**Sub: Submission of Newspaper Advertisement under Regulation 47 of SEBI (Listing Obligations and Disclosure Requirements), Regulations 2015**

Dear Sir(s),

We wish to inform you that the Company is proposing to make an application to the Central Government to obtain approval under Section 196, 203 read with Schedule V and other applicable provisions of the Companies Act, 2013, for the appointment of Mr. Yasuhiro Ashiki (DIN: 09132637) as the Joint Managing Director of the Company for a period of five years from June 23, 2021 to June 22, 2026.

Pursuant to Regulation 47 and other applicable provisions of SEBI (Listing Obligations and Disclosure Requirements), Regulations 2015, please find enclosed herewith the copy of Newspaper advertisement published in under Section 201 of the Companies Act, 2013 in newspapers viz. "Mint" in English language on August 27, 2021 and "Hindustan" in Hindi Language on August 27, 2021.

Kindly take the aforesaid information on your records.

Thanking you,

Yours sincerely,

For MUNJAL SHOWA LIMITED

# India losing FII support; all eyes on Jackson Hole

Investors wait for Fed chairman's signal on taper before making next move

Nasrin Sultana  
nasrin.s@livemint.com  
MUMBAI

Foreign flows into Indian markets are being drained out even as the economy opens on the back of a decreasing virus load and strengthening nationwide vaccination drive. Neither action-clamped primary markets nor regulatory clampdowns in China have been able to attract foreign institutional investors (FIIs) to Indian shares any more.

FII inflows into Indian equities have been slowing down with an outflow of \$800 million since July. Last month, FIIs were net sellers of Indian equities worth \$1.7 billion, while they bought \$905 million in August so far, compared to a robust inflow of \$7.32 billion in first three months of this year. FII net inflow into equities in 2021 is \$7.28 billion against \$23.37 billion last year.

Investors will be watching US Fed chairman Jerome Powell's speech at Jackson Hole, which will offer a guidance on when emergency support will be scaled back. **BLOOMBERG**

"The Indian market has seen FII outflows over the past two months despite inflows in the primary market. In fact, secondary market outflows have been quite large over the past six months. This would suggest that China's woes have not benefited India in any form and probably impacted overall EM (emerging market) sentiment and flows," said Kotak Institutional Equities.

According to the brokerage firm, the net outflow of FII money from India is a "bit surprising" in the context of general bullishness in the market and China's woes and collapse in market capitalization of its large technology companies.

"Valuations of the Indian market look full and are supported by expectations of strong earnings growth over FY2021-23 and stable-to-modestly higher interest rates/bond yields over the next few months; yield gap is still reasonable. We see negative risks to both the 'supports' but not enough to call time on the market," Kotak Institutional Equities added.

The Indian market has outperformed emerging peers in 2021 so far, while scoring new highs multiple times, supported by a combination of favourable factors.

In this year so far, market benchmark indices Sensex and Nifty have risen 17-19%, while MSCI EM is down 1% and MSCI World is up 16.20%.

So far in August, the Sensex and Nifty are up nearly 6%, significantly higher than the 2% rise in MSCI World, while MSCI EM is down 0.2%.

Analysts at Credit Suisse Wealth Management continue to say that FIIs may not desert Indian equities as India's structural

### REVERSAL IN FORTUNES

FII inflows into Indian equities have been slowing down with an outflow of \$800 mn since July	NET inflow by FIIs into Indian equities this year so far is \$7.28 bn against \$23.37 bn last year	FIIs started withdrawing from EMs on fears of the Fed tightening its monetary policy
--	--	--

outlook has improved materially, and it offers one of the fastest growth among major economies.

However, they feel that near-term indicators are looking a little stretched for equities, while the medium-term outlook for Indian equities remains attractive.

"We expect some minor underperformance by Indian equities given stretched valuation. Nevertheless, we expect Indian equities to continue to command better

valuation premium compared to EM peers," said Jitendra Gohil, head, India equity research; and Premal Kamdar, equity research analyst at Credit Suisse Wealth Management.

FIIs started withdrawing from emerging markets such as India on fears of the US Federal Reserve tightening its monetary policy stance.

The latest Federal Open Market Committee (FOMC) meeting minutes suggest the increase of the likelihood of tapering of asset purchases in 2021.

