# Strong season, new markets add fizz to Varun Beverages

Operating leverage, product mix to offset raw material pressures

RAM PRASAD SAHU  
Mumbai, 13 July

International giant PepsiCo's strong June quarter earnings commentary is positive for its India franchise — Varun Beverages Limited (VBL). The global food, beverages and snack giant indicated that its developing and emerging market sales were resilient, delivering a double digit organic revenue growth across multiple countries, including India.

After a 26 per cent revenue growth in the last quarter, the company is expected to put up a strong show for the second consecutive quarter.

Analysts, led by Anand Shah of Axis Securities, estimate the company's June quarter (peak season) revenue growth to come in at 86 per cent year-on-year (YoY). This is on the back of a 93 per cent growth in India volumes and 46 per cent uptick in the international segment.

Overall, volumes are likely to grow by 85 per cent YoY to 282 million cases on the back of strong summer season, robust scale-up in new products and market share gains in south and west territories.

Strong top line performance will also lead to a doubling of operating profit to ₹1,143 crore.

While consumer companies are struggling with demand and margin pressures, VBL's performance stands out. Even as the staple (consumer) companies would register an aggregate annual revenue growth of 10 per cent over the past three years, VBL has the highest growth on that front at 18 per cent.

Its operating profit growth over the

## BACK IN FLAVOUR

	Juneqtr (in ₹ cr)	YoY chg (%)	QoQ chg (%)	3-year CAGR (%)
Revenues	4,561	86	61	18
Operating profit	1,143	100	115	13
Margin (%)	25.1	178	629	---
Net profit	716	132	182	21

Consolidated figures; CAGR: Compound annual growth rate  
Source: Axis Securities

three-year period too is the second best at 13 per cent as compared to the average for staple companies at 8 per cent, highlights Axis Securities.

While there would be input cost pressures in the near term, better product mix and operating leverage are expected to ensure healthy margins, believes B&K Securities.

Moreover, given VBL's improvement in performance trajectory, it could well be that Pepsi is gaining market share over Coca Cola — which is a structural re-rating trigger for the company in terms of multi-

ples going forward, says the brokerage.

A medium-term positive are the steps it has taken to de-risk the seasonality and portfolio risk. The company acquired the south and west India region in calendar year 2019 (CY19). Given the strong volume growth (45 per cent) and low market share of the company in the acquired territories, this offers a huge opportunity.

The other segment which should be beneficial is its presence in the international market which accounts for 19 per cent of total volumes and has higher realisations than the India market.

The international business posted an annual volume growth of 24 per cent over CY15-21 as compared to 14 per cent growth in India, according to Anant Chaudhary of Bonanza Institutional Research

Incremental gains for the beverage maker are also expected to come from new launches.

In February, the company signed a co-packing agreement to make Kurkure Puffcorn for the PepsiCo's India unit which marked its entry into the manufacturing of products other than beverages. In addition to growth in energy drink Sting, value added dairy products (mango shake, cold coffee) and Tropicana range, tapping into other PepsiCo food products for manufacturing and distribution would drive growth going ahead.

While there are multiple positives in the near term and the financial performance over the CY21-23 period is expected to remain strong, the 17 per cent uptick in the stock over the past month — from ₹747.9 apiece to ₹874.75 — captures some of these gains. Investors could consider the stock for the long term on dips.

# Unable to take duration call? Go for a dynamic bond fund

But these funds can underperform if the fund manager's calls go wrong

SANJAY KUMAR SINGH

The debt market could be volatile in the coming days. The interest-rate outlook could also change rapidly. Investors who find it difficult to deal with all this uncertainty may consider investing in a dynamic bond fund.

## Inflation versus recession fears

At present, central banks are hiking interest rates and withdrawing liquidity to rein-in high inflation. This policy could tip some developed-world economies into a recession. This could, in turn, lead to a further fall in commodity prices, and hence inflation, leading to an early end to the rate-hike cycle. But if commodity prices continue to rise, central banks may have to raise rates at a faster pace.

Pankaj Pathak, fund manager-fixed income, Quantum Mutual Fund, says: "Currently, a tussle is on between two narratives — inflation and recession. The narrative could keep changing periodically, causing volatility."

There's another factor adding to investors' dilemma. "Most are currently in shorter-duration funds to avoid the mark-to-market impact of rising rates. They will want to move into longer-duration funds when they think the repo rate has peaked, but may struggle to get the timing right," says Arun Kumar, head of research, FundsIndia.com.

## High level of flexibility

Many retail investors may not be equipped to handle these issues. Says Manish Bantia, senior fund manager, fixed-income, ICICI Prudential Asset Management Company: "Allocating investments in line with the evolving macros can be difficult for an investor, which is where a dynamic bond fund comes in handy." Fund managers have in-house proprietary models tested over long periods for managing their funds. "Our model looks at current account and absolute G-Sec yield levels. Whenever the index level in the model starts moving into positive territory, the scheme begins to

## NOT A DYNAMIC YEAR

Fund	AUM (cr)	Returns (%)			
		YTD	1-year	3-year	5-year
ICICI Pru All Seasons	5,616.0	2.0	3.7	7.5	7.4
Nippon India Dynamic Bond	3,070.5	-1.9	1.7	5.1	5.6
IDFC Dynamic Bond	2,504.4	-1.4	1.6	6.0	6.7
SBI Dynamic Bond	2,313.1	1.6	2.8	5.9	6.7
Kotak Dynamic Bond Fund	2,065.0	0.1	3.0	6.4	7.5

All figures are for direct, growth plans Source: Morningstar AWS

increase duration, and vice versa," says Bantia.

