Dear Sir/Ma'am,

Sub: Investor Presentation for the period ended September 30, 2024

In terms of Regulation 30 of the SEBI (Listing Obligation and Disclosure Requirements) Regulations, 2015, (as amended) we submit herewith a copy of Investors Presentation with respect to Business Overview for the Quarter and half year ended September 30, 2024, of Gala Precision Engineering Limited (“the Company”).

Further a copy of the same is also available on the website of the Company viz. www.galagroup.com.

Please take the same on your records.

Thanks & Regards,
For Gala Precision Engineering Limited

**Pooja Ladha
Company Secretary and Compliance Officer

COMPANY OVERVIEW

COMPANY OVERVIEW

- Gala Precision Engineering is a renowned and preferred manufacturer of precision components in India.
- The company is supported by an experienced management team and a diverse, skilled workforce, driving consistent financial growth, operational efficiency, and high levels of repeat business.
- Leading manufacturer of Special Fastening Solutions (SFS) like High Tensile Fasteners such as Studs, Anchor Bolts, Cross Bolts, Hex Bolts, Nuts, Gallock Wedge Lock and Grip Lock Washers, as well as Disc & Strip Springs (DSS) and Coil & Spiral Springs (CSS), comprising of an extensive portfolio of 750+ SKUs.
- A diversified customer profile with more than 175 customers, with key clientele including major OEM's, Tier-1 & Channel Partners across various industries like Renewable Energy, Industrials and Mobility.
- Exporting to more than 25 countries with an office in Frankfurt, Germany and export revenues contributing to 37% in FY24.
- State-of-the-art manufacturing facilities, complemented by in-house tool design and development capacities, offer both scalability and flexibility, providing comprehensive solutions to its clients.

DISC SPRING & WEDGE LOCK WASHERS

Disc Springs

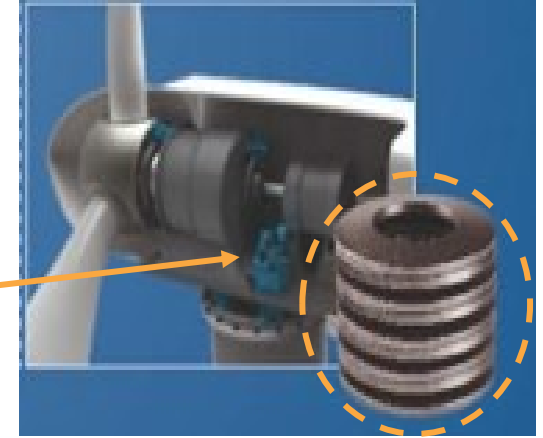

Wedge Lock Washers

Strip Springs

- Disc spring, Strip Springs and fastening solutions used in industrial applications requiring force exertion. They offer significant spring forces in a compact design.
- These solutions are specifically designed for industrial applications, ensuring secure, vibration-resistant joints with exceptional longevity and reliability.
- Strip springs are precision-stamped components made from spring or stainless steel, designed to store and release energy under load.
- Disc springs developed through collaboration with German universities, focusing on high performance and excellent fatigue life under stress.
- Providing over 100 standard sizes (ex-stock) and online selection software, allowing for reduced spring sizes while meeting load and deflection requirements.
- **The installed capacity for DSS is 225,517,000 units, with an 85% utilization rate, contributing to 59.5% of the company's total revenue in FY2024.**

RENEWABLE ENERGY

INDUSTRIAL

MOBILITY

COIL AND SPIRAL SPRINGS (CSS)

Coil Springs

Spiral Springs

- Coil Mechanical devices that store potential energy are made from wire twisted into a spiral shape, with various steel types to meet specific requirements.
- Began manufacturing CSS in 2015, utilizing expertise to produce springs for critical applications.
- CSS solutions are used in automotive, off-highway vehicles, commercial vehicles, and industrial infrastructure.
- Spiral Springs are made from rectangular metal strips wound into a flat spiral, designed to store and release rotational energy as torque.
- Spiral springs offer high durability, optimal space efficiency, various surface treatments, and cost options while meeting strict tolerances.
- **The installed capacity for CSS is 20,941,200 units, with a 78% utilization rate, contributing to 20% of the company's total revenue in FY2024.**

INDUSTRIAL

SPECIAL FASTENING SOLUTIONS (SFS)

Anchor bolts

Studs

Nuts

- Fasteners are hardware devices used to join or affix objects together, generally creating non-permanent joints.
- The company manufactures custom-made fasteners like studs, anchor bolts, and nuts, used in industries such as renewable energy, railways, off-highway vehicles, electrical, and heavy machinery.
- The company holds a 15% market share in the domestic specialized fastener solutions (SFS) market for wind turbines.
- **Specialty Fasteners and Systems has an installed capacity of 420,000 units with a capacity utilization of 69.94% in FY2024.**

STRATEGIC OVERVIEW

KEY COMPETITIVE STRENGTHS

Well established manufacturer of precision engineering components with diversified product portfolio and diverse market

01

Long-standing customer relationships with both Indian and global OEM and Tier 1 players

02

Well-equipped manufacturing facilities along with in-house design and other capabilities which offer scale, flexibility and comprehensive solutions

03

Experienced management team supported by large, diverse and skilled work force

04

Track record of consistent financial growth and performance characterized by operational efficiency and high repeat business

FUTURE GROWTH STRATEGIES

01

Strengthening our core capabilities in precision engineering for sustainability

02

Moving up the value chain from niche markets to large addressable markets

03

Leverage in-house design and development capabilities to grow our product offerings and capitalize on future trends

04

Strengthen relationships with our existing customers and expand customer base

05

Expand manufacturing capacity at our existing facilities and set-up additional strategically located facility

GROWTH DRIVERS

Equipment used in manufacturing and infrastructure contribute maximum revenue share

Increase in steel demand on account of rapid urbanization & construction needs

Increase consumption of passenger vehicle and increase capex toward Railway industry to fuel demand for precision products

Government favorable policies in conjunction with private capex in renewable sector such as wind and hydro has provided impetus precision products.

COIL SPRINGS & SPIRAL SPRINGS

COIL SPRINGS & SPIRAL SPRINGS

GROWTH DRIVERS

Coil spring assistance is essential for suspensions, engines, clutch, seat recliners and in-cabin shock absorbers in vehicles resulted in significant growth of the coil spring market

Upgradation of Indian railway system to high-speed rail and increased investment in metro rail has been instrumental in fueling demand for railway infrastructure

Rapid Urbanization will one of the determinant for demand of CSS products

PLI Scheme, import substitute, Urban Infrastructure will be key driver of CSS products in Industrial segment

Increase demand such as tractors, mowers, deep tillage equipment and spraying equipment has fuel demand for coil spring in advance mechanization of agriculture

GROWTH DRIVERS

Renewable sources are projected to contribute 95% to the increased global power capacity from CY21-26. Rising demand for renewable energy will also lead to an increased need for fasteners used in constructing wind turbines, hydroelectric plants, and solar farms

Various government are focusing on replacing old age infrastructure with modern infrastructure thus fueling demand for fastening solutions

Government focus on infrastructure has led to increase in mining activity and construction has aided demand for fasteners

FURTHER OPPORTUNITIES IN DIFFERENT INDUSTRY

Note(s): CSS segment is not a focus area for us globally.
