Germany, Spain in race for ₹40K crore Indian sub deal

BLOOMBERG

16 August

Two European defense manufacturing giants are seeking to win a ₹40,000 crore (\$4.8 billion) order to build submarines in India as the Centre looks to strengthen its navy to counter China's expanding naval presence in the Indo-Pacific region.

Government officials are currently evaluating competing bids to build six of the vessels in India, senior officials aware of the developments said, asking not to be named because discussions are private. One bid is from Germany's Thyssenkrupp AG along with Mumbai-based Mazagon Dock Shipbuilders Limited, with the other was submitted by Spain's Navantia in partnership with private shipyard Larsen & Toubro, the people said.

The Navy will go for the best and largest transfer of technology that is being offered, the people said. When announcing the tender in July, the Ministry of Defense said it expected substantial technology transfer to Indian shipyards apart from providing the submarines with air independent propulsion — a technology that helps conventional vessels stay underwater for longer.

India is looking for a reliable alternative for military hardware as supplies from Russia, the country's biggest source of weapons, is mired in a protracted war in Ukraine and faces sanctions from the US and its allies. India, which is part of the so-called Quad grouping that includes Japan, US and Australia, is also projecting itself as a manufacturing hub and pushing for technology transfers to build complex defense platforms such as fighter aircraft and submarines. The Ministry of Defence, Larsen & Toubro, and MDL did not respond to requests for comment. Thyssenkrupp confirmed the bid and referred to a June 7 statement while Navantia didn't respond to emails.

Boeing starts building Apache attack choppers for Army

AJAI SHUKLA

New Delhi, 16 August

Defence major Boeing on Wednesday said it had started producing AH-64E Apache attack helicopters in Mesa, Arizona, in an encouraging sign for Indian Army's mechanised strike formations.

Boeing will deliver six AH-64E Apache helicopters to the Indian Army for ₹4,168 crore. All six of these Apaches are to be delivered by 2024.

Since independence in 1947, the Indian Air Force (IAF) has insisted on retaining control of combat aviation assets, especially attack helicopters, which

the air marshals have kept under their control. Even as the Army began operating light utility helicopters and established its own Army Aviation Corps, the IAF retained control of medium and heavy lift helicopters (Mi-17 and Mi-26) and attack helicopters (Mi-35).

This involves taking out enemy radars and command and control centres. Meanwhile, the Army's Apaches would be employed for destroying enemy tanks and armoured vehicles on the mechanised battlefield.

As a part of transferring production of defence equipment from the US to India, Boeing and the Tata group have formed a joint venture called Tata Boeing Aerospace Limited (TBAL).

Road ministry looks to allay CAG concerns on cost escalation

Dwarka e-way cost normal for large-scale project: Official

DHRAVAKSH SAHA

New Delhi, 16 August

Amid severe political backlash, the Ministry of Road Transport and Highways is likely to respond to the conclusions made by the Comptroller and Auditor General (CAG) and allay the auditor's concerns about unrealistic cost escalations in the Dwarka Expressway project, among other possible lapses, a top ministry official said on Wednesday.

The CAG, in its report on the implementation of Bharatmala Pariyojana, found that the National Highways Authority of India (NHA) board approved the Dwarka Expressway with "civil cost of ₹7,287.29 crore with per km ₹250.77 crore as against per kilometre (km) civil cost of ₹18.2 crore approved by the Cabinet Committee on Economic Affairs (CCEA)".

The source said that the auditor's calculations do not factor in increased costs of land acquisition, the complicated nature of the project and the additional costs incurred on account of that, as it simply takes a broad-based average.

The Dwarka expressway, features an eight-lane and a six-lane tunnel, along with some elevated service roads, which require higher construction costs than basic highways.

"The average cost of an elevated road even in the most conservative scenario is at least ₹100 crore per km. Moreover, the plan head of greenfield expressways in the Bharatmala pipeline explicitly mentions that cost can be established after Detailed Project Report as there are no standard cost norms for these components," the official said.

