Allcargo International Supply Chain (ISC) Monthly Operational Update

LCL operations:

- LCL volume for the month of September 2023 was down 1% as compared to September 2022 and down 4% as compared to August 2023. January 2023 onwards, the volume includes ~1.5% contribution from the new acquisition in Germany.
- Overall muted demand led to a softer print for the quarter with Q2FY24 LCL volumes declining 3% YoY to 2,294 '000cbm. Our near-term expectation of a muted demand outlook along with softer yields remains intact.
- Sequentially for the month, we saw a broader decline across our key geographies of APAC, Europe, Americas, and India.

Note: Jan 2023 onwards volumes include recently acquired German entity

- **Container utilization:** Container utilization continues to remain soft, reflecting lower volumes on a YoY basis; however, the index appears better Y-o-Y vs. our last few updates as the base period has improved marginally. Sequentially, it has remained rangebound post Chinese New Year.

Note: The Index shows Container utilization (Cbm/TeU) levels rebased as Oct 2022 = 100

- **40 feet ratio:** 40 feet container usage has remained rangebound since Chinese New Year. Decline in the 40 feet ratio was more pronounced in intra-Asia routes.

Note: The Index shows 40 feet Container usage (number of 40 feet containers as % of total containers used) levels rebased as Oct 2022 = 100

FCL operations:

- FCL volume for the month of September 2023 was up 3% as compared to September 2022 and up 1% as compared to August 2023.
- Consequently, Q2FY24 FCL volumes remained flat YoY at 153 '000 TEUs.
- At a regional level, on a sequential basis, improvement in Europe and APAC was offset by negative trend in Americas and India.