Using the model, he says, takes away emotions from fund management. While other debt fund categories are constrained by the duration band they can operate within, dynamic bond funds enjoy complete freedom. Debt funds also enjoy a tax advantage. Says Joydeep Sen, corporate trainer (debt markets) and author: "If an investor moves from one fund to another, there is a tax incidence, which is higher if the holding period is less than three years. A fund does not attract taxes when its fund manager buys or sells securities to alter the portfolio duration."

## Calls can go wrong

One risk is that a fund manager's rate calls can go wrong. "Timing the interest rate cycle correctly is not easy, which is why delivering long-term outperformance has been a challenge in this category," says Kumar. Expense ratios can be on the higher side, which raises the bar for fund managers to outperform.

## Check past calls

To select the right fund, examine the fund manager's track record. "View

his performance in rising and falling interest-rate environments to see if he was able to increase and decrease portfolio duration at the right time. If the majority of his calls were right, go with him," says Sen.

Pathak suggests avoiding fund managers who take too much credit risk. "This will unnecessarily raise portfolio risk. Lower credit quality papers also reduce portfolio liquidity, and hence the fund manager's flexibility to alter duration," he says.

## Alternative options

Those who don't want a dynamic bond fund may select a fund based on their investment horizon. If the horizon is less than one year, go with a liquid, ultrashort duration, low duration, or money market fund.

If the horizon is one to three years, split 50:50 between a low-duration and a short-duration fund. According to Kumar, investors with a horizon of more than three years should opt for a target maturity fund which allows them to almost lock in the return.

According to Sen, "Investors with a 10-year horizon may invest in a G-Sec fund. They will earn decent returns, though they may face interim volatility."

If you go for a dynamic bond fund, invest for at least three years.

# NSE IFSC-SGX Connect launch postponed indefinitely

VINAY UMARJI & SAMIE MODAK  
Mumbai, 13 July

The launch of NSE International Financial Service Centre (IFSC) SGX Connect has been postponed indefinitely with both the National Stock Exchange (NSE) and Singapore Exchange (SGX) informing trading members and vendors.

"Members may note that the operationalisation of the NSEIFSC-SGX Connect is deferred. The revised date for operationalisation of the Connect shall be informed shortly through a separate circular," NSE IFSC said in a circular on Wednesday.

The launch, which was to bring SGX Nifty trading at Gift

City IFSC, was due to get operationalised on Friday by Prime Minister Narendra Modi. However, Modi decided to cancel all his programmes at Gift City due to the flood situation in Gujarat. Trading in Nifty derivatives contracts are very popular on the Singapore bourse and account for 16 per cent of the trading volume at the SGX. The

launch of SGX Connect is expected to give a fillip to Gift City as these trades will now be routed through NSE IFSC. The proposed SGX Connect is modelled on the lines of Shanghai-Hong Kong Stock Connect.

On July 10, several parts of Ahmedabad were inundated with the city receiving a record 115 mm rainfall in three hours.

7.	Earnings Per Share (of Re. 1/- each)				
	1. Basic	(1.33)	(0.53)	0.15	(1.36)
	2. Diluted	(1.33)	(0.53)	0.15	(1.36)

**NOTES**

- The accumulated losses of the Company (including other comprehensive income) as on 30th June 2022 stood at Rs. 5,704.81 Lakhs. On account of the operating losses incurred during the current quarter and the previous years and other indicators, the Management, including the Board of Directors of the Company, performed an assessment on the Company's ability to continue as a going concern. The Board of Directors based on its review of the approved business plan and the future cash flow projections prepared for the next twelve months from the date of the financial results has assessed that the Company would be able to meet its cash flow requirements for the next twelve months from the date of financial results considering the following reasons:  
a) The Company expects to meet its cashflow requirements in the future by focusing on the following:  
i. Tata Projects Limited, Holding Company intends to provide operational support to the Company and will also extend financial support, if needed, to manage the cashflow requirements of the Company.  
ii. The Company has a pending order book for around Rs. 18,296.79 Lakhs as at 30th June 2022. Additionally, the Company is hopeful of receiving some orders for which it has already submitted its bids.  
iii. The Company is in the process of bidding for multiple projects of Tata Projects Limited ("TPL"), Holding Company and it is hopeful of receiving orders from TPL in the coming quarters based on competitive bidding and Arm's Length Pricing norms.  
iv. In some of the existing projects, the Company plans to successfully pursue for customer claims in the next quarters, which would significantly improve its operating margins as well as its cash flows.  
v. Some of the major projects of the Company are in the final stages of completion and the Company plans to complete the pending milestones for these projects in the next couple of quarters. This would reduce the unbilled revenue amount which in turn would improve the working capital/Cash flow situation of the Company.  
vi. Additionally, the Company would be focusing more on obtaining orders for the Nashik and Nagpur factories as these yield better operating margins.  
b) As at 30th June 2022, there are three Directors nominated by TPL on the Board of Company, which demonstrates its continuous operational and business support.  
Based on the assessment performed above, the Management has prepared the accompanying financial results on a going concern basis.
- The Company has considered all the possible impacts of COVID-19 in preparation of these financial results, including but not limited to its assessment of, liquidity and going concern assumption, recoverable values of its financial and non-financial assets and impact on revenue recognition owing to changes in cost budgets of fixed price contracts. The Company has carried out this assessment based on available internal and external sources of information upto the date of approval of these financial results and believes that the impact of COVID-19 is not material to these financial results and expects to recover the carrying amount of its assets. The impact of COVID-19 on the financial results may differ from that estimated as at the date of approval of these financial results owing to the nature and duration of COVID-19.
