Fiscal deficit settles at 9.2% of GDP

Higher revenue receipts help keep deficit within revised target of 9.5%

New Delhi, 31 May

he Union government's fiscal deficit for financial year 2020-21 (FY21) settled at 9.2 per cent of gross domestic product (GDP), marginally below the revised target of 9.5 per cent. This came on the back of better-than-expected revenue receipts with expenditure staying broadly at the level targeted in the Revised Estimates (RE) of the Budget.

In absolute terms, the fiscal deficit was ₹18.21 trillion, about ₹27,194 crore lower than the projected ₹18.48 trillion, according to the provisional estimates released by Controller General of Accounts. The fiscal deficit has been arrived at based on provisional estimates for FY21 GDP of ₹197.46 trillion.

The Centre had revised its fiscal deficit target in the Budget from 3.5 per cent to 9.5 per cent because of increased expenditure on various schemes it announced to tide over

the Covid-19 pandemic, and a sharp shortfall in revenue receipts (both tax and non-tax).

government's revenue receipts were ₹16.32 trillion, about 5 per cent higher than ₹15.55 trillion proiected in the RE. Tax revenue was 6 per cent higher at ₹14.24 trillion, aided by an increase in excise and Customs duty. Revenue from excise duty jumped 63 per cent year-on-year (YoY) to ₹3.89 trillion, while mop-up from Customs duty increased over 23 per cent to ₹1.35 trillion. Total receipts, including non-debt capital receipts. stood at ₹16.89 trillion.

The total expenditure in FY21marred by the first wave of Covid-19was ₹35.11 trillion, as against an estimated ₹34.5 trillion. Although, total expenditure was higher by around ₹61,000 crore, capital expenditure was cut by ₹13,568 crore to ₹4.24 trillion. Revenue expenditure was 2.5 per cent higher the RE at ₹30.86 trillion.

Navar said. "This suggests a cushion of ₹1 trillion in FY22 within the budgeted level of expenditure, which will help to absorb the already announced costs related to free food grain and fertiliser subsidy, as well as the expected enhancement in the MGNREGA allocation that may be needed following the second surge," Nayar said.

Capex recorded a healthy level, and a robust 66 per cent year-on-year growth, given the low base because of the nationwide lockdown that had curtailed activity in April 2020, Navar said.

The Controller General of Accounts (CGA) has also released data for April 2021, and the total expenditure was ₹2.26 trillion as against ₹3.07 trillion a year ago. Capital expenditure was ₹47,126 crore. Total receipts during the month were ₹1.48 trillion.

Madan Sabnavis, chief economist at CARE Ratings, said in FY22, there will be pressures on tax revenue because of lockdowns, while non-tax revenue will be higher because of the Reserve Bank of India's transfer of

Core sector output in April up 56% on low base

But it is down 15% sequentially due to second wave

SHREYA NANDI New Delhi, 31 May

Growth in the eight core sectors rose sharply by 56.1 per cent year-on-year (YoY) in April, mainly due to the low base effect, data released by the commerce and industry ministry showed on Monday.

Growth in April, 2021 was also driven by a massive jump in steel and cement output. Core sector output in April 2020 shrank by a record 37.9 per cent, as factories remained closed across the country and production came to a virtual halt. This was due to the imposition of a Covid-induced lockdown during April-May last year.

basis, core sector output, as captured by the index of eight core industries (ICI), declined 15 per cent in April as compared to March, mainly due to the outbreak of the second wave of the pandemic. This resulted in state-wise lockdowns across the country starting mid-April.

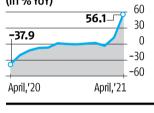

Core sector growth has also been revised for March to 11.4 per cent from 6.8 per cent due to higher coal production.

"Core infrastructure industries data is the first set of information of FY22 with regional/localised lockdowns. April 2021 growth is high due to the weak base. However, this data suggests that while all states individually implemented lockdowns, these are not as stringent as the nationwide lockdown of April and May 2020," Devendra Kumar Pant, chief economist, India Ratings & Research said

Steel and cement output grew 400 per cent and 548.8 per cent, respectively, as it plummeted last year with industry activity coming to a near-halt. Crude oil output contracted 2.1 per cent. On the other hand, steel output declined by a fifth on a sequential basis, amid rising Covid cases and use of liquid oxygen for patients fighting coronavirus, thereby affecting its production. Similarly, cement output declined in April as compared to March, owing to the restrictions imposed due to regional lockdowns.

Crude oil output contracted 2.1 per cent. "This fall can be ascribed to the less-thanplanned contribution from workover wells, drilling wells and old wells by governmentowned oil companies. Prod-

GAURAV KAPUR Latest GDP estimates released by the NSO reaffirmed the economy witnessed its deepest contraction in the aftermath of the pandemic since FY50-51, the year in which national accounts compilation begun. Real GDP registered a contraction of -7.3 per cent YoY in FY20-21, marginally better than the earlier estimate of -8 per cent. With this the size of the economy was3percentsmallerin March 2021 compared to Ma-

The first half saw a recession with a de-growth of -16 per cent, followed by a recovery in the second with 1 per cent growth, on the back of non-farm economic activity slowly reviving with gradual unlocking. This V-shaped turnaround in growth was driven by a recovery in

rch 2020.

manufacturing and a mixed speed improvement in services sector activity. On the spending side, private final consumption expenditure (PFCE) registered a de-growth of -9.1 per cent YoY, as the national lockdown had a deleterious impact on incomes and employment over the first half of the year. In fact, PFCE recorded a contraction for the first time in past four decades. The situation changed over the second half as gradual unlocking, easier financial conditions and higher household financial savings, helped stoke pentup demand. The second half of the year also saw an encouraging sign for sustainable long-term growth - a pick-up in the pace of gross fixed capital formation with a 10.85 per cent YoY growth in Q4, led by public capex push by the central and state governments. For the full year, however, GFCF contracted by -10.8 per cent YoY. A coordinated and unprecedented fiscal and monetary policy support amounting to 15.7 per cent of GDP, helped cushion the impact of the pandemic over the year. Fiscal policy focus in particular turned towards reviving growth through

direct public investments in infrastructure and encouraging private investments through an extended PLI scheme.

Covid pushed GDP into deepest contraction

The fourth quarter showed promising signs of the growth momentum improving, as can be seen by a sequential pick-up in the pace of growth of both manufacturing and services, from Q3 to Q4, helped by normalising demar conditions. However, as the year drew to a close, the biggest risk to the nascent recovery re-emerged in the form of a severe second wave of the pandemic, highlighting the need to urgently address this public health crisis through large scale vaccinations. The outlook on growth has once again turned uncertain and dependent upon the duration and the impact of the second wave.

While a 10 per cent growth for the full year FY21-22 is still possible, especially as the peak of the second wave seems to behind us and the vaccination program is slowly gathering momentum, the balance of risks remains on the downside. A supportive policy environment is already embedded in the form of accommodative monetary

fiscal policy stance. Global economic environment can also act as a tailwind with growth prospects of a large economies improving helping to boost global trade. Any negative spillovers from higher global rates on the back of inflation resurgence can be absorbed without tightening the policy levers through the use of abundan forex reserve stock and a flexible exchange rate. Managing the pandemic will, however, remain the most crucial determinant of driving a recovery though, as its negative impact can be more pervasive and persistent. Economic costs of this crisis are already steep, as highlighted by the OECD's latest growth forecast for India, which projects that output in India by end of March 2022 to be lower by 10 per cent compared to its pre-pandemic November 2019 projections. Thus, stopping the pandemic in its tracks and focusing on investment led recovery, should guide policy agenda ahead.
