Trai reject panel request to review 5G base price

FE BUREAU
New Delhi, July 8

THE TELECOM REGULATORY
Authority of India (Trai) on Monday stuck to its recommendation on the reserve price of spectrum, including 5G band, which the government wants to put up for auctions later this year.

Last month, amid an industry disquiet over the pricing of spectrum, Digital Communications Commission (DCC) had decided to ask Trai to reconsider its spectrum recommendations, to ensure competition and greater participation of larger set of players in auctions slated for 2019.

DCC felt that Trai should revisit its 2018 suggestions keeping in mind the government's larger objective of digital proliferation, broadband for all and inclusive 5G services.

In its detailed response to the department of telecommunications (DoT) on Monday, Trai said it had considered all the relevant factors, including the methodology, assumptions, developments between the spectrum

auction in 2016 and its suggestions of August 1, 2018, and the rationale for spectrum valuation and reserve price while giving its recommendations. "In view of the above, the authority reiterates the spectrum valuation and reserves prices as contained in its recommendations dated August 1, 2018," Trai said.

The regulator has, however, yielded ground on the issue of lock-in period it had previously recommended for spectrum in 3300-3600 MHz band (for eligibility on spectrum trading). It has now suggested a lower lock-in period of two years for this band against five years prescribed earlier. "Authority recommends that no roll out obligations should be mandated for spectrum in 3300-3600 MHz

band. Further, lock-in period for spectrum in this band for becoming eligible for spectrum trading should be same as in other bands that is two years," Trai said.

Trai had in August, 2018 recommended auction of about 8,644 MHz of spectrum across bands at an estimated total base price of ₹4.9 lakh crore, but the financially-stressed industry that is reeling under high debt had argued that proposed prices are unaffordable and exorbitant.

Some industry players had pointed out that the average price of 5G band auctioned in countries like South Korea, Spain, the UK and Italy comes out to be ₹84 crore/MHz, whereas Trai's recommended price for the same band is 5 to 6 times higher at ₹492 crore/MHz. Trai on Monday also asserted that it may not be correct to assume that only the existing licensees will participate in the auction. "The auction is an open process and there is always a possibility of additional players participating in the process," Trai said.

S&P believes that the government's proposed injection of ₹70,000 crore into the banking sector as capital support should help stabilise financial sector's conditions, although the funding is likely to weigh on government finances at the margin.

PRESS TRUST OF INDIA
New Delhi, July 8

A HIGHER DISINVESTMENT and dividend target for state-owned firms may strain their credit profiles but steps toward private participation in rail infrastructure are likely to create growth opportunities for corporates, S&P Global Ratings said Monday.

S&P forecast the general government's net indebtedness at 67.1% of GDP by the end of the current fiscal year against a projected fiscal deficit of 6.7% of GDP. "In the context of fiscal constraints, a higher divestment and dividend target for state-owned entities (SOEs) may strain their credit profiles, especially if an SOE has to buy a government stake in another SOE or pay more dividends than free cash flow allows, to support these policy objectives," it said.

The Budget 2019-20 has set a divestment target of ₹1.05 lakh crore, while ₹57,487 crore is expected to come from central public sector enterprises (CPSEs) as dividend.

Elevated general government deficits and indebtedness will continue to cap direct infrastructure investment, S&P said.

General government deficits will remain elevated despite the marginal decline at the central government level to 3.3% of GDP this fiscal year projected in the budget, it added.

ernment's proposed injection of ₹70,000 crore into the banking sector as capital support should help stabilise financial sector's conditions, although the funding is likely to weigh on government finances at the margin.

"A more aggressive divestment plan of SOEs and moves toward private participation in rail infrastructure are likely to create growth opportunities for corporates across sectors," it said.

S&P said the government's growing emphasis on private sector participation reflects its limited fiscal space. Capital expenditure as a percentage of total proposed expenditure remains very low at just 12.1%, approximately equal to total expenditure on subsidies.

Elevated general government deficits and indebtedness will continue to cap direct infrastructure investment, S&P said.

General government deficits will remain elevated despite the marginal decline at the central government level to 3.3% of GDP this fiscal year projected in the budget, it added.

DPIIT to hold consultations on local sourcing norms for single brand retail

PRESS TRUST OF INDIA
New Delhi, July 8

THE DEPARTMENT FOR promotion of industry and internal trade (DPIIT) will hold consulta-

tions with stakeholders to discuss ways to further relax local sourcing norms for firms having FDI and undertaking single brand retailing in the country, a top official said.

Secretary in the DPIIT Ramesh Abhishek said there will be no relaxation in the mandatory 30% local sourcing norms. "We would try to make it more simple for retailers to

comply with the provisions of sourcing. There will be no change in the 30% thing," he said. "We will do stakeholder consultation to see what we have to do," he added.

Last year, it was stated that retailers can show the amount of goods exported from India against meeting the mandatory

30% local sourcing norms. Retail traders were allowed to adjust the incremental sourcing of goods from India for global operations during the initial five years (beginning April 1 of the year of the opening of first store), against the mandatory sourcing requirement of 30% of purchases from India.
