GlobalSpace's subsidiary Makebot partners with Euro School for its Centre of Excellence (CoE) for Experiential Learning program

Expanding its footprint in Indian education sector

Mumbai, November 04, 2020: GlobalSpace Technologies Limited is delighted to inform our esteemed stakeholders about the major breakthrough made by our subsidiary - Makebot in expanding its footprint in Indian market by entering into a partnership contract with a leading chain of schools in India, Euro School.

As a first of its kind initiative in India from a chain of schools, Euro School have introduced Centre of Excellence (CoE) for Experiential Learning program for all their schools PAN India consisting over 16,000 students to promote skill-based learning. This program is launched in association with Makebot - Coding to Concept™ program for students across 4th to 9th grade. Euro School CoE for Experiential Learning is focused on creating skill-based learning platform in addition to regular curriculum across its schools. Also, with strong emphasis on coding in National Education Policy 2020 – this program also acts as stepping stone for more exciting programs in future which CoE will introduce as in-curriculum programs including artificial intelligence, data science, machine learning and core coding platforms such as Python.

“The idea behind to setting up CoE for Experiential Learning in Euro School is to encourage 21st century skill-based learning within the group of school and provide holistic development to Euro School children – said Mr. Bhargav T (Senior Manager), who is the brain behind CoE”. He further added – “we want our students to learn & experience latest technologies to help them become global citizens. This will enable them to create things in future by themselves rather just being consumers. We partnered with Makebot - Coding to Concept™ program under CoE since Makebot are the leaders in STEAM education and experiential learning in India and we co-created this exclusive program for our students”.

Commenting on the uniqueness of this program, Mr. Amit Verma, Co-founder and CEO of Makebot, ‘This program is specially curated for students of Euro School keeping in mind their coding & technology roadmap designed under CoE to promote experiential learning across all their schools. Moreover, Makebot - Coding to Concept™ program is different than other coding programs available in market as it has a technical component (hardware) where students practice their coding skills and see things in action.’

Commenting on the recent Development, Mr. Krishna Singh, Founder & CMD, ‘We are very excited to partner with Euro school on this initiative to promote experiential learning in India using coding and AI. Since coding will play a vital role in development of our children and country, it is important that schools should introduce such programs in mainstream education like Euro School and helps in building future ready generation. For now, this program is running virtually across all school students across Euro school but once physical schools will start, CoE is planning to introduce more programs with Makebot to promote coding with experiential learning in next academic year.’

About Euro School:

Euro School is a leading chain of schools in India with over 16000 students across 11 schools and that presents students with a universe of possibilities to discover their true potential. Euro School endeavour to encourage children to realize latent talent, ascertain areas of interest, hone individual skills, thereby uncovering varied facets of their personality.

About GlobalSpace Technologies Limited:

GlobalSpace Technologies is a Digital, Mobility, Analytics, AI & Cloud technology Company providing integrated Healthtech platforms to major stakeholders of Healthcare domain. GSTL's software product platforms and solutions enable large and medium enterprises embrace mobility & digital technology for their business enhancement. In addition to Pharma, GlobalSpace has been pioneer in creating solutions for Doctors & Channel to create a 360-degree digital healthcare ecosystem.

Apart from Health Tech, Globalspace is doing some path breaking innovation in Edutech industry with its subsidiary Makebot. Makebot is already India's leading STEAM education platform with more than 1200 School using its platform to impart STEAM learning to its students.

About Makebot Robotic Solutions Private Limited:

Makebot, founded in 2018, is a leading STEAM Education provider using coding on robotics, AI and machine learning and offers STEAM certification programs & International Olympiad for students through its online platform. Makebot STEAM programs are designed to induct 21st century skills in students with healthy competition-based learning methodology and through edutainment. So far, Makebot has over 1,45,000 students and 1200+ schools subscribed to its online certification program on STEAM and the numbers are growing exponentially especially after Post-COVID and launch of new education policy to incorporate STEAM and coding in curriculum.
