மீண்டும், பழைய மார்க் கெட்டுக்கே திரும்பிச் சென்றனர். இவ்விஷயத்தில் மாநகராட்சி அதிகாரிகள் கூடுதல் கவனம் செலுத்தி, நடவடிக்கை எடுக்க வேண்டும்.

அதிகாரிகளிடம் கேட்டபோது, 'பூ மார்க்கெட் வியாபாரிகளை கடுமையாக எச்சரித்துள்ளோம். போதிய சமூக இடைவெளி இல்லாமல், நோய் பரப்பும் விதமாக, கூட்டமாக வாடிக்கையாளர்கள் நின்றிருந்தால், அபராதம் விதிப்பதோடு, மார்க்கெட் மூடப்படும்' என்றனர்.

Maharashtra sugar mills to produce oxygen to tide over current crisis

NANDA KASABE
Pune, April 23

SUGAR MILLS IN Maharashtra have decided to come forward to produce and supply oxygen at their plants in the wake of rising Covid-19 cases and severe shortage of oxygen being faced by hospitals in several states.

Mills have come forward to produce and supply oxygen in response to an appeal made by NCP president Sharad Pawar who urged all factories to come forward and make use of their facilities to produce and supply oxygen in a letter sent to all the factories by the Vasantdada Sugar Institute (VSI).

"Oxygen demand has increased in the current corona conditions. Therefore, all sugar mills should take the initiative and set up oxygen production plants," the letter said "Facto-

ries have experience in refining ethanol and separating carbon dioxide in distillation projects. The only thing to be done here is to set up a project to separate oxygen," the letter suggested.

Pawar is also the chairman of VSI in Pune where an online meeting was held on Friday cutting across political lines to discuss the best ways to resolve the current crisis of oxygen. Cabinet

minister Jayant Patil and health minister Rajesh Tope were also present in the meeting. Shivajirao Deshmukh, director general, VSI, said that four options were discussed at the meeting with stakeholders with regard to oxygen supply. "At least 50 to 60 factories have

showed readiness to import 5 litre and 10 litre oxygen cylinders from Taiwan. This is a comparatively low-cost solution that could prove useful for patients at home who do not require ventilators," he said.

Factories that produce ethanol and run cogeneration plants can produce oxygen at the ethanol facility

Secondly, factories that produce ethanol and run cogeneration plants can produce oxygen at the ethanol facility. A pilot plant is coming up at Dharashiv factory in Osmanabad

district and Baramati Agro. Factories showing a willingness to stop ethanol production and opt for oxygen production as a social cause can also do so," Deshmukh said. Factories are also looking at skid mounted oxygen production units that will again be

imported from Taiwan. These units cost ₹45-50 lakh and an additional ₹8-10 lakh for air freight cost," he said.

Pandurang Sahakari Sakhar Karkhana is also looking at establishing Vacuum Pressure Swing Adsorption (VPSA) facilities. This requires 8-10 months for the entire set up. Deshmukh said factories in the state have shown a positive response and have shown a willingness to opt for one of the four alternatives suggested at the meeting. Once the facilities are established, the investment will not be wasted since the factories could continue to supply oxygen at the neighbouring industrial development parks, he said.

BB Thombare, president, Western India Sugar Mills Association said factories are willing to go in for oxygen production as a major social initiative.

ALAMELU CHARITABLE FOUNDATION

Steel industry hoping for steady growth in 2021

SUSHIM BANERJEE

Former DG, Institute of Steel Growth and Development

THE CATASTROPHIC YEAR 2020 after creating one of the greatest challenges of the century came to an end reversing the hopelessness with lots of positivity. The feel-good period, however, appears short-lived as the second wave of the pandemic is ravaging some parts of the country and threatens to spread at a supersonic speed the remaining states of the country. Speed in vaccination covering the vulnerable sections, while maintaining all possible mandatory precautions against the disease remains the only solution left to fight the menace. Events that would take shape in the next fortnight would only tell if 2021 would be a better year than 2020.

The Indian steel industry like its global counterparts belongs to one of those core industries that along with cement, renewable energy, coal

ening steel demand. The demand for logistic-related facilities to support e-commerce, along with green recovery programmes and infra renewals, would play their part.

In India, the transportation of clean drinking water to cover each household in the country, LPG gas supply through pipes and transportation of oil and gas have been identified as key action areas.

The automobile sector that accounts for a much larger share in steel consumption in the US, the EU, Japan and South Korea (22-25% against 9% in India), is poised for a growth after sliding down in last three years. The Covid 19 pandemic has brought about a thrust on owning personal vehicles as opposed to public transport. Shortage of semiconductors may pose a risk in supply chain management. Passenger cars, light and medium commercial vehicles and tractors are selling at a high rate in India to reflect rising rural income and demand.

A number of mega government schemes in India like Jal Jiban Mission, PMAY-G & U, Bharatmala and Sagarmala provide good prospect for public investment, while projects
