Dear Sir/Madam,

Pursuant to the Regulation 30 of SEBI Listing Regulations, please find attached copies of extracts of the newspaper advertisement for the extract of the Unaudited Financial Results (Standalone and Consolidated) of the Company for the quarter ended on 30th June, 2021, published in all editions of Financial Express, Indian Express and Jansatta on 10th August, 2021.

We request you to kindly take the same on record.

Thanking You,

Yours Faithfully,

For Kamdhenu Limited

Khem Chand
Company Secretary & Compliance Officer

India likely to see more heat waves, droughts, cyclones: IPCC report

ESHA ROY
New Delhi, August 9

INCREASING HEAT WAVES and droughts, rainfall events and a likelihood of more cyclonic activity - this is what is in store for India and the subcontinent over the coming decades, according to a report released by the Intergovernmental Panel on Climate Change (IPCC) on Monday.

The report, 'Climate Change 2021: the Physical Science Basis', is the first part of IPCC's Sixth Assessment Report (AR6), its latest evaluation of the state of Earth's climate and the impact on the planet and life forms.

In a grim reminder of the threat posed by climate change, the report raises a crucial red flag, that global temperatures have already risen by about 1.1 degree Celsius from pre-industrial times, and warns that a 1.5-degree Celsius warming was likely to be reached before 2040. The stated objective of the

2015 Paris Agreement, the international architecture to fight climate change, is to limit temperature increase to within 2 degree Celsius from pre-industrial times, hopefully within 1.5 degrees Celsius itself. Scientists say a temperature rise beyond 2 degree Celsius would result in catastrophic and irreversible changes that would make it difficult for human beings and other species to survive.

On India, the report says heat waves and humid heat stress will be more intense and frequent in the 21st Century. Changes in monsoon precipitation is also expected, with both annual and summer monsoon precipitation projected to increase.

"Heat extremes have increased while cold extremes have decreased, and these trends will continue over the coming decades," it says for the Indian subcontinent.

The report says the presence of aerosols and particulate mat-

ter due to human activity have influenced rainfall events in the Indian subcontinent. The dominant cause of the observed decrease of South and Southeast Asian monsoon precipitation since mid-20th century is the in-

crease in aerosols and particulate matter due to human activity, the report said, while predicting that in the long-term, South and Southeast Asian monsoon and East Asian summer monsoon precipitation will increase.

The report also says there is now "unequivocal" evidence to say that global warming is being caused by human activities. "The main finding of the report is that climate change is a fact, warming is a fact and that the

warming has taken places because of human influence is now well established... There is no going back from some of these changes. Even if we limit temperatures to 1.5 degrees Celsius from pre-industrial levels, we

will continue to see extreme weather events," says Dr Friederike Otto, Associate Director, Environment Change Institute, University of Oxford and one of the authors of the report.

Otto adds that some changes are locked in, such as rising sea levels and melting glaciers, which can now no longer be reversed. "For India, increase in heat waves is marked by other emissions like aerosol emissions. If there is a reduction in aerosols, we will see a further increase in heat waves," she says.

IITM's Dr Swapna Panickal, one of the authors of the report, adds India is and will experience an intensifying of the water cycle which will affect rainfall patterns as well as increased monsoon precipitation.

"In the Indian Ocean, the sea temperature is heating at a higher rate than other areas, and therefore may influence other regions. The South West Monsoon has declined over the past

few decades because of the increase of aerosols, but once this reduces, we will experience heavy monsoon rainfall," she says. The global mean sea level in the Indian Ocean is rising at 3.7 mm annually. Extreme sea-level events, that previously occurred once every 100 years, will now be seen nearly every year, she adds.

The report projects that in the coming decades, climate changes will increase in all regions. For 1.5°C of global warming, there will be increasing heat waves, longer warm seasons and shorter cold seasons.

Coastal areas will see continued sea-level rise throughout the 21st century, contributing to more frequent and severe coastal flooding in low-lying areas and coastal erosion. For cities, some aspects of climate change may be amplified, including heat (since urban areas are usually warmer than their surroundings) and flooding from heavy precipitation.

Message for India: Net-zero emissions target a must

AMITABH SINHA
Pune, August 9

WITH A WARNING that a 1.5-degree warming was likely to be achieved even before 2040, the Intergovernmental Panel on Climate Change (IPCC) has tried to make a case, much stronger than earlier, for immediate cuts on global greenhouse gas emissions.

For India, it is likely to translate into increased pressure to agree to a net-zero target, a deadline by which it should be able to bring down its emissions to a level that equals the absorptions made by its carbon sinks, such as forests.

IPCC assessment reports, the sixth edition of which was released on Monday, are not policy prescriptive.

They do not tell countries what to do. But their science forms the basis for climate action across the globe, and foundation for international climate negotiations.

In the case of the Sixth Assessment Report, the fact that the 1.5 degree Celsius warming has been shown to be closer than thought earlier is likely to trigger widespread calls for stronger, more wide-ranging emission cuts from all countries.

Not that the deadline was not known earlier. But this is the first time that the IPCC has said that 1.5 degree warming was inevitable even in the best-case scenario.

The most ambitious emission pathways would lead to 1.5 degree warming to be achieved in the 2030s, overshoot to 1.6 degree C, before the temperatures drop back again to 1.4 degree C by the end of the century. Several countries, more than 100, have already announced their intentions to achieve net-zero emissions by the middle of the century.

These include major emitters like the United States, China and the European Union. India, the third largest emit-

For India, it is likely to translate into increased pressure to agree to a net-zero target, a deadline by which it should be able to bring down its emissions to a level that equals the absorptions made by its carbon sinks, such as forests. IPCC assessment reports, the sixth edition of which was released on Monday, are not policy prescriptive.

ter in the world, has been holding out. It has argued that it was already doing much more than it was required to do, performing better, in relative terms, than other countries, and that any further burden would jeopardise its continuing efforts to pull its millions out of poverty.

The IPCC said that a global net-zero by 2050 was the mini-

mum required to keep the temperature rise to 1.5 degree Celsius.

Without India, this would not be possible. Even China, the world's biggest emitter, has a net-zero goal for 2060.

But other countries would feel the heat as well. For the purposes of global warming and its impacts, the pathways are as important as the destination.

Immediate emission cuts and a steady pathway to net-zero is expected to bring better benefits than a business-as-usual scenario and a sudden drop in emissions towards the end to meet the target.

Even for the countries that have pledged a net-zero target, the substantial part of their emission cuts is planned only for 2035 and beyond.

The new evidence in the IPCC report is likely to put pressure on them as well to reconsider their pathways.

"The science is clear, the impacts of the climate crisis can be

seen around the world and if we don't act now, we will continue to see the worst effects impact lives, livelihoods and natural habitats," said Alok Sharma, the UK Minister who will preside over the climate change talks in Glasgow in November.

Sharma emphasised on the need to keep the hopes alive for a 1.5 degree world, as did all the speakers from IPCC at the release of the report.

"Our message to every country, government, business and part of society is simple. The next decade is decisive, follow the science and embrace your responsibility to keep the goal of 1.5C alive. We can do this together, by coming forward with ambitious 2030 emission reduction targets, and long-term strategies with a pathway to net zero by the middle of the century, and taking action now to end coal power, accelerate the roll out of electric vehicles, tackle deforestation and reduce methane emissions," he said.

Nargol Greenfield port project in Gujarat opposed by locals

FE BUREAU
Ahmedabad, August 9

AT A TIME when the Gujarat government is in the advanced stage of developing a Greenfield port at Nargol village, voices have been raised against the ambitious project by the localities.

Recently a pre-bid meeting for the development of the port in Umargam taluka of Valsad district was conducted by the state maritime regulator, Gujarat Maritime Board (GMB) in which Adani Group, Essar Group, JM Baxi Group and the Dubai based logistic firm DP World participated.

Reacting on the meeting, Umargam Taluka Kinara Bachao Samiti (UTKBS), a platform form to oppose the proposed port by the local residents of the area has submitted a memorandum to Gujarat government and suggested to develop picturesque

Nargol beach as tourist destination and drop the port project.

