# IFGL Refractories Limited

(Formerly IFGL Exports Limited)

Investor Presentation  
November 2019

*This presentation and the accompanying slides (the “Presentation”), has been prepared by **IFGL Refractories Limited**, solely for information purposes and do not constitute any offer, recommendation or invitation to purchase or subscribe for any securities, and shall not form the basis or be relied on in connection with any contract or binding commitment whatsoever.*

*This Presentation has been prepared by the Company based on information and data which the Company considers reliable, but the Company makes no representation or warranty, express or implied, whatsoever, and no reliance shall be placed on, the truth, accuracy, completeness, fairness and reasonableness of the contents of this Presentation. This Presentation may not be all inclusive and may not contain all of the information that you may consider material. Any liability in respect of the contents of, or any omission from, this Presentation is expressly excluded.*

*Certain matters discussed in this Presentation may contain statements regarding the Company’s market opportunity and business prospects that are individually and collectively forward-looking statements. Such forward-looking statements are not guarantees of future performance and are subject to known and unknown risks, uncertainties and assumptions that are difficult to predict. These risks and uncertainties include, but are not limited to, the performance of the Indian economy and of the economies of various international markets, the performance of the refractories industry in India and world-wide, competition, the company’s ability to successfully implement its strategy, the Company’s future levels of growth and expansion, technological implementation, changes and advancements, changes in revenue, income or cash flows, the Company’s market preferences and its exposure to market risks, as well as other risks. The Company’s actual results, levels of activity, performance or achievements could differ materially and adversely from results expressed in or implied by this Presentation. The Company assumes no obligation to update any forward-looking information contained in this Presentation.*

The background features a white central area with two large triangles. A dark blue triangle is in the bottom-left corner, and a gold triangle is in the top-right corner. Both triangles are separated from the white background by thin black lines.

# **Industry Overview**

# Global Steel Demand outlook

Source: World Steel Association

## Reasons contributing to growth

### ➤ Global outlook:

- Global steel demand is expected to continue to grow in 2019 and 2020
- However, uncertainty surrounding trade policies, volatility in the financial markets and China's deceleration could pose downside risks to this forecast

### ➤ India Outlook:

- Indian economy is expected to achieve faster growth starting second half of 2019
- Wide range of continuing infrastructure projects is likely to support growth in steel demand above 7% in both 2019 and 2020
- Growth in mechanical engineering as well as construction is expected to surpass that of emerging market average, providing a solid basis for domestic demand

# Forecasted Global Short-Term Steel Demand

In MT 2019F 2020F

- Steel demand in emerging economies excluding China is expected to grow by 2.9% and 4.6% in 2019 and 2020 respectively
- In 2019, steel demand in China is expected to remain robust on account of government stimulus, which is expected to come down in 2020
- Steel demand in developed world is expected to decelerate to 0.3% in 2019 and 0.7% in 2020, post growth of 1.8% in 2018 - reflecting a small slowdown

# Top 5 Steel Consuming Countries

Source: World Steel Association

- As is visible in the above chart, **India is the only country among top 5 steel consuming countries which is expected to witness growth in consumption**
- **Demand scenario in India is expected to improve on the back of:**
  - Government spending on infrastructure
  - Robust activity in downstream manufacturing sectors
  - Rapid urbanization - a major long-run driver of construction growth in India, which ensures a solid long-run outlook for steel demand
- Strong domestic demand will underpin an expansion of steelmaking capacity over short to medium term

# India's share in Global Steel production expected to rise

Source: BofA Merrill Lynch Report

# Domestic Steel Industry on a strong footing

# Strong Domestic consumption

Particulars (in MTPA)	FY18	FY19F	YoY%	FY20F	YoY%
India	96.0	102.8	7.1%	110.2	7.2%
China	835.0	843.3	1%	834.9	-1%
USA	100.2	101.4	1.2%	101.7	0.3%
Japan	65.4	64.7	-1.1%	64.2	-0.8%

**India is expected to witness high demand, whereas others are expected to remain flat**

# Growth drivers of Indian Steel industry

Boost usage of refractory products significantly. Iron and steel industry accounts for approximately 71% of the refractories market share.

# About Refractories

## What are Refractories

Refractories are material having high melting points, with properties that make them suitable to act as heat-resisting barriers between high and low temperature zones. Refractories are inorganic nonmetallic material which can withstand high temperature without undergoing physical or chemical changes while remaining in contact with molten slag, metal and gases

## Raw Materials

Principal raw materials used in the production of refractories are: oxides of silicon, aluminum, magnesium, calcium and zirconium and some non-oxide refractories like alumina, carbides, nitrides, borides, silicates and graphite

## Uses

Refractories are used by metallurgy industry for flow control and also in the internal linings of furnaces, kilns, reactors and other vessels for holding and transporting metal and slag. In non-metallurgical industries, the refractories are mostly installed on fired heaters, hydrogen reformers, ammonia primary and secondary reformers, cracking furnaces, utility boilers, catalytic cracking units, coke calciner, sulfur furnaces, air heaters, ducting, stacks, etc.

## Types of Refractories

Isostatic Refractories, Slide Gate Refractories & Systems, Tube Changer Refractories & System, Purging System & Refractories, Cast Products & Zirconia Nozzles, Monolithics/ Castable & Foundry Ceramics

# Global Refractories Market outlook (2018-2023)

## Reasons contributing to growth

- Global Refractories Market is estimated to grow at a CAGR of 5.2% and reach size of \$ 48,620 Million by 2023
- India is expected to exhibit promising growth in global refractories market and grow at a similar rate
- Asian countries, such as China, Japan, India, Korea and ASEAN are showing good traction in demand
- Rise in Demand can be attributed to increased Capital Investments in various sectors as well as increased infrastructure & construction activities