Loose monetary policy by global central banks have led to massive liquidity inflows into equities following the covid-19 outbreak.

Christopher Wood, global head of equity strategy, Jefferies, said in his latest Greed and Fear note that sooner-than-expected rate taper by the Fed may cause some jitters in the risk-on trade in equities, and give a reason for treasury bond yields to move higher.

Investors will be keenly watching US Federal Reserve chairman Jerome Powell's speech at Jackson Hole, which will offer a guidance on when and how the Fed will scale back its emergency support.

# DIGITALLY DELICATELY PUT: I DON'T KNOW

A MATTER OF NUMBERS  
DILIP D'SOUZA

Respond to this column at  
feedback@livemint.com

The mathematician Murray Klamkin (1921-2004) taught at several universities, helped to organize various competitions (Mathematical Olympiads) and won awards for his work. In 1988, there was the Mathematical Association of America's Award for Distinguished Service to Mathematics. Four years later, his years of contributions to Olympiads and the like won him the David Hilbert Award.

But for all that, Klamkin was probably best known for proposing serious mathematical questions. Of course, it wasn't that he necessarily knew the answers, or at least not immediately. In offering these challenges, Klamkin's purpose was to open up new areas of research. Many of his questions made their way into books. Like one he co-authored with two other mathematicians, *Five Hundred Mathematical Challenges*; or like *Index to Mathematical Problems 1975-1979: A Compendium of over 5,000 Problems* by Stanley Rabinowitz and Mark Brown; or like *Problems from Murray Klamkin*, which two mathematicians published after his death.

In January 1978, Klamkin sent *Mathematics Magazine* this question: "Does there exist any prime number such that if any digit is changed to any other digit, the resulting number is always composite?" (Composite means non-prime).

For example, take 79, which is a prime number. I could change the 7 to 3, 4, 6, or 9 and get composite numbers every time (none of 39, 49, 69 and 99 are prime). But if I changed it to 1, 2, 5 or 8, we have another prime (19, 29, 59, 89). Similar reasoning applies to the 9 in 79. That is, 79 doesn't answer Klamkin's poser. Try 103, also a prime. Change the 1 to 5 and we have 503, which is prime; Klamkin is foiled again. He is similarly foiled by the primes 919, 4,021 and 48,281—and, I'm willing to bet, any prime you name. So you can see why he asked the question.

Aside: maybe you wonder why Klamkin or any other mathematician would want to ask and answer such a question. Of what possible use is it to the real world? I do not know, but I do know that it is just the kind of puzzle that gets mathematical juices flowing. End of aside.

Anyway, *Mathematics Magazine* published Klamkin's poser in their May 1979 issue. Below it was a solution from the remarkable Hungarian mathematician Paul Erdős, which began with words that probably wouldn't have surprised anyone who knew the man: "We prove a slightly stronger result." Erdős's proof calls on Linnik's theorem and the "well-known theorem of Bang-Birkhoff-Vandiver" and plenty more, which is to say that by about its 3rd paragraph, it has surpassed my mathematical capabilities. After a page-and-a-half of mathematical manipulations, Erdős writes "This completes our proof."

But he doesn't stop there. In fact, he had telegraphed this at the start: "In the end [we will] make some comments and state a few more problems." (Note how one problem stimulates more problems, something else that delights mathematicians). After his proof is done, Erdős writes these lines:

"We can deduce by the methods used here that there are infinitely many primes [of a certain type P] so that if we simultaneously alter [some of their] digits we always get a composite number. Is it true that if [we take numbers of a certain type A] then there are always primes, in fact infinitely many of them, so that [numbers formed by adding primes P and numbers A] are composite?"

Take a moment to digest that. In effect, Erdős has taken the puzzle into the realm of the infinite—there's not just one prime that

answers Klamkin, but an infinity of them—and that gets him thinking in other related directions. So he leaves an open question, also involving infinity, for other mathematicians to pursue.

