# Jhunjhunwala eyes 70 aircraft in 4 years

To invest ₹260 crore for a 40% stake in low-cost airline

ANEESH PHADNIS & BLOOMBERG  
Mumbai, 28 July

Rakesh Jhunjhunwala

Billionaire investor Rakesh Jhunjhunwala is investing over ₹260 crore for a 40 per cent stake in a low-cost airline promoted by Vinay Dube, Jet Airways' former chief executive officer.

Dube has put in place a team of senior executives in commercial, engineering and finance roles, and negotiations are underway with both Airbus and Boeing for an aircraft order. The proposed airline christened 'Akasa Air' is scheduled to start next summer and have 70 aircraft in four years.

Jhunjhunwala has already put in ₹15 crore in the venture. The infusion was made earlier in the month and unsecured convertible debentures were allotted to his wife Rekha.

Regulatory filings show

While demand for air travel has hit globally, India's aviation industry is at greater risk of delayed recovery. That's not deterring Jhunjhunwala. "I think some of the incremental players may not recover," he said. Dube has roped in many of his former colleagues from Jet Airways and GoAir, where he served as CEO. Senior executives on board include Anand Srinivasan (chief information officer), Praveen Iyer (chief commercial officer), Bhavin Joshi (senior vice-president-finance and leasing) and Neelu Khatri (VP-government affairs). Belson Coutinho and Adam Voss, who headed marketing and engineering in Jet, are part of the initial team. "We are working with the aviation ministry to ensure we are compliant with all requirements and hope the NOC will be granted soon," said Dube, director and CEO of the new airline.

# Nestlé India Q1 PAT up 10.7%

ARNAB DUTTA  
New Delhi, 28 July

Packaged food and beverages major Nestlé India reported a 10.7 per cent year-on-year growth in its profit after tax (PAT) for the April-June quarter. Its net profit for the quarter stood at ₹538.6 crore, up from ₹486.6 crore in the corresponding quarter last year.

Its net sales surged 13.8 per cent y-o-y to ₹3,462.4 crore from ₹3,042 crore. However, steep rise in its raw material costs impacted its margins. In the June quarter, Nestlé's cost of raw materials consumed jumped 24 per cent to ₹1,479 crore from ₹1,194 crore. While its employee benefit expenses remained stable, total expenses grew 14 per cent as operating expenses surged, too.

# No clot risk after 2nd jab: AstraZeneca

However, study by vaccine maker finds possibility of small clot after first vaccine dose

SOHINI DAS  
Mumbai, 28 July

British-Swedish drugmaker AstraZeneca said its Covid-19 vaccine Vaxzevria carries a small extra risk of rare blood clots with low platelets after the first dose, but no extra risk after the second shot.

A study led and funded by the drugmaker, which was published in the Lancet medical journal, found that the estimated rate of thrombosis with thrombocytopenia (TTS) after the first dose was 8.1 per million among those vaccinated. Vaxzevria is made in India by Pune-based Serum Institute of India (SII) and marketed as Covishield.

Co-developed by the University of Oxford, the

Rates of TTS after a second vaccine dose are comparable to those among the unvaccinated population. induced immune thrombotic thrombocytopenia (VITT). The EU's drug regulator has been looking into cases of TTS and has found possible links to Vaxzevria and also Johnson & Johnson's vaccines. It, however, has said the overall benefits of both vaccines outweigh the risks posed by them.

The study said the estimated rate of TTS following a second dose of AstraZeneca was 2.3 per million vaccinated individuals, comparable to the rate observed in an unvaccinated population. The results are in line with reports in the Medicines and Healthcare products Regulatory Agency Yellow Card Report, which also show low rates of TTS after a second jab, AstraZeneca said.

Astrazeneca vaccine is based on a weakened version of a common cold virus (adenovirus) that causes infections in chimpanzees. It contains the genetic material of the SARS-CoV-2 virus spike protein, which the virus uses to enter and infect the human cells. This primes the immune system to attack the SARS-CoV-2 virus if it infects the body later.
