Business Responsibility & Sustainability Report

Sigachi Industries demonstrates a comprehensive commitment to sustainable and responsible business practices across various domains. The Company's approach encompasses environmental stewardship, social responsibility, and robust governance, aligning its operations with global sustainability standards and stakeholder expectations.

In environmental management, Sigachi focuses on energy efficiency, emissions reduction, and responsible resource utilization. The company is taking bold steps towards sustainability. By 2030, the company aims to cut energy usage intensity by 20%. The company also aims to decrease coal usage intensity by 30% by 2032. To achieve this, the company is adopting energy-saving technologies to minimise its carbon footprint. The company's dedication also encompasses water conservation, with a goal to lower freshwater usage intensity by 30% by 2032, at the same time boost water recycling by 10% by 2028. Sigachi, has implemented several initiatives to enhance its sustainability and efficiency. These include the installation of ETP and STP in every manufacturing unit for water treatment and reuse, leading to reduced water consumption and environmental protection. Sigachi also uses Mechanical Vapour Recompression installations for energy efficiency and waste management. The company ensures the circular use of packaging materials by monitoring the life cycle of pallets, improving supply chain transparency. In transportation, Sigachi prioritises sea and rail, reducing emissions and enhancing operational efficiency. Biomass optimization is used for sustainable waste management, and solar power installations generate renewable energy, aligning with Sigachi's broader sustainability objectives. These initiatives demonstrate Sigachi's commitment to environmental responsibility and operational efficiency.

On the social front, Sigachi prioritizes employee well-being, health, and safety. The company is certified as a Great Place to Work and adheres to ISO 45001 standards in its manufacturing facilities. Sigachi's commitment to diversity, equity, and inclusion is evident in its efforts to enhance gender diversity and create opportunities for persons with disabilities. The Company also maintains strong community relations and upholds human rights principles throughout its operations and supply chain.

Governance at Sigachi is characterized by a strong ethical framework and commitment to transparency. The Company's Code of Business Conduct and Ethics guides decision-making and promote stakeholder trust. Sigachi has made significant strides in sustainable governance, including the release of its first Business Responsibility and Sustainability Report (BRSR) in FY 2023, achieving EcoVadis Silver certification, and aligning with Global Reporting Initiative (GRI) Standards and Sustainable Development Goals (SDGs). The Company's risk management strategy encompasses both financial and operational risks, with a proactive approach to leveraging opportunities such as currency fluctuations for strategic growth.

Through these multifaceted initiatives, Sigachi Industries demonstrates its dedication to creating long-term value for all stakeholders while minimizing its environmental footprint and positively impacting society. The company's holistic approach to sustainability positions it as a responsible corporate citizen committed to driving positive change in the industry and beyond.

Capex	3.39%	3.33%	MVRE, ATFD, ETP-RO, HAG, STP installation at all units.

2. a. Does the entity have procedures in place for sustainable sourcing? (Yes/No)

Sigachi ensures sustainable and socially responsible sourcing by using FSC-certified wood pulp for MCC production. This certification supports responsible forest management and benefits communities. When sourcing is required, the relevant department initiates a tender request with details for budgeting and technical specs. The procurement team then manages sourcing and commercial negotiations, while technical evaluations are handled by the requesting department. At least three quotations are solicited, and the selected vendor must sign the code of conduct and complete the ESG questionnaire before the purchase order is issued. Violations require corrective action within a set timeline.

The company's Code of Conduct for External Stakeholders mirrors their vision and anticipations for business partners, manufacturers, suppliers, service providers, traders, consultants, contractors, and so on.

Crucial aspects of their Supplier Code encompass:

- Operating business ethically and with integrity, honouring human rights and dignity.
- Adhering to environmental regulations and keeping all necessary permits and licenses.
- Providing a safe work environment with health and safety policies that align with local and national regulations.
- Establishing management systems for legal compliance, risk reduction, and ongoing improvement. As part of their dedication to ESG, sustainability, and responsible business practices, they have introduced an ESG Assessment process for their suppliers to assess and enhance their joint impact. Suppliers are required to supply precise and verifiable data on their ESG performance, which includes Environmental Impact, Social Responsibility, and Governance.

b. If yes, what percentage of inputs were sourced sustainably?

100% of the company's Key Starting Materials (KSMs) suppliers strictly follow sustainable methods and meet the standards of Good Manufacturing Practices (GMP). The company regularly conducts audits to ensure the quality and sustainability of their operations.

3. Describe the processes in place to safely reclaim your products for reusing, recycling and disposing at the end of life, for (a) Plastics (including packaging) (b) E-waste (c) Hazardous waste and (d) other waste.