Over forty years later, two mathematicians at the University of South Carolina, Michael Filaseta and Jacob Jailler, published a paper addressing this open question (*Consecutive primes which are widely digitally delicate*, arXiv, [bit.ly/3gAZ6bh](https://arxiv.org/abs/2105.09024)). Filaseta and Jailler start by acknowledging Klamkin and Erdős. They remind readers that Erdős's "infinitely many primes" that answer Klamkin's question were, in 2016, given the delicious label "digitally delicate" by two other mathematicians. Then they write: "The first digitally delicate prime is 294,001, and you can check this for yourself. Change any of the digits in 294,001 to another, and you get a composite number: for example, 294,501 and 694,001 are both composite. They also note that there are composite numbers that, when you manipulate them the same way, produce only composites. 212,159 is the smallest such composite, and again, you can check this for yourself: for example, 216,159 and 212,179 are composites.

But sticking with the digitally delicate: in 2020, Filaseta and Jeremia Southwick proved something startling. You wouldn't typically do this, but you could write any given number with any number of leading zeros. For example, you could write the prime 79 as 079, 0079 or even 000000000079. All those are still 79, still prime; and in fact, you could prefix a number with an infinite number of leading zeros, and it would remain the same. Filaseta and Southwick showed that there are primes which answer Klamkin's question even if you write them this way, with any number of leading zeros. That is, "if any digit of [such a prime], including any one of [its] infinitely many leading zeros, is replaced by any other digit, then the resulting number is composite."

If you think about it, this is nothing short of astonishing. Prefix one of these primes with any number of zeros, point to any one of them and change it to any other digit, and presto, like magic, what you get is composite. Filaseta and Southwick called such primes "widely digitally delicate." So is 294,001, the first digitally delicate prime, also widely digitally delicate? No, because you could write it as 00,294,001, change that first 0 to 1, and 10,294,001 is prime. In fact, these widely digitally delicate primes are somewhat like black holes used to be—their existence is a theoretically proved certainty, but "no specific examples of widely digitally delicate primes are known."

### There are strings of consecutive prime numbers that are all widely digitally delicate

If that much isn't intriguing enough, what Filaseta and Jailler proved in this paper should fit the bill. Never mind that we don't yet know of a single widely digitally delicate prime, let's just keep in mind that one exists. But it's not just that there's *one*. Nor is it that there are *some* such primes. Nor even is it that there is an *infinite number* of such primes, which there is.

What these two mathematicians proved is that there are strings of consecutive primes—like 41, 43, 47 and 53 are four consecutive primes—that are *all* widely digitally delicate. But not just that, either. They showed that these strings can be of any length at all. That is, pick any number—4, 89, 271, 828, 31, 415, 926—yes, *any number at all*, and there is a string of that many consecutive primes that are all widely digitally delicate.

And we don't know any of them. Not one.

That, by the way, is hardly a lament. I say so not only because it leaves mathematicians plenty to search for, not only because it gives us yet another glimpse of the meaning of infinity. Even more than those things, this appreciation of the unknown is what makes mathematics, and science more generally, so fascinating.

I didn't tell you the four words at the end of Paul Erdős's proof above, after the question he asks. Those words are: "I do not know."

Once a computer scientist, Dilip D'Souza now lives in Mumbai and writes for his dinners. His Twitter handle is @DeathEndsFun

# Acma seeks long-term stable road map for tech localization

PTI  
feedback@livemint.com  
NEW DELHI

Automotive Component Manufacturers Association of India (Acma) on Thursday called for a long-term stable and technology agnostic roadmap to allow localisation of technologies, saying it is critical for the survival and competitiveness of the industry amid dropping vehicle sales.

Speaking at the 61st Annual session of the component manufacturers' body, Acma president Deepak Jain highlighted that factors such as

high domestic taxation, increasing fuel costs, steep rise in commodity prices were adversely impacting affordability of vehicles, and, in turn, the viability of the component sector.

"As we embark on another year, we need to reflect on some of the intrinsic challenges that we have been facing now for almost a decade," he said.

Citing the "grave concern" raised by Maruti Suzuki India Chairman R.C. Bhargava at the Annual convention of Society of Indian Automobile Manufacturers (Siam) on Wednesday over "the falling growth

Deepak Jain, president, Acma.

rate of vehicle consumption in the country", Jain said it is time to reflect on what strategic interventions are needed to bring the growth back.

"High domestic taxation, increasing fuel costs, steep rise in commodity prices, among others, are adversely impacting affordability of vehicles, and, in turn, the viability of the component sector," he said.

Jain added, "a long-term stable and technology agnostic roadmap that allows sufficient time for localization of technologies would be critical for survival and competitiveness of our industry." He said in FY2021, the industry witnessed the second consecutive year of contraction in vehicle sales in India as overall vehicle sales fell by 13.6%.

