Denodo and Sonata Sign Partnership to Help Enterprises Unlock Data-to-Value Creation Through Logical Data Management

Partnership combines Denodo's specialization in Logical Data Management with Sonata's expertise in Systems Integration to help customers institutionalize data-driven decision making

April 30, 2024, Bengaluru, INDIA: [Denodo](#), a leader in data management, and Sonata Information Technology India Limited (SITL), a leading systems integrator in India, have announced that they have entered into a partnership to provide Indian enterprises with advanced logical data fabric and data mesh capabilities. As part of the engagement, customers will have seamless access to cutting-edge solutions that will enable them to unlock greater value from their distributed data sets, streamline operations, and enhance decision-making.

Today's enterprises struggle with establishing data infrastructures that can seamlessly handle the volume, velocity, and variety of data from different sources. This challenge is compounded by the rapid evolution of technologies like generative artificial intelligence (AI), which many organizations

struggle to incorporate effectively. The key to overcoming these challenges lies in eliminating data silos and establishing a centralized logical data management layer enabled by data virtualization. Such an enterprise data layer enables easy access to real-time data, regardless of location or format, while facilitating timely insights crucial for agile decision-making.

Sujit Mohanty, managing director and chief executive officer at Sonata Information Technology Ltd. said, "We are excited that Denodo has chosen Sonata as its Tier-1 partner to expand the availability of logical data management in India. Many organizations are still struggling to implement a data foundation that can scale across the increasing number of data sources and increasing volumes of data required in the generative AI era. Sonata has a dedicated data practice and proprietary Platformation™ framework. Our firms will help enterprise clients adopt data virtualization and drive the institutionalization of data-driven decision making."

Ravi Shankar, senior vice president and chief marketing officer at Denodo, said, "Sonata is well placed to help enterprises in creating and realizing modernization-driven hyper-growth. We are very pleased to partner with them in the India market to bring Denodo's award-winning data management technology, supported by the most advanced methods for data integration, management, and delivery using a logical data management approach. Working together, we will enable our mutual customers across all industries to improve decision making, operational excellence, and regulatory compliance, with faster time-to-data."

About Denodo

Denodo is a leader in data management. The award-winning Denodo Platform is the leading logical data management platform for delivering data in the language of business, at the speed of business, for all data-related initiatives across the organization. Realizing more than 400% ROI and millions of dollars in benefits, Denodo's customers across enterprises in 30+ industries all over the world have received payback in less than six months. About Sonata Software

In today's market, there is a unique duality in technology adoption. On one side, extreme focus on cost containment by clients, and on the other, deep motivation to modernise their Digital storefronts to attract more consumers and B2B customers.

As a leading Modernization Engineering company, we aim to deliver modernization-driven hypergrowth for our clients based on the deep differentiation we have created in Modernization Engineering, powered by our Lightening suite and 16-step Platformation™ playbook. In addition, we bring agility and systems thinking to accelerate time to market for our clients.

Headquartered in Bengaluru, India, Sonata has a strong global presence, including key regions US, UK, Europe, APAC, and ANZ. We are a trusted partner of world-leading companies in TMT (Telecom, Media, and Technology), Retail & CPG, Manufacturing, BFSI (Banking, Financial

Services and Insurance), and HLS (Healthcare and Lifesciences) space. Our bouquet of Modernization Engineering Services cuts across Cloud, Data, Dynamics, Contact Centers, and around newer technologies like Generative AI, MS Fabric, and other modernization platforms.