(a) Plastics (including packaging)	Plastics recycling and disposal, including packaging, adhere strictly to the Central Government rules and the provisions of the Plastic Waste Management Rules. Additionally, waste is sent to authorised vendors approved by the government for recycling and disposal.
(b) E-waste	E-waste is disposed of through a registered recycler, with a preference for buy-back options, resulting in circular use.
(c) Hazardous Waste	Hazardous waste is disposed of at authorized sustainable disposal sites through authorized SPCB vendors or sent to cement industries.
(d) Other Waste.	Other Non-hazardous waste is directed to authorised recyclers, supporting recycling efforts and promoting sustainable waste management practices.

4. Whether Extended Producer Responsibility (EPR) is applicable to the entity's activities (Yes / No). If yes, whether the waste collection plan is in line with the Extended Producer Responsibility (EPR) plan submitted to Pollution Control Boards? If not, provide steps taken to address the same.

Leadership Indicators-

1. Provide the processes for consultation between stakeholders and the Board on economic, environmental, and social topics or if consultation is delegated, how is feedback from such consultations provided to the Board.

The Company engages in consultations and feedback sessions with stakeholder groups. Subsequently, business and functional heads analysed material topics related to the economy, environment, and social aspects. The company identifies material issues through stakeholder engagement exercises. These issues are then presented to the highest governing member and the Board to guide strategy and decision-making. The company periodically reviews stakeholder engagement efforts to identify important material issues affecting internal and external stakeholders.

2. Whether stakeholder consultation is used to support the identification and management of environmental, and social topics (Yes / No). If so, provide details of instances as to how the inputs received from stakeholders on these topics were incorporated into policies and activities of the entity.

The process of identifying and prioritizing material issues pertinent to environmental, social, economic, and governance topics is conducted in collaboration with stakeholders. Once these issues are identified, they are mapped to relevant risks. As part of the risk management plan, strategies and mitigation action plans are developed for the identified risks.

These material issues serve as a guiding framework for the non-financial disclosures through the Corporate Overview, Statutory Reports, and Financial Statements in the Annual Report 2023-24. The Sustainability Report adheres to relevant national and international guidelines and standards, disclosing the management approach, targets/goals, and non-financial performance in the reporting year for each identified material topic.

Moreover, the identification of material issues allows the focus to be placed on key areas of improvement. This enables the development of future action plans, such as policy development and implementation of initiatives. This approach ensures a proactive stance towards continuous improvement and sustainable growth.

3. Provide details of instances of engagement with, and actions taken to, address the concerns of vulnerable/marginalized stakeholder groups.

Community members are recognized as a vulnerable/marginalized stakeholder group. As part of the Corporate Social Responsibility (CSR) initiatives, a need assessment is undertaken to identify and prioritize focus areas for community development. Various CSR initiatives have been implemented to address these needs. For further details, one can refer to the Annual Report and the Annual CSR report.

Sigachi identifies communities and non-governmental organizations as vulnerable and marginalized groups.

Partnership with Aga Khan Rural Support Programme India (AKRSPI): Sigachi has partnered with AKRSPI to support villagers in need through initiatives under integrated development programme that comprises of :

1. Irrigation and Water Conservation
2. Agricultural and Environmental Practices
3. Renewable Energy Solutions
4. Community Support and Empowerment
5. Educational and Health Initiatives

Collaboration with Mauna Dhwani Foundation (MDF): Sigachi, in collaboration with MDF, empowers tribal women by providing sustainable livelihood opportunities through a world-class stitching unit and comprehensive training program focused on:

1. Skill Development
2. Sustainable Livelihoods
3. Community Strengthening

4. Do you have a focal point (Individual/ Committee) responsible for addressing human rights impacts or issues caused or contributed to by the business? (Yes/No)

Yes, Sigachi has zero tolerance for non-compliant behavior and is committed to addressing any concerns related to Code of Conduct violations. Typically, such concerns should be reported to your manager. If uncomfortable, stakeholders can escalate the issue to the Head of Department, Unit HR Manager, or Compliance Officer.

The Head of Human Resources is responsible for addressing human rights impacts and issues. The Human Rights Policy mandates that all stakeholders adhere to its principles and comply with applicable laws across all operational territories.

5. Describe the internal mechanisms in place to redress grievances related to human rights issues.

The Company follows a structured process for addressing grievances. When a complainant reaches out to their reporting manager, any unsettled grievances are escalated to the HR and Management. After detailed discussions with the complainant, the HR and Management work toward a win-win resolution.

Addressing Concerns: The Company encourages employees to share their concerns with their immediate manager as a standard procedure. If an employee feels uneasy about reporting a potential breach to their supervisor, the company allows for the issue to be escalated to the Head of Department, the HR Manager of the unit, or the Compliance Officer.

Reporting Violations and Ensuring Compliance: The Company insists on the immediate reporting of any potential or actual breaches of laws, company policies, or the Code. Reports can be made to an employee’s Manager/Supervisor, the Unit HR, the CFO, or the Compliance Officer.

