COAL OUTPUT BY state-run miner Coal India (CLI), which produces about 83% of the fuel in the country, fell 3% year-on-year (9-9) to 36.4 million tonne (ATT) in luly, marking an improvement from the production levels recorded in the preceding three months.

The 158.4 MT coal output by CLI in the first four months of PV2 1 is 9.7% blower than the corresponding periodial syear.

Signalling the resurgence of demand from the powersector, CLI said production in the last week of July was 15.7% more than the output in the corresponding periodials year. Bectricity demand in July was down 2.6% year-on-year, which is a sharp improvement from June when the annual drop in demandwas 11%. With reduced domestic demand of coal, CLI. had shifted its focus to overburden from June when the annual drop in demandwas 11%. With reduced domestic demand of coal, CLI. had shifted its focus to overburden removal — the process of removing the tops soil and the production decreased to expose coal seams in its open cast mines — with the company removing 88.5 million cubic metres of over-burden in July, 23% more than a year-ago period. This will enable CLI to accelerate coal
