She has worked for renowned organizations such as Reliance Industries Limited, Reliance foundation and Thirumalai Chemicals Limited.

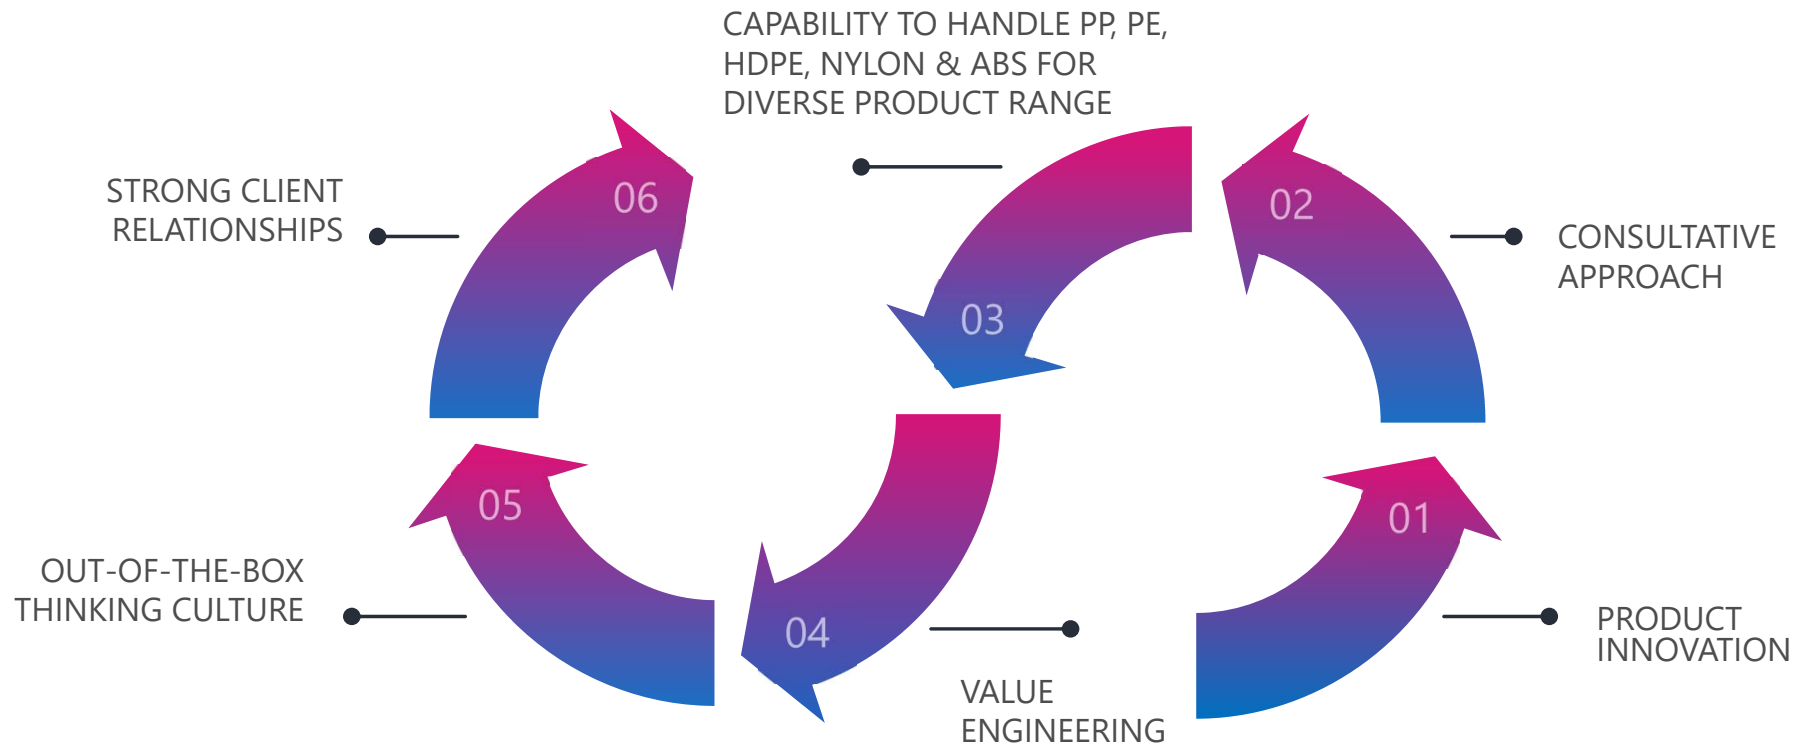

Management Supported By Well Experienced Professional Team

Skills that Differentiate us from Competition

Plastic Industry offers Opportunities Galore

Domestic Plastic Industry

The total plastic consumption in India is around 15 million tonnes and is expected to go up to 25 million tonnes in the next seven years. India's plastics exports posted a growth of 31.6% at USD 4.59 billion during the period Apr 18-Sep 18 (H1 2018-19) as against USD 3.48 billion in same period during H1 2017-18. Industry expected to Grow at CAGR of 10-12%. The per capita consumption is expected to double, with an investment of \$80bn over the next five years.