"Against this backdrop, the

component industry also witnessed a de-growth of 3%, with its turnover reducing to \$46 billion from \$49 billion," he said. Given the volatility in the environment, Jain said it was for the industry to find answers on how to "strive to survive, piece ourselves together to revive and explore the opportunities for growth."

"If volatility is the new normal, how can we sustain ourselves, ensure business continuity and stay relevant to our

### Jain said it is time to reflect on what strategic steps are needed to revive falling growth of vehicle purchases in India

customers with uncertainty in the business and regulatory environment," he asked.

Combined with fast changing trends and mobility, "what would be the most apt business model for us? Will one size fit all?" Jain said. "What strategic interventions, do we need to make—internal and external, technological, and human as individuals and as a community—to become globally competitive," he asked.

# TSMC to hike prices, threatening costlier electronics

Yang Jie  
feedback@livemint.com

The world's largest contract chip maker is raising prices by as much as 20%, according to people familiar with the matter, a move that could result in consumers paying more for electronics.

TSMC plans to increase prices of most advanced chips by roughly 10%; the less advanced chips will cost about 20% more. **REUTERS**

Taiwan Semiconductor Manufacturing Co. (TSMC) plans to increase the prices of its most advanced chips by roughly 10%, while less advanced chips used by customers like auto makers will cost about 20% more, these people said.

The higher prices will generally take effect late this year or next year, the people said.

Apple Inc. is one of TSMC's largest customers and its iPhones use advanced microprocessors made in TSMC foundries. It couldn't be determined how much more Apple would pay.

A TSMC spokeswoman declined to comment on prices

but said the company works closely with customers. An Apple spokeswoman didn't immediately respond to a request for comment.

The price increases come in the wake of a global semiconductor shortage that has affected Apple and most car makers, including General Motors Co. and Toyota Motor Corp. In August, GM said it had to idle three factories in North America that make large pickup trucks, the company's

biggest moneymaker. Last week, Toyota said it would curb production by 40% in September.

The price increases have a twofold purpose for TSMC as it addresses the shortage.

In the short term, higher prices push down demand and preserve supply for customers who have no other choice.

Over the longer term, the higher income will help the chip maker invest aggressively in new capacity, according to

analysts.

The company has said it plans to spend a total of \$100 billion over the next three years on new factories and equipment as well as research and development. It is expanding its production capacity in Nanjing, China, and has started construction on a \$12 billion facility in Arizona.

Chips are only one of many costs that go into a car or smartphone, but TSMC's price increases could eventually filter down to consumers next year unless brand-name companies decide to eat the higher costs.

Already, chip shortages have driven up prices for laptops, which are in high demand because more people are working remotely.

Apple warned in its latest earnings call that the chip shortage, which hit its iPad tablets and Mac computers earlier in the year, would affect

iPhone production in the quarter that ends in September.

Andrew Lu, a semiconductor analyst at Sinolink Securities, said price increases would preserve TSMC's profit margins. He said the Taiwanese company had spent too much of its huge capital budget on the most advanced chips, losing market share in less advanced chips.

"TSMC is finally going to increase their prices to go with the trend, making up for miscalculating their capital spending," Mr. Lu said.

One person whose company is affected by the price increases said they would reach all of TSMC's customers, including long-term partners. The chip maker usually negotiates prices in August or September for products to be delivered the following year, another person said.

The company's market

dominance gives it more pricing power than suppliers usually enjoy. TSMC accounts for more than half of the global semiconductor foundry market by revenue, according to Taiwanese research firm TrendForce, and it makes more than 90% of the world's most advanced chips.

Bernstein analysts said the price increases would likely lift TSMC's revenue by 10% to 15% and increase earnings by 20% to 30%, adding that the impact would be seen in the first quarter of next year.

Before the pandemic, TSMC usually would offer regular discounts for its big customers, but Chief Executive C.C. Wei told clients in a March letter his company would no longer do that starting at the end of this year. Mr. Wei said the company is facing rising manufacturing costs because of more expensive raw materials and constant investment to expand production and develop more advanced chips.