Convener of the UTKBS, Shailesh Hodivala said that if the port would come up at Nargol, thousands of fishermen would be impacted adversely. According to Hodivala, the Nargol Gram Panchayat had passed a resolution against the Greenfield port project in gram sabha (village convention).

In the memorandum UTKBS requested the Chief Minister to review the port project plan in wake of the resolution passed by the Nargol village panchayat. Nearly 30,000 people are getting employment in fishing activities in and around Nargol area and their annual turnover is over Rs 450 crore, says the memorandum adding, "If the project would come up at Nargol, the entire ecosystem would get disturbed due to pollution which would impact fishing activities

adversely. The port would generate hardly hundreds of new jobs, but at the same time thousands of fishermen will lose their livelihood."

UTKBS further said in the memorandum that the scenic coastal area of Nargol region with sandy beaches can be protected and developed as a tourist destination. Through tourism activities, thousands of new jobs would be created for the locals, it said. Instead of spending thousands of crore rupees to develop the port, the state government should develop fishing infrastructure by investing just a few crores of rupees to increase income of local people, opined UTKBS in the memorandum.

Interestingly, the Gujarat government had announced plans to develop Nargol port in the year 1999. Since then, nothing concrete has happened on ground zero yet.

BENGALURU

India likely to see more heat waves, droughts, cyclones: IPCC report

A grim reminder: Paris climate goal set to be breached in two decades

ESHA ROY
New Delhi, August 9

INCREASING HEAT WAVES and droughts, rainfall events and a likelihood of more cyclonic activity — this is what is in store for India and the sub-continent over the coming decades, according to a report released by the Intergovernmental Panel on Climate Change (IPCC) on Monday.

The report, 'Climate Change 2021: the Physical Science Basis', is the first part of IPCC's Sixth Assessment Report (AR6) — its latest evaluation of the state of Earth's climate and the impact on the planet and life forms.

In a grim reminder of the threat posed by climate change, the report raises a crucial red flag — that global temperatures have already risen by about 1.1 degree Celsius from pre-industrial times, and warns that a 1.5-degree Celsius warming was likely to be reached before 2040.

The stated objective of the 2015 Paris Agreement, the international architecture to fight climate change, is to limit temperature increase to within 2 degree Celsius from pre-industrial times, hopefully within 1.5 degrees Celsius itself. Scientists say a temperature rise beyond 2 degree Celsius would result in catastrophic and irreversible changes that would make it difficult for human beings and other species to survive.

On India, the report says heat waves and humid heat stress will be more intense and frequent in the 21st Century. Changes in monsoon precipitation is also expected, with both annual and summer monsoon precipitation projected to increase.

"Heat extremes have increased while cold extremes have decreased, and these trends will continue over the coming decades," it says for the Indian subcontinent.

The report says the presence of aerosols and particulate matter due to human activity have influenced rainfall events in the Indian subcontinent. The dominant cause of the observed decrease of South and Southeast Asian monsoon precipitation since mid-20th century is the increase in aerosols and particulate matter due to human activity, the report said, while predicting that in the long-term, South and Southeast Asian monsoon and East Asian summer monsoon precipitation will increase.

The report also says there is now "unequivocal" evidence to say that global warming was being caused by human activities. "The main finding of the report is that climate change is a fact, warming is a fact and that the warming has taken places because of human influence is now well established... There is no going back from some of these changes. Even if we limit temperatures to 1.5 degrees Celsius from pre-industrial levels, we will continue to see extreme weather events," says Dr Friederike Otto, Associate Director, Environment Change Institute, University of Oxford and one of the authors of the report.

Otto adds that some changes are locked in, such as rising sea levels and melting glaciers, which can now no longer be reversed.

"For India, increase in heat waves is marked by other emissions like aerosol emissions. If there is a reduction in aerosols, we will see a further increase in heat waves," she says.

IITM's Dr Swapna Panickal, one of the authors of the report, adds India is and will experience an intensifying of the water

cycle which will affect rainfall patterns as well as increased monsoon precipitation.

"In the Indian Ocean, the sea temperature is heating at a higher rate than other areas, and therefore may influence other regions. The South West Monsoon has declined over the past few decades because of the increase of aerosols, but once this reduces, we will experience heavy monsoon rainfall," she says.

The global mean sea level in the Indian Ocean is rising at 3.7 mm annually. Extreme sea-level events, that previously occurred once every 100 years, will now be seen nearly every year, she adds.

The report projects that in the coming decades, climate changes will increase in all regions. For 1.5°C of global warming, there will be increasing heat waves, longer warm seasons and shorter cold seasons.

Coastal areas will see continued sea-level rise throughout the 21st century, contributing to more frequent and severe coastal flooding in low-lying areas and coastal erosion. For cities, some aspects of climate change may be amplified, including heat (since urban areas are usually warmer than their surroundings), flooding from heavy precipitation events and sea level rise in coastal cities.

"Given that India is one of the most climate-vulnerable countries, we must recognise that even geographically far-away climatic changes can have consequences for our monsoons and intensity of extreme events," says Dr Arunabha Ghosh, CEO, Council on Energy, Environment and Water (CEEW).

Message for India: Net-zero emissions target a must

AMITABH SINHA
Pune, August 9

WITH A WARNING that a 1.5-degree warming was likely to be achieved even before 2040, the Intergovernmental Panel on Climate Change (IPCC) has tried to make a case, much stronger than earlier, for

immediate cuts on global greenhouse gas emissions.

For India, it is likely to translate into increased pressure to agree to a net-zero target — a deadline by which it should be able to bring down its emissions to a level that equals the absorptions made by its carbon sinks, such as forests.

IPCC assessment reports, the sixth edition of which was released on Monday, are not policy prescriptive. They do not tell countries what to do. But their science forms the basis for climate action across the globe, and foundation for international climate negotiations.

In the case of the Sixth

Assessment Report, the fact that the 1.5 degree Celsius warming has been shown to be closer than thought earlier is likely to trigger widespread calls for stronger, more wide-ranging emission cuts from all countries.

Not that the deadline was not known earlier. But this is the first time that the IPCC has

said that 1.5 degree warming was inevitable even in the best-case scenario. The most ambitious emission pathways would lead to 1.5 degree warming to be achieved in the 2030s, overshoot to 1.6 degree C, before the temperatures drop back again to 1.4 degree C by the end of the century.

CHENNAI/KOCHI

China's economic risks build as Delta cases spread, prices gain

BLOOMBERG
August 9

CHINA'S ECONOMIC RISKS are building in the second half of the year, with growth set to slow while inflation pressures are picking up, clouding the outlook for central bank support.

A report Monday showed factory-gate inflation surging again to 9% in July as commodity prices climbed, while core consumer prices — which strip out volatile food and fuel costs — rose the most in 18 months.

At the same time, the spread of the delta variant is threatening

China's outlook, with Goldman Sachs Group and JPMorgan Chase & Co downgrading growth forecasts for the third quarter and full year, and predicting more central bank easing.

The latest developments are another complication for policy makers, who have already pledged fiscal and monetary support for the economy in the second half of the year. While some economists see inflation risks limiting the room for central bank action, many see the uncertain growth environment as a bigger worry, with more easing likely to come.

"As the outbreak unfolds, China's domestic demand will weaken, and the overall inflation pressure will decline," said Xing Zhaopeng, senior China strategist at Australia & New Zealand Banking Group Ltd. "Even though prices are still high, they won't have much momentum to rise further, so it won't create a huge constraint on monetary policy."

Chinese government bonds extended losses after the data, with the yield on the 10-year security rising 4 basis points, the most since January, to 2.85%.

Inflation, though, is unlikely

to be a key consideration for monetary policy in the near term. The growth outlook — under pressure from new outbreaks of the Covid-19 variant — will be a bigger concern that could prompt the People's Bank of China to do more to support the economy, following a cut in the required reserve ratio in mid-July.

The jump in factory-gate inflation was largely due to higher commodity prices, in particular oil and coal. Beijing has been trying to quell the surge in commodity prices by releasing inventory from the nation's strategic

reserves, cracking down on hoarding and speculation, and ordering state-owned enterprises to limit their exposure to overseas commodities markets.

