NOTICE
 (For the kind attention of Shareholders of the Company)
Transfer of Equity Shares of the Company to the Investors Education and Protection Fund

This Notice is hereby given that pursuant to the Section 124(6) of the Companies Act, 2013 (the "Act") read with the Investors Education and Protection Fund Authority (Accounting, Audit, Transfer and Refund) Rules, 2016 (the "Rules"), the Company is required to transfer the equity shares in respect of which dividend remains unpaid or unclaimed for seven consecutive years to the Investors Education and Protection Fund (IEPF).

A list of such shareholders, who have not encashed their dividends for seven consecutive years from the interim dividend declared by the Company in the financial year 2016-17 and whose shares are therefore liable for transfer to the IEPF account, is displayed on the website of the Company - www.aurobindo.com.

As per the said Rules, the Company has sent individual communication to the concerned shareholders whose shares are liable to be transferred to IEPF account for taking appropriate action and submitting requisite documents to claim the unclaimed dividend amount(s) by December 12, 2023. In the absence of receipt of a valid claim from the concerned shareholder, the Company will proceed to transfer the said shares to IEPF account without any further notice. All future benefits including dividends arising on such shares would also be transferred to IEPF.

Please note that no claim shall lie against the Company in respect of unclaimed dividend amounts and shares transferred to IEPF pursuant to the said Rules. Shareholders can claim shares and dividend transferred to IEPF by complying due procedure given in the Rules, details of which are also available at www.iepf.gov.in.

For any information / clarification on the matter, the concerned shareholder may write to the Company at ig@aurobindo.com or contact the Company's Registrar and Share Transfer Agent - M/s KFin Technologies Ltd., Selenium Tower-B, Plot 31-32, Gachibowli, Financial District, Nanakramguda, Hyderabad - 500032, Toll Free No. 1-800-309-4001, email ID: einward.ris@kfinotech.com.

Soldier abducted, killed in Manipur

PRESS TRUST OF INDIA
 Imphal, 17 September

The body of an Indian Army soldier was found at Khuningthek village in Manipur's Imphal East district on Sunday, officials said. He was identified as Sepoy Serto Thangthang Kom of the Army's Defence Security Corps (DSC) platoon at Leimakhong in Kangpokpi district, they said. He hailed from

Tarung in Imphal West, officials said. According to officials, unidentified armed men abducted Sepoy Kom, who was on leave, from his home around 10am on Saturday. According to his 10-year-old son, who was the only eyewitness to the crime, three men entered their home while his father and he were working on the porch. "The armed men placed a pistol on the Sepoy's head and forced him into a white vehicle before

fleeing the spot," officials said quoting his son. "There was no news of Sepoy Kom till Sunday early morning. Around 9.30 am, his body was found at Khuningthek village, east of Mongjam under Sogolmang PS in Imphal East. His identity was confirmed by his brother and brother-in-law who said the soldier had a single bullet wound on his head," officials added. Sepoy Kom is survived by wife, daughter and son.

Project Cheetah 2.0 begins in the shadow of deaths

NITIN KUMAR
 New Delhi, 17 September

On September 17, 2022, India welcomed eight cheetahs — five female and three male — from Namibia, marking the beginning of Project Cheetah, the country's ambitious plan to reintroduce the big cat after it was declared extinct in 1952.

On February 18, 2023, 12 more cheetahs — five female and seven male — from South Africa joined in, taking the total feline numbers to 20, a milestone not witnessed in over eight decades. As the first lot of eight cheetahs completes one year on Indian soil, only six of them are alive to celebrate their journey. Two female cheetahs lost their lives to the heat stroke.

The Namibian cheetahs have endured more than just the loss of two female members. They also experienced the heartbreaking loss of three out of four cubs due to heat stroke. Besides the Namibian cheetahs, those from South Africa also lost four of their members. So far, a total of nine cheetahs have died — five Namibian (two adults and three cubs) and four South African.

Bharatiya Janata Party's (BJP's) Member of Parliament Varun Gandhi, however, raised concerns over India's cheetah import plan. He said, "Reckless pursuit of exotic animals must end immediately, and we should prioritise the welfare of our native wildlife instead." He

CHEETAH STAT CHECK

Adults	Cubs

added, "Importing cheetahs from Africa and allowing nine of them to die in a foreign land is not just cruelly but an appalling display of negligence."

Project Cheetah 2.0

But despite these deaths, all is not lost, says SP Yadav, head, Project Cheetah. "If we look at last year from the point

of view of success, then the benchmark we had set has been achieved," he said. He added that the survival rate of the cheetahs is more than 50 per cent.

For the second year, Yadav said that the project's focus would be on breeding these animals. Once breeding takes place, we will understand how the population will behave in our country, he said.

For the next phase of the project, Yadav said the team is working on bringing a batch of around 12 to 14 cheetahs from South Africa. This batch could be introduced at two more habitats in Madhya Pradesh — Gandhi Sagar Wildlife Sanctuary and Nauradehi Wildlife Sanctuary.

"I hope that in November-December, fencing and enclosure at Gandhi Sagar Wildlife Sanctuary will be completed and a decision will be taken to bring cheetahs there after inspection," he said.

According to the action plan on cheetahs, the country will need to import 10-12 cheetahs annually from Africa for at least the next five years.

South Africa has already expressed its willingness to provide India with as many cheetahs as needed. This assurance was given by South African President Cyril Ramaphosa to Prime Minister Narendra Modi during the BRICS summit in August.

Ramaphosa said, "We are ready to donate even more, considering your nation's commitment to the conservation of big cats."