टिकट बंटवारे के वक्त दोनों नेताओं में और बढ़ सकता है टकराव

# कैप्टन और सिद्धू की लड़ाई में फंसी कांग्रेस

**पंजाब**

नई दिल्ली | सुहेल हामिद

पंजाब में कांग्रेस का संकट बढ़ता जा रहा है। मुख्यमंत्री कैप्टन अमरिंदर सिंह के विरोध के बावजूद नवजोत सिंह को प्रदेश अध्यक्ष की जिम्मेदारी सौंपकर पार्टी ने नया नेतृत्व तैयार करने की कोशिश की, पर यह तजुबा परेशानी का सबब बनता जा रहा है और इस लड़ाई में पार्टी खुद को फंसा हुआ महसूस करने लगी है।

## अमरिंदर ने 55 विधायकों, आठ सांसदों से मुलाकात की

चंडीगढ़। मुख्यमंत्री अमरिंदर सिंह ने गुरुवार को शक्ति प्रदर्शन करते हुए यहां एक कैबिनेट सहायोगी के घर रात के भोजन पर कांग्रेस के करीब 55 विधायकों और आठ सांसदों से मुलाकात की। राज्य में चार मंत्री मुख्यमंत्री को बदले जाने की मांग कर रहे हैं। उनमें से तीन मंत्री दिन में हुई मंत्रिपरिषद की बैठक में शामिल नहीं हुए। मुख्यमंत्री और नवजोत सिंह सिद्धू के घड़ों के बीच टकराव की पुष्टि भी है। सिंह ने पार्टी विधायकों के साथ बैठक की। सिद्धू ने एक बार फिर अमरिंदर को बिजली दर से कमी किए जाने के वादे की याद दिलाई। सिद्धू ने एक टीवीट में कहा, 'कांग्रेस पार्टी धरेलु बिजली तीन रुपये प्रति यूनिट और औद्योगिक बिजली पांच रुपये प्रति यूनिट देने के अपने संकल्प के साथ-साथ... सॉल्यूशन देने के संकल्प पर कायम है। इस वादे को पूरा किया जाना चाहिए।'

अदरूनी कलह से जूझ रही है। किसी भी राजनीतिक पार्टी के लिए यह अच्छा संकेत नहीं है, जब मिलकर मुकाबला करने का वक्त है, तो हम आपस में झगड़ रहे हैं।

**पार्टी को पंजाब में जीत का भरोसा था:** किसान आंदोलन, भाजपा और अकाली दल में गठबंधन खत्म होना और कैप्टन सरकार के कामकाज की बुनियाद पर पार्टी को पंजाब में जीत का भरोसा था। पर पिछले कुछ माह में जिस तरह अदरूनी कलह सामने आई, उससे पार्टी का भरोसा डगमगाया है। क्योंकि, यह पार्टी के चुनाव फायदे से ज्यादा अहं की लड़ाई बनती जा रही है।

# पार्टी जो जिम्मेदारी देगी, निभाऊंगा : टीएस सिंहदेव

**छत्तीसगढ़**

नई दिल्ली | विशेष संवाददाता

छत्तीसगढ़ में मुख्यमंत्री भूपेश बघेल और स्वास्थ्य मंत्री टीएस सिंहदेव के बीच झगड़ा बरकरार है। सिंहदेव मुख्यमंत्री पद पर दावेदारी जता रहे हैं। हालांकि पार्टी ओबीसी मुख्यमंत्री को बदलने का जोखिम नहीं लेना चाहती। ऐसे में सिंहदेव को मनाने के लिए पार्टी सरकार व संगठन में उनका कद बढ़ाने की संभावनाओं पर विचार कर रही है। टीएस सिंहदेव के समर्थकों की दलील है कि छत्तीसगढ़ में ढाई-ढाई

**सियासत**

- छत्तीसगढ़ में सरकार और संगठन में बढ़ सकता है सिंहदेव का कद
- मुख्यमंत्री भूपेश बघेल कर सकते हैं कांग्रेस अध्यक्ष से मुलाकात

मुख्यमंत्री का फॉर्मूला तय हुआ था। भूपेश बघेल मुख्यमंत्री के तौर पर ढाई साल पूरे कर चुके हैं, इसलिए अब सिंहदेव को मुख्यमंत्री बनाया जाए। पर खुद सिंहदेव ने इस तरह के फॉर्मूले से इनकार किया है। उनका कहना है कि