Core CPI rose 1.3% in July from a year ago, suggesting domestic demand is getting stronger. Food prices declined 3.7% from a year ago, mainly due to a 43.5% plunge in pork prices, a key item in the CPI basket.

"PPI will probably be around 6% by the year-end. This will to some extent limit the room for monetary easing," said Zhou Hao, senior emerging markets econo-

mist at Commerzbank AG in Singapore. "The possibility of a rate cut is extremely small."

Latest trade data also showed an easing in global demand, another headwind for China's growth. Export growth slowed to 19.3% in July, missing forecasts, the customs administration said Saturday. Extreme weather conditions and local Covid outbreaks have disrupted production and shipping in parts of China, while record-high freight costs have squeezed exporters' profits.

"This puts the policy makers in a dilemma: inflation is rising and growth is slowing,"

said Zhang Zhiwei, chief economist at Pinpoint Asset Management. "The pandemic worsened and caused more disruption in the global supply chain."

China's zero-tolerance ap-

proach to controlling the spread of the virus means more scrutiny on cross-border movement of cargo and travelers, which will probably put further stress on the supply chain, he said.

India likely to see more heat waves, droughts, cyclones: IPCC report

A grim reminder: Paris climate goal set to be breached in two decades

ESHA ROY
New Delhi, August 9

INCREASING HEAT WAVES and droughts, rainfall events and a likelihood of more cyclonic activity — this is what is in store for India and the sub-continent over the coming decades, according to a report released by the Intergovernmental Panel on Climate Change (IPCC) on Monday.

The report, 'Climate Change 2021: the Physical Science Basis', is the first part of IPCC's Sixth Assessment Report (AR6) — its latest evaluation of the state of Earth's climate and the impact on the planet and life forms.

In a grim reminder of the threat posed by climate change, the report raises a crucial red flag — that global temperatures have already risen by about 1.1 degree Celsius from pre-industrial times, and warns that a 1.5-degree Celsius warming was likely to be reached before 2040.

The stated objective of the 2015 Paris Agreement, the international architecture to fight climate change, is to limit temperature increase to within 2 degree Celsius from pre-industrial times, hopefully within 1.5 degrees Celsius itself. Scientists say a temperature rise beyond 2 degree Celsius would result in catastrophic and irreversible changes that would make it difficult for human beings and other species to survive.

On India, the report says heat waves and humid heat stress will be more intense and frequent in the 21st century. Changes in monsoon precipitation is also expected, with both annual and summer monsoon precipitation projected to increase.

"Heat extremes have increased while cold extremes have decreased, and these trends will continue over the coming decades," it says for the Indian subcontinent.

The report says the presence of aerosols and particulate matter due to human activity have influenced rainfall events in the Indian subcontinent. The dominant cause of the observed decrease of South and Southeast Asian monsoon precipitation since mid-20th century is the increase in aerosols and particulate matter due to human activity, the report said, while predicting that in the long-term, South and Southeast Asian monsoon and East Asian summer monsoon precipitation will increase.

The report also says there is now "unequivocal" evidence to say that global warming was being caused by human activities. "The main finding of the report is that climate change is a fact, warming is a fact and that the warming has taken places because of human influence is now well established... There is no going back from some of these changes. Even if we limit temperatures to 1.5 degrees Celsius from pre-industrial levels, we will continue to see extreme weather events," says Dr Friederike Otto, Associate Director, Environment Change Institute, University of Oxford and one of the authors of the report.

Otto adds that some changes are locked in, such as rising sea levels and melting glaciers, which can now no longer be reversed. "For India, increase in heat waves is marked by other emissions like aerosol emissions. If there is a reduction in aerosols, we will see a further increase in heat waves," she says.

ITM's Dr Swapna Panickal, one of the authors of the report, adds India is and will experience an intensifying of the water

cycle which will affect rainfall patterns as well as increased monsoon precipitation.

"In the Indian Ocean, the sea temperature is heating at a higher rate than other areas, and therefore may influence other regions. The South West Monsoon has declined over the past few decades because of the increase of aerosols, but once this reduces, we will experience heavy monsoon rainfall," she says.

The global mean sea level in the Indian Ocean is rising at 3.7 mm annually. Extreme sea-level events, that previously occurred once every 100 years, will now be seen nearly every year, she adds.

The report projects that in the coming decades, climate changes will increase in all regions. For 1.5°C of global warming, there will be increasing heat waves, longer warm seasons and shorter cold seasons.

Coastal areas will see continued sea-level rise throughout the 21st century, contributing to more frequent and severe coastal flooding in low-lying areas and coastal erosion. For cities, some aspects of climate change may be amplified, including heat (since urban areas are usually warmer than their surroundings), flooding from heavy precipitation events and sea level rise in coastal cities.

"Given that India is one of the most climate-vulnerable countries, we must recognise that even geographically far-away climatic changes can have consequences for our monsoons and intensity of extreme events," says Dr Arunabha Ghosh, CEO, Council on Energy, Environment and Water (CEEW).

Message for India: Net-zero emissions target a must

AMITABH SINHA
Pune, August 9

WITH A WARNING that a 1.5-degree warming was likely to be achieved even before 2040, the Intergovernmental Panel on Climate Change (IPCC) has tried to make a case, much stronger than earlier, for

immediate cuts on global greenhouse gas emissions.

For India, it is likely to translate into increased pressure to agree to a net-zero target — a deadline by which it should be able to bring down its emissions to a level that equals the absorptions made by its carbon sinks, such as forests.

IPCC assessment reports, the sixth edition of which was released on Monday, are not policy prescriptive. They do not tell countries what to do. But their science forms the basis for climate action across the globe, and foundation for international climate negotiations.

In the case of the Sixth

Assessment Report, the fact that the 1.5 degree Celsius warming has been shown to be closer than thought earlier is likely to trigger widespread calls for stronger, more wide-ranging emission cuts from all countries.

Not that the deadline was not known earlier. But this is the first time that the IPCC has

said that 1.5 degree warming was inevitable even in the best-case scenario. The most ambitious emission pathways would lead to 1.5 degree warming to be achieved in the 2030s, overshoot to 1.6 degree C, before the temperatures drop back again to 1.4 degree C by the end of the century.

India likely to see more heat waves, droughts, cyclones: IPCC report

ESHA ROY
New Delhi, August 9

INCREASING HEAT WAVES and droughts, rainfall events and a likelihood of more cyclonic activity - this is what is in store for India and the subcontinent over the coming decades, according to a report released by the Intergovernmental Panel on Climate Change (IPCC) on Monday.

The report, 'Climate Change 2021: the Physical Science Basis', is the first part of IPCC's Sixth Assessment Report (AR6), its latest evaluation of the state of Earth's climate and the impact on the planet and life forms.

In a grim reminder of the threat posed by climate change, the report raises a crucial red flag, that global temperatures have already risen by about 1.1 degree Celsius from pre-industrial times, and warns that a 1.5-degree Celsius warming was likely to be reached before 2040. The stated objective of the

2015 Paris Agreement, the international architecture to fight climate change, is to limit temperature increase to within 2 degree Celsius from pre-industrial times, hopefully within 1.5 degrees Celsius itself. Scientists say a temperature rise beyond 2 degree Celsius would result in catastrophic and irreversible changes that would make it difficult for human beings and other species to survive.

On India, the report says heat waves and humid heat stress will be more intense and frequent in the 21st Century. Changes in monsoon precipitation is also expected, with both annual and summer monsoon precipitation projected to increase.

"Heat extremes have increased while cold extremes have decreased, and these trends will continue over the coming decades," it says for the Indian subcontinent.

The report says the presence of aerosols and particulate mat-

ter due to human activity have influenced rainfall events in the Indian subcontinent. The dominant cause of the observed decrease of South and Southeast Asian monsoon precipitation since mid-20th century is the in-

crease in aerosols and particulate matter due to human activity, the report said, while predicting that in the long-term, South and Southeast Asian monsoon and East Asian summer monsoon precipitation will increase.

