Several people in suits are seated around a table. One person in the foreground is holding a pen over a document. The document contains a bar chart and the text 'COST ANALYSIS - PARETO'. Another person in the background has their hands clasped. The image is partially obscured by a light green circular overlay on the right side.