ऐसा कोई फॉर्मूला नहीं है, यह कयास है। छत्तीसगढ़ के स्वास्थ्य मंत्री सिंहदेव ने कहा कि पार्टी में किसको क्या काम करना है, यह हाईकमान तय करता है। उन्हें जो जिम्मेदारी दी जाएगी, वह उस जिम्मेदारी को निभाएंगे। इस बीच

# कश्मीर से कन्याकुमारी तक भारत एक : केजरीवाल

**दो टुक**

चंडीगढ़ | एजेसी

दिल्ली के मुख्यमंत्री और आम आदमी पार्टी के राष्ट्रीय संयोजक अरविंद केजरीवाल ने कांग्रेस की पंजाब इकाई के अध्यक्ष नवजोत सिंह सिद्धू के दो सलाहकारों की हालिया विवादास्पद टिप्पणियों को खारिज करते हुए गुरुवार को कहा कि कश्मीर से कन्याकुमारी तक भारत एक है।

केजरीवाल ने गुरुदासपुर में संवाददाताओं से कहा कि उन्होंने पिछले एक-दो दिनों में कश्मीर और देश को लेकर कुछ बयान सुने हैं। सीधे तौर पर सिद्धू के सलाहकारों का जिज्ञासु किए बिना उन्होंने कहा, 'भेरा मानना है कि कश्मीर से कन्याकुमारी तक भारत एक है। कोई हमें अलग नहीं कर सकता। इस तरह के बयान सही नहीं हैं।' केजरीवाल ने

गुरुदासपुर जिले में गुरुवार को अरविंद केजरीवाल की मौजूदगी में पंजाब के पूर्व मंत्री सेवा सिंह सेखवं आप में शामिल हुए। ● समीर सखल

कहा, 'पंजाब एक सीमावर्ती राज्य है। कोई भी बयान जिम्मेदारी से दिया जाना चाहिए। हम ऐसे मुद्दों पर राजनीति नहीं

करना चाहते।' सिद्धू के दो सलाहकारों, मालवींदर सिंह माली और प्यारे लाल गर्ग की कश्मीर और पाकिस्तान जैसे

संवेदनशील मुद्दों पर विवादास्पद टिप्पणी की कांग्रेस के भीतर और विपक्ष की ओर से तोखी आलोचना की गई है।

# तीन सितंबर को विधानसभा का विशेष सत्र बुलाने का फैसला

**चंडीगढ़।** पंजाब मंत्रिमंडल ने गुरु तेग बहादुर के ऐतिहासिक 400वें प्रकाश पर्व के उपलक्ष्य में तीन सितंबर को राज्य विधानसभा का एक दिन का विशेष सत्र बुलाने का फैसला किया। मुख्यमंत्री कार्यालय के एक प्रवक्ता के अनुसार, मुख्यमंत्री अमरिंदर सिंह की अध्यक्षता में हुई एक बैठक में मंत्रिपरिषद ने राज्यपाल से भारत के संविधान के अनुच्छेद 174 (1) के तहत सदन का

# कांग्रेस गोवा में सरकार बनाएगी: चिदंबरम

**भरोसा**

पणजी | एजेसी

पूर्व केंद्रीय मंत्री पी चिदंबरम ने कहा कि कांग्रेस गोवा में अगले साल फरवरी में होने वाले विधानसभा चुनाव में सभी 40 सीटों पर लड़ने के लिए कम्पर कर रही है। उन्होंने दावा किया राज्य का राजनीतिक

## 'मैं यहां किसी को हटाने के लिए नहीं आया हूँ'

राज्य में पार्टी नेतृत्व में बदलाव और गोवा प्रदेश कांग्रेस कमेटी के अध्यक्ष गिरीश को हटाए जाने के बारे में पूछने पर चिदंबरम ने कहा, मैं यहां किसी को हटाने के लिए नहीं आया हूँ। ऐसे संगठनात्मक मामलों पर फैसला उचित समय पर किया जाता है।

जताया कि कांग्रेस चुनाव के बाद राज्य में अगली सरकार बनाएगी, लेकिन समान विचारधारा वाले दलों के साथ गठबंधन