The report also says there is now "unequivocal" evidence to say that global warming was being caused by human activities. "The main finding of the report is that climate change is a fact, warming is a fact and that the

warming has taken places because of human influence is now well established... There is no going back from some of these changes. Even if we limit temperatures to 1.5 degrees Celsius from pre-industrial levels, we

will continue to see extreme weather events," says Dr Friederike Otto, Associate Director, Environment Change Institute, University of Oxford and one of the authors of the report.

Otto adds that some changes are locked in, such as rising sea levels and melting glaciers, which can now no longer be reversed. "For India, increase in heat waves is marked by other emissions like aerosol emissions. If there is a reduction in aerosols, we will see a further increase in heat waves," she says.

ITM's Dr Swapna Panickal, one of the authors of the report, adds India is and will experience an intensifying of the water cycle which will affect rainfall patterns as well as increased monsoon precipitation.

"In the Indian Ocean, the sea temperature is heating at a higher rate than other areas, and therefore may influence other regions. The South West Monsoon has declined over the past

few decades because of the increase of aerosols, but once this reduces, we will experience heavy monsoon rainfall," she says. The global mean sea level in the Indian Ocean is rising at 3.7 mm annually. Extreme sea-level events, that previously occurred once every 100 years, will now be seen nearly every year, she adds.

The report projects that in the coming decades, climate changes will increase in all regions. For 1.5°C of global warming, there will be increasing heat waves, longer warm seasons and shorter cold seasons.

Coastal areas will see continued sea-level rise throughout the 21st century, contributing to more frequent and severe coastal flooding in low-lying areas and coastal erosion. For cities, some aspects of climate change may be amplified, including heat (since urban areas are usually warmer than their surroundings) and flooding from heavy precipitation.

Message for India: Net-zero emissions target a must

AMITABH SINHA
Pune, August 9

WITH A WARNING that a 1.5-degree warming was likely to be achieved even before 2040, the Intergovernmental Panel on Climate Change (IPCC) has tried to make a case, much stronger than earlier, for immediate cuts on global greenhouse gas emissions.

For India, it is likely to translate into increased pressure to agree to a net-zero target, a deadline by which it should be able to bring down its emissions to a level that equals the absorptions made by its carbon sinks, such as forests.

In the case of the Sixth Assessment Report, the fact that the 1.5 degree Celsius warming has been shown to be closer than thought earlier is likely to trigger widespread calls for stronger, more wide-ranging emission cuts from all countries.

Not that the deadline was not known earlier. But this is the first time that the IPCC has said that 1.5 degree warming was inevitable even in the best-case scenario.

The most ambitious emission pathways would lead to 1.5 degree warming to be achieved in the 2030s, overshoot to 1.6 degree C, before the temperatures drop back again to 1.4 degree C by the end of the century.

Several countries, more than 100, have already announced their intentions to achieve net-zero emissions by the middle of the century.

These include major emitters like the United States, China and the European Union.

India, the third largest emit-

For India, it is likely to translate into increased pressure to agree to a net-zero target, a deadline by which it should be able to bring down its emissions to a level that equals the absorptions made by its carbon sinks, such as forests. IPCC assessment reports, the sixth edition of which was released on Monday, are not policy prescriptive.

ter in the world, has been holding out. It has argued that it was already doing much more than it was required to do, performing better, in relative terms, than other countries, and that any further burden would jeopardise its continuing efforts to pull its millions out of poverty.

The IPCC said that a global net-zero by 2050 was the minimum required to keep the temperature rise to 1.5 degree Celsius.

Without India, this would not be possible. Even China, the world's biggest emitter, has a net-zero goal for 2060.

But other countries would feel the heat as well. For the purposes of global warming and its impacts, the pathways are as important as the destination.

Immediate emission cuts and a steady pathway to net-zero is expected to bring better benefits than a business-as-usual scenario and a sudden drop in emissions towards the end to meet the target.

Even for the countries that have pledged a net-zero target, the substantial part of their emission cuts is planned only for 2035 and beyond.

The new evidence in the IPCC report is likely to put pressure on them as well to reconsider their pathways.

"The science is clear, the impacts of the climate crisis can be

seen around the world and if we don't act now, we will continue to see the worst effects impact lives, livelihoods and natural habitats," said Alok Sharma, the UK Minister who will preside over the climate change talks in Glasgow in November.

Sharma emphasised on the need to keep the hopes alive for a 1.5 degree world, as did all the speakers from IPCC at the release of the report.

"Our message to every country, government, business and part of society is simple. The next decade is decisive, follow the science and embrace your responsibility to keep the goal of 1.5C alive. We can do this together, by coming forward with ambitious 2030 emission reduction targets, and long-term strategies with a pathway to net zero by the middle of the century, and taking action now to end coal power, accelerate the roll out of electric vehicles, tackle deforestation and reduce methane emissions," he said.

Nargol Greenfield port project in Gujarat opposed by locals

FE BUREAU
Ahmedabad, August 9

AT A TIME when the Gujarat government is in the advanced stage of developing a Greenfield port at Nargol village, voices have been raised against the ambitious project by the localities.

Recently a pre-bid meeting for the development of the port in Umargam taluka of Valsad district was conducted by the state maritime regulator, Gujarat Maritime Board (GMB) in which Adani Group, Essar Group, JM Baxi Group and the Dubai based logistic firm DP World participated.

Reacting on the meeting, Umargam Taluka Kinara Bachao Samiti (UTKBS), a platform formed to oppose the proposed port by the local residents of the area has submitted a memorandum to Gujarat government and suggested to develop picturesque

Nargol beach as tourist destination and drop the port project.

Convener of the UTKBS, Shailesh Hodivala said that if the port would come up at Nargol, thousands of fishermen would be impacted adversely. According to Hodivala, the Nargol Gram Panchayat had passed a resolution against the Greenfield port project in gram sabha (village convention).

In the memorandum UTKBS requested the Chief Minister to review the port project plan in wake of the resolution passed by the Nargol village panchayat. Nearly 30,000 people are getting employment in fishing activities in and around Nargol area and their annual turnover is over Rs 450 crore, says the memorandum adding, "If the project would come up at Nargol, the entire ecosystem would get disturbed due to pollution which would impact fishing activities

adversely. The port would generate hardly hundreds of new jobs, but at the same time thousands of fishermen will lose their livelihood."

UTKBS further said in the memorandum that the scenic coastal area of Nargol region with sandy beaches can be protected and developed as a tourist destination. Through tourism activities, thousands of new jobs would be created for the locals, it said. Instead of spending thousands of crore rupees to develop the port, the state government should develop fishing infrastructure by investing just a few crores of rupees to increase income of local people, opined UTKBS in the memorandum.

Interestingly, the Gujarat government had announced plans to develop Nargol port in the year 1999. Since then, nothing concrete has happened on ground zero yet.

We Make A World of Your Dreams!

India likely to see more heat waves, droughts, cyclones: IPCC report

ESHA ROY
New Delhi, August 9

INCREASING HEAT WAVES and droughts, rainfall events and a likelihood of more cyclonic activity - this is what is in store for India and the subcontinent over the coming decades, according to a report released by the Intergovernmental Panel on Climate Change (IPCC) on Monday. The report, 'Climate Change 2021: the Physical Science Basis', is the first part of IPCC's Sixth Assessment Report (AR6), its latest evaluation of the state of Earth's climate and the impact on the planet and life forms. In a grim reminder of the threat posed by climate change, the report raises a crucial red flag, that global temperatures have already risen by about 1.1 degree Celsius from pre-industrial times, and warns that a 1.5-degree Celsius warming was likely to be reached before 2040. The stated objective of the

2015 Paris Agreement, the international architecture to fight climate change, is to limit temperature increase to within 2 degree Celsius from pre-industrial times, hopefully within 1.5 degrees Celsius itself. Scientists say a temperature rise beyond 2 degree Celsius would result in catastrophic and irreversible changes that would make it difficult for human beings and other species to survive. On India, the report says heat waves and humid heat stress will be more intense and frequent in the 21st Century. Changes in monsoon precipitation is also expected, with both annual and summer monsoon precipitation projected to increase. "Heat extremes have increased while cold extremes have decreased, and these trends will continue over the coming decades," it says for the Indian subcontinent. The report says the presence of aerosols and particulate mat-

ter due to human activity have influenced rainfall events in the Indian subcontinent. The dominant cause of the observed decrease of South and Southeast Asian monsoon precipitation since mid-20th century is the in-

crease in aerosols and particulate matter due to human activity, the report said, while predicting that in the long-term, South and Southeast Asian monsoon and East Asian summer monsoon precipitation will increase.