Aditya Birla Sun Life Mutual Fund

Aditya Birla Sun Life AMC Limited (Investment Manager for Aditya Birla Sun Life Mutual Fund) Registered Office: One World Center, Tower 1, 17th Floor, Jupiter Mills, Senapati Bapat Marg, Elphinstone Road, Mumbai - 400 013. Tel.: 4356 8000. Fax: 4356 8110/8111. CIN: L65991MH1994PLC080811

Record Date for Distribution

NOTICE IS HEREBY GIVEN THAT the Trustees of Aditya Birla Sun Life Mutual Fund have approved Thursday, September 21, 2023*, as the Record Date for declaration of distribution under the Income Distribution cum Capital Withdrawal (IDCW) options in the following schemes, subject to availability of distributable surplus on the Record Date:

Name of the Scheme	Plans/Options	Quantum of Distribution per unit# on face value of Rs. 10/- per unit	NAV as on September 15, 2023 (Rs.)
Aditya Birla Sun Life Balanced Advantage Fund (An open ended Dynamic Asset Allocation fund)	Regular Plan - IDCW	0.151	24.22
	Direct Plan - IDCW	0.168	26.97

Steel import...

Over the past few decades, technology firms have developed complex and interwoven global supply chains. While the US remains the leader in the design and innovation for the ICT (information and communications technology) sector, manufacturing is largely outsourced to manufacturing services companies operating from China.

Tata Steel UK...

The UK is headed for elections next year. Is there any risk to the proposal in the event of a change in government?

The next engagement with the UK government is to convert the understanding into a definitive grant-funding agreement. That will take some months to happen. It then becomes a contract. Once it is a contract, there are no other risks from a grant perspective. But every stakeholder across the spectrum understands the need to have strong domestic manufacturing. That's where the importance of the jobs and the criticality of the real economy come in. We have been one of the largest steel producers in the UK and this proposal will make us the most competitive. As we go along with the consultation process, I believe all stakeholders will support the idea and its execution.

Would the restructuring result in a significant cash outflow? We have done enough restructuring in the past 15 years in the UK and the trends will be similar as they were then.

The UK operation has structural issues. The downstream units are scattered and the operating costs are high. How will this investment fix them? The fundamental issues with the UK asset were two — the heavy end is not structurally competitive. We run two blast furnaces and we are not coke self-sufficient. So the cost increases immediately.

We have been spending £80-90 million on capex on a yearly basis for sustenance in the heavy end. But if an asset reaches end of life, you can't keep doing that. And you can't reinvest in a similar asset because it is financially and environmentally unviable.

In the UK, as in the EU, there is a cost to carbon. This project effectively looks at changing the blast furnace route into an EAF, which is state-of-the-art, much lower in cost and simpler in configuration. It ensures that the cost of hot-rolled coil is £100-150 per tonne lower than where we are today in Port Talbot.

The market is also moving towards lower carbon products. In the European Union, we have the carbon border adjustment tax starting. And the UK's primary market has been domestic, as also Western Europe. This project will truly be a turning point for Tata Steel UK in resetting its competitiveness and the UK steel industry in the global map.

What has been the carbon cost and how does it get eliminated?

We will cut emission from about 2.16 tonnes of carbon dioxide to about 0.4 tonnes after the implementation. On average it's about £70 million per year. And that's a lot of cost.

You were in discussion with the UK government on policy measures — like energy, scrap. What is the status?

The UK government has started the consultation process on the carbon border adjustment mechanism (CBAM) and we expect it will be legislated in good time. The CBAM will ensure the demand for low-carbon products gets priced effectively because it is an equalisation mechanism. It's not a trade defence mechanism.

On energy, the government in the last one year has been moving significantly on a policy on energy-intensive industries where the landed price and the wholesale price differential comes down significantly especially for high-energy consuming industries. We are already seeing prices coming down and hopefully in the future the renewable portfolio in the UK is going to become much larger. A few years ago, the cost of energy in the UK was significantly higher than in mainland Europe, but that bridge will be reversed with the commissioning of more renewable power like offshore wind power in the next few years.

On scrap, the UK produces a very significant amount of steel scrap, which is largely not value-added. And it gets exported. We will also look at facilitating the development of a good scrap ecosystem in the country and facilitate value addition.

Lighthouses...

But for local fishing communities, they bring a sense of hope and heritage today.

Now, the Centre is planning to tap into this heritage and develop these lighthouses and areas around them as heritage tourism hubs. The Ministry of Ports, Shipping, and Waterways is looking to attract private interest and has identified 75 lighthouses for development. It will also hold a lighthouse festival from September 23 to 25 near the Aguada Lighthouse in Goa and the Madras Lighthouse in Chennai to inspire confidence in the investment potential of these projects.

The Centre had launched a similar drive in 2021, with little success. According to officials in the know, so far, only one such project, in Mahabali-puram, has seen interest. "While core operational and security aspects will remain under the Directorate General of Lighthouses and Lightships (DGLL), the ministry is hoping to garner investments in the development of tourism facilities on the surrounding land. While many lighthouses are

and will be open to tourists for scenic views, they will continue to be manned by DGLL staff," said a ministry official.

"The revenue sharing will happen on money generated from tourist facilities, as the lighthouse operated by the government is the primary attraction," he said.

According to Anil Antony, director of lighthouses looking after 37 structures in Kerala and Lakshadweep, lighthouses will hold operational value as they have been modernising with the times. At the same time, they are also a repository of coastal history, and tourism-led development via museums and other informational facilities can bring tourists closer to the history of these coasts.

In ancient times, seafarers used to light fires atop hills for navigation during the night. In the day, smoke from the burnt logs was the beacon of hope for sailors looking for shore, Antony said. Eventually, sailors began using lanterns for that purpose, and with the advent of electricity, incandescent lamps came into play.
