Sub: - Press Release – STL partners with UK's Netomnia to fiberise multiple cities for ultra-fast broadband

Ref.: Scrip ID - STLTECH/ Scrip Code – 532374

Dear Sir/Madam,

We wish to inform that, the Company has expanded its partnership with Netomnia, one of the fastest growing network operators in the United Kingdom. The Company will provide integrated network deployment services to help Netomnia grow its Ultrafast Full-Fibre broadband programme in the United Kingdom.

A copy of the Company's Press Release in this behalf, is enclosed herewith.

Kindly take the above on record.

Thanking you.

Yours faithfully,

For **Sterlite Technologies Limited**

Amit Deshpande

Corporate General Counsel & Company Secretary (ACS 17551)

Enclosure: As above.

PRESS RELEASE

STL partners with UK's Netomnia to fiberise multiple cities for ultra-fast broadband

London, 10 February 2022: [STL \[NSE: STLTECH\]](#), an industry-leading integrator of digital networks, today announced that it has expanded its partnership with Netomnia, one of the fastest growing network operators in the United Kingdom. According to the multi-city agreement, STL will provide integrated network deployment services to help Netomnia grow its Ultrafast Full-Fibre broadband programme in the United Kingdom.

STL brings to the deal more than 10 years and 35,000 kms of network deployment experience. Having led large-scale rollouts across tough terrains in India, the company leverages design-led planning, gets professionally trained manpower to the field and uses advanced deployment techniques to the fibre deployment process. These capabilities will enable Netomnia to achieve rapid scale in delivering home passes and ultimately realise reduced Total Cost of Ownership.

The collaboration will greatly contribute to the high-speed broadband revolution of the UK led by exciting new-age players such as Netomnia. With an ambition to provide multi-gigabit broadband to one million premises by 2023, Netomnia has an infrastructure that supports symmetrical (equal upload and download speeds) multi-gigabit services up to 10 Gbps using XGS-PON technology.

Commenting on the announcement, **Jeremy Chelot, CEO, Netomnia**, said, "We have an ambitious target for our Ultrafast Full-Fibre broadband and we rely on superfast deployment to reach there by 2023. It is important for us to partner with players who enable us to add advanced capabilities to our rollout and STL, with its innovative and technology-centric approach, brings exactly that to the table."

Commenting on the announcement, **Praveen Cherian, CEO, Global Business Services, STL**, said, "Netomnia, an exciting new-age company, is one of the UK's fastest growing broadband players. We are excited to partner with them for their Ultrafast Full-Fibre broadband programme. Our design excellence and service engineering will deliver scale and fast home-pass readiness for Netomnia, which will help them provide superlative digital experience to their customers."

About Netomnia

Netomnia is developing full-fibre infrastructure, utilising innovative technology and agile deployment, to bring ultrafast broadband to towns and cities across the UK. Founded in 2019, Netomnia is investing in rapidly building a high-quality multi-gigabit network for UK homes and businesses.

Netomnia, in partnership with major UK construction companies, is aiming to become a top national full-fibre network operator in the UK. Netomnia is committed to help level the digital playing field by providing access to truly fast and affordable digital connectivity to as many UK residents and businesses as possible, targeting one million residential and business premises by 2023.

Netomnia makes wholesale connectivity available to service providers, including YouFibre, which has been delivering the UK's fastest broadband packages of up to 10 Gbps to customers.

About STL - Sterlite Technologies Ltd:

STL is an industry-leading integrator of digital networks that helps telcos, cloud companies, citizen networks and large enterprises deliver enhanced experiences to their customers. [Read more](#), [Contact us](#).