The report also says there is now "unequivocal" evidence to say that global warming was being caused by human activities. "The main finding of the report is that climate change is a fact, warming is a fact and that the

warming has taken places because of human influence is now well established... There is no going back from some of these changes. Even if we limit temperatures to 1.5 degrees Celsius from pre-industrial levels, we

will continue to see extreme weather events," says Dr Friederike Otto, Associate Director, Environment Change Institute, University of Oxford and one of the authors of the report. Otto adds that some changes are locked in, such as rising sea levels and melting glaciers, which can no longer be reversed. "For India, increase in heat waves is marked by other emissions like aerosol emissions. If there is a reduction in aerosols, we will see a further increase in heat waves," she says. IITM's Dr Swapna Panickal, one of the authors of the report, adds India is and will experience an intensifying of the water cycle which will affect rainfall patterns as well as increased monsoon precipitation. "In the Indian Ocean, the sea temperature is heating at a higher rate than other areas, and therefore may influence other regions. The South West Monsoon has declined over the past

few decades because of the increase of aerosols, but once this reduces, we will experience heavy monsoon rainfall," she says. The global mean sea level in the Indian Ocean is rising at 3.7 mm annually. Extreme sea-level events, that previously occurred once every 100 years, will now be seen nearly every year, she adds. The report projects that in the coming decades, climate changes will increase in all regions. For 1.5°C of global warming, there will be increasing heat waves, longer warm seasons and shorter cold seasons. Coastal areas will see continued sea-level rise throughout the 21st century, contributing to more frequent and severe coastal flooding in low-lying areas and coastal erosion. For cities, some aspects of climate change may be amplified, including heat (since urban areas are usually warmer than their surroundings) and flooding from heavy precipitation.

Message for India: Net-zero emissions target a must

AMITABH SINHA
Pune, August 9

WITH A WARNING that a 1.5-degree warming was likely to be achieved even before 2040, the Intergovernmental Panel on Climate Change (IPCC) has tried to make a case, much stronger than earlier, for immediate cuts on global greenhouse gas emissions. For India, it is likely to translate into increased pressure to agree to a net-zero target, a deadline by which it should be able to bring down its emissions to a level that equals the absorptions made by its carbon sinks, such as forests. IPCC assessment reports, the sixth edition of which was released on Monday, are not policy prescriptive. They do not tell countries what to do. But their science forms the basis for climate action across the globe, and foundation for international climate negotiations.

In the case of the Sixth Assessment Report, the fact that the 1.5 degree Celsius warming has been shown to be closer than thought earlier is likely to trigger widespread calls for stronger, more wide-ranging emission cuts from all countries. Not that the deadline was not known earlier. But this is the first time that the IPCC has said that 1.5 degree warming was inevitable even in the best-case scenario. The most ambitious emission pathways would lead to 1.5 degree warming to be achieved in the 2030s, overshoot to 1.6 degree C, before the temperatures drop back again to 1.4 degree C by the end of the century. Several countries, more than 100, have already announced their intentions to achieve net-zero emissions by the middle of the century. These include major emitters like the United States, China and the European Union. India, the third largest emit-

For India, it is likely to translate into increased pressure to agree to a net-zero target, a deadline by which it should be able to bring down its emissions to a level that equals the absorptions made by its carbon sinks, such as forests. IPCC assessment reports, the sixth edition of which was released on Monday, are not policy prescriptive.

ter in the world, has been holding out. It has argued that it was already doing much more than it was required to do, performing better, in relative terms, than other countries, and that any further burden would jeopardise its continuing efforts to pull its millions out of poverty. The IPCC said that a global net-zero by 2050 was the mini-

mum required to keep the temperature rise to 1.5 degree Celsius. Without India, this would not be possible. Even China, the world's biggest emitter, has a net-zero goal for 2060. But other countries would feel the heat as well. For the purposes of global warming and its impacts, the pathways are as important as the destination. Immediate emission cuts and a steady pathway to net-zero is expected to bring better benefits than a business-as-usual scenario and a sudden drop in emissions towards the end to meet the target. Even for the countries that have pledged a net-zero target, the substantial part of their emission cuts is planned only for 2035 and beyond. The new evidence in the IPCC report is likely to put pressure on them as well to reconsider their pathways. "The science is clear, the impacts of the climate crisis can be

seen around the world and if we don't act now, we will continue to see the worst effects impact lives, livelihoods and natural habitats," said Alok Sharma, the UK Minister who will preside over the climate change talks in Glasgow in November. Sharma emphasised on the need to keep the hopes alive for a 1.5 degree world, as did all the speakers from IPCC at the release of the report. "Our message to every country, government, business and part of society is simple. The next decade is decisive, follow the science and embrace your responsibility to keep the goal of 1.5C alive. We can do this together, by coming forward with ambitious 2030 emission reduction targets, and long-term strategies with a pathway to net zero by the middle of the century, and taking action now to end coal power, accelerate the roll out of electric vehicles, tackle deforestation and reduce methane emissions," he said.

Nargol Greenfield port project in Gujarat opposed by locals

FE BUREAU
Ahmedabad, August 9

AT A TIME when the Gujarat government is in the advanced stage of developing a Greenfield port at Nargol village, voices have been raised against the ambitious project by the localities. Recently a pre-bid meeting for the development of the port in Umargam taluka of Valsad district was conducted by the state maritime regulator, Gujarat Maritime Board (GMB) in which Adani Group, Essar Group, JM Baxi Group and the Dubai based logistic firm DP World participated. Reacting on the meeting, Umargam Taluka Kinara Bachao Samiti (UTKBS), a platform form to oppose the proposed port by the local residents of the area has submitted a memorandum to Gujarat government and suggested to develop picturesque

Nargol beach as tourist destination and drop the port project. Convener of the UTKBS, Shailesh Hodivala said that if the port would come up at Nargol, thousands of fishermen would be impacted adversely. According to Hodivala, the Nargol Gram Panchayat had passed a resolution against the Greenfield port project in gram sabha (village convention). In the memorandum UTKBS requested the Chief Minister to review the port project plan in wake of the resolution passed by the Nargol village panchayat. Nearly 30,000 people are getting employment in fishing activities in and around Nargol area and their annual turnover is over Rs 450 crore, says the memorandum adding, "If the project would come up at Nargol, the entire ecosystem would get disturbed due to pollution which would impact fishing activities

adversely. The port would generate hardly hundreds of new jobs, but at the same time thousands of fishermen will lose their livelihood." UTKBS further said in the memorandum that the scenic coastal area of Nargol region with sandy beaches can be projected and developed as a tourist destination. Through tourism activities, thousands of new jobs would be created for the locals, it said. Instead of spending thousands of crore rupees to develop the port, the state government should develop fishing infrastructure by investing just a few crores of rupees to increase income of local people, opined UTKBS in the memorandum. Interestingly, the Gujarat government had announced plans to develop Nargol port in the year 1999. Since then, nothing concrete has happened on ground zero yet.

We Make A World of Your Dreams!

Kamdhenul Ltd, always leaving the trails of success behind, eyes the world of your dreams. Thus, the pioneering TMT bar manufacturers in the country are future-ready to build a stronger & better world with the nerves of steel.

