Dear Sir/Madam,

Subject: Press Release - Announcement related to US Step down subsidiary

We announce the launch of full-fledged operations of Healthcare Triangle Inc., as a subsidiary of 8K Miles Software Services Inc. USA by combining 8K Miles Software Services Inc, USA's cloud transformation, security business for healthcare and life sciences domains and Cornerstone Advisors, the health IT advisory and implementation professional services company.

Healthcare Triangle Inc. provide world-class Cloud Technology and Consulting Services to Providers, Payers and Life Sciences Companies across North America. This will enable us to bring a sharp focus on Healthcare and Life Science vertical and enhance our solution offering to cross and upsell to existing customers while positioning us to compete even more effectively in this vertical.

This press release shall not be considered as a material event or information for disclosure under Regulation 30 of SEBI LODR.

Please take a note of the above at your end.

Thanking You,

Yours Truly,

For 8K Miles Software Services Limited

Diya Venkatesan
Company Secretary

Healthcare Triangle, Inc. Announces launch of World-Class Cloud Technology and Consulting Services to Providers, Payers and Life Sciences Companies

HTI holds the distinct position in healthcare with its triangle of services in cloud transformation, data lifecycle management and operational improvement

PLEASANTON, California– June 22, 2020–[Healthcare Triangle, Inc.](#)[™] (HTI) today announced its launch of full-fledged operations as a privately held U.S.-based company combining life sciences, healthcare delivery and business methodologies to accelerate cloud transformation, data lifecycle management and operational improvement strategies for customers. Specifically, HTI offers experienced leadership, world-class services, advanced cloud data management functionality, DevOps, and privacy and security compliance tools to help hospitals and health systems, health insurers, life sciences and bio-pharma companies drive improved health outcomes.

With headquarters in Pleasanton, California, HTI brings together 8K Miles, the “born-in-the-cloud” core global company focused on security and cloud transformation for healthcare and life sciences domains, and Cornerstone Advisors, the health IT advisory and implementation professional services consultancy. With the integration of the two companies, HTI provides services to hundreds of healthcare providers, payers and life science companies.

“The united power and domain expertise of our talented team and solutions presents the opportunity to alleviate some of healthcare’s most challenging problems including mitigating the impact of the COVID-19 pandemic,” said Suresh Venkatachari, Chairman and CEO of HTI. “We believe our clients are the visionaries and action takers, and we’re ready to support their progress every step of the way in reinforcing healthcare innovation and progress.”

HTI’s advisory and consulting services will connect the healthcare and life sciences ecosystem, delivering data-centric services that extend across traditional boundaries and initiate productive interactions and business development initiatives among providers, payers and life sciences companies.

HTI will concentrate on accelerating value to three healthcare sectors:

- **Pharmaceutical companies**, which require improved efficiencies in the clinical trial process. HTI modernizes their IT infrastructure to advance the clinical trial process to drug discovery and delivery.
- **Hospitals and health systems**, which face interoperability challenges as mergers, acquisitions and partnerships drive increasing need for integrated healthcare infrastructures. HTI's health IT expertise optimizes providers' enterprise digital structure needs connecting disparate systems and applying analytics capabilities.
- **Life sciences, payers and all healthcare organizations** must protect and secure personal health information (PHI), a regulatory compliance mandate that HTI addresses and manages for its customers.

HTI plans to add significant value to its offerings with its evolution into a data platform company. Its healthcare data pipeline management, analytics and aggregation services are in use by five of the top 10 global pharmaceutical companies.

"We remain committed to delivering value to our customers," said Venkatachari. "We consider their needs as our needs as HTI brings new capabilities and continued focus to our existing relationships."