Investigation Process: The Company follows a structured method for addressing each concern or violation report. This ensures a comprehensive investigation in line with the procedures of our Code of Business Conduct Committee and legal protocols.

Disciplinary Actions and Remedial Measures Based on the specifics and nature of the violation, the investigation committee recommends suitable remedial and preventive actions. These may include disciplinary measures.

Safeguard Against Retaliation: The Company is dedicated to protecting individuals who report alleged violations in good faith or cooperate in investigations. The company ensures these individuals are safeguarded from any form of retaliation.

Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency? (Y/N) If yes, name of the external agency.

No, an independent assessment/ evaluation/assurance hasn't been carried out.

7. Does the Company have any project related to reducing Green House Gas emission? If yes, then provide details.

Sigachi is actively implementing a range of initiatives to reduce greenhouse gas emissions:

Energy Efficiency: We're committed to responsible manufacturing, exploring ways to reduce our environmental footprint through energy-efficient technologies, building retrofits, and strategic HVAC use. Our air compressors with auto-off at 6-9 bar further optimize energy use.

Carbon Sequestration: Sigachi actively participates in reforestation and afforestation projects. One of our environmental targets was to plant 50,000 trees by 2026 to sequester atmospheric CO₂. We are proud to announce that we have already achieved this goal in FY 2024.

Sustainable Transportation: Sigachi champions clean commutes by promoting electric vehicles, enhancing public transport infrastructure, and offering employee carpooling programs. We encourage employees to use our bus service, which significantly reduces emissions from inefficient commuting habits. Additionally, 98% of our logistics shipments are dispatched by sea, greatly cutting emissions and our carbon footprint.

Green Supply Chain: We actively collaborate with suppliers to set emission reduction targets and promote sustainable practices throughout our supply chain. We screen our vendors for ESG initiatives and engage them in taking responsibility by providing Supplier ESG training.

Investing in Innovation: Sigachi is committed to investing significantly in research and development to drive innovative solutions that optimize our raw material consumption. Our focus extends to advancements in renewable energy, carbon capture, and energy storage. By integrating strategies to optimize resource consumption and waste generation, we align our practices with Sustainable Development Goals (SDGs) and Environmental, Social, and Governance (ESG) objectives, promoting responsible production and disposal practices.

8. Provide details related to waste management by the Company, in the following format:

9. Briefly describe the waste management practices adopted in your establishment. Describe the strategy adopted by your Company to reduce usage of hazardous and toxic chemicals in your products and processes and the practices adopted to manage such wastes.

Sigachi is deeply committed to clean manufacturing practices and efficient waste management. The company meticulously manages all solid wastes, both hazardous and non-hazardous. These wastes are segregated at their source and stored in dedicated areas within Sigachi's facilities.

Sigachi's approach involves categorizing hazardous wastes and storing them in designated hazardous waste storage areas. These wastes are then disposed of at facilities approved by the Pollution Control Board, ensuring strict compliance with regulatory requirements across all factory locations.

In a bid to enhance environmental stewardship, Sigachi directs nearly 100% of its non-hazardous waste to authorized recyclers. This initiative supports recycling efforts and contributes to sustainable waste management practices.

Moreover, Sigachi is actively implementing strategies to minimize the use of hazardous and toxic chemicals in its products and manufacturing processes. Through continuous process optimization, the company aims to reduce the generation of solvents and hazardous waste. Sigachi's practices include adopting safer alternatives, improving production efficiencies, and implementing stringent waste management protocols.

By converting waste into valuable biomass resources, Sigachi is not only mitigating environmental impact but also fostering a circular economy within its operations. This holistic approach underscores Sigachi's commitment to sustainable practices and regulatory compliance, ensuring responsible stewardship of resources and environmental protection.

10. If the entity has operations/offices in/around ecologically sensitive areas (such as national parks, wildlife sanctuaries, biosphere reserves, wetlands, biodiversity hotspots, forests, coastal regulation zones etc.) where environmental approvals / clearances are required, please specify details in the following format:

3. With respect to the ecologically sensitive areas reported in Question 10 of Essential Indicators above, provide details of significant direct & indirect impact of the entity on biodiversity in such areas along-with prevention and remediation activities.

Not Applicable, as the company does not operate in ecologically sensitive areas.