पुरुष हॉकी टीम के खिलाड़ी - कांस्य पदक

महिला हॉकी टीम के खिलाड़ी

संसद में भारतीय ओलंपिक खिलाड़ियों को दी गई बधाई

जनसत्ता ब्यूरो
नई दिल्ली, 9 अगस्त।

तोक्यो ओलंपिक में भाला फेंक स्पर्धा में स्वर्ण पदक जीतकर इतिहास रच देने वाले नीरज चोपड़ा सहित विभिन्न भारतीय ओलंपिक खिलाड़ियों को संसद के दोनों सदनों में सोमवार को बधाई दी गई। लोकसभा और राज्यसभा में जैसे ही आसन की ओर से ओलंपिक शब्द का उल्लेख किया गया, सदस्यों ने मेजें थपथपाना शुरू कर दी जिससे इस उपलब्धि को लेकर उनका उत्साह और प्रसन्नता साफ झलक रही थी। लोकसभा में अध्यक्ष ओम बिरला ने तोक्यो ओलंपिक में भाला फेंक श्रेणी में नीरज चोपड़ा के स्वर्ण पदक जीतने का उल्लेख किया। उन्होंने कहा कि इससे देश में उमंग का वातावरण है। उन्होंने कुश्ती में बजरंग पूनिया द्वारा कांस्य पदक जीतने का भी उल्लेख किया। बिरला ने अपनी और सदनों को भी ओलंपिक में उल्लेखनीय प्रदर्शन करने के लिए सभी भारतीय खिलाड़ियों को बधाई दी। राज्यसभा में सभापति एम वेंकैया नायडू ने कहा कि तोक्यो ओलंपिक में हमारी 120 वर्ष पुरानी यात्रा में एक सर्वोत्तम क्षण साबित हुआ।

तोक्यो अब अतीत, पेरिस से उम्मीद हर पहलू से नई शुरुआत करूंगी : लवलीना

नई दिल्ली, 9 अगस्त (भाषा)।

ओलंपिक पदार्पण पर पदक जीतना लवलीना बोरगोहेन के लिए सोने पे सुहागा जैसा रहा लेकिन इस भारतीय मुक्केबाज ने कहा कि तोक्यो ओलंपिक अब अतीत की बात है। वह पेरिस में 2024 में होने वाले खेलों के लिए अपने खेल के हर पहलू में नए सिरे से शुरुआत करेगी। लवलीना ने तोक्यो में महिलाओं के 69 किग्रा भार वर्ग में कांस्य पदक जीता। यह 23 वर्षीय खिलाड़ी ओलंपिक में पदक जीतने वाली तीसरी भारतीय मुक्केबाज है। उनसे पहले विजेंद्र सिंह (2008) और एमसी मैरीकॉम ने यह उपलब्धि हासिल की थी। लवलीना ने अपना अभियान समाप्त करने के बाद ही अपने बलिदानों पर बात करने की सौगंध खाई थी और उन्होंने ऐसा किया भी। उन्होंने कहा कि मेरा पहला बलिदान पिछले आठ वर्षों से घर से दूर रहना और मुश्किल परिस्थितियों में परिवार वालों का साथ नहीं दे पाना था। यह सबसे बड़ा बलिदान था। मैंने व्यक्तिगत तौर पर अपनी कुछ इच्छाओं को मारा जैसे वह भोजन नहीं कर पाना जैसा कि मेरी उम्र के लोग पसंद करते हैं। मैंने खेल पर ध्यान देने के लिए अवकाश नहीं लिया

और ऐसा लगातार आठ साल तक चला। उन्होंने अब छुट्टियां मनाने की योजना बनाई है और इसके बाद पेरिस ओलंपिक की तैयारियों में जुटना चाहती हैं जिनका आयोजन तीन साल बाद होना है। उन्होंने कहा कि तोक्यो ओलंपिक अब अतीत की बात है। मुझे केवल एक नहीं अपने खेल के हर पहलू पर नए सिरे से शुरुआत करनी होगी। उनके बदलावों में अपने घुंसों को अतिरिक्त मजबूती प्रदान करना भी शामिल होगा क्योंकि तुर्की की ओलंपिक चैंपियन बुसेनाज सुरमनली के खिलाफ सेमी फाइनल में हार के दौरान लवलीना का यह कमजोर पक्ष नजर आ रहा था। उन्होंने कहा कि ऐसा नहीं है कि ताकत और अनुकूलन पर काम नहीं किया गया। इस पर काम हो रहा था। आप यह कह सकते हैं कि वह उस स्तर पर नहीं था जिस पर आदर्श

तौर पर इसे होना चाहिए था। मैंने अपनी ताकत और अनुकूलन पर केवल पिछले चार महीनों में ही काम किया। मुझे इसका लाभ मिला लेकिन ओलंपिक जैसी प्रतियोगिता के लिए चार महीने पर्याप्त नहीं होते हैं। उससे कुछ नहीं होता आपको चार साल के चक्र में इस तरह का काम करना होता है। उन्होंने पिछले कुछ सालों से अपनी भावनाएं दबा रखी थीं जो पदक पक्का होने के बाद खुलकर सामने आईं। लवलीना ने कहा कि कई सालों तक मेरी भावनाएं अंदर ही दबी रहीं। लेकिन इस ओलंपिक में जब हर बार रिंग पर उतरने पर मुझे देशवासियों के समर्थन का अहसास हुआ तो तब मेरी भावनाएं बाहर निकलकर आ गईं। ओलंपिक में लवलीना के लिए

सबसे यादगार पल क्वार्टर फाइनल में पूर्व विश्व चैंपियन नीन चिन चैन को हराना रहा। उन्होंने कहा कि सबसे यादगार पल मैं आखिर में उस मुक्केबाज को हराने में सफल रही जिसने यहां आने से पहले मुझे चार बार हरया था। उसे ओलंपिक में हराना मेरे करियर का विशेष क्षण था। दूसरा यादगार पल कतर और इटली के बीच ऊंची कूद का स्वर्ण पदक साझा किया जाना रहा। इससे पता चलता है कि मानवता जिंदा है और खेल एकमात्र जरिया है जो दो देशों, दो इंसानों को इस तरह से जोड़ सकता है। इटली के गियानमाको ताम्बेरी और कतर के मुताज बारशिम ने पुरुषों की ऊंची कूद में समान 2.37 मीटर की ऊंचाई नापी थी। वह बारशिम थे जिन्होंने अपने अच्छे मित्र ताम्बेरी के साथ खिलाता साझा करने की पेशकश की थी। ऊंची कूद में दोनों खिलाड़ियों के सहमत होने पर पदक साझा करने का प्रावधान है लेकिन पिछले 100 वर्षों से अधिक समय में ऐसा पहली बार हुआ। लवलीना ने कहा कि कोई कितना भी मतभेद पैदा करने की कोशिश करे, खेल सभी को साथ ला सकते हैं। मैंने उसको देखकर यह सीख ली।

पदक वीर : तोक्यो ओलंपिक में इतिहास रचकर देश लौटे सूरमा

खबर कोना

संसद में भारतीय ओलंपिक खिलाड़ियों को दी गई बधाई

जनसत्ता ब्यूरो
नई दिल्ली, 9 अगस्त।

तोक्यो ओलंपिक में भाला फेंक स्पर्धा में स्वर्ण पदक जीतकर इतिहास रच देने वाले नीरज चोपड़ा सहित विभिन्न भारतीय ओलंपिक खिलाड़ियों को संसद के दोनों सदनों में सोमवार को बधाई दी गई। लोकसभा और राज्यसभा में जैसे ही आसन की ओर से ओलंपिक शब्द का उल्लेख किया गया, सदस्यों ने मेजों थपथपाना शुरू कर दी जिससे इस उपलब्धि को लेकर उनका उत्साह और प्रसन्नता साफ झलक रही थी।

लोकसभा में अध्यक्ष ओम बिरला ने तोक्यो ओलंपिक में भाला फेंक स्पर्धा में नीरज चोपड़ा के स्वर्ण पदक जीतने का उल्लेख किया। उन्होंने कहा कि इससे देश में उमंग का वातावरण है। उन्होंने कुश्ती में बजरंग पूनिया द्वारा कांस्य पदक जीतने का भी उल्लेख किया। बिरला ने अपनी और सदनों की ओर से ओलंपिक में उल्लेखनीय प्रदर्शन करने के लिए सभी भारतीय खिलाड़ियों को बधाई दी। राज्यसभा में सभापति एम वैकेया नायडू ने कहा कि तोक्यो ओलंपिक में हमारी 120 वर्ष पुरानी यात्रा में एक सर्वोत्तम क्षण साबित हुआ।

