New Delhi, 15 September

arlier this month, Sobha **≺** Kapoor and Ekta ■ Kapoor, part of the promoter group of Balaji Telefilms, faced shareholder ire when they failed to obtain the requisite votes on resolutions proposing pay increases for them. In recent months, several promoter-directors, including Siddharth Lal of Eicher Motors and Pawan Munjal of Hero MotoCorp, have faced similar situations. Clearly, large institutional shareholders - and public shareholders — are not taking kindly to promoterdirectors upping their remuneration takeaways at a time when the prospects of business recovery are clouded by the anticipated third wave of the Covid-19 pandemic. The onus, say experts, is on the Nomination and Remuneration Committee (NRC) in the board of directors of a company to bring more transparency, objectivity and fairness in arriving at promoter-remuneration and hikes.

DEFEATED

PASSED

"There is a sense that promoters need to share in the pain in this Covid year. When growth in revenue and profits has slowed, or is negative, how can a disproportionate increase in remuneration only to promoters be justified?" asks Shriram Subramanian, founder and managing director, InGovern Research Services. The reason for shareholder angst is not hard to figure out. Aon India's Executive Compensation Study for 2021, released in April, suggests that promoter-CEOs in BSE 100 companies earn, on an average, 30 per cent more than NRC while assessing remuner-vided the company gets due the compensation proposal a lot advisory firm, points out.

have taken the risk in investing and backing the promoter. "Compensation should be benchmarked to Total Shareholder Return," says Subramanian.

Not everyone agrees with this line of thinking. IiAS believes that dividend declaration should not favour a specific class of shareholders, namely promoters or controlling shareholders, as that may impact the long-term interests of shareholders

Performance-driven agreements for promoter pay-outs are seen as a more viable option for fixing promoter remuneration. "Sebi could perhaps mandatorily require listed companies (with a turnover of above ₹500 crore) to adopt a Key Managerial Remuneration policy approved by the shareholders, and an independent expert. We have seen similar developments in the case of dividend declaration policy as well," says Amit Agarwal, partner, Nangia & Co.

But one thing experts agree on is that the NRC has to bring in more transparency in promoter-directors' performance appraisals. "It is important to establish and publish the principles for assessment to evaluate the effectiveness and contribution by each of the directors. While establishing this assessment, NRC should consider the relative performance of the organisation in comparison to a relevant peer group," says Pothen Jacob, practice leader executive compensation & governance at Aon India.

Building linkages between the relative performance of the organisation to the compensation of the directors can make

Technology has made this possible.	The first challenge here	

Also, about two decades back, GN Bajpai, stems from the fact that then chairman of the Securities and Exchcurrently, FPIs send out the ange Board of India (Sebi), had expressed a details of the trade done on desire to implement the T+1 settlement T day to their global custodian (GC) after India cycle by April 2004. This was after India had gone live with T+3 effective April 2002. trading hours, which the GC The regulators did move this further to T+2 relays to the India custodian effective April 2003, but the move to T+1 during the night. Posthas unfortunately remained pending. Can reconciliation with the technology help address the perceived broker contract note, the challenges and make T+1 possible, too? India custodian confirms On September 7, Sebi issued an these trades with the interesting circular that lets the exchanges Clearing Corporation by 1 pm on T+1 day. In the T+1 and investors decide whether they want to

model, such confirmation would perhaps need to be completed on T day itself, within a few hours of the close of market hours, which can be challenging. In case of a mismatch, the India custodian may not be able to confirm the trade, and the resultant hand delivery can put pressure on the broker who needs to In the proposed model of Sebi, a stock arrange for funds overnight to complete exchange can offer a T+1 settlement cycle the pay-in process the next morning. on any scrip, which then needs to be follo-During certain times of the year, e.g. MSCI wed uniformly for all transactions, inclurebalancing, trade volumes tend to shoot up sharply, and so could such mismatches.

The second challenge is that FPIs have to pre-fund in the T+1 model. In the current T+2 structure, on the morning of can be deployed more effectively. Also, this T+1 day, when FX markets are active, the

(INR) to fund the trades of T day by selling foreign currency. The exact value of US dollar (USD) is then remitted by the FPIs via their global custodian. This helps reconcile the value of the trade with the FX booked for the same on an end-to-end basis. In the T+1 format, the FPIs would have to pre-fund on an approximate basis, atively keep INR in their account ndian custodian on T day itself. lose out on ease of reconcilian best time to book FX deals.

, the T+1 model could disrupt ties Lending and Borrowing nent, and unless trading hours ed by a few more hours, that ould become irrelevant.

Fourthly, as India looks to increase its weightage in the global indices, global funds tracking such indices and ETFs, for example, could face challenges in the absence of adequate liquidity.

The concern is that should, for example, one exchange turn into a T+1 exchange, we could see a fragmentation of the order book and the liquidity, should domestic volumes move to such T+1 exchange.

It would be interesting to see how the key exchanges in India react to this circular, as that could decide the future of liquidity. Domestic investors could jump at this while FPIs might perhaps wait and watch. Technology can certainly solve the challenges outlined above, and it is a

intermediaries to chip in here. Congratulations are due to the regulators though, who have avoided the temptation to get prescriptive here and instead chosen to let the market decide the way forward. Let the action begin.