4. If the entity provided below taken any specific initiatives or used innovative technology or solutions to improve resource efficiency, or reduce impact due to emissions / effluent discharge / waste generated, please provide details of the same as well as outcome of such initiatives, as per the following format:

Sr. No	Initiative undertaken	Details of the initiative (<i>Web-link, if any, may be provided along-with summary</i>)	Outcome of the initiative
1	ETP and STP installation	Every manufacturing unit within Sigachi is equipped with ETP and STP installations. These installations are utilized to treat water prior to its reuse for process applications, in-house utilities, or discharge through government-authorized third-party facilities.	<ol style="list-style-type: none"> 1. Reduced Water Usage: Sigachi has achieved a substantial reduction in water consumption. 2. Environmental Protection: Sigachi's efforts have minimized pollution, contributing to a healthier environment. 3. Regulatory Compliance: Sigachi consistently meets government standards, demonstrating its commitment to responsible operations. 4. Sustainability: Sigachi has enhanced its recycling practices and resource conservation, underscoring its dedication to sustainability. 5. Resource Conservation: Sigachi efficiently reuses treated water, furthering its resource conservation efforts.
2	Mechanical Vapor Recompression (MVR) installation	Sigachi's manufacturing units are equipped with MVRE installations. These installations compress the vapor produced from boiling the liquid, which elevates its pressure and temperature. The compressed vapor is then utilized to supply the heat required for additional evaporation, rendering the process exceptionally energy-efficient.	<ol style="list-style-type: none"> 1) Higher Energy Efficiency 2) Cost Savings 3) Improved Waste Management 4) Enhanced Sustainability
3	End-of-Life Processes for Recycled Pallets	Sigachi ensures the circular utilization of packaging materials by actively monitoring the life cycle of the pallets. From the point of production to delivery, Sigachi has implemented a comprehensive system to trace their journey within the supply chain. Furthermore, Sigachi actively engages with customers to comprehend and record the management of these pallets at the end of their life cycle.	<ol style="list-style-type: none"> 1) Enhanced sustainability through circular packaging practices. 2) Improved supply chain transparency and accountability. 3) Stronger customer engagement and collaboration. 4) Continuous process improvement for efficient resource management. 5) Compliance with environmental regulations and optimized operations.
4	Sustainable Transportation Solutions in Supply Chain Management	<ol style="list-style-type: none"> 1. Sea Transportation: Sigachi Industries capitalizes on sea transportation, which accounts for 98% of its logistics shipments. This strategy substantially reduces emissions and the company's carbon footprint. 2. Railway Utilization: Sigachi Industries gives precedence to railways for international logistics from production sites to shipyards. This approach curtails greenhouse gas emissions and bolsters operational energy efficiency. 	<ol style="list-style-type: none"> 1) Environmental Responsibility: Reduced environmental impact. 2) Operational Efficiency: Improved efficiency and cost savings.

Sr. No	Initiative undertaken	Details of the initiative (Web-link, if any, may be provided along-with summary)	Outcome of the initiative
5	Biomass Optimization for Sustainable Waste Management	Facilities optimize waste management through: 1) Regular dosing of supplements to enhance bacterial activity. 2) Maintaining biomass levels below 70% to convert waste into valuable resources. 3) Continuous COD monitoring for efficient waste management.	1) Successful conversion of waste into valuable biomass resources. 2) Enhanced system efficiency and stability. 3) Demonstrates Sigachi's commitment to sustainability and innovation in waste management practices.
6	Solar Power Installation	A subsidiary of Sigachi Industries, has implemented a green energy initiative: 1) Solar Lights Installation: Nine solar lights installed, each with a capacity of 28 watts. 2) Energy Generation: Collectively generating 252 watts of clean, renewable energy. 3) Daily Output: Produces 3024 watt-hours (WH) of energy per day, equivalent to 3.024 kilowatt-hours (KWH). 3) Monthly Output: Generates 90 kilowatt-hours (KWH) of energy per month.	Environmental Impact: Reduction in carbon footprint and environmental impact. Sustainability Goals: Aligns with Sigachi Industries' broader sustainability objectives. Expansion Plans: Commitment to expanding green energy initiatives for a more environmentally responsible future.
7	HVAC Systems with Dampers	At Sigachi, our HVAC systems are designed for optimal heating, ventilation, and air conditioning with reduced energy consumption. They feature variable speed drives, smart thermostats, and advanced control systems. Dampers, adjustable plates or valves within the ductwork, regulate airflow and temperature by controlling the distribution of cooled or heated air to different areas of the building.	1) Energy Reduction 2) Cost Savings 3) Improved comfort
8	Variable Refrigerant Flow (VRF) Systems	At Sigachi, we have implemented VRF cooling systems to eliminate water use for cooling. VRF systems are advanced air conditioning systems that use refrigerant as the cooling and heating medium. They precisely control refrigerant flow to multiple indoor units based on demand in different zones, ensuring high efficiency and consistent, comfortable indoor environments. By adjusting refrigerant flow to meet exact requirements, VRF systems reduce energy consumption and increase efficiency.	<ul style="list-style-type: none"> Optimal efficiency with inverter-driven compressors and advanced control systems. Lower energy consumption, reduced operational costs, and a smaller carbon footprint. Elimination of water use and reduced energy consumption.