पूर्व अंतरराष्ट्रीय हॉकी खिलाड़ी गोपाल भंगरा का निधन

रांची, 9 अगस्त (भाषा)।

पूर्व अंतरराष्ट्रीय हॉकी खिलाड़ी गोपाल भंगरा का लंबी बीमारी के बाद सोमवार को यहां निधन हो गया। भंगरा ने 1978 में अर्जेंटीना में हुए विश्व कप में भारत का प्रतिनिधित्व किया था। झारखंड के मुख्यमंत्री हेमंत सोरेन ने भंगरा के निधन पर शोक जताते हुए कहा, 'पूर्व हॉकी खिलाड़ी गोपाल भंगरा के निधन की दुखद खबर मिली। भंगरा ने हमेशा देश का सिर ऊंचा रखा, फिर चाहे वह देश की सीमा हो या हॉकी का मैदान।'

नीरज चोपड़ा - स्वर्ण पदक विजेता

रवि दहिया - रजत पदक विजेता

बजरंग पूनिया - कांस्य पदक विजेता

पुरुष हॉकी टीम के खिलाड़ी - कांस्य पदक

महिला हॉकी टीम की खिलाड़ी

भाला फेंकने के बाद मुझे पता था मैंने कुछ विशेष कर दिया : नीरज

नई दिल्ली, 9 अगस्त (भाषा)।

ओलंपिक स्वर्ण पदक विजेता नीरज चोपड़ा ने सोमवार को खुलासा किया कि तोक्यो खेलों में इतिहास रचने वाले प्रदर्शन के बाद उनका शरीर दुख रहा था। उन्होंने कहा कि जो एतिहासिक नतीजा हासिल किया उसे देखते हुए यह दर्द सहन करने में कोई समस्या नहीं थी। चोपड़ा ने कहा कि मुझे पता था कि मैंने कुछ विशेष कर दिया है, असल में मैंने सोचा कि मैंने अपना निजी सर्वश्रेष्ठ प्रदर्शन किया है। मेरी श्रो काफी अच्छी गई थी। चोपड़ा का निजी सर्वश्रेष्ठ प्रदर्शन 88.07 मीटर है जो उन्होंने इसी साल हासिल किया था।

उन्होंने कहा कि अगले दिन मेरे शरीर ने महसूस किया कि वह प्रदर्शन इतना विशेष था, शरीर दुख रहा था लेकिन यह दर्द सहन करने में कोई समस्या नहीं थी। यह पदक पूरे देश के लिए है। सेना के 23 साल के इस खिलाड़ी ने कहा कि देश के खिलाड़ियों के लिए उनका एकमात्र संदेश यह है कि कभी भी डरो नहीं। उन्होंने कहा कि मैं सिर्फ इतना कहना चाहता हूँ, विरोधी चाहे कोई भी हो, अपना सर्वश्रेष्ठ

सरकार ने भव्य समारोह में किया सम्मानित

भारत के ओलंपिक पदक विजेताओं का सोमवार को सम्मान समारोह में सरकार द्वारा भव्य तरीके से स्वागत किया गया। इसमें खेल मंत्री अनुराग ठाकुर ने कहा कि इन खिलाड़ियों की यात्रा 'खेल उत्कृष्टता और जज्बे की अविश्वसनीय कहानी' रही है। सम्मान समारोह में खेल मंत्री ने नीरज को स्मृति चिन्ह और शॉल भेंट की। कांस्य विजेता पुरुष हॉकी टीम और चौथे स्थान पर रही महिला टीम दोनों ने होटल पहुंचने के बाद कैंक काटकर जश्न मनाया। समारोह में उपस्थित लोगों में केंद्रीय कानून एवं न्याय मंत्री किरन रिज्जु, खेल राज्य मंत्री निसिथ प्रमाणिक, सचिव (खेल) रवि भित्तल और भारतीय खेल प्राधिकरण के महानिदेशक संदीप प्रधान भी शामिल थे।

दो। आपको बस यही करने की जरूरत है और इस स्वर्ण पदक के यही मायने हैं। कभी विरोधी से मत डरो। चोपड़ा ओलंपिक में स्वर्ण पदक

यह बहुत अच्छा लगता है, मैं सरकार, भारतीय खेल प्राधिकरण (साई) और भारतीय ओलंपिक संघ (आइओए) को हमारे एकांतवास के दौरान मदद करने के लिए धन्यवाद देना चाहता हूँ। उन्होंने हमें पूरा सहयोग दिया। - मनप्रीत सिंह, हॉकी टीम के कप्तान

तोक्यो 2020 में भारत के लिए कई ऐसी चीजें हुईं जो ओलंपिक में पहली बार हुईं। ओलंपिक में 'टीम इंडिया' की सफलता इस बात को दर्शाती है कि कैसे नया भारत दुनिया पर हावी होने की इच्छा और आकांक्षा रखता है, यहां तक कि खेल में भी। - अनुराग ठाकुर, खेल मंत्री

जीतने वाले 13 साल में पहले भारतीय खिलाड़ी के अलावा ट्रैक एवं फील्ड में स्वर्ण जीतने वाले पहले भारतीय भी बने।

हर पहलू से नई शुरुआत करूंगी : लवलीना

नई दिल्ली, 9 अगस्त (भाषा)।

ओलंपिक पदार्पण पर पदक जीतना लवलीना बोरगोहेन के लिए सोने पे सुहागा जैसा रहा लेकिन इस भारतीय मुक्केबाज ने कहा कि तोक्यो ओलंपिक अब अतीत की बात है। वह पेरिस में 2024 में होने वाले खेलों के लिए अपने खेल के हर पहलू में नए सिरे से शुरुआत करेंगी। लवलीना ने तोक्यो में महिलाओं के 69 किग्रा भार वर्ग में कांस्य पदक जीता।

यह 23 वर्षीय खिलाड़ी ओलंपिक में पदक जीतने वाली तीसरी भारतीय मुक्केबाज है। उनसे पहले विजेन्द्र सिंह (2008) और एमसी मैरीकॉम ने यह उपलब्धि हासिल की थी। लवलीना ने अपना अभियान समाप्त करने के बाद ही अपने बलिदानों पर बात करने की सौगंध खाई थी और उन्होंने ऐसा किया भी। उन्होंने कहा कि मेरा पहला बलिदान पिछले आठ वर्षों से घर से दूर

रहना और मुश्किल परिस्थितियों में परिवार वालों का साथ नहीं दे पाना था। यह सबसे बड़ा बलिदान था। मैंने व्यक्तिगत तौर पर अपनी कुछ इच्छाओं को मारा जैसे वह भोजन नहीं कर पाना जैसा कि मेरी उम्र के लोग पसंद करते हैं। मैंने खेल पर ध्यान देने के लिए अवकाश नहीं लिया और ऐसा लगातार आठ साल तक चला।

उन्होंने अब छुट्टियां मनाने की योजना बनाई है और इसके बाद पेरिस ओलंपिक की तैयारियों में जुटना चाहती हैं जिनका आयोजन तीन साल बाद होना है। उन्होंने कहा कि तोक्यो ओलंपिक अब अतीत की बात है। मुझे केवल एक नहीं अपने खेल के हर पहलू पर नए सिरे से शुरुआत करनी होगी। उनके बदलावों में अपने चूंसों को अतिरिक्त मजबूती प्रदान करना भी शामिल होगा क्योंकि तुर्की की ओलंपिक चैंपियन बुसेनाज सुरमेन्ली के खिलाफ सेमी फाइनल में हार के दौरान लवलीना का यह कमजोर पक्ष नजर आ रहा था।

We Make A World of Your Dreams!

KAMDHENU GROUP

Kamdhen Ltd, always leaving the trails of success behind, eyes the world of your dreams. Thus, the pioneering TMT bar manufacturers in the country are future-ready to build a stronger & better world with the nerves of steel.

