Management Commentary on 3Q and 9MFY25 Results

Nirmal Bhogilal

Chairman of Batliboi Ltd

“ *The third quarter results on standalone basis were disappointing primarily due to foreign exchange losses, disruption in our foundry on account of the modernisation programme going on which resulted in loss of production in our machine tool activities, shifting of a large value imported machines planned for the third quarter having now shifted to the fourth quarter and the continuing poor performance of the textile industry both domestic and global specially in Bangladesh. Our Canadian Subsidiary, Quickmill, continues to do extremely well.*

In spite of this our nine months profit before tax on a consolidated basis is better than the previous year.

The Order book position continues to be healthy and robust and we are confident that going forward we should make up the lost ground of the third quarter and end the year with improved results over the previous year.

Our planned merger with Batliboi Environmental Engineering Limited is on track and we expect the merger to be completed by the end of this financial year. The merged results would also add to both the top line and bottom-line results.

The Board has also approved investment in a subsidiary for a new venture into the business of effluent and water treatment beginning with the textile industry and later venturing into other industries as well specially in the area of the zero liquid discharge. This revenue would also add to the results of our Company in the next financial year. ”