के बारे में कोई भी फैसला उचित समय पर किया जाएगा। उन्होंने कहा कि कांग्रेस पार्टी अगले साल निर्धारित गोवा विधानसभा चुनाव लड़ने के लिए कम्पर कर रही है। शुरुआती आकलन यह है कि सभी निर्वाचन क्षेत्रों में राजनीतिक माहौल कांग्रेस के लिए काफी अनुकूल है। ऐसे संकेत हैं कि सरकार में बदलाव होगा और नई सरकार कांग्रेस पार्टी के नेतृत्व में होगी। उन्होंने कहा कि गोवा के लोगों को उम्मीद है कि सरकार में बदलाव होना चाहिए और कांग्रेस पार्टी उन्हें निराश नहीं करेगी।

# नुसरत जहां ने बेटे को दिया जन्म

**कोलकाता।** तृणमूल कांग्रेस की सांसद एवं अभिनेत्री नुसरत जहां ने गुरुवार दोपहर शहर के एक निजी अस्पताल में एक बच्चे को जन्म दिया।

अस्पताल के एक सूत्र ने बताया कि नुसरत जहां को बुधवार शाम पार्क स्ट्रीट स्थित एक अस्पताल में भर्ती कराया गया था और बृहस्पतिवार दोपहर करीब 12 बजकर 20 मिनट पर उन्होंने बेटे को जन्म दिया। मां तथा बेटा दोनों स्वस्थ हैं और चिकित्सकों की निगरानी में हैं। नुसरत से अलग रह रहे पति निखिल जैन ने कहा कि हम दोनों के बीच मतभेद हो सकते हैं, लेकिन मैं बच्चे और मां को शुभकामनाएं देता हूँ। मैं दुःखा करता हूँ कि बच्चे का भविष्य उज्वल हो।

# केंद्रीय मंत्री पशुपति पारस ने जान को खतरा बताया

नई दिल्ली | एजेसी

लोकजनशक्ति पार्टी के नेता एवं केंद्रीय मंत्री पशुपति कुमार पारस ने गृह मंत्री अमित शाह को पत्र लिखकर कहा है कि राजनीतिक साजिश की वजह से उनके जीवन को खतरा है तथा उन्हें जेड प्लस सुरक्षा उपलब्ध कराई जानी चाहिए। पारस ने गुरुवार को एक संवाददाता सम्मेलन में कहा कि उन्हें उनके मोबाइल फोन पर गालियां और धमकियां दी गई हैं तथा उन्होंने दिल्ली पुलिस में शिकायत दर्ज करवाई है। उन्होंने किसी का नाम लिए बिना कहा कि केंद्रीय मंत्री बनने के बाद 23 अगस्त को बिहार स्थित हाजीपुर निर्वाचन क्षेत्र के उनके पहले

धमकी

- गृह मंत्री अमित शाह को पत्र लिख जेड प्लस सुरक्षा की मांग की
- पारस ने मोबाइल फोन पर धमकी देने की बात कही

# राणे ने महाराष्ट्र की प्रतिष्ठा को टेस पहुंचाई : शिवसेना

मुंबई | एजेसी

शिवसेना ने गुरुवार को कहा कि केन्द्रीय मंत्री नारायण राणे ने महाराष्ट्र की प्रतिष्ठा एवं गौरव को टेस पहुंचाई है। उन्होंने राज्य के मुख्यमंत्री उद्धव ठाकरे के खिलाफ दिए विवादिता बयान के मामले में उनके खिलाफ कानून के तहत कार्रवाई की गई। सामना के सम्पादकीय में कहा गया, 'क्योंकि राणे कोई आम आदमी नहीं हैं, इसलिए उन्होंने महाराष्ट्र की प्रतिष्ठा एवं गौरव को टेस पहुंचाई। भाजपा को कम से कम अब यह समझ में आ जाना चाहिए।'

## 'भाजपा नेता के खिलाफ प्राथमिकी दर्ज हो'

शिवसेना के विधायक देवभद्र नाइक ने केंद्रीय मंत्री नारायण राणे की तुलना मराठा योद्धा राजा छत्रपति शिवाजी महाराज के पुत्र संभाजी महाराज से कथित तौर पर करने पर भाजपा विधायक प्रमोद जटार के खिलाफ मामला दर्ज करने के लिए पुलिस का रुख किया है। नाइक ने गुरुवार को कहा कि केंद्रीय मंत्री नारायण राणे की तुलना संभाजी महाराज से करना सस्बा करने वाला है।