खबर कोना

रूस की चौथी वरीयता प्राप्त दारिया कारस्ताकिना को हराकर सिलिकॉन वैली क्लासिक टेनिस टूर्नामेंट का खिताब जीतने के बाद अमेरिका की डेनियल कोलिंस।

कोलिंस को सिलिकॉन वैली क्लासिक का खिताब

सैन जोस, 9 अगस्त (एपी)।

अमेरिका की डेनियल कोलिंस ने रविवार को रूस की चौथी वरीयता प्राप्त दारिया कारस्ताकिना को हराकर सिलिकॉन वैली क्लासिक टेनिस टूर्नामेंट का खिताब जीता। सातवीं वरीयता प्राप्त कोलिंस ने अपनी अच्छी फॉर्म जारी रखते हुए कारस्ताकिना को 6-3, 6-7 (10), 6-1 से हराया। उन्होंने 25 जुलाई को ही पालेर्मो में भी खिताब जीता था। कोलिंस ने कहा, 'मैंने बहुत अच्छी शुरुआत की थी और मैंने अच्छी टेनिस खेली। मुझे नहीं लगता कि दारिया पहले सेट में अपना सर्वश्रेष्ठ टेनिस खेल रही थीं। दूसरे सेट में उसने वास्तव में अपने खेल में सुधार किया और 5-3 से आगे हो गई थी जिसके बाद मैंने इसे टाईब्रेक तक ले गई।' युगल में दारिया जुराक और आंद्रिया कलेपाक ने गैब्रियला डाब्रोवस्की और लुइसा स्ट्रेफनी से खिताब जीता।

पुरुष हॉकी टीम के खिलाड़ी - कांस्य पदक

महिला हॉकी टीम के खिलाड़ी

संसद में भारतीय ओलंपिक खिलाड़ियों को दी गई बधाई

जनसत्ता ब्यूरो
नई दिल्ली, 9 अगस्त।

टोक्यो ओलंपिक में भाला फेंक स्पर्धा में स्वर्ण पदक जीतकर इतिहास रच देने वाले नीरज चोपड़ा सहित विभिन्न भारतीय ओलंपिक खिलाड़ियों को संसद के दोनों सदनों में सोमवार को बधाई दी गई। लोकसभा और राज्यसभा में जैसे ही आसन की ओर से ओलंपिक शब्द का उल्लेख किया गया, सदस्यों ने मेजें थपथपाया शुरू कर दी जिससे इस उपलब्धि को लेकर उनका उत्साह और प्रसन्नता साफ झलक रही थी।

लोकसभा में अध्यक्ष ओम बिरला ने टोक्यो ओलंपिक में भाला फेंक श्रेणी में नीरज चोपड़ा के स्वर्ण पदक जीतने का उल्लेख किया। उन्होंने कहा कि इससे देश में उमंग का वातावरण है। उन्होंने कुशती में बजरंग पूनिया द्वारा कांस्य पदक जीतने का भी उल्लेख किया। बिरला ने अपनी और सदनों की ओर से ओलंपिक में उल्लेखनीय प्रदर्शन करने के लिए सभी भारतीय खिलाड़ियों को बधाई दी।

राज्यसभा में सभापति एम वेंकैया नायडू ने कहा कि टोक्यो ओलंपिक में हमारी 120 वर्ष पुरानी यात्रा में एक सर्वोत्तम क्षण साबित हुआ।

नई दिल्ली, 9 अगस्त (भाषा)।

ओलंपिक पदार्पण पर पदक जीतना लवलीना बोरगोहेन के लिए सोने पे सुहागा जैसा रहा लेकिन इस भारतीय मुक्केबाज ने कहा कि टोक्यो ओलंपिक अब अतीत की बात है। वह पेरिस में 2024 में होने वाले खेलों के लिए अपने खेल के हर पहलू में नए सिरे से शुरुआत करेंगी। लवलीना ने टोक्यो में महिलाओं के 69 किग्रा भार वर्ग में कांस्य पदक जीता।

यह 23 वर्षीय खिलाड़ी ओलंपिक में पदक जीतने वाली तीसरी भारतीय मुक्केबाज है। उनसे पहले विजेंदर सिंह (2008) और एमसी मैरीकॉम ने यह उपलब्धि हासिल की थी। लवलीना ने अपना अभियान समाप्त करने के बाद ही अपने बलिदानों पर बात करने की सौभाग्यवर्ती थी और उन्होंने ऐसा किया भी। उन्होंने कहा कि मेरा पहला बलिदान पिछले आठ वर्षों से पर से दूर रहना और मुश्किल परिस्थितियों में परिवार वालों का साथ नहीं दे पाना था। यह सबसे बड़ा बलिदान था। मैंने व्यक्तिगत तौर पर अपनी कुछ इच्छाओं को मारा जैसे वह भोजन नहीं कर पाना जैसा कि मेरी उम्र के लोग पसंद करते हैं। मैंने खेल पर ध्यान देने के लिए अवकाश नहीं लिया

और ऐसा लगातार आठ साल तक चला। उन्होंने अब छुट्टियां मनाने की योजना बनाई है और इसके बाद पेरिस ओलंपिक की तैयारियों में जुटना चाहती हैं जिनका आयोजन तीन साल बाद होना है। उन्होंने कहा कि टोक्यो ओलंपिक अब अतीत की बात है। मुझे केवल एक नहीं अपने खेल के हर पहलू पर नए सिरे से शुरुआत करनी होगी। उनके बदलावों में अपने घुंसों को अतिरिक्त मजबूती प्रदान करना भी शामिल होगा क्योंकि तुर्की की ओलंपिक चैंपियन बुरसेनाज सुरमेनेली के खिलाफ सेमी फाइनल में हार के दौरान लवलीना का यह कमजोर पक्ष नजर आ रहा था।

उन्होंने कहा कि ऐसा नहीं है कि ताकत और अनुकूलन पर काम नहीं किया गया। इस पर काम हो रहा था। आप यह कह सकते हैं कि वह उस स्तर पर नहीं था जिस पर आदर्श

टोक्यो अब अतीत, पेरिस से उम्मीद

हर पहलू से नई शुरुआत करूंगी : लवलीना

तौर पर इसे होना चाहिए था। मैंने अपनी ताकत और अनुकूलन पर केवल पिछले चार महीनों में ही काम किया। मुझे इसका लाभ मिला लेकिन ओलंपिक जैसी प्रतियोगिता के लिए चार महीने पर्याप्त नहीं होते हैं। उससे कुछ नहीं होता आपको चार साल के चक्र में इस तरह का काम करना होता है।

उन्होंने पिछले कुछ सालों से अपनी भावनाएं दबा रखी थीं जो पदक पक्का होने के बाद खुलकर सामने आईं। लवलीना ने कहा कि कई सालों तक मेरी भावनाएं अंदर ही दबी रहीं। लेकिन इस ओलंपिक में जब हर बार रिंग पर उतरने पर मुझे देशवासियों के समर्थन का अहसास हुआ तो तब मेरी भावनाएं बाहर निकलकर आ गईं। ओलंपिक में लवलीना के लिए

सबसे यादगार पल क्वार्टर फाइनल में पूर्व विश्व चैंपियन नीन चिन चिन को हराना रहा।

उन्होंने कहा कि सबसे यादगार पल में अखिर में उस मुक्केबाज को हराने में सफल रही जिसने यहां आने से पहले मुझे चार बार हराया था। उसे ओलंपिक में हराना मेरे करियर का विशेष क्षण था। दूसरा यादगार पल कतर और इटली के बीच ऊंची कूद का स्वर्ण पदक साझा किया जाना रहा। इससे पता चलता है कि मानवता जिंदा है और खेल एकमात्र जरिया है जो दो देशों, दो इंसानों को इस तरह से जोड़ सकता है। इटली के गियानामार्को ताम्बेरी और कतर के मुताज बारशिम ने पुरुषों की ऊंची कूद में समान 2.37 मीटर की ऊंचाई नापी थी। वह बारशिम थे जिन्होंने अपने अच्छे मित्र ताम्बेरी के साथ खिताब साझा करने की पेशकश की थी।

ऊंची कूद में दोनों खिलाड़ियों के सहमत होने पर पदक साझा करने का प्रावधान है लेकिन पिछले 100 वर्षों से अधिक समय में ऐसा पहली बार हुआ। लवलीना ने कहा कि कोई कितना भी मतभेद पैदा करने की कोशिश करे, खेल सभी को साथ ला सकते हैं। मैंने उसको देखकर यह सीख ली।
