About General Insurance Corporation of India (GIC Re)

GIC Re has steadfastly maintained its leadership position in the Indian reinsurance market. It is the largest reinsurer in the domestic reinsurance market in India and leads most of the domestic companies' treaty programmes and facultative placements. While foreign reinsurers have opened branch operations in India since early 2017, GIC Re is expected to maintain its market leadership and market share. GIC Re has been identified as Domestic Systemically Important Insurers (D-SIIs) for 2020-21 by insurance regulator IRDAI.

Internationally, GIC Re is an effective reinsurance partner for the Afro-Asian region, leading the reinsurance programmes of several insurance companies in Middle East and North Africa, and Asia including SAARC countries. GIC Re is 13th largest global reinsurer group based on gross written premium figures for 2020-21. It has branch offices in London and Kuala Lumpur. In April 2018, syndicate fully capitalised by GIC Re became operational at Lloyd's of London. This syndicate is expected to scale up over the next few years towards achieving the medium-term management objective of achieving 60:40 (domestic: international) risk portfolio composition.

The global economic growth is a key driver for insurance markets, which feeds into reinsurance sector. The pandemic has created significant uncertainties in regard to the growth trajectory.

As the effect of the pandemic recedes and economic recovery continues, insurance industry will see revival. This will then have a knock-on effect on reinsurance industry. However, the recovery could be variable across industries and thus various classes of insurance.

2020 saw significant impact of the global pandemic along with rising loss from secondary perils. Also, there was a trailing impact on the market from record level of global catastrophes in 2017 and 2018. Broadly, the return on equity earned by the reinsurance sector globally for last 4 years has not been meeting investor expectations. Alternative capital continues to be deployed in the market and is finetuning its approach to the sector. The reinsurance market has shown significant signs of hardening during last few months and the trend can be expected to continue during next 6 quarters. However, earlier expectations of significant hardening are being influenced by the inflow of new capital in recent months. Changing perception on climate change is likely to contribute to the price hardening trends in the sector.

In Indian context, as the insurers get listed and market consolidates in the backdrop of declining interest rates, the pricing discipline in the market can be expected to strengthen in the medium to long term.

GIC Re maintains a diversified risk portfolio that includes property, health, motor, agriculture, marine, engineering, aviation, liability. The general insurance business in India has penetration level at under 1% thus indicating great potential. Its dominance of the Indian market stems from a long-term and broad-based relationship with the Indian risk carriers. This is supported by continued obligatory cessions and order of preference. Its strength lies in its geographical and business diversification, long term relationships, prudent risk selection, effective exposure management, ample liquidity and efficient claims management. Its investment portfolio is also well diversified, with effective asset-liability management. Quite importantly for business that runs on human talent, GIC Re has the right talent pool with a low attrition rate.

GIC benchmarks its performance against the best-in-class global players. With the competitive advantage that it enjoys and with a domestic market growth momentum, on the strength of its balance sheet size and customer servicing, it can be expected to further strengthen its position globally.