Shift from Unorganized to Organized

With the implementation of GST and rationalization of tax rates we anticipate the shift from unorganized to organized to be faster, currently 40-45% of plastic industry is still dominated by small and unorganised players in India.

Availability of Raw material & Investments in lateral Industries driving growth

Availability of polymers has become very easy in the domestic market, also investments in lateral industries such as food processing, cold storage & material handling, infrastructure & housing, agriculture, water management and retailing are acting as drivers for the growth of the Plastic Industry.

Consumption of Plastics has been Increasing Consistently

SOURCE: PLASTINDIA FOUNDATION /INDUSTRY ESTIMATE

Enough scope for per capita usage of Plastics to grow in India

End Usage of Plastics in India Quite Similar to Global Trends

SOURCE: PLASTINDIA FOUNDATION /INDUSTRY ESTIMATE

Our Future Growth Strategy

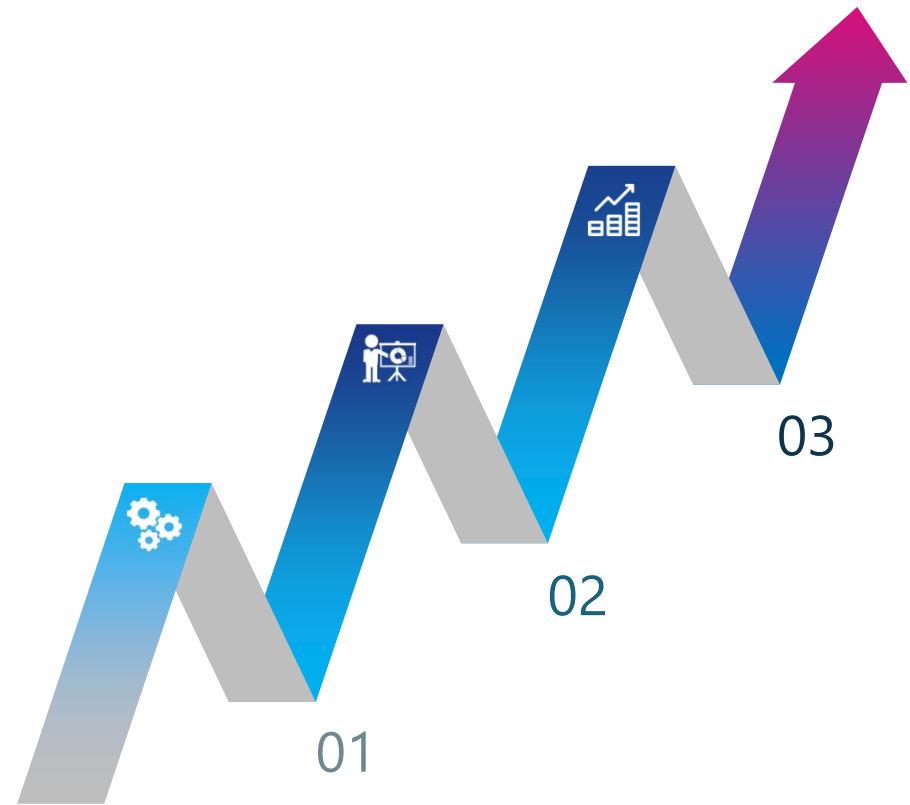

Step 1
New Products

Step 2
Higher Capacity Utilization

Step 3
Margin Improvement Higher ROCE
New Customers Expanded foot print

Focus Areas For Future Growth

Hospital Furniture

As per industry reports the health care sector will need investments of \$245 bn over the next two decade. Indicating addition of to 3.5million beds over this period.

Apart from this there is also high demand from conventional markets for replacement.

Auto Components

The auto component Industry has been growing at 10-12%, India has also become a major export hub growing at 8-10% in FY19 we exported \$15bn worth of components.

Cost effective manufacturing has kept the costs lower by 20-25% as compared to developed countries in US & Europe.

Customised Moulding

Customized plastic moulding allows for great design flexibility and any type of plastic part can be produced using this manufacturing process, and the molds allow the finished product to be extremely precise.

Plastic parts are typically upto 50% lighter in weight than metal parts and converting from metal to plastic can significantly reduce total manufacturing costs.