According to the ministry's estimates, the actual civil cost of the project is actually much lower than the CAG's claim and even the initial estimate. The average civil cost put to tender for all four packages of the Dwarka

Actual civil cost of the project was lower than the CAG's claim and even the initial estimate, according to ministry estimates

Expressway was ₹206.4 crore per km, while the actual awarded civil cost was 12 per cent lower, at ₹182 crore per km.

Another issue flagged by CAG was that executing agencies did not follow the appraisal and approval mechanism prescribed by the Union cabinet committee on economic affairs (CCEA) for Bharatmala Phase-1.

"Out of 50 sample projects of NHA, in the case of eight projects, appraisal by Project Appraisal and Technical Scrutiny Committee was not done due to either these being appraised under the NHDP programme or they being balanced works/ one-time improvement works," the report said.

Sources in the ministry said that each of the four packages of the expressway saw a minimum of four bids, and all were awarded to the lowest bidders.

Chandrayaan-3 undergoes 5th and final lunar orbit manoeuvre

PRESS TRUST OF INDIA

Bengaluru, 16 August

India's ambitious Chandrayaan-3 spacecraft on Wednesday successfully underwent a fifth and final lunar-bound orbit manoeuvre, bringing it even closer to the surface of the Moon.

The spacecraft has completed all of its Moon-bound manoeuvres, and it will now prepare for separation of the lander module — comprising the lander and rover — from the propulsion module.

"Today's successful firing, needed for a short duration, has put Chandrayaan-III into an orbit of 153 km x 163 km, as intended. With this, the lunar bound manoeuvres are completed. It's time for preparations as the Propulsion Module and the Lander Module gear up for their separate journeys," ISRO said in a post on X (formerly Twitter).

Separation of the lander module from the propulsion module is planned for August 17, it said. After its launch on July 14, Chandrayaan-3 entered into the lunar orbit on August 5, following which orbit reduction manoeuvres were carried out on August 6, 9 and 14. As the mission progressed, a series of manoeuvres were being conducted by ISRO to gradually reduce Chandrayaan-III's orbit to position it over lunar poles.

‘इस दशक के अंत तक इंडिया में ईवी की सालाना सेल्स होगी 10 लाख यूनिट्स’

नवी दिल्ली। टाटा मोटर्स ने कहा कि इस दशक के अंत तक भारत में इलेक्ट्रिक व्हीकल्स (ईवी) की सालाना सेल्स का अंकड़ा 10 लाख यूनिट्स को पार कर सकता है। कंपनी को इस दौरान अपनी कुल सेल्स में इलेक्ट्रिक व्हीकल की हिस्सेदारी 50 प्रतिशत पर पहुंचने की उम्मीद है। देश की प्रमुख व्हीकल कंपनी वर्तमान में तिमाही आधार पर अपनी कुल सेल्स का 14-15 प्रतिशत इलेक्ट्रिक व्हीकल से प्राप्त करती है। कंपनी ने एक लार्ग मोटर्स पैरेंजर वेहिकल्स के कुल सेल्स पार कर लिया है। टाटा मोटर्स पैरेंजर वेहिकल्स के प्रबंध विवेश शैलेश चंदा ने कहा, “पांच साल पहले इलेक्ट्रिक व्हीकल प्रति माह महज 90 यूनिट्स बिकते थे। आज ये प्रति माह 8,500 से 9,500 यूनिट्स पर पहुंच चुके हैं, जो लगभग 100 गुना है... पांच साल पहले उद्योग ने लगभग 2,000 कारें बेंची थीं और हम इस वर्ष पहले से ही एक लाख से अधिक यूनिट्स का कीरीबन्ध कर्तव्य लेने वाले थे। चंदा ने कहा कि अगले पांच साल में यह कम से कम 10 गुना होकर 10 लाख यूनिट्स का कीरीबन्ध नहीं होना चाहिए, यहीं में कहाँग... यह भारतीय उपभोक्ताओं और देश के लिए एक रोमांचक समय होगा क्योंकि इस दृष्टिकोण को साकार किया जा सकता है, जिसे सरकार द्वारा निर्धारित किया गया था।
